To Whom It May Concern,

Ramboll Environ US Corporation (Ramboll Environ) is pleased to submit this report to Aerospace Center LLC, a California limited liability company; Rabin Family LLC, a California limited liability company; Ronnie Dalesandro and Susan Hymers, not individually but as Trustees of The Rabin Trust; John D. Winters and Sherry Winters, not individually but as Trustees of the Elaine Winters Survivors Trust; and, John D. Winters and Sherry Winters, not individually but as Executors of the Estate of Elaine Winters to present the findings of a Phase II subsurface investigation conducted recently at the property located at 700 N. Sepulveda Boulevard, El Segundo, California (the "site:" see Figure 1). The Phase II subsurface investigation was performed in accordance with the proposal provided to Liner LLP on February 4, 2016.

BACKGROUND

Based solely on information provided in a Phase I environmental site assessment (ESA) performed by Partner Engineering and Science, Inc. (Partner) in September 2015 (Phase I Environmental Site Assessment Report, Boeing Building II, 700 N. Sepulveda Boulevard, El Segundo, California, dated September 18, 2015 [the "2015 Phase I Report"]), the approximately 1.99 acre site was undeveloped until approximately 1927. Between approximately 1927 and 1938, the site was used as agricultural land. In approximately 1957, the current building was constructed on the site. According to the 2015 Phase I Report, tenants at the site have included Pharmaceutical Co. (1958), The Rabin Company/Pharmapak Drug Company (1960), Rabin Winters Corporation (1962-1967), Rabin Winters Division of Brunswig Drug/Bergan Brunswick (1966-1974), BBC Laboratories (1971), Norton Products/Tannehill Pharmaceuticals (1971), Devlin Pharmaceuticals (1974-1981), Hughes Aircraft Company (1982-1999), and The Boeing Company (2008 - present).

Between 1958 and 1985, eight 1,000 gallon USTs of concrete construction were present on the site and used for the storage of gasoline, sulfides, organic acids, copper, zinc, mineral oils, alcohols, and solvents. In 1985, the tanks were filled in place but were subsequently removed from the site in 1990, reportedly without regulatory closure. In addition, between 1966 and 1985 a concrete clarifier was in use at the site. In 1985, the clarifier was abandoned under the regulatory oversight of the Los Angeles County Department of Public Works (DPW). The site received no further action (NFA) status for the clarifier in 1994. However, no

documentation regarding the closure of the clarifier, including whether any sampling was performed as part of closure activities, was provided for Partner's review. As a result, Partner characterized this issue as a recognized environmental condition (REC) in the 2015 Phase I Report.

In addition, no subsurface characterization activities are known to have been conducted in the vicinity of the former USTs or the concrete clarifier. As a result, and with the specific objective of evaluating the potential for the REC identified by Partner in its 2015 Phase I Report to have impacted the subsurface of the site, Ramboll Environ proposed to complete the scope of work presented in our proposal dated May 12, 2016 and as described below; based on the anticipated depth to groundwater in the site vicinity (on the order of approximately 100 feet), no groundwater sampling was performed as part of the Phase II subsurface investigation.

SCOPE OF WORK

The scope of work included (Task 1) pre-field activities and mobilization; (Task 2) soil and soil vapor sampling; (Task 3) laboratory testing; and (Task 4) data evaluation and reporting. Drilling and sampling activities were supervised by Ramboll Environ field personnel working under the supervision of a California Registered Professional Geologist.

PRE-FIELD ACTIVITIES AND MOBILIZATION

Prior to implementation of the subsurface investigation, a geophysical survey was performed at the site on March 5, 2016, by Spectrum Geophysics of Chatsworth, California in an effort to locate the former UST area and the clarifier. The geophysical survey was performed using a variety of equipment, including EM-61 high sensitivity metal detection, shallow focus terrain conductivity, ground penetrating radar, and electromagnetic utility-locating methods. According to the 2015 Phase I ESA Report, the exact locations of the former UST area and clarifier are not known; the tanks were described as being located "north of the building near receiving." The location of the clarifier is not known but may be located in proximity to the former UST area (information contained in an appendix to the 2015 Phase I Report contains a hand drawn map with a feature labelled as a "large stationary cylindrical tank;" this feature is located to the immediate west of the former UST area and could possibly be the clarifier). As a result, the focus of the geophysical survey was an approximately 11,500 square foot area to the north of the building marked "USTs" on Figure 2 in the 2015 Phase I Report (and shown on Figure 1 in this report). The results of the geophysical survey indicated an anomaly within the survey area that was interpreted by Spectrum Geophysics to be the "most likely" location of the former USTs; the anomaly was observed in the general area marked "USTs" on Figure 2 in the 2015 Phase I Report. Furthermore, this anomaly approximately coincided with a patched area observed on the asphalt surface. No feature indicative of the former concrete clarifier was identified in the surveyed area. The geophysical survey report provided by Spectrum Geophysics is included in Attachment A.

In addition to the area that was cleared for the presence of underground pipes/utilities by Spectrum Geophysics' geophysical survey, Ramboll Environ contacted Underground Services Alert (DigAlert) to mark the locations of all major utilities at the site boundaries.

Prior to initiating drilling activities, Ramboll Environ prepared a site-specific Health and Safety Plan (HASP). The HASP was designed to minimize exposure of Ramboll Environ's field personnel to potentially hazardous materials. All field personnel were required to implement the procedures presented in the HASP while performing field work. As part of this task, Ramboll Environ also contracted with the appropriate subcontractors for the planned fieldwork.

SOIL VAPOR SURVEY AND SOIL SAMPLING

On March 19, 2016, under Ramboll Environ's oversight, BC2 Environmental of Orange, California, advanced 6 soil borings (SB-1 through SB-6) in the area identified as an anomaly during the geophysical survey (see Figure 1). Because the location of the concrete clarifier could not be identified, the soil borings planned for that area (SB-7 and SB-8) were not drilled. At each soil boring location, the asphalt surface was penetrated using a direct push drilling rig, then the soil boring was hand augered to approximately 5 feet below ground surface (bgs) to confirm that no subsurface utilities or lines were present at that location. Once the top 5 feet was hand augered, each soil boring was then advanced to its total depth of approximately 15 feet bgs using a direct push drilling rig. The soil borings were logged in accordance with

the Unified Soil Classification System (USCS) and monitored using an organic vapor meter photoionization device (PID) equipped with a 10.6 electron volt lamp calibrated against an isobutylene standard.

In each soil boring, soil samples were collected at three depth intervals ("shallow," "middle," and "deep"). Soil samples were collected in an attempt to sample native soil and sample depths were adjusted based on soil composition changes from backfill material to native soil in the former USTs area. The depth interval for the shallow and middle sample in each soil boring varied from 7 to 11 feet and 10 to 13 feet bgs, respectively. The depth interval for the deep soil sample at each location was 15 feet bgs.

Soil samples for volatile organic compound (VOC) analyses were collected using Encore soil samplers and sample containers, while soil samples collected for all other analysis were collected in acetate sleeves with Teflon-lined plastic end caps or glass sampling jars with plastic lids. Soil samples were labelled, placed in plastic Ziploc bags for additional containment purposes, and then placed in an insulated cooler with ice for shipment to the laboratory under chain-of-custody protocols. Samples were delivered to TestAmerica Laboratories, Inc., of Irvine, California, for analytical testing. The two shallowest samples from each soil boring were laboratory analyzed, while the deeper samples were placed on hold at the laboratory, pending analytical results of the shallower samples. Soil samples were analyzed for total petroleum hydrocarbons (TPH) as gasoline-, diesel fuel-, and oil-range hydrocarbons (TPH-g, TPH-d, and TPH-o, respectively) in accordance with United States Environmental Protection Agency (USEPA) Method 8015 Modified; VOCs, in accordance with USEPA Method 8260B; and California Manual 17 Metals by (USEPA) Methods 6010B/7471A.

Soil borings were converted to temporary soil vapor probes at depths of approximately 10.5 ft bgs in SB-1 through SB-3, SB-5, and SB-6, and 12 ft bgs in SB-4 (the vapor probe was installed at 12 ft bgs in SB-4 to place it in native soil). The soil vapor probes were installed and sampled in general accordance with the guidelines established by the California Environmental Protection Agency (Cal/EPA), the Department of Toxic Substances Control, the Los Angeles Regional Water Quality Control Board, and the San Francisco Bay Regional Water Quality Control Board in "*Advisory Active Soil Gas Investigations*", dated July 2015 (the advisory). The soil vapor probes were constructed with a temporary airstone filter and 1/4 inch tubing equipped with a valve at its termination. The probe tip was set with a minimum of 6 inches of sand on each side, or one foot total depth, and a minimum of 6 inches of dry bentonite was placed below and above this sand pack.

Following an equilibration period of at least 120 minutes (in accordance with the advisory), each soil vapor probe was sampled. Soil vapor samples were collected in vapor-tight glass syringes and analyzed in an onsite mobile laboratory operated by H&P Mobile Geochemistry of Carlsbad, California. In addition to the 6 primary soil vapor samples, a duplicate sample was collected from probe SV-1-10.5 and a material blank sample was collected from a soil vapor probe and associated tubing assembled and installed by BC2 Environmental. Each soil vapor sample was analyzed for the full suite of VOCs in accordance with USEPA Method 8260B.

In accordance with the advisory, each soil vapor probe was purged three purge volumes before sampling. Additionally before sampling, a shut-in test and a leak test (utilizing the compound 1,1-difluoroethane) were performed in accordance with advisory guidelines to confirm that no leaks existed in the above ground sampling equipment and that ambient air had not been allowed into the soil vapor sample. The analysis of soil vapor samples and the material blank did not indicate the presence of 1,1-difluroethane at concentrations above laboratory reporting limits, indicating that these samples are considered to be representative of the soil vapor at each respective location and depth.

Prior to collection of samples and between successive sampling attempts, sampling equipment was decontaminated to minimize the potential for cross-contamination. After the collection of soil vapor samples, the tubing was removed from each sampling location, the boreholes sealed with hydrated bentonite, and patched to match the surrounding asphalt surface.

Soil cuttings and decontamination water generated during subsurface investigation activities were placed in a 55-gallon Department of Transportation (DOT)-rated drum and stored on site pending offsite disposal.

Results of Sampling

The lithology at the site consisted of dark reddish brown sand extending from the surface to approximately 8 to 12 ft bgs, and transitioned to red sand to the total depth drilled (approximately 15 ft bgs). The transition from dark reddish brown to red sand was considered the contact between backfill material and native soil. In SB-4 and SB-5, pieces of concrete or asphalt-like materials were encountered within the upper approximately 12 feet while drilling, possibly indicating that those materials made up some of the backfill material used when the USTs were removed and the area backfilled.

Analytical results for soil vapor samples are summarized in Table 1 and analytical results for soil samples are summarized in Tables 2a and 2b; laboratory analytical reports are included in Attachment B (soil vapor samples) and Attachment C (soil samples).

Soil Vapor

The following analytes were detected at concentrations above the respective laboratory reporting limits: benzene; carbon tetrachloride; chloroform; 1,1-dichloroethene, dichlorodi-fluoromethane (F12); ethylbenzene; m,p-xylene; o-xylene; naphthalene, tetrachloroethene, toluene; trichloroethene; 1,1,2-trichloro-trifluoroethane (F113), and trichlorofluoromethane (F11).

Soil

The following analytes were detected at concentrations above the laboratory reporting limits: TPH-d and TPH-o, arsenic, barium, beryllium, chromium, cobalt, copper, lead, mercury, nickel, vanadium, and zinc.

SOIL VAPOR AND SOIL SCREENING LEVELS

In evaluating the soil vapor data, Ramboll Environ considered risk-based soil vapor screening levels for residential land use, based on the USEPA Regional Screening Levels (RSLs)(USEPA 2015) and/or Department of Toxic Substances Control (DTSC)-modified screening levels (SLs). The development of the screening levels is described below.

The DTSC-modified RSLs or USEPA RSLs are concentrations of chemicals in residential air that the Cal/EPA and/or USEPA consider to be below thresholds of concern for risks to human health over a lifetime. The thresholds of concern used to develop the RSLs are an excess lifetime cancer risk of one-in-a-million (10^{-6}) and a hazard quotient (HQ) of 1.0 for noncancer health effects. The NCP (40 Code of Federal Regulations [CFR] § 300) is commonly cited as the basis for target risk and hazard levels. According to the NCP, lifetime incremental cancer risks posed by a site should not exceed one in a million (1×10^{-6}) to one hundred in a million (1×10^{-4}), and noncarcinogenic chemicals should not be present at levels expected to cause adverse health effects (i.e., HI greater than one). As a conservative measure, the RSLs are calculated to correspond to an estimated cancer risk of 1×10^{-6} (the low or conservative end of the target risk range) or a noncancer HQ of 1.0. The USEPA RSLs were used unless the DTSC-modified RSLs were more stringent. Under this approach, the DTSC-modified RSLs were used for benzene and PCE.

Soil screening levels were obtained from the USEPA RSL Summary Table (USEPA 2015), and the soil vapor screening levels were derived from the DTSC, Human and Ecological Risk Office Note 3 (Cal/EPA 2016), and/or the Regional Screening Level Summary Table (USEPA 2015). Both the soil vapor and soil screening levels are provided in Tables 1 (soil vapor) and 2a and 2b (soil), respectively.

DATA EVALUATION

Soil vapor results were compared to screening levels derived from Cal/EPA and/or USEPA in a future residential building land use scenario, as described above. None of the VOC compounds that were detected above laboratory reporting limits in the soil vapor samples exceeded their respective screening levels.

Soil sample results were compared to USEPA RSLs for soils in a residential land use scenario. As indicated above, the only compound detected in any of the soil samples that exceeded its respective USEPA RSL was arsenic. Arsenic was detected in four soil samples (SB-2-10, SB-3-10, SB-4-11, and SB-5-10) at concentrations ranging from 3.6 to 4.3 milligrams per kilogram (mg/kg). These concentrations exceed both the residential and commercial/industrial land use USEPA RSLs for arsenic of 0.68 and 3.0 mg/kg, respectively. Arsenic is a naturally occurring metal in soil and tends to be present in native California soils

at concentrations that exceed applicable regulatory thresholds. According to one source,[1] the average concentration of arsenic detected in California soils is 3.5 mg/kg (with a minimum detection of 0.6 mg/kg and a maximum detection of 11.0 mg/kg in the samples collected for this study); in a second source,[2] naturally-occurring arsenic was detected in California soils at concentrations ranging from 0.3 mg/kg to 69 mg/kg. A third study specific to Southern California soils,[3] and based on statistical analysis of a large data set from school sites in Los Angeles County, gave an upper-bound background arsenic concentration of 12 mg/kg. In addition, detected concentrations of arsenic are relatively consistent throughout the samples collected at the site. Therefore, it is Ramboll Environ's opinion that the arsenic detected in the soil at the site is naturally occurring.

CONCLUSIONS AND RECOMMENDATIONS

Based on the results of the sampling described above, it is Ramboll Environ's professional opinion that (a) the investigation that was conducted by Ramboll Environ was a reasonable and prudent investigation designed to assess the potential impacts from historic USTs and a clarifier at the site and should be deemed to be 'all appropriate inquiry' with respect to such potential impact; (b) the low concentrations of constituents detected in the soil vapor and soil sampling results in the area of the site investigated (i) were well below the residential screening levels, the most restrictive applicable screening levels; (ii) are consistent with a no further action status for the site; (iii) are not indicative of any release or condition which has adversely impacted the environmental integrity of the site, which would require additional investigation, monitoring, or remediation or reporting to any governmental agency; (c) are not indicative of conditions which would require special handling in connection with the redevelopment of the site; and (d) no further investigation, monitoring, or remediation is recommended or warranted.

1.0 INTRODUCTION

On March 5, 2016, Spectrum Geophysics conducted a geophysical investigation at a commercial property located at 700 North Sepulveda Boulevard in El Segundo, California. The purpose of the investigation was to delineate the surface trace of detectable steel underground storage tanks (USTs), backfilled excavations or concrete clarifiers within the 190-foot by 95-foot survey area. The area of investigation, as designated by Patrick Holland-Stergar of Ramboll, was primarily asphalt covered though some areas of concrete were visible adjacent to the building.

The expected surficial geology in the upper 8 feet (maximum depth of geophysical investigation) of the survey area was Quaternary Eolian and Dune deposits consisting of wind-blown sands. There may also be artificial fill from previous construction. The water table is expected to be below the maximum depth of investigation, but moisture in the upper five feet of soil can contribute to signal attenuation in ground penetrating radar data. Based on information provided by the Client, the site was occupied by a Boeing facility in the past and had up to 8 USTs present.

Site interferences included a building, several stairwells, a loading dock, several metallic vault lids, bollards, trash bins, and a drain invert.

2.0 EQUIPMENT

The equipment used during this investigation consisted of a Geonics EM-61 high-sensitivity metal detector, a Sensors & Software "Noggin Smart Cart" ground penetrating radar, a shallow-focus metal detector (M-scope), and electromagnetic (EM) utility-locating equipment. An Allegro digital field computer was used to enter acquisition paramenters and store data during the EM-61 survey.

3.0 METHODS AND FIELD PROCEDURES

Prior to data collection, a 5-foot by 5-foot grid was created parallel and perpendicular to the building located at the northern boundary of the survey area. A survey chain with 5-foot markers was used to establish the survey lines and stations, and survey paint was used to mark the locations of each survey station on the ground. The survey was completed with no interference from vehicle traffic. It should be noted that no EM-61 or GPR data were collected outside of the blue dashed boundary labeled "Area of Subsurface Investigation" in Figure 1.

EM-61 data acquisition (archive photo)

3.1 EM-61 High Sensitivity Metal Detector

The EM-61 high-sensitivity metal detector was used in an effort to delineate areas where metallic objects (such as underground storage tanks and metal piping) may be buried. The EM-61 transmitter generates short pulses of a primary magnetic field that induces electromagnetic currents in nearby metallic objects. Between pulses, the two receiver coils measure the decay of these electromagnetic currents in millivolts (mV). The measured values are proportional to the metal content (ferrous and non-ferrous) of the nearby objects

Prior to data acquisition the EM-61 battery level was checked and found to be within an acceptible range for data collection. After the EM-61 had a few minutes to warm up, the unit was nulled in a location with more than four meters of separation between the coils and any known metallic objects. A cable-shake test was performed to assure the cables were in good working condition and the connectors were fastened properly. Finally a static test was run in which a series of EM-61 readings were taken with no metal followed by a series of readings with a ½-inch bolt on the ground in the center of the EM-61 coils. The EM-61 was found to be working as expected.

During this investigation EM-61 readings were collected at 2.5-foot intervals along parallel west-east lines spaced 5 feet apart within the area of investigation. These data were processed in the field and used to generate contour maps to assist in identifying anomalous areas that may be caused by buried utilities or features of interest.

Top and bottom coil data can be useful for identifying near-surface metallic objects; although, the top coil generally has a greater response than the bottom coil to deeply buried objects. The differential data (top coil data minus the bottom coil data) was used during this survey to distinguish deeper targets such as metallic USTs from shallow ones such as a vault lid or scrap metal. Utilization of the differential data allows for the suppression of near surface targets that might mask the response from deeper targets of interest.

3.2 Electromagnetic (EM) Utility Location

Passive and active EM utility-locating methods were used in an effort to identify possible sources of EM-61 anomalies and to identify buried objects having no surface expression.

Electromagnetic (EM) utility location (archive photo)

Passive locating is possible when electrically conductive conduits are energized by ambient radio frequencies (RF) that are often produced by 50/60 cycle electrical, radio, audio, television, and communication transmissions. A receiver tuned to these frequencies can be used to locate the re-radiated signal emitted by the conductor (i.e., conduit).

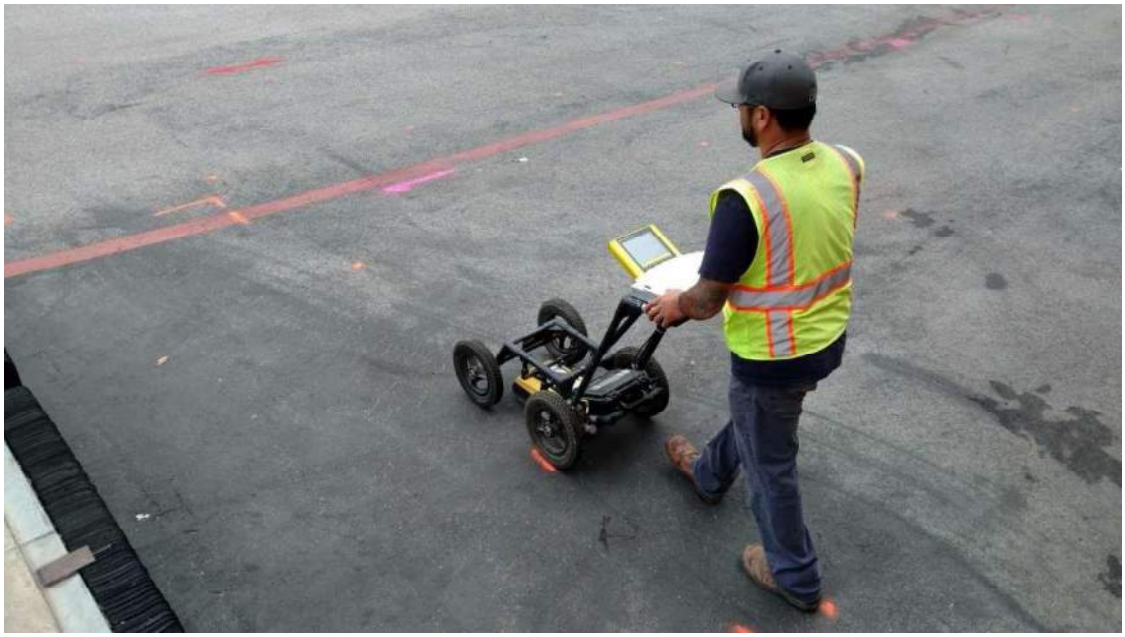
Active locating is initiated by conducting an EM signal at a known frequency (8 and 33 kHz for this site) on a conduit exposed at the surface. A receiver, tuned to these frequencies, is then used to locate the signal maxima (or surface trace) of the applied signal.

3.3 Ground Penetrating Radar

Ground penetrating radar (GPR) data were collected on east – west lines spaced 2.5 feet apart within the survey grid established by the geophysics crew. The purpose of the GPR survey was to locate anomalies from non-metallic sources like backfilled excavations or concrete clarifiers and better characterize EM-61 anomalies. During GPR data acquisition, an antenna containing both a transmitter and a receiver is pushed along the ground surface. The transmitter radiates short pulses of high-frequency (center frequency of 500-MHz)

electromagnetic energy into the ground. These electromagnetic waves propagate into the subsurface at a velocity that is dependent on the electrical properties of the material through which the waves travel. When the GPR waves encounter an interface of two materials having different electrical properties, a portion of the energy is reflected back to the surface and received at the antenna at a time (in nanoseconds) that is related to the depth of the reflecting interface, where later times generally represent greater depths of investigation. The contrast in velocity between the media either side of the interface can be quantified by a reflection coefficient at the media boundary, where a larger reflection coefficient (larger electrical contrast in materials) corresponds to a higher amplitude reflection.

The reflected signal is received at the antenna, transmitted to a control unit (the Smart Cart) and displayed on the computer screen as the data are being acquired. The data may be stored electronically, and subsequently processed with various software packages.



4.0 RESULTS

A map of the area of geophysical investigation is presented in Figure 1. A contour map of the EM-61 Differential Data is presented in Figure 2 and sample GPR profiles are displayed in Figure 3.

4.1 EM-61

The high-amplitude EM-61 anomalies on the north and south perimeter of the survey area are the result of surface metal like the building walls and bollards. There are two linear anomalies identified in the EM-61 data produced from metallic piping running east to west along 55N and a south to north trending railroad track centered from 162E to 1723E. These features were relocated with the utility locators or GPR and plotted on the site map. There are a few isolated EM-61 anomalies from surface metal like sewer clean-outs, a man-hole cover and electric vault cover.

4.2 GPR

Most of the shallow metallic objects such as underground piping and rail road tracks were relocated during the GPR survey. One GPR anomaly with no corresponding EM-61 anomaly was identified. Anomaly A is broad GPR anomaly located from 50E to 150E, between 77N and 88N. This GPR anomaly is characterized by relatively high-amplitude reflectors in the soil compared to the GPR signal in the surrounding soil. There is no corresponding EM-61 anomaly within the bounds of Anomaly A which indicates that the source of the high-amplitude GPR reflectors is not associated with buried metal, but rather a slight change in the electrical conductivity of the soil. A possible source of this GPR anomaly is backfill material which slightly amplifies the GPR signal relative to the adjacent soils.

5.0 LIMITATIONS

Reliable EM-61 data cannot be collected within 8 feet of surface metallic objects such as reinforced concrete pads, vault lids and/or manholes, buildings and parked vehicles. As a result, Spectrum cannot guarantee that a UST is not present beneath these features.

The penetration depth of the GPR signal was approximately 3 feet in the area investigated. As a consequence, some subsurface utilities may not have been detected, and USTs present at depths greater than 3 feet in the areas adjacent to surface metal may not have been detected due to the shallow penetration of the GPR. Because of this limitation, Spectrum cannot guarantee that all non-metallic conduits, such as sewers and PVC water lines, have been identified within the area of investigation. A discussion of the limitations of each method follows.

5.1 EM-61

The EM-61 is capable of detecting a 55-gallon drum up to a depth of 3 meters under favorable conditions. We recommended a minimum 10-foot buffer between the survey area and any metallic or metal bearing surface cultural features such as buildings, fences, parked vehicles

or aboveground piping which could severely compromise the quality of the data. Reliable EM-61 data cannot be collected over areas covered with reinforced concrete.

5.2 GPR

The performance capability of GPR is dependent on the electrical conductivity of the soil at the site. If the soil conductivity is high, attenuation of the radar signal in the soil can severely restrict the maximum penetration depth of the radar signal. Under favorable conditions depth of penetration can be greater than 10 feet; however, average depths of GPR penetration in the West and Southwest tend to range between 2-5 feet.

5.3 General

It should be understood that the detection of subsurface objects and utilities is dependent upon acquiring reliable measured values of magnetic fields or electro-magnetic waves with geophysical instruments above ground. These data may be interpreted as representative of subsurface objects due to the measured signal strength. These waves or fields, however, may be attenuated and/or distorted by a number of factors including soil moisture, corrosion, and proximity to other surface and subsurface facilities.

ATTACHMENT B
SOIL VAPOR SAMPLE ANALYTICAL REPORT

Mobile Geochemistry Inc.

23 March 2016

Ms. Rebekah Wale
Ramboll Environ
18100 Von Karman Ave, Suite 600
Irvine, CA 92612

H&P Project: RAM031916-L6
Client Project: 04-16856Q /700 N. Sepulveda Blvd

Dear Ms. Rebekah Wale:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 19-Mar-16 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody
- Sampling Logs (if applicable)

Unless otherwise noted, I certify that all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Janis Villarreal

Janis Villarreal
Laboratory Director

H&P Mobile Geochemistry, Inc. is certified under the California ELAP, the National Environmental Laboratory Accreditation Conference (NELAC) and the Department of Defense Accreditation Programs.

RPD	Relative Percent Difference

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP and the ISO 17025 programs, certification number L11-175.

H&P is approved by the State of Arizona as an Environmental Testing Laboratory and Mobile Laboratory, certification numbers AZM758 and AZ0779.

H&P is approved by the State of California as an Environmental Laboratory and Mobile Laboratory in conformance with the Environmental Laboratory Accreditation Program (ELAP) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste, certification numbers 2740, 2741, 2743, 2744, 2745, 2754 & 2930.

H&P is approved by the State of Florida Department of Health under the National Environmental Laboratory Accreditation Conference (NELAC) certification number E871100.

The complete list of stationary and mobile laboratory certifications along with the fields of testing (FOTs) and analyte lists are available at www.handpmg.com/about/certifications.

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Narrative

Job Narrative
440-142056-1

Comments
No additional comments.

Receipt
The samples were received on 3/19/2016 1:50 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.7º C.

Receipt Exceptions
Method(s) 8260B: All the EPA 5035A Terracore water-preserved vials for the following sample froze and cracked during storage: SB-2-10 (440-142056-5). The EPA prep 5030B test method had to be used for this sample.

GC/MS VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC VOA
Method(s) 8015B: Surrogate recovery for the following sample was outside control limits: (440-142363-A-3). Re-extraction and/or re-analysis was performed with concurring results. The original analysis has been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
Method(s) 3546 / 8015B: The following sample had smaller initial amount used due to the nature of the sample matrix: SB-6-11 (440-142056-14). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Job ID: 440-142062-1

Laboratory: TestAmerica Irvine

Narrative

Job Narrative
440-142062-1

Comments
No additional comments.

Receipt
The samples were received on 3/21/2016 9:05 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.6º C.

GC/MS VOA
Method(s) 8260B: The continuing calibration verification (CCV) associated with batch 440-319492 recovered above the upper control limit

Job ID: 440-142062-1 (Continued)

Laboratory: TestAmerica Irvine (Continued)

for Ethyl-t-butyl ether (ETBE). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following sample is impacted: SB-4-13 (440-142062-2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
Method(s) 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and/or precision of Antimony and Silver for preparation batch 440-319531 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep
Method(s) 3546 / 8015B: The following samples had smaller initial amounts used due to the nature of the sample matrix: SB-4-11 (440-142062-1) and SB-4-13 (440-142062-2). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Qualifiers

Metals

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.
F1	MS and/or MSD Recovery is outside acceptance limits.
F2	MS/MSD RPD exceeds control limits

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Mata, Patty

From: Patrick Holland-Stergar [PHollandstergar@ramboll.com]
Sent: Tuesday, March 22, 2016 4:25 PM
To: Mata, Patty
Subject: Samples taken off hold for 700 N. Sepulveda Blvd. Project, El Segundo

Hi Patty,

For the 700 N. Sepulveda, El Segundo, project, please take the second shallowest sample from each boring location off of hold and run for all analyses listed. Thus, please take SB-1-10; SB-2-10; SB-3-10; SB-4-13; SB-5-10; and SB-6-11 off of hold and run for all analyses listed.

Also, please do not charge us for the disposable plastic terracore samplers I received with the rest of the sampling supplies, I did not order these items and understand that they were included in my supplies deliver by mistake.

Thanks,

Patrick Holland-Stergar

Underground Storage Tank Program – Case Closure
Equinix Communications
1920 E. Maple Avenue, El Segundo
Case No. R-10916A; Global ID. T10000010173; Priority D-1

Dear Mr. Lopez:

This letter confirms the completion of a site investigation and corrective action for the recent underground piping replacement and upgrades associated with the existing underground storage tank(s) located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the underground piping replacement and upgrades are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground tank(s) site is in compliance with the requirements of subdivision (a) and (b) of section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (g) of section 25296.10 of the Health and Safety Code.

Claims for reimbursement of corrective action costs submitted to the Underground Storage Tank Cleanup Fund more than 365 days after the date of this letter or issuance or activation of the Fund's Letter of Commitment, whichever occurs later, will not be reimbursed unless one of the following exceptions applies:

- Claims are submitted pursuant to Section 25299.57, subdivision (k) (reopened UST case); or

- Submission within the timeframe was beyond the claimant's reasonable control, ongoing work is required for closure that will result in the submission of claims beyond that time period, or that under the circumstances of the case, it would be unreasonable or inequitable to impose the 365-day time period.

If you have any questions concerning this matter, please contact Mr. Joshua Cwikla at (213) 576-6713 or joshua.cwikla@waterboards.ca.gov

Sincerely,

Deborah J. Smith

UNDERGROUND STORAGE TANK PROGRAM: TRANSMITTAL OF CLOSURE LETTER

Equinix Communications
1920 E. Maple Avenue, El Segundo
Case No. R-10916A; Global ID. T10000010173; Priority D-1

Dear Mr. Lopez:

Attached please find the closure letter for the subject site. The current record fee title owners were notified of the proposed closure in accordance with Section 25296.20 of Chapter 6.7 of the Health and Safety Code. The California Regional Water Quality Control Board, Los Angeles Region (Los Angeles Regional Board) sent a public notification of the proposed case closure to all interested parties, which included a 60-day public comment period. No comments were received.

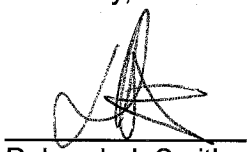
Based on the site specific information and data available in GeoTracker and the Los Angeles Regional Board's case file, we conclude that this case meets all the criteria of the State Water Resources Control Board's Low-Threat Underground Storage Tank Case Closure Policy and that a case closure determination is appropriate.

Site data indicate that there may be residual petroleum hydrocarbons in soil, groundwater, and/or vapor at this site that could pose an unacceptable risk as a result of future construction/redevelopment activities, such as on- or off-site excavations, the installation of water wells at or near the site, or change to a more sensitive land use from commercial use. Responsible parties, land owners, and contractors performing subsurface activities at the site should be prepared to encounter soil, groundwater, and/or vapor contaminated with petroleum hydrocarbons. Appropriate health and safety equipment and protocols should be used, and any encountered pollution should be managed properly to avoid threats to human health or the environment.

April 24, 2018

Please contact Mr. Daniel P. Pirotton at (213) 576-6714 or at daniel.pirotton@waterboards.ca.gov if you have any questions.

Sincerely,



Deborah J. Smith
Executive Officer

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.
Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 07/19/2019 has revealed that there are 4 SEMS-ARCHIVE sites within approximately 0.5 miles of the target property.

Federal RCRA CORRACTS facilities list

CORRACTS: CORRACTS is a list of handlers with RCRA Corrective Action Activity. This report shows which nationally-defined corrective action core events have occurred for every handler that has had corrective action activity.

A review of the CORRACTS list, as provided by EDR, and dated 06/24/2019 has revealed that there are 5 CORRACTS sites within approximately 1 mile of the target property.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

A review of the RCRA-TSDF list, as provided by EDR, and dated 06/24/2019 has revealed that there are 4 RCRA-TSDF sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/24/2019 has revealed that there are 4 RCRA-LQG sites within approximately 0.25 miles of the target property.

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/24/2019 has revealed that there are 7 RCRA-SQG sites within approximately 0.25 miles of the target property.

RCRA-VSQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-VSQG list, as provided by EDR, and dated 06/24/2019 has revealed that there is 1 RCRA-VSQG site within approximately 0.25 miles of the target property.

Federal institutional controls / engineering controls registries

US INST CONTROL: A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

A review of the US INST CONTROL list, as provided by EDR, and dated 08/19/2019 has revealed that there is 1 US INST CONTROL site within approximately 0.5 miles of the target property.

State- and tribal - equivalent CERCLIS

CA ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the CA ENVIROSTOR list, as provided by EDR, and dated 07/29/2019 has revealed that there are 24 CA ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal registered storage tank lists

CA UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the CA UST list, as provided by EDR, has revealed that there are 17 CA UST sites within

approximately 0.25 miles of the target property.

Local Lists of Registered Storage Tanks

CA SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the CA SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 13 CA SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/24/2019 has revealed that there are 20 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there are 5 EDR Hist Auto sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

COMPLIANCE AND EMISSIONS REPORTING

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System
California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of

TRI CLEANERS (Continued) **1000686238**

events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Site Name: Circle K Stores Inc. Site #2709416
Violation Date: 12-03-2018
Citation: HSC 6.7 25284, 25286 - California Health and Safety Code, Chapter 6.7, Section(s) 25284, 25286
Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.
Violation Notes: Returned to compliance on 12/19/2018. Owner/Operator did not submit and/or maintain a complete and/or accurate UST Operating Permit Application. On California Environmental Reporting System (CERS), the UST Tank Information/Monioring Plan for Tank #2 needs to be updated, the piping in Tank #2 is currently listed as pressurized but it should be listed as "suction". Submit and/or maintain a complete and/or accurate UST Operating Permit Application, including for permit renewal. Facility shall update the UST Tank Information for Tank #2 on CERS and change piping type from pressurized to suction.

Violation Source: CERS

Site ID: 19219
Site Name: Circle K Stores Inc. Site #2709416
Violation Date: 02-22-2019
Citation: 23 CCR 16 2712(b)(1)(G) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2712(b)(1)(G)
Violation Description: Failure to comply with one or more of the following overfill prevention equipment requirements: Alert the transfer operator when the tank is 90 percent full by restricting the flow into the tank or triggering an audible and visual alarm; or Restrict delivery of flow to the tank at least 30 minutes before the tank overfills, provided the restriction occurs when the tank is filled to no more than 95 percent of capacity; and activate an audible alarm at least five minutes before the tank overfills; or Provide positive shut-off of flow to the tank when the tank is filled to no more than 95 percent of capacity; or Provide positive shut-off of flow to the tank so that none of the fittings located on the top of the tank are exposed to product due to overfilling. Install/retrofit overfill prevention equipment that does not use flow restrictors on vent piping to meet overfill prevention equipment requirements when the overfill prevention equipment is installed, repaired, or replaced on and after October 1,?2018. For USTs installed before October 1, 2018, perform an inspection by October 13, 2018 and every 36 months thereafter. For USTs installed on and after October?1,?2018, perform an inspection at installation and every 36 months thereafter. Inspected within 30 days after a repair to the overfill prevention equipment. Inspected using an applicable manufacturer guidelines, industry codes, engineering standards, or a method approved by a professional engineer. Inspected by a certified UST service technician. Maintain records of overfill prevention equipment inspection for 36 months.
Violation Notes: Returned to compliance on 03/12/2019. Owner/Operator failed to meet one or more of the requirements applicable to overfill prevention equipment. Overfill Prevention equipment consists of audible and visual alarm with flow restriction (ball floats). During routine overfill prevention equipment testing, the flow restrictors failed the test per ICC Certified Technicians Test Report (test date 2/7/19). Facility shall repair overfill prevention system to meet overfill prevention equipment requirements by replacing flow restrictors with regulatory compliant overfill prevention equipment.

Site Name: Airport 5 Star
Violation Date: 11-03-2016
Citation: 23 CCR 6.7 25284, 25286 - California Code of Regulations, Title 23, Chapter 6.7, Section(s) 25284, 25286
Violation Description: Failure to submit a complete and accurate application for a permit to operate a UST, or for renewal of the permit.

AIRPORT 5 STAR (Continued) **S113111418**

Violation Notes:	Returned to compliance on 03/08/2017. The CERS submittal for the tanks is incorrect. The following needs to be updated: - The Tank Manufacturer is Owens Corning for both tanks. The tanks are Joor tanks. Revise the Tank Manufacturer in CERS for Tanks 1 and 2. - The Vent Secondary Piping is incorrect. It is identified as double-walled in CERS and is single-walled fiberglass piping. Revise Vent Secondary Piping in CERS to None for Tanks 1 and 2. - The UDC Construction Material is identified as fiberglass in CERS. The UDCs are steel construction. Revise the UDC Construction Material in CERS.

Violation Date:	04-08-2019
Citation:	23 CCR 16 2632(c)(2)(A)&(B) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2632(c)(2)(A)&(B)
Violation Description:	Failure to continuously monitor the interstitial space of a double-walled tank with an audible and visual alarm system.
Violation Notes:	Returned to compliance on 04/08/2019. Owner/Operator did not continuously monitor the interstitial space of the USTs such that the leak detection activates an audible/visual alarm when a leak is detected. The annular space sensor of the 91-fuel UST failed initial testing during annual monitoring certification. Continuously monitor the interstitial space of the USTs such that the leak detection equipment activates an audible/visual alarm when a leak is detected. The sensor for the annular space of the 91-fuel UST was replaced and passed test during inspection. No further action is required.
Violation Division:	El Segundo City Fire Department
Violation Program:	UST

Citation:	HSC 6.5 25189.5(a),25201(a) - California Health and Safety Code, Chapter 6.5, Section(s) 25189.5(a),25201(a)
Violation Description:	Failure to dispose of hazardous waste at a facility which has a permit from DTSC or disposing of hazardous waste at any point which is not authorized according to HSC 6.5.
Violation Notes:	Returned to compliance on 01/20/2018. In April of 2015, Trio Mfg. disposed of 5 yards of EDM filters to an Arizona TSDF for proper management. The facility has not disposed of any filters since that date and there was not filters being stored at the time of the inspection. George Zamora was not aware what happened to the filters, possible municipal trash. The facility shall properly manage the used EDM filters as a hazardous waste. The sludge in the filters is a hazardous waste for copper. The facility shall not add waste solvents to the used oil and manage the waste separately.

Violation Date:	11-16-2017
Citation:	HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description:	Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 01/20/2018. The facility was storing used oil for more than 180 days in November of 2016 and June of 2017. This violation was also documented in the December 3, 2012 inspection. Trio Manufacturing is a small quantity generator and is allowed to store hazardous waste for 180 days. The facility shall ensure that hazardous waste is not stored for more than 180 days.

Hazardous Waste Summary:

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

THE BOEING CO (Continued) **1001967650**

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D008
. Waste name: LEAD

. Waste code: D011
. Waste name: SILVER

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Site Name: Equinix LLC
Violation Date: 11-01-2017
Citation: HSC 6.5 25123.3(h)(1) - California Health and Safety Code, Chapter 6.5, Section(s) 25123.3(h)(1)
Violation Description: Failure to send hazardous waste offsite for treatment, storage, or disposal within 180 days (or 270 days if waste is transported over 200 miles) for a generator who generates less than 1000 kilogram per month

EQUINIX LLC (Continued) **S121759740**

	if all of the following conditions are met: (1) The quantity of hazardous waste accumulated onsite never exceeds 6,000 kilograms. (2) The generator complies with the requirements of 40 Code of Federal Regulations section 262.34(d), (e) and (f). (3) The generator does not hold acutely hazardous waste or extremely hazardous waste in an amount greater than one kilogram for more than 90 days.
Violation Notes:	Returned to compliance on 12/13/2017. Dispose of hazardous waste and submit a copy of the manifest to the CUPA.
Violation Division:	El Segundo City Fire Department
Violation Program:	HW
Violation Source:	CERS
Site ID:	28549
Site Name:	Equinix LLC
Violation Date:	11-01-2017
Citation:	40 CFR 1 265.173 - U.S. Code of Federal Regulations, Title 40, Chapter 1, Section(s) 265.173
Violation Description:	Failure to meet the following container management requirements: (a) A container holding hazardous waste must always be closed during storage, except when it is necessary to add or remove waste. (b) A container holding hazardous waste must not be opened, handled, or stored in a manner which may rupture the container or cause it to leak.
Violation Notes:	Returned to compliance on 12/13/2017. White container holding contaminated diesel. Submit photos to the CUPA demonstrating that the container listed above has been properly closed.

Violation Program:	HW
Violation Source:	CERS
Site ID:	28549
Site Name:	Equinix LLC
Violation Date:	03-19-2019
Citation:	23 CCR 16 2666(f) - California Code of Regulations, Title 23, Chapter 16, Section(s) 2666(f)
Violation Description:	Failure of the functional line leak detector (LLD) to monitor at least hourly with the capability of detecting a release of 3.0 gallons per hour leak at 10 pounds per square inch and restrict or shut off the flow of product through the piping or triggers a visual and audible alarm.
Violation Notes:	Returned to compliance on 05/23/2019. Owner/Operator did not install or failed to ensure that a functional LLD was installed on underground piping connected to emergency generator tank system which monitors at least hourly with the capability of detecting a release of 3.0 gph leak at 10 psi and restricts or shuts off the flow of product through the piping, or triggers a visual and audible alarm. UST #1 has been upgraded to meet the LLD requirements. UST #2 has not been upgraded to meet LLD requirements. Repair or install LLD on underground piping connected to emergency generator tank system, for UST #2, which meets the requirements listed above.

Site Name: Keysight Technologies, Inc.
Violation Date: 10-17-2017
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 11/03/2017. The facility did not have a final copy of manifest 001083854VES used to transport waste oil to Veolia. Locate a copy of all manifests for [001083854VES] and submit copies to the CUPA.

. Waste code: 321
. Waste name: Sewage sludge

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D022
. Waste name: CHLOROFORM

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: K061
. Waste name: EMISSION CONTROL DUST/SLUDGE FROM THE PRIMARY PRODUCTION OF STEEL IN ELECTRIC FURNACES.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE

LG NANOH2O (Continued) **1015740053**

FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 86926

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 5

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 40

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 65728

Violation Date:	01-15-2019
Citation:	22 CCR 11 66261.7 - California Code of Regulations, Title 22, Chapter 11, Section(s) 66261.7
Violation Description:	Failure to manage empty containers greater than 5 gallons in capacity that previously held a hazardous material/waste in accordance with 22 CCR 11 66261.7 including but not limited to the following: (e)(2)By reclaiming its scrap value onsite or shipping the container or inner liner to a person who reclaims its scrap value; or (3) By reconditioning or re manufacturing the container or inner liner onsite for subsequent reuse, or shipping the container or inner liner to a person who reconditions or re-manufactures the container or inner liner; or (4) By shipping the container or inner liner to a supplier or to another intermediate collection location for accumulation prior to managing the container or inner liner pursuant to subsections (e)(2) or (e)(3) of 22 CCR 11 66261.7; or (i) By shipping the container or inner liner back to the supplier for the purpose of being refilled. (f) A container or an inner liner removed from a container larger than five gallons in capacity which is managed pursuant to subsection (e) of 22 CCR 11 66261.7 shall be marked with the date it has been emptied and shall be managed within one year of being emptied.
Violation Notes:	Returned to compliance on 02/13/2019. Approximately three empty 5-gallon containers that previously held solvent were observed in the hazardous waste accumulation area without labels. Submit photos/documentation to this department demonstrating that the empty containers listed above have been marked with the date they were emptied and are being properly managed pursuant to 22 CCR 11 66261.7.

L A X AUTOBODY (Continued) **S113057373**

Violation Description: Failure to meet the following conditions of satellite accumulation regulations: ? Accumulate up to 55 gallons of hazardous waste or one quart of acute hazardous waste at or near the initial point of accumulation which was under the control of the operator. ? Total time hazardous waste can be accumulated onsite in any generator accumulation area is one year, i.e., the combined accmulation time at a satellite accumulation point and at a 90/180/270 accumulation area (depending on size of generator and distance transported), whichever comes first. ? The generator complies with section 66265.171, 66265.172, and 66265.173(a). ? The container must be clearly marked with the initial date that hazardous waste is first placed in the container and labelled with the words ?Hazardous Waste? including specified information ? Container must be labelled with the date the satellite accumulation limit is reached and moved within three days after reaching the 55 gallon (or one quart) limit to a ?90 day? accumulation area ? 55 gallons (or one quart of acute hazardous waste) of waste per process may be accumulated
Violation Notes: Returned to compliance on 01/29/2019. Failure of the Owner/Operator to comply with one or more satellite accumulation requirements. Facility is exceeding the 55-gallon limit per waste stream of satellite accumulation for the bondo process. The facility currently holds 3 x 55-gallon drums of hazardous waste bondo dust/debris. Ensure that all hazardous wastes being accumulated pursuant to satellite accumulation meet all applicable requirements and submit documentation of compliance to the CUPA. Facility shall limit hazardous waste satellite accumulation not to exceed a single 55-gallon amount per waste stream.

FINDS:

Registry ID: 110002651906

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS ID: 10593142
CERS Description: Hazardous Waste Generator

FINDS:

Registry ID: 110000784982

Environmental Interest/Information System
AIR EMISSIONS CLASSIFICATION UNKNOWN

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

FINDS:

Registry ID: 110008261139

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

CERS:
Name: RALPHS GROCERY #645
Address: 500 N. SEPULVEDA BLVD.
City,State,Zip: EL SEGUNDO, CA 90245
Site ID: 146329
CERS ID: 10159971
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 146329
Site Name: Ralphs Grocery #645
Violation Date: 01-29-2019
Citation: 22 CCR 12 66262.34(f) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.34(f)
Violation Description: Failure to properly label hazardous waste accumulation containers and portable tanks with the following requirements: "Hazardous Waste", name and address of the generator, physical and chemical characteristics of the Hazardous Waste, and starting accumulation date.
Violation Notes: Returned to compliance on 01/29/2019. 5 gallon container of Hazardous Waste Off-spec medicine located in the Pharmacy was observed without a hazardous waste label. Submit a photo to the CUPA demonstrating that the container listed above has been properly labeled.
Violation Division: El Segundo City Fire Department
Violation Program: HW
Violation Source: CERS

Site ID: 146329
Site Name: Ralphs Grocery #645
Violation Date: 01-29-2019
Citation: HSC 6.95 25508(a)(1) - California Health and Safety Code, Chapter 6.95, Section(s) 25508(a)(1)
Violation Description: Failure to complete and electronically submit a site map with all required content.
Violation Notes: Returned to compliance on 02/05/2019. The business failed to complete and electronically submit a site map with all required content including: hazardous materials/waste storage areas. Current site map depicts hazardous materials in the "Produce Prep" room but this room did not have any hazardous materials during inspection. Complete and electronically submit a site map with all required content. Facility shall update site map and remove hazardous materials symbol from "Produce Prep" room.
Violation Division: El Segundo City Fire Department
Violation Program: HMRRP

Site ID: 146329

RALPHS GROCERY #645 (Continued) **S113466417**

Site Name: Ralphs Grocery #645
Violation Date: 01-29-2019
Citation: 22 CCR 12 66262.40(a) - California Code of Regulations, Title 22, Chapter 12, Section(s) 66262.40(a)
Violation Description: Failure to keep a copy of each properly signed manifest for at least three years from the date the waste was accepted by the initial transporter. The manifest signed at the time the waste was accepted for transport shall be kept until receiving a signed copy from the designated facility which received the waste.
Violation Notes: Returned to compliance on 01/29/2019. A signed copy from the Treatment Storage Disposal Facility (TSDF) of the Uniform Hazardous Waste Manifests were not available at the time of inspection for the following manifests: 019620393JJK, 019623934JJK,018858287JJK, 019620379JJK, and 018858286JJK. Locate a signed copy from the TSDF of all manifests and submit copies to the CUPA for the following manifests: 019620393JJK, 019623934JJK,018858287JJK, 019620379JJK, and 018858286JJK. Facility was able to print out copies of signed manifests the end of inspection and copies were reviewed by CUPA. No further action required at this time.

Hazardous Waste Summary:

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213

RAYTHEON COMPANY (Continued) **1015730700**

. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 461
. Waste name: Degreasing sludge

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D011
. Waste name: SILVER

. Waste code: D018

RAYTHEON COMPANY (Continued) **1015730700**

. Waste name: BENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D038
. Waste name: PYRIDINE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: D040
. Waste name: TRICHLORETHYLENE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U223
. Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D009

Hazardous Waste Summary:

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

TELEDYNE CONTROLS LLC (Continued) **1000241004**

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 512
. Waste name: Other empty containers 30 gallons or more

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: D000
. Waste name: Not Defined

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D008
. Waste name: LEAD

. Waste code: D011
. Waste name: SILVER

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002

TELEDYNE CONTROLS LLC (Continued) **1000241004**

. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U223
. Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Violation Status: No violations found

FINDS:

Registry ID: 110002697261

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

US National Pollutant Discharge Elimination System (NPDES) module of the Compliance Information System (ICIS) tracks surface water permits issued under the Clean Water Act. Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Staff visited and inspected the site in response to a NOT. The company filed NOT because it changed the name from Teledyne Controls Inc. to Teledyne Controls LLC. The former NEC ID number was 4 19NEC001291. Staff met at the site with Mr. Vu Nguyen, Environmental Health and

TELEDYNE CONTROLS LLC (Continued) **S106832778**

Safety/ Manufacturing Engineer, (310)765-9436. He permitted the inspection and to take photos during the inspection. Also, he accompanied staff during the site inspection. The company assembles electronic parts at the building . The parts are manufactured outside and delivered to this building for assembling and shipping to customers. All the industrial activities are conducted indoors. Outside the building was located only a large empty nitrogen tank and part of a cardboard compactor. The company was very clean and organized. Staff believe that the NEC is appropriate in this case. Photos from the site are attached.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS)

THE BOEING COMPANY (Continued) **1000240982**

ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: LABP
. Waste name: LAB PACK

. Waste code: P012
. Waste name: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P029
. Waste name: COPPER CYANIDE (OR) COPPER CYANIDE CU(CN)

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

. Waste code: P098
. Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

. Waste code: P106
. Waste name: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U012
. Waste name: ANILINE (I,T) (OR) BENZENAMINE (I,T)

. Waste code: U041
. Waste name: EPICHLOROHYDRIN (OR) OXIRANE, (CHLOROMETHYL)-

. Waste code: U079
. Waste name: 1,2-DICHLOROETHYLENE (OR) ETHENE, 1,2-DICHLORO-,(E)-

. Waste code: U112
. Waste name: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

. Waste code: U133
. Waste name: HYDRAZINE (R,T)

. Waste code: U154
. Waste name: METHANOL (I) (OR) METHYL ALCOHOL (I)

. Waste code: U165
. Waste name: NAPHTHALENE

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: U213
. Waste name: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

. Waste code: U219
. Waste name: THIOUREA

. Waste code: U220
. Waste name: BENZENE, METHYL- (OR) TOLUENE

. Waste code: U223
. Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 1107

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 141821

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 8132

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 1028

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 2088

Waste code: D008
Waste name: LEAD
Amount (Lbs): 49159

Waste code: D011

THE BOEING COMPANY (Continued) **1000240982**

Waste name: SILVER
Amount (Lbs): 10402

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 118

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 20778

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Handler Activities Summary:
U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151

THE BOEING COMPANY (Continued) **1000240982**

. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB’s

. Waste code: 291
. Waste name: Latex waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 611
. Waste name: Contaminated soil from site clean-ups

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 726
. Waste name: Liquids with nickel > 134 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002

. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D018
. Waste name: BENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D040
. Waste name: TRICHLORETHYLENE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE,

THE BOEING COMPANY (Continued) **1000240982**

METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: LABP
. Waste name: LAB PACK

. Waste code: P012
. Waste name: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P029
. Waste name: COPPER CYANIDE (OR) COPPER CYANIDE CU(CN)

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

. Waste code: P098
. Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

. Waste code: P106
. Waste name: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U012
. Waste name: ANILINE (I,T) (OR) BENZENAMINE (I,T)

. Waste code: U041
. Waste name: EPICHLOROHYDRIN (OR) OXIRANE, (CHLOROMETHYL)-

. Waste code: U079
. Waste name: 1,2-DICHLOROETHYLENE (OR) ETHENE, 1,2-DICHLORO-,(E)-

. Waste code: U112
. Waste name: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

. Waste code: U133

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

THE BOEING COMPANY (Continued) **1000240982**

Amount (Lbs): 1107

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 141821

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 8132

Waste code: D006

Classification: Not a generator, verified

Hazardous Waste Summary:

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 461
. Waste name: Degreasing sludge

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: D000
. Waste name: Not Defined

RAYTHEON COMPANY SAS (Continued) **1000241015**

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D011
. Waste name: SILVER

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

RAYTHEON COMPANY SAS (Continued) **1000241015**

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: U223
. Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Hazardous Waste Summary:

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 352
. Waste name: Other organic solids

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D011
. Waste name: SILVER

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

INERNATIONAL RECTIFIER (Continued) **1000216983**

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: U219
. Waste name: THIOUREA

. Waste code: U226
. Waste name: ETHANE, 1,1,1-TRICHLORO- (OR) METHYL CHLOROFORM

FINDS:

Registry ID: 110064159119

Environmental Interest/Information System
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 09/24/1996
Comments: Preliminary Assessment completed under U.S. EPA grant. Site is no further assessment for U.S. EPA. However, DTSC requires a Preliminary Endangerment Assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 05/25/1995
Comments: The Department received a hazardous substace release report. The site had a waste leak from a plating line and acidic aqueous waste left metal contamination in the soil. Due to evidence of contamination, the Department recommends a PEA. The Department notified the RP that a PEA be conducted.

Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

1330 EAST FRANKLIN AVENUE (Continued) **S118757325**

Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 01/18/2017
Comments: Document found acceptable for purposes for moving forward. Anderson made corrections to the reports that constituted the PEAE and agreed to further investigation. They maintain that the SVE should continue to operate although site characterization is incomplete and a remedy selection document has not been prepared. DTSC intends to address outstanding data gaps and discrepencies in a forthcoming SSI scoping meeting.

Completed Document Type:	Correspondence
Completed Date:	01/18/2017
Comments:	Document found acceptable for purposes for moving forward. Anderson made corrections to the reports that constituted the PEAE and agreed to further investigation. They maintain that the SVE should continue to operate although site characterization is incomplete and a remedy selection document has not been prepared. DTSC intends to address outstanding data gaps and discrepencies in a forthcoming SSI scoping meeting.

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 10280

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 4410

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 1996

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 2964

Waste code: D008

Hazardous Waste Summary:

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 241
. Waste name: Tank bottom waste

. Waste code: 291
. Waste name: Latex waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste name: Other organic solids

. Waste code: 461
. Waste name: Degreasing sludge

. Waste code: 512
. Waste name: Other empty containers 30 gallons or more

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 731
. Waste name: Liquids with polychlorinated biphenyls > 50 mg/l

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D015
. Waste name: TOXAPHENE (C10 H10 CL8, TECHNICAL CHLORINATED CAMPHENE, 67-69 PERCENT CHLORINE)

. Waste code: D018
. Waste name: BENZENE

. Waste code: D022
. Waste name: CHLOROFORM

. Waste code: D027
. Waste name: 1,4-DICHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F027
. Waste name: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

. Waste code: P065
. Waste name: FULMINIC ACID, MERCURY(2+) SALT (R,T) (OR) MERCURY FULMINATE (R,T)

. Waste code: P074
. Waste name: NICKEL CYANIDE (OR) NICKEL CYANIDE NI(CN)2

. Waste code: P098
. Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

. Waste code: P106
. Waste name: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

. Waste code: P120
. Waste name: VANADIUM OXIDE V2O5 (OR) VANADIUM PENTOXIDE

. Waste code: P122
. Waste name: ZINC PHOSPHIDE ZN3P2, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 10% (R,T)

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U003
. Waste name: ACETONITRILE (I,T)

. Waste code: U019
. Waste name: BENZENE (I,T)

. Waste code: U031
. Waste name: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

. Waste code: U035
. Waste name: BENZENEBUTANOIC ACID, 4-[BIS(2-CHLOROETHYL)AMINO]- (OR) CHLORAMBUCIL

. Waste code: U056
. Waste name: BENZENE, HEXAHYDRO- (I) (OR) CYCLOHEXANE (I)

. Waste code: U057
. Waste name: CYCLOHEXANONE (I)

. Waste code: U069
. Waste name: 1,2-BENZENEDICARBOXYLIC ACID, DIBUTYL ESTER (OR) DIBUTYL PHTHALATE

. Waste code: U080
. Waste name: METHANE, DICHLORO- (OR) METHYLENE CHLORIDE

. Waste code: U115
. Waste name: ETHYLENE OXIDE (I,T) (OR) OXIRANE (I,T)

. Waste code: U122
. Waste name: FORMALDEHYDE

. Waste code: U125
. Waste name: 2-FURANCARBOXALDEHYDE (I) (OR) FURFURAL (I)

. Waste code: U133
. Waste name: HYDRAZINE (R,T)

. Waste code: U134
. Waste name: HYDROFLUORIC ACID (C,T) (OR) HYDROGEN FLUORIDE (C,T)

. Waste code: U140
. Waste name: 1-PROPANOL, 2-METHYL- (I,T) (OR) ISOBUTYL ALCOHOL (I,T)

. Waste code: U144
. Waste name: ACETIC ACID, LEAD(2+) SALT (OR) LEAD ACETATE

. Waste code: U154
. Waste name: METHANOL (I) (OR) METHYL ALCOHOL (I)

. Waste code: U159
. Waste name: 2-BUTANONE (I,T) (OR) METHYL ETHYL KETONE (MEK) (I,T)

. Waste code: U161
. Waste name: 4-METHYL-2-PENTANONE (I) (OR) METHYL ISOBUTYL KETONE (I) (OR) PENTANOL, 4-METHYL-

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste code: U162
. Waste name: 2-PROPENOIC ACID, 2-METHYL-, METHYL ESTER (I,T) (OR) METHYL METHACRYLATE (I,T)

. Waste code: U163
. Waste name: GUANIDINE, N-METHYL-N'-NITRO-N-NITROSO- (OR) MNNG

. Waste code: U165
. Waste name: NAPHTHALENE

. Waste code: U166
. Waste name: 1,4-NAPHTHALENEDIONE (OR) 1,4-NAPHTHOQUINONE

. Waste code: U169
. Waste name: BENZENE, NITRO- (OR) NITROBENZENE (I,T)

. Waste code: U188
. Waste name: PHENOL

. Waste code: U196
. Waste name: PYRIDINE

. Waste code: U211
. Waste name: CARBON TETRACHLORIDE (OR) METHANE, TETRACHLORO-

. Waste code: U213
. Waste name: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

. Waste code: U216
. Waste name: THALLIUM CHLORIDE TLCL (OR) THALLIUM(I) CHLORIDE

. Waste code: U220
. Waste name: BENZENE, METHYL- (OR) TOLUENE

. Waste code: U223
. Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

. Waste code: U226
. Waste name: ETHANE, 1,1,1-TRICHLORO- (OR) METHYL CHLOROFORM

. Waste code: U228
. Waste name: ETHENE, TRICHLORO- (OR) TRICHLOROETHYLENE

. Waste code: U238
. Waste name: CARBAMIC ACID, ETHYL ESTER (OR) ETHYL CARBAMATE (URETHANE)

. Waste code: U239
. Waste name: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 10280

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 4410

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 1996

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 2964

Waste code: D008
Waste name: LEAD
Amount (Lbs): 2110

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 51

Waste code: D011

Comments:	Fully executed EOA sent (FedEx) to District 10/16/12.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Post HARP Form
Completed Date:	08/15/2013
Comments:	On August 15, 2013, DTSC Supervisor signed the Post-HARP for site visit inside existing building.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	School Cleanup Agreement
Completed Date:	02/05/2013
Comments:	Fully executed sent (FedEx) to the District.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence
Completed Date:	08/01/2013
Comments:	On August 1, 2013, DTSC informed the District that DTSC oversight costs exceeded the SCA cost estimate, listed activities causing the exceedance, and provided a revised cost estimate.
Completed Area Name:	PROJECT WIDE
Completed Sub Area Name:	Not reported
Completed Document Type:	Correspondence
Completed Date:	01/24/2013
Comments:	On January 24,2013, DTSC notified the District that the Environmental Oversight Agreement cost estimate has been exceeded and provided an anticipated approximate cost for the PEA.
Completed Area Name:	PROJECT WIDE

CA BOND EXP. PLAN:

Reponsible Party:	FEDERAL FACILITY SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The Department will either enter into an interagency agreement with the Department of Defense or will issue an order. The Department has budgeted $15,000 for oversight/monitoring costs. DHS will seek 100 percent cost recovery for its direct costs plus staff costs and overhead related to the project. The Department of Defense is expected to fund all remedial investigation and cleanup activities.
Site Description:	The Fort McArthur site is a former nike missile base located in the White's Point area of San Pedro. The Army transferred the site to the Air Force for housing and the Air Force transferred part of the site to the City of Los Angeles for a park. Thesite is located at 25th Street and Western Avenue in San Pedro.
Hazardous Waste Desc:	Ninety-six acres of the original 561-acre complex remain under Air Force control. The remaining properties were disposed of as surplus. An initial assessment study was performed on the active ninety-six acres of Fort McArthur. Nine acres of potential contamination were identified. Only two areas are recommended by the Air Force for further site characterization. Released wastes include pesticides and battery acids.
Threat To Public Health & Env:	Residues of hazardous wastes in the soil are the only identified environmental threat. Ground water is intruded by seawater and is unsuitable at this time for use as a drinking water supply. There is no known exposure at this time.
Site Activity Status:	The installation restoration program (IRP) has been initiated at this base. Currently, the program is in the operations/remedial action phase of the mitigation process.

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	58750
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs):	6660
Waste code:	D005
Waste name:	BARIUM
Amount (Lbs):	231640
Waste code:	D007
Waste name:	CHROMIUM
Amount (Lbs):	297248
Waste code:	D011
Waste name:	SILVER
Amount (Lbs):	40685
Waste code:	D035
Waste name:	METHYL ETHYL KETONE
Amount (Lbs):	286725
Waste code:	F002
Waste name:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs):	35260
Waste code:	F003
Waste name:	THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

BLDG. 902 (Continued) **1000840757**

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 133
. Waste name: Aqueous solution with 10% or more total organic residues

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB’s

. Waste code: 271
. Waste name: Organic monomer waste (includes unreacted resins)

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 342
. Waste name: Organic liquids with metals (see 121)

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

BLDG. 902 (Continued) **1000840757**

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 725
. Waste name: Liquids with mercury > 20 mg/l

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003

. Waste code: D011
. Waste name: SILVER

. Waste code: D021
. Waste name: CHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE

BLDG. 902 (Continued) **1000840757**

USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 58750

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 6660

Waste code: D005
Waste name: BARIUM

BLDG. 902 (Continued) **1000840757**

Amount (Lbs): 231640

Environmental Interest/Information System
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

BLDG. 902 (Continued) **1000840757**

corrective action activities required under RCRA.

HAZARDOUS WASTE BIENNIAL REPORTER

Agency Contact:	Jennifer Sasaki
Agency Telephone:	3103315418
Agency Type:	Private
SIC Code:	3721
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported

WEST COMPLEX FACILITY (Continued) **S105256477**

Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: No reclamation requirements associated with this facility.
POTW: The facility is not a POTW.
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 07/19/2019
Date Data Arrived at EDR: 07/30/2019

Next Scheduled EDR Contact: 01/13/2020
Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 07/19/2019

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 04/03/2019

Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 07/19/2019

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/24/2019
Date Data Arrived at EDR: 06/26/2019

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/24/2019

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

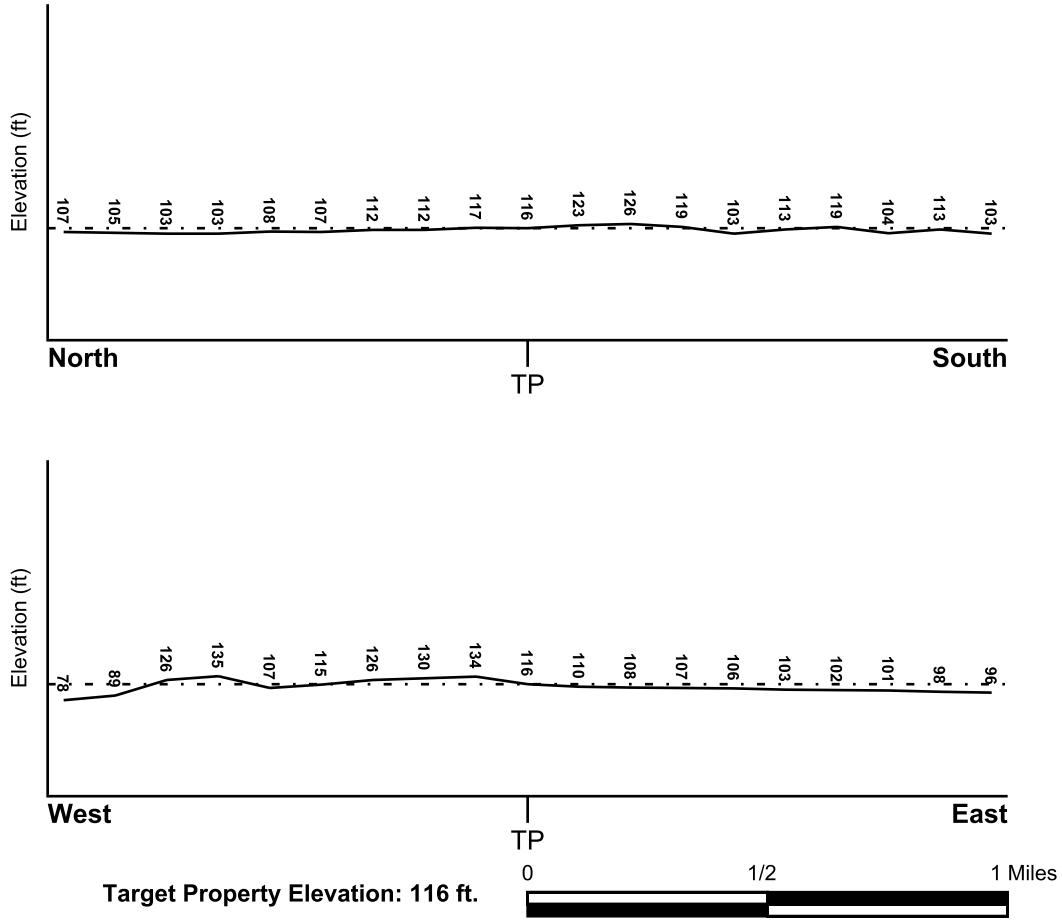
TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES



Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1770F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1760F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
VENICE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSW
Site Name:	International Rectifier
Site EPA ID Number:	CAD076208313
Groundwater Flow Direction:	West
Inferred Depth to Water:	80 feet.
Hydraulic Connection:	Aquifers underlying the site are interconnected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW

All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	DELHI
Soil Surface Texture:	sand
Hydrologic Group:	Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
Soil Drainage Class:	Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	10 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
2	10 inches	30 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
3	30 inches	50 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
4	50 inches	70 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand
clay

Surficial Soil Types: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand

clay

Shallow Soil Types: fine sandy loam
gravelly - loam
sandy clay loam
sandy clay

Deeper Soil Types: coarse sand
silty clay loam
gravelly - fine sandy loam
stratified
gravelly - sandy loam
weathered bedrock
clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779

APPENDIX D: QUALIFICATIONS

PARTNER

Daniel Frizzell
Partner Associate

Education

B.A. in Business Administration - DeVry University, Long Beach, California

Training

Occupational Safety and Health Administration (OSHA) 40-Hour Hazardous Waste Operations and Emergency Response (HAZWOPER) and unexploded ordinance (UXO) safety and awareness training

Highlights

15 years of experience performing Property Condition Assessments and Environmental Site Assessments

Experience Summary

Mr. Frizzell has conducted hundreds of Phase I Environmental Site Assessments (ESAs) and Property Condition Assessments (PCAs), and many Americans with Disabilities Act (ADAs) reports over his 15-year career in the environmental consulting industry. He has served as a researcher, assessor, report writer, project manager and environmental tester. Mr. Frizzell has performed assessments on retail structures, office buildings, multi-unit residential properties, hotels, RV resorts, nursing homes, high-rise buildings, as well as warehouse and industrial properties. He has completed assessments for private individuals, banks, and engineering and consulting firms.

Mr. Frizzell has experience drafting/drawing residential and commercial buildings using AutoCAD and has excellent comprehension in reading plans. Mr. Frizzell also has experience with water sampling, quality assurance inspections, and mold inspections.

Project Experience

Property Condition Assessments

Irvine Spectrum Center, Irvine, California. The Site consists of an 87-acre, irregular-shaped lot developed with 29 buildings within an outdoor mall comprised of retail stores, entertainment and restaurants. The Site currently has 1,194,603 net rentable square feet with approximately 174 rental tenants at 98% occupancy. The 29 buildings include 3 ground-lease buildings. Recommended addressing all observed deficiencies that required immediate action because of existing or potentially unsafe (health and safety) conditions, obvious material building code violations, or conditions that had the potential to result in, or contribute to, the failure of a critical element of system failure within one year, or a significant escalation in repair costs if left uncorrected. Opinions of costs for Immediate Repairs were provided in an Immediate Repair Cost Table.

Residential Property, Clackamas, Oregon. Components or systems that required replacement reserves during the term were itemized with opinions of probable cost on a schedule titled Replacement Reserve Analysis. Based upon observations conducted during the property visit, no items were identified that were required as corrective work to remedy immediate physical needs. The Replacement Reserve Analysis was projected for the term of 10 years plus two years, for a total of 12 years and totaled $609,223.

Industrial Building, Broomfield, Colorado. The scope of work for this report is based upon the client scope of work and the American Society for Testing and Materials (ASTM) Standard E 2018-08. A Replacement Reserves Analysis was not a part of the scope of work. Only routine maintenance items were identified regarding immediate repairs.

Environmental Site Assessments

Retail Building, Temecula, California. This site is approximately 31.3 acres with 19 single-story retail buildings with a total of 295,947 rentable square feet, situated on 10 parcels of land. The property may have been impacted by a leaking underground storage tank (UST) on the abutting south Mobil Station #18-AOJ which is currently under investigation. A Phase II ESA was recommended for further investigation and analysis of the subject property.

AutoCAD Architectural Drafting/Drawings

Residential and Commercial Buildings, California. The scope of work for this work varies from small to large residential and commercial buildings. Drafting is done via AutoCAD and includes: land surveys, floor plans, reflected ceiling plans, roof plans, electrical/lighting plans, and interior and exterior elevations.

Education

M.A. Environmental Studies, Brown University
B.S. Biology, University of California, Los Angeles, Emphasis in Ecology, Behavior and Evolution

Registrations

EPA Accredited Asbestos Inspector
National Registry of Environmental Professionals: Registered Environmental Property Assessor (REPA)

Training

California Underground Storage Tank Inspector

Highlights

15 years in environmental service industry
14 years performing Phase I Environmental Site Assessments (ESAs), Environmental Transaction Screens, radon screening, asbestos inspections, and lead-based paint inspection
13 years of experience with multi-family properties, commercial properties, retail shopping centers, municipal and private airports, oil well properties, oil refineries, gas stations, dry cleaners, aerospace manufacturers, dry cleaning plants, hotels, auto dealership and repair facilities, and various manufacturing operations throughout the US
8 years of project management experience in Environmental Assessments, Property Condition Assessments, Physical Needs Assessments, seismic evaluations, and ALTA Surveys, compliance reports
5 years of project management experience in ESAs and PCAs for properties located in Mexico, Canada, the Caribbean, Southeast Asia and South Pacific

Experience Summary

Ms. Churchill has served as an environmental scientist, project manager, senior author, or client manager for projects associated with thousands of real estate transactions. Ms. Churchill is familiar with the due diligence requirements of a varied number of reporting standards, including ASTM, EPA's All Appropriate Inquiry (AAI), Freddie Mac, Fannie Mae DUS, and U.S. Small Business Administration's (SBA) SOP 50 10. She also has experience with fulfilling numerous customized client scopes of work. Furthermore, Ms. Churchill has working experience in performing biological and noise assessments, and in preparing and reviewing environmental documentation in support of CEPA and NEPA.

While in graduate school, Ms. Churchill's Masters Thesis research focused on evaluating the potential of Japanese Knotweed (an invasive plant species) as an effective phytoremediator of heavy metal contaminated soils along a historically polluted river in Rhode Island. Phytoremediation refers to the natural ability of certain plants called hyperaccumulators to bioaccumulate contaminants in soil. Hyperaccumulators can be grown and harvested economically, leaving the soil with a greatly reduced level of toxic contamination. This cost-effective approach to remediation has gained increasing popularity in both academic and practical circles.

Ms. Churchill previously worked for the City of El Segundo, where she regularly collaborated with other local CUPAs to ensure compliance with State and Federal regulations. Ms. Churchill's responsibilities included implementing and enforcing elements of the CUPA program including the following: hazardous waste generator program; underground storage tank program; Hazardous Material Release Response Plan

(Business Plan) Program and the California Accidental Release Response Plan (CalARP) Programs. Ms. Churchill also worked on enforcing city specific environmental programs such as Stormwater Pollution Prevention and Industrial Wastewater Discharge. As the Principal Environmental Specialist for the City, Ms. Churchill worked with large industries such as Chevron, Northrop Grumman, Boeing and International Rectifier to ensure regulatory compliance pertaining to business operations and remedial activities.

Project Experience

International Airport Portfolio. Project Manager and Senior Reviewer for Phase I ESAs and PCAs of a confidential acquisition of airport facilities throughout the South Pacific and Southeast Asia. The project involved working with many foreign agencies and coordinating dual scope site visits at all facilities within a 2-week time frame.

West Coast Gas Station Portfolio. Project Manager for limited PCAs of an acquisition of gas station/car wash facilities throughout California, Oregon and Washington.

Mexico Industrial Site Portfolio. Project Manager and Senior Reviewer for Phase I ESAs of an acquisition of industrial/warehouse facilities throughout Northern Mexico. The project involved coordinating site inspections of multiple industrial facilities with private security in high risk danger areas.

Office Tower Portfolio, Los Angeles. Project Manager and Senior Reviewer for Phase I ESAs of a $1.34 Billion acquisition of Class A office buildings in Los Angeles.

Freddie Mac Multi-Scope Portfolio. Project Manager and Senior Reviewer for Phase I ESAs, PCAs and PMLs of an acquisition of multifamily apartment complexes throughout Southern California. The project involved coordinating three different scopes of specially qualified assessors to conduct site visits with radon and ACM sampling.

1. Low Impact Development [LID] Storm Water Management

The project storm water management design will be required to comply with the City of El Segundo LID requirements. The first flush (85th percentile annual rainstorm) of storm run-off will need to be either:

- Infiltrated in the soils, by mean of deep infiltration wells or shallow infiltration trenches;
- Captured in a cistern and treated for on-site re-use [irrigation);
- Filtered through bio-retention planters and released.

LID design will be reviewed by the City of El Segundo Building and Safety Division. In the City of El Segundo, infiltration is the first tier of stormwater management design that should be considered to satisfy LID. If infiltration is deemed infeasible by the geotechnical engineer, the second tier of capture and re-use may need to be considered. If capture and re-use is deemed infeasible, perhaps due to the amount of landscaping provided on site being less than the required amount of landscaping needed to utilize the stormwater captured in the cistern, then the last tier of biofiltration/bioretention can be explored to satisfy LID requirements.

The type of storm water management system selected will primarily depend on whether the soils are suitable for infiltration. We anticipate the geotechnical engineer to provide this assessment and provide design criteria for the storm water management system.

The LID volume calculations for the project depend on the total project area of disturbance. This includes all existing at grade surfaces being altered, existing buildings roofs areas modifications impacting the existing roof drainage pattern and areas to be excavated within the existing buildings footprints for structural reasons.

Based on the County of Los Angeles guidelines followed by the City of El Segundo Building and Safety Division in charge of reviewing proposed LID designs:

- "Where 50 percent or more of the impervious surface of a previously developed site is proposed to be altered and the previous development project was not subject to post-construction stormwater quality control measures, the entire development site [e.g., both the existing development and the proposed alteration) must meet the requirements of the LID Standards Manual.

- Where less than 50 percent of the impervious surface of a previously developed site is proposed to be altered and the previous development project was not subject to post-construction stormwater quality control measures, only the proposed alteration must meet the requirements of the LID Standards Manual."

Based on these guidelines, preliminary LID stormwater mitigation volumes to be considered for the project are as follows:

- Up to 11,402 cubic feet if the project disturbed area is limited to 50% or less of the total project area.

- 22,804 cubic feet is the project disturbed area is more than 50% of the total project area.

Here below is a breakdown of possible storm water management systems based on the selected Tier.

Tier 1 Design [Infiltration]

LID System components may include:

a. Pre-treatment: CDS units or downspout filters;
b. Temporary stormwater detention system: tanks [masonry or prefabricated) and/or detention pipes located on-site. The capacity of the storage system will equate approximately to the LID stormwater mitigation volume;
Drywell[s): passive vertical underground wells located on-site - away from buildings footings and private property lines per LID regulations - to inject storm runoff into the soils. Number and depth of drywells required is dependent on percolation test results which is to be provided by the Geotechnical engineer. We understand the percolation test[s) have not been performed yet but are being planned with the rest of the geotechnical investigation.
c. Overflow outlet[s) to public storm drain or street.

Storm drainage flow from roof downspouts is first routed to the pre-treatment system[s), prior to being discharged into the detention system[s) and drywell[s).

Tier 2 Design [Capture and Re-use]

The project needs to include sufficient landscaped areas to justify this

design. LID System components may include:

a. Pre-treatment: CDS units or downspout filters;
b. Permanent storage tank[s): masonry or prefabricated tank[s) located

on- site. The capacity of the tank[s) will equate approximately to the LID stormwater mitigation volume. Prefabricated tanks need to have a third-party rating [UL or other);

c. Pump and treatment skid [if required);
d. Connection to irrigation system;
e. Overflow outlet[s) to public storm drain or street.

Storm drainage flow from roof downspouts is first routed to the pre-treatment system[s), prior to being discharged into the permanent storage tank[s), where it can then be used for irrigation on site.

Tier 2 designs require review and approval by the County Health Department, in addition to the City Department of Building and Safety.

Tier 3 Design [Biofiltration "Flow Through Planters"]

This tier requires the project to capture 1.5 times the amount of storm water required for the previous two tiers. The required volume will dictate the minimum required area of flow through planters.

LID System Components may include:

a. All roof downspouts to be routed to flow through planters;
b. Engineered media in flow through planters to treat the stormwater;
c. Perforated underdrain to collect the treated stormwater;
d. Connection to a storm drain system on site;
e. Overflow to public storm drain or street.

The amount of storm water to be mitigated will depend on the amount of hardscape or roof areas that is constructed. Permeable pavement, landscape areas or green roofs can help reduce the amount of storm run-off that requires mitigation.

1.0 EXECUTIVE SUMMARY

1.1 Purpose of Analysis and Study Objectives

This Noise Impact Analysis has been prepared to determine the noise impacts associated with the proposed 650 PCH Project (proposed project). The following is provided in this report:

- A description of the study area and the proposed project;
- Information regarding the fundamentals of noise;
- Information regarding the fundamentals of vibration;
- A description of the local noise guidelines and standards;
- An evaluation of the current noise environment;
- An analysis of the potential short-term construction-related noise impacts from the proposed project; and,
- An analysis of long-term operations-related noise impacts from the proposed project.

1.2 Site Location and Study Area

The project site is located in the City of El Segundo (City) at 650 and 700 North Pacific Coast Highway and 737 Carl Jacobson Way. The approximately 7.2-acre project site is currently developed with office buildings and surface parking lots. The existing onsite improvements are detailed below:

- 650 N. P Pacific Coast Highway (Parcels 1 and 3 above) has an existing gross floor area of 128,544 square feet. Net floor area is 98,885 square feet.
- 700 N. Pacific Coast Highway (Parcels 4 and 5 above) has an existing gross floor area of 78,512 square feet. Existing net floor area is 69,692 square feet.
- 737 Carl Jacobson Way has an existing gross floor area of 17,000 square feet. The net floor area is 16,652 square feet. Please note that while 737 Carl Jacobson Way and the existing building on the property is a part of the property and the project, no changes are contemplated to this building at this time as there is an existing long-term tenant at this building.

The entire project site is bounded by a fast-food restaurant (Chick-fil-A) and industrial buildings to the north, industrial buildings to the east, a shopping center and an industrial building to the south, and Pacific Coast Highway to the west. The project study area is shown in Figure 1.

Sensitive Receptors in Project Vicinity

The nearest sensitive receptors to the project site are residents at the multi-family homes along E Palm Avenue and Indiana Court located as near as 270 feet west of the project site. The nearest school is Center Street Elementary School at 700 Center Street, El Segundo, that is located as near as 1,800 feet (0.34 mile) west of the project site.

1.3 Proposed Project Description

The proposed project would involve the renovation and minor alteration of two existing office buildings at 650 North Pacific Coast Highway (“Building A”) and 700 North Pacific Coast Highway (“Building B”). In

addition, the project includes the demolition of the existing surface parking lot and construction of a new 7-story office building with an integrated parking structure ("Building C"). In addition, the project will consolidate the seven parcels of land into a single 7.258-acre ground parcel through the proposed Vesting Tentative Parcel Map No. 83129. The gross and net square footages for each building in the project are as follows:

- Building A: 130,526 gross square feet; 99,916 net square feet;
- Building B: 77,309 gross square feet; 65,120 net square feet;
- Building C: 122,156 gross square feet, inclusive of the terraces and balconies; 70,021 net square feet.

The project would provide a total of 1,256 parking spaces to serve the office uses at the property and potentially other nearby parcels that do not have adequate parking. The proposed Building C would provide parking within an integrated parking structure that will have 1,185 spaces. Also, the existing surface parking areas on the north and east side of Building B will remain. The surface parking areas include 51 existing standard parking space and 20 new standard parking spaces for a total of 71 standard parking spaces. The proposed site plan is shown in Figure 2.

1.4 Standard Noise Regulatory Conditions

The proposed project will be required to comply with the following regulatory conditions from the City of El Segundo and State of California.

City of El Segundo Noise and Vibration Regulations

The following lists the noise and vibration regulations from the Municipal Code that are applicable, but not limited to the proposed project.

- Section 7-2-4: Noise Standards
- Section 7-2-9: Vibration Limits
- Section 7-2-10(D): Construction Noise Exemptions

State of California Noise Regulations

The following lists the State of California noise regulations that are applicable, but not limited to the proposed project.

- California Vehicle Code Section 2700-27207 – On Road Vehicle Noise Limits
- California Vehicle Code Section 38365-38350 – Off-Road Vehicle Noise Limits

1.5 Summary of Analysis Results

The following is a summary of the proposed project's impacts with regard to the State CEQA Guidelines noise checklist questions.

Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?

Less than significant impact.

Generation of excessive groundborne vibration or groundborne noise levels?

Less than significant impact.

For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

Less than significant impact.

1.6 Mitigation Measures for the Proposed Project

This analysis found that through adherence to the noise and vibration regulations detailed in Section 1.4 above, all noise and vibration impacts would be reduced to less than significant levels and no mitigation is required.

Proposed Site Plan

2.0 NOISE FUNDAMENTALS

Noise is defined as unwanted sound. Sound becomes unwanted when it interferes with normal activities, when it causes actual physical harm or when it has adverse effects on health. Sound is produced by the vibration of sound pressure waves in the air. Sound pressure levels are used to measure the intensity of sound and are described in terms of decibels. The decibel (dB) is a logarithmic unit which expresses the ratio of the sound pressure level being measured to a standard reference level. A-weighted decibels (dBA) approximate the subjective response of the human ear to a broad frequency noise source by discriminating against very low and very high frequencies of the audible spectrum. They are adjusted to reflect only those frequencies which are audible to the human ear.

2.1 Noise Descriptors

Noise Equivalent sound levels are not measured directly, but are calculated from sound pressure levels typically measured in A-weighted decibels (dBA). The equivalent sound level (Leq) represents a steady state sound level containing the same total energy as a time varying signal over a given sample period. The peak traffic hour Leq is the noise metric used by California Department of Transportation (Caltrans) for all traffic noise impact analyses.

The Day-Night Average Level (Ldn) is the weighted average of the intensity of a sound, with corrections for time of day, and averaged over 24 hours. The time of day corrections require the addition of ten decibels to sound levels at night between 10 p.m. and 7 a.m. The Community Noise Equivalent Level (CNEL) is similar to the Ldn, except that it has an added 4.77 decibels to sound levels during the evening hours between 7 p.m. and 10 p.m. These additions are made to the sound levels at these time periods because during the evening and nighttime hours, when compared to daytime hours, there is a decrease in the ambient noise levels, which creates an increased sensitivity to sounds. For this reason the sound appears louder in the evening and nighttime hours and is weighted accordingly. The City of El Segundo also relies on the CNEL noise standard to assess transportation-related impacts on noise sensitive land uses.

2.2 Tone Noise

A pure tone noise is a noise produced at a single frequency and laboratory tests have shown that humans are more perceptible to changes in noise levels of a pure tone. For a noise source to contain a “pure tone,” there must be a significantly higher A-weighted sound energy in a given frequency band than in the neighboring bands, thereby causing the noise source to “stand out” against other noise sources. A pure tone occurs if the sound pressure level in the one-third octave band with the tone exceeds the average of the sound pressure levels of the two contiguous one-third octave bands by:

- 5 dB for center frequencies of 500 hertz (Hz) and above
- 8 dB for center frequencies between 160 and 400 Hz
- 15 dB for center frequencies of 125 Hz or less

2.3 Noise Propagation

From the noise source to the receiver, noise changes both in level and frequency spectrum. The most obvious is the decrease in noise as the distance from the source increases. The manner in which noise reduces with distance depends on whether the source is a point or line source as well as ground absorption, atmospheric effects and refraction, and shielding by natural and manmade features. Sound

from point sources, such as air conditioning condensers, radiate uniformly outward as it travels away from the source in a spherical pattern. The noise drop-off rate associated with this geometric spreading is 6 dBA per each doubling of the distance (dBA/DD). Transportation noise sources such as roadways are typically analyzed as line sources, since at any given moment the receiver may be impacted by noise from multiple vehicles at various locations along the roadway. Because of the geometry of a line source, the noise drop-off rate associated with the geometric spreading of a line source is 3 dBA/DD.

2.4 Ground Absorption

The sound drop-off rate is highly dependent on the conditions of the land between the noise source and receiver. To account for this ground-effect attenuation (absorption), two types of site conditions are commonly used in traffic noise models, soft-site and hard-site conditions. Soft-site conditions account for the sound propagation loss over natural surfaces such as normal earth and ground vegetation. For point sources, a drop-off rate of 7.5 dBA/DD is typically observed over soft ground with landscaping, as compared with a 6.0 dBA/DD drop-off rate over hard ground such as asphalt, concrete, stone and very hard packed earth. For line sources a 4.5 dBA/DD is typically observed for soft-site conditions compared to the 3.0 dBA/DD drop-off rate for hard-site conditions. Caltrans research has shown that the use of soft-site conditions is more appropriate for the application of the Federal Highway Administration (FHWA) traffic noise prediction model used in this analysis as most ground surfaces between the source and receptor will provide some noise absorption.

3.0 GROUND-BORNE VIBRATION FUNDAMENTALS

Ground-borne vibrations consist of rapidly fluctuating motions within the ground that have an average motion of zero. The effects of ground-borne vibrations typically only cause a nuisance to people, but at extreme vibration levels damage to buildings may occur. Although ground-borne vibration can be felt outdoors, it is typically only an annoyance to people indoors where the associated effects of the shaking of a building can be notable. Ground-borne noise is an effect of ground-borne vibration and only exists indoors, since it is produced from noise radiated from the motion of the walls and floors of a room and may also consist of the rattling of windows or dishes on shelves.

3.1 Vibration Descriptors

There are several different methods that are used to quantify vibration amplitude such as the maximum instantaneous peak in the vibrations velocity, which is known as the peak particle velocity (PPV) or the root mean square (rms) amplitude of the vibration velocity. Due to the typically small amplitudes of vibrations, vibration velocity is often expressed in decibels and is denoted as (L_v) and is based on the rms velocity amplitude. A commonly used abbreviation is vibration decibels (VdB), which in this text, is when L_v is based on the reference quantity of 1 micro inch per second.

3.2 Vibration Perception

Typically, developed areas are continuously affected by vibration velocities of 50 VdB or lower. These continuous vibrations are not noticeable to humans whose threshold of perception is around 65 VdB. Off-site sources that may produce perceptible vibrations are usually caused by construction equipment, steel-wheeled trains, and traffic on rough roads, while smooth roads rarely produce perceptible ground-borne noise or vibration.

3.3 Vibration Propagation

The propagation of ground-borne vibration is not as simple to model as airborne noise. This is due to the fact that noise in the air travels through a relatively uniform median, while ground-borne vibrations travel through the earth which may contain significant geological differences. There are three main types of vibration propagation; surface, compression, and shear waves. Surface waves, or Rayleigh waves, travel along the ground's surface. These waves carry most of their energy along an expanding circular wave front, similar to ripples produced by throwing a rock into a pool of water. P-waves, or compression waves, are body waves that carry their energy along an expanding spherical wave front. The particle motion in these waves is longitudinal (i.e., in a "push-pull" fashion). P-waves are analogous to airborne sound waves. S-waves, or shear waves, are also body waves that carry energy along an expanding spherical wave front. However, unlike P-waves, the particle motion is transverse or "side-to-side and perpendicular to the direction of propagation."

As vibration waves propagate from a source, the vibration energy decreases in a logarithmic nature and the vibration levels typically decrease by 6 VdB per doubling of the distance from the vibration source. As stated above, this drop-off rate can vary greatly depending on the soil but has been shown to be effective enough for screening purposes, in order to identify potential vibration impacts that may need to be studied through actual field tests.

4.0 REGULATORY SETTING

The project site is located in the City of El Segundo. Noise regulations are addressed through the efforts of various federal, state, and local government agencies. The agencies responsible for regulating noise are discussed below.

4.1 Federal Regulations

The adverse impact of noise was officially recognized by the federal government in the Noise Control Act of 1972, which serves three purposes:

- Promulgating noise emission standards for interstate commerce
- Assisting state and local abatement efforts
- Promoting noise education and research

The Federal Office of Noise Abatement and Control (ONAC) was initially tasked with implementing the Noise Control Act. However, the ONAC has since been eliminated, leaving the development of federal noise policies and programs to other federal agencies and interagency committees. For example, the Occupational Safety and Health Administration (OSHA) agency prohibits exposure of workers to excessive sound levels. The Department of Transportation (DOT) assumed a significant role in noise control through its various operating agencies. The Federal Aviation Administration (FAA) regulates noise of aircraft and airports. Surface transportation system noise is regulated by a host of agencies, including the Federal Transit Administration (FTA). Transit noise is regulated by the federal Urban Mass Transit Administration (UMTA), while freeways that are part of the interstate highway system are regulated by the Federal Highway Administration (FHWA). Finally, the federal government actively advocates that local jurisdictions use their land use regulatory authority to arrange new development in such a way that "noise sensitive" uses are either prohibited from being sited adjacent to a highway or, alternately that the developments are planned and constructed in such a manner that potential noise impacts are minimized.

Although the proposed project is not under the jurisdiction of the FTA, the FTA is the only agency that has defined what constitutes a significant noise impact from implementing a project. The FTA standards are based on extensive studies by the FTA and other governmental agencies on the human effects and reaction to noise and a summary of the FTA findings are provided below in Table A.

Table A – FTA Project Effects on Cumulative Noise Exposure

Existing Noise Exposure (dBA Leq or Ldn)	Allowable Noise Impact Exposure dBA Leq or Ldn		
	Project Only	Combined	Noise Exposure Increase
45	51	52	+7
50	53	55	+5
55	55	58	+3
60	57	62	+2
65	60	66	+1
70	64	71	+1
75	65	75	0

Source: Federal Transit Administration, 2018.

Since the federal government has preempted the setting of standards for noise levels that can be emitted by transportation sources, the City is restricted to regulating noise generated by the transportation system through nuisance abatement ordinances and land use planning.

4.2 State Regulations

Noise Standards

California Department of Health Services Office of Noise Control

Established in 1973, the California Department of Health Services Office of Noise Control (ONC) was instrumental in developing regularity tools to control and abate noise for use by local agencies. One significant model is the "Land Use Compatibility for Community Noise Environments Matrix," which allows the local jurisdiction to clearly delineate compatibility of sensitive uses with various incremental levels of noise.

California Noise Insulation Standards

Title 24, Chapter 1, Article 4 of the California Administrative Code (California Noise Insulation Standards) requires noise insulation in new hotels, motels, apartment houses, and dwellings (other than single-family detached housing) that provides an annual average noise level of no more than 45 dBA CNEL. When such structures are located within a 60-dBA CNEL (or greater) noise contour, an acoustical analysis is required to ensure that interior levels do not exceed the 45-dBA CNEL annual threshold. In addition, Title 21, Chapter 6, Article 1 of the California Administrative Code requires that all habitable rooms, hospitals, convalescent homes, and places of worship shall have an interior CNEL of 45 dB or less due to aircraft noise.

Government Code Section 65302

Government Code Section 65302 mandates that the legislative body of each county and city in California adopt a noise element as part of its comprehensive general plan. The local noise element must recognize the land use compatibility guidelines published by the State Department of Health Services. The guidelines rank noise land use compatibility in terms of normally acceptable, conditionally acceptable, normally unacceptable, and clearly unacceptable.

Vibration Standards

Title 14 of the California Administrative Code Section 15000 requires that all state and local agencies implement the California Environmental Quality Act (CEQA) Guidelines, which requires the analysis of exposure of persons to excessive groundborne vibration. However, no statute has been adopted by the state that quantifies the level at which excessive groundborne vibration occurs.

Caltrans issued the *Transportation- and Construction-Induced Vibration Guidance Manual* in 2004. The manual provides practical guidance to Caltrans engineers, planners, and consultants who must address vibration issues associated with the construction, operation, and maintenance of Caltrans projects. However, this manual is also used as a reference point by many lead agencies and CEQA practitioners throughout California, as it provides numeric thresholds for vibration impacts. Thresholds are established for continuous (construction-related) and transient (transportation-related) sources of vibration, which found that the human response becomes distinctly perceptible at 0.25 inch per second PPV for transient sources and 0.04 inch per second PPV for continuous sources.

4.3 Local Regulations

The City of El Segundo General Plan and Municipal Code establishes the following applicable policies related to noise and vibration.

City of El Segundo General Plan

The City of El Segundo adopted their General Plan in 1992. The General Plan sets the long-term goals and policies that decision makers use to guide the growth and development in the City; and the Noise Element establishes the goals and policies associated with noise exposure within the City. Goals and policies that are applicable to implementation of the proposed project are presented below.

Goal N 1: Encourage a high quality environmental within all parts of the City of El Segundo where the public's health, safety, and welfare are not adversely affected by excessive noise.

Objectives & Policies

Objective N 1-1	It is the objective of the City of El Segundo to ensure that City residents are not exposed to mobile noise levels in excess of the interior and exterior noise standards or the single event noise standards specified in the El Segundo Municipal Code.
Policy N1-1.1	Continue to work for the elimination of adverse noise sources, especially from Los Angeles International Airport West Imperial Terminal, and from helicopter and aircraft flyovers.
Policy N1-1.2	Play an active role in the planning process associated with preparation of the Los Angeles International Airport Master Plan.
Policy N1-1.3	Continue to work with the City of Los Angeles Department of Airports to reduce the noise-impacted area around Los Angeles International Airport to zero.
Policy N1-1.4	Consider noise impacts from traffic arterials and railroads, as well as aircraft, when identifying potential new areas for residential land use.
Policy N1-1.5	Encourage state inspection and enforcement of noise standards for motor vehicles, including those involved in public transit.
Policy N1-1.6	Encourage the State Department of Transportation (DOT) to conduct an active highway noise abatement program with scenic/aesthetic consideration for Sepulveda Boulevard (State Route 1).
Policy N1-1.7	Monitor California Department of Transportation and Los Angeles County Transportation Commission noise abatement measures aimed at minimizing noise impacts associated with the I-105 Freeway and the Metro Rail Green Line.
Policy N1-8	Continue to develop zoning, subdivision, and development controls to prevent future encroachment of noise-sensitive uses into present or planned industrial or transportation system noise-impacted zones where adverse effects cannot be adequately mitigated.
Policy N1-9	Require review of all new development projects in the City for conformance with California Airport Noise Regulations and California Noise Insulation Standards (CCR Title 24) to ensure interior noise will not exceed acceptable levels.

Policy N1-10	Continue to develop and implement City programs to incorporate noise reduction measures into existing residential development where interior noise levels exceed acceptable standards.
Objective N 1-2	It is the objective of the City of El Segundo to ensure that City residents are not exposed to stationary noise levels in excess of El Segundo's Noise Ordinance standards.
Policy N1-2.1	Require all new projects to meet the City's Noise Ordinance Standards as a condition of building permit approval.
Objective N 1-3	It is the objective of the City of El Segundo that the City maintain intergovernmental coordination and public information programs which are highly efficient in their noise abatement efforts.
Policy N1-3.1	Encourage site planning to be consistent with the existing and future noise environment and promote development standards in which noise-sensitive projects and residences are mitigated from major noise sources. Shon-term and long-term noise control measures should be formulated in a manner compatible with community needs and expectations.
Policy N1-3.2	Work to remove non-conforming land uses (mixed usage such as residential uses in commercial or industrial land use designations) which result in noise incompatibility.
Policy N1-3.3	Employ effective noise mitigation techniques through appropriate provisions in the building code, subdivision procedures, and zoning and noise ordinances.
Policy N1-3.4	Urge continued federal and state research into noise problems and recommend additional research programs as problems are identified.
Policy N1-3.5	Support a continuous effort to evaluate noise levels in the City of El Segundo and to reduce unacceptable noise levels through the planning process.

City of El Segundo Municipal Code

Chapter 2 Noise and Vibration of the City of El Segundo Municipal Code sets forth the noise standards and regulations for noise related sources within the City.

7-2-4 Noise Standards

No person shall, at any location within the City, create any noise, nor shall any person allow the creation of any noise within the person's control of public or private property, which causes the noise level when measured on any other property, to exceed the applicable noise standards, except as set forth in subsection C1 of this Section.

A. Residential Property: **Five (5) dBA above the ambient noise level**.

B. Commercial and Industrial Property: **Eight (8) dBA above the ambient noise level**.

C. Adjustments:

   1. Increases to the noise standards as set forth in subsections A and B of this Section may be permitted in accordance with the following:

Noise Standards Adjustments	
Permitted Increase (dBA)	**Duration of Increased Minutes)[1]**
0	30
5	15
10	5
15	1
20	Less than 1

Note:
[1] Cumulative minute during any one hour
Source: City of El Segundo, 2020.

2. If the receptor property is located on a boundary between two (2) different noise zones, the lower noise level standard applicable to the quieter zone shall apply.

7-2-8 Special Prohibitions.

The following acts, and the causing therefor, are declared to be in violation of the Noise and Vibration Chapter of the Municipal Code if they occur in such a manner as to disturb the peace, quiet, and comfort of any reasonable person of normal sensitivity residing in the area; and occur:

A. Between the hours of 10:00 PM and 7:00 AM:

1. Operating, playing or permitting the operation or playing of any radio, television, phonograph, drum, musical instrument, sound amplifier, or similar device which produces, reproduces or amplifies sound.
2. Using or operating any loudspeaker, public address system or similar device.
3. Loading, unloading, opening, closing or other handling of boxes, crates, containers, building materials, garbage cans, or similar objects.

B. Between the hours of 8:00 PM and 7:00 AM:

1. Refuse collection vehicles:
    a. Collection of refuse with a collection vehicle in a residential area or within five hundred feet (500') thereof;
    b. Operation or permitting the operation of the compacting mechanism of any motor vehicle which compacts refuse in a residential area or within five hundred feet (500') thereof.
2. Loudspeakers/Public Address Systems: Using or operating for any commercial purpose any loudspeaker, public address system, or similar device on a public right of way or public space.
3. Powered Model: Operating or permitting the operation of powered models

7-2-9 Vibration.

Notwithstanding other sections of the Noise and Vibration Chapter of the Municipal Code, a person shall not create, maintain or cause any ground vibration which is perceptible, without the use of instructions, to any reasonable person of normal sensitivity at any point on any affected property.

7-2-10 Exemptions.

The following actives shall be exempted from the provisions of the Noise and Vibration Chapter of the Municipal Code:

A. School And Park Facilities: Authorized activities conducted on public school grounds and City park facilities, associated with normal operation of the facilities including, but not limited to, school and public athletic and entertainment events.

B. Mechanical Or Electronic Devices: Any mechanical or electronic device, apparatus or equipment used, related to or connected with emergency machinery, vehicle, work or warning alarm or bell, provided the sounding of any bell or alarm on any building or motor vehicle shall terminate its operation within fifteen (15) minutes of its activation.

C. Public Speaking Or Assemblies: Noncommercial public speaking and public assembly activities conducted on any public space or public right of way without the use of sound amplification equipment.

D. Construction Noise: Noise sources associated with or vibration created by construction, repair, or remodeling of any real property, provided said activities do not take place between the hours of six o'clock (6:00) P.M. and seven o'clock (7:00) A.M. Monday through Saturday, or at any time on Sunday or a Federal holiday, and provided the noise level created by such activities does not exceed the noise standard of **sixty five (65) dBA** plus the limits specified in subsection 7-2-4C of this Chapter as measured on the receptor residential property line and provided any vibration created does not endanger the public health, welfare and safety.

E. Real Property Maintenance: Noise sources associated with the maintenance of real property, provided said activities take place between the hours of seven o'clock (7:00) A.M. and eight o'clock (8:00) P.M. on any day except Sunday, or between the hours of nine o'clock (9:00) A.M. and eight o'clock (8:00) P.M. on Sunday.

F. Activities Preempted By State Or Federal Law: Any activity to the extent regulation thereof has been preempted by State or Federal law, including, but not limited to, aircraft, motor vehicles, railroads and other interstate carriers.

5.0 EXISTING NOISE CONDITIONS

To determine the existing noise levels, noise measurements have been taken in the vicinity of the project site. The field survey noted that noise within the proposed project area is generally characterized by vehicle traffic on Pacific Coast Highway, which is located adjacent to the west side of the project site as well as industrial noises created from the industrial buildings on the east side of the project site. The following describes the measurement procedures, measurement locations, noise measurement results, and the modeling of the existing noise environment.

5.1 Noise Measurement Equipment

The noise measurements were taken using three Larson Davis Model LXT1 Type 1 sound level meters programmed in "slow" mode to record the sound pressure level at 1-second intervals for 24 hours in "A" weighted form. In addition, the L_{eq} averaged over the entire measuring time and L_{max} were recorded with both sound level meters. The sound level meters and microphones were mounted on fences in the vicinity of the nearby homes west of the project site and on the project site. The noise meters were mounted on fences and poles that were placed between four and six feet above the ground and were equipped with windscreens during all measurements. The noise meters were calibrated before and after the monitoring using a Larson Davis Cal200 calibrator. All noise level measurement equipment meets American National Standards Institute specifications for sound level meters (S1.4-1983 identified in Chapter 19.68.020.AA).

Noise Measurement Locations

The noise monitoring locations were selected in order to obtain the existing noise levels on the project site and at the nearest residential uses located to the west of the project site. Descriptions of the noise monitoring sites are provided below in Table B and Appendix A includes a photo index of the study area and noise level measurement locations.

Noise Measurement Timing and Climate

The noise measurements were recorded between 12:29 p.m. on Tuesday, November 24, 2020 and 12:47 p.m. on Wednesday, November 25, 2020. At the start of the noise measurements, the sky was clear (no clouds), the temperature was 66 degrees Fahrenheit, the humidity was 42 percent, barometric pressure was 29.89 inches of mercury, and the wind was blowing around two miles per hour. Overnight, the temperature dropped to 51 degrees Fahrenheit. At the conclusion of the noise measurements, the sky was clear, the temperature was 64 degrees Fahrenheit, the humidity was 64 percent, barometric pressure was 29.93 inches of mercury, and the wind was blowing around six miles per hour.

5.2 Noise Measurement Results

The results of the noise level measurements are presented in Table B. The measured sound pressure levels in dBA have been used to calculate the minimum and maximum L_{eq} averaged over 1-hour intervals. Table B also shows the L_{eq}, L_{max}, and CNEL, based on the entire measurement time. The noise monitoring data printouts are included in Appendix B. Figure 3 shows a graph of the 24-hour noise measurements.

Table B – Existing (Ambient) Noise Level Measurements

Site No.	Site Description	Average (dBA L_{eq})		1-hr Average (dBA L_{eq}/Time)		Average (dBA CNEL)
		Daytime[1]	Nighttime[2]	Minimum	Maximum	
1	Located northwest of project site, on the wall between IHOP and multi-family homes on Indiana Court, approximately 195 feet west of Pacific Coast Highway centerline.	64.1	57.9	53.9 3:08 a.m.	65.3 3:35 p.m.	66.9
2	Located west of project site, on power pole located on southeast corner of 1637 E Palm Avenue, approximately 22 feet north of Palm Avenue centerline.	63.6	55.7	51.9 3:08 a.m.	67.3 8:44 a.m.	65.2
3	Located on light pole that is located approximately in center of project site parking lot.	60.1	53.2	52.9 5:34 a.m.	62.2 7:48 a.m.	62.2

6.0 MODELING PARAMETERS AND ASSUMPTIONS

6.1 Construction Noise

The noise impacts from construction of the proposed project have been analyzed through use of the FHWA's Roadway Construction Noise Model (RCNM). The FHWA compiled noise measurement data regarding the noise generating characteristics of several different types of construction equipment used during the Central Artery/Tunnel project in Boston. Table C below provides a list of the construction equipment anticipated to be used for each phase of construction as detailed in *Air Quality, Energy, and Greenhouse Gas Emissions Impact Analysis for the 650 PCH Project* (Air Quality Analysis), prepared by Vista Environmental, December 21, 2020.

Table C – Construction Equipment Noise Emissions and Usage Factors

Equipment Description	Number of Equipment	Acoustical Use Factor[1] (percent)	Spec 721.560 Lmax at 50 feet[2] (dBA, slow[3])	Actual Measured Lmax at 50 feet[4] (dBA, slow[3])
Demolition/Rough Grading				
Excavator	1	40	85	81
Water Truck (Dump Truck)	1	40	84	76
Rubber Tired Dozer	1	40	85	83
Rubber Tired Loader	1	40	80	79
Scraper	2	40	85	84
Tractor, Loader, or Backhoes	3	40	84	N/A
Grading/Foundation				
Crane	1	16	85	81
Forklifts (Gradall)	2	40	85	83
Rubber Tired Dozer	1	40	85	82
Tractor, Loader or Backhoe	3	40	84	N/A
Building Construction				
Crane	1	16	85	81
Forklift (Gradall)	3	40	85	83
Concrete Boom Pump	2	20	90	90
Boom Lift (Man Lift)	3	40	84	N/A
Architectural Coating				
Air Compressor	1	40	80	78
Paving/Site Improvements				
Forklifts (Gradall)	2	40	85	83
Paving Equipment	2	50	85	77
Tractor, Loader or Backhoe	1	40	84	N/A

Notes:
[1] Acoustical use factor is the percentage of time each piece of equipment is operational during a typical workday.
[2] Spec 721.560 is the equipment noise level utilized by the RCNM program.
[3] The "slow" response averages sound levels over 1-second increments. A "fast" response averages sound levels over 0.125-second increments.
[4] Actual Measured is the average noise level measured of each piece of equipment during the Central Artery/Tunnel project in Boston, Massachusetts primarily during the 1990s.
Source: Federal Highway Administration, 2006 and CalEEMod default equipment mix.

Table C also shows the associated measured noise emissions for each piece of equipment from the RCNM model and measured percentage of typical equipment use per day. Construction noise impacts to the nearby homes have been calculated according to the equipment noise levels and usage factors listed in Table C and through use of the RCNM. For each phase of construction, the nearest piece of equipment was placed at the shortest distance of the proposed activity to the nearest home and each subsequent piece of equipment was placed an additional 50 feet away. 5 dB of shielding was added to the RCNM model, in order to account for the existing walls that are located on the east property lines of the nearest homes, located on the west side of the project site.

6.2 Operational Noise

FHWA Roadway Noise Model Methodology

The proposed project would result in increases in traffic noise to the nearby roadways as well as introduce new sensitive receptors to the project site. The project impacts to the offsite roadways were analyzed through use of the FHWA Traffic Noise Prediction Model - FHWA-RD-77-108 (FHWA Model) as detailed in the *Technical Noise Supplement to the Traffic Noise Analysis Protocol,* prepared by Caltrans, September 2013. The FHWA Model arrives at a predicted noise level through a series of adjustments to the Reference Energy Mean Emission Level (REMEL). Adjustments are then made to the reference energy mean emission level to account for:

- The roadway active width (i.e., the distance between the center of the outermost travel lanes on each side of the roadway);
- The total average daily traffic (ADT) and the percentage of ADT which flows during the day, evening and night, the travel speed, the vehicle mix on the roadway, which is a percentage of the volume of automobiles, medium trucks and heavy trucks, the roadway grade, the angle of view of the observer exposed to the roadway; and
- Site conditions ("hard" or "soft" relates to the absorption of the ground, pavement or landscaping).

The following section provides a discussion of the software and modeling input parameters used in this analysis and a discussion of the resultant existing noise model.

FHWA Model Traffic Noise Prediction Model Inputs

The roadway parameters used for this study are presented in Table D. The roadway classifications are based on the City's General Plan Circulation Element. The roadway speeds are based on the posted speed limits. The distance to the nearest homes were determined by measuring the distance from the roadway centerline to the nearest residence. Since the study area is located in an area where landscaping exists along the sides of most of the analyzed roadways, soft site conditions were modeled.

Table D – FHWA Model Roadway Parameters

Roadway	Segment	General Plan Classification	Vehicle Speed (MPH)	Distance to Nearest Home[1] (feet)
Pacific Coast Highway	North of Grand Avenue	Major Arterial	40	340
Pacific Coast Highway	North of Mariposa Avenue	Major Arterial	40	340
Pacific Coast Highway	North of Palm Avenue	Major Arterial	40	200
Pacific Coast Highway	North of Maple Avenue	Major Arterial	40	250
Grand Avenue	West of Pacific Coast Highway	Secondary Arterial	35	35

Notes:
[1] Distance measured from nearest residential structure to centerline of roadway.
Source: Kimley-Horn, 2020; and City of El Segundo, 1992.

The average daily traffic (ADT) volumes were obtained from the *Traffic Impact Study for the Proposed 650 North Pacific Coast Highway Project* (Traffic Impact Study), prepared by Kimley-Horn, 2020. The ADT volumes have been provided for both without project and with project conditions for the existing, opening year 2021, and horizon year 2040. The ADT volumes used in this analysis are shown in Table E.

Table E – FHWA Model Average Daily Traffic Volumes

		Average Daily Traffic Volumes			
Roadway	Segment	Existing	Existing + Project	Year 2023	Year 2023 + Project
Pacific Coast Highway	North of Grand Avenue	56,620	56,990	69,420	69,790
Pacific Coast Highway	North of Mariposa Avenue	60,820	61,340	72,360	72,890
Pacific Coast Highway	North of Palm Avenue	61,700	62,940	73,730	74,960
Pacific Coast Highway	North of Maple Avenue	62,980	63,780	74,930	76,810
Grand Avenue	West of Pacific Coast Highway	11,860	11,940	12,240	12,320

Source: Kimley-Horn, 2020.

The vehicle mixes used in the FHWA-RD-77-108 Model are presented in Table F. The vehicle mix for State Route 1 is based on Caltrans data and the other roadways are based on typical vehicle mixes observed in Southern California.

Table F – Roadway Vehicle Mixes

Vehicle Type	Traffic Flow Distributions			
	Day (7 a.m. to 7 p.m.)	Evening (7 p.m. to 10 p.m.)	Night (10 p.m. to 7 a.m.)	Overall
Secondary Roadways (Grand Avenue)				
Automobiles	73.6%	13.6%	10.2%	97.4%
Medium Trucks	0.9%	0.9%	0.0%	1.8%
Heavy Trucks	0.4%	0.0%	0.4%	0.7%
State Route 1 (Pacific Coast Highway)				
Automobiles	67.1%	13.7%	16.1%	96.9%
Medium Trucks	1.3%	0.2%	0.6%	2.1%
Heavy Trucks	0.5%	0.1%	0.4%	1.0%

Source: Caltrans, 2019; Vista Environmental.

FHWA Model Source Assumptions

To assess the roadway noise generation in a uniform manner, all vehicles are analyzed at the single lane equivalent acoustic center of the roadway being analyzed. In order to determine the height above the road grade where the noise is being emitted from, each type of vehicle has been analyzed independently with autos at road grade, medium trucks at 2.3 feet above road grade, and heavy trucks at 8 feet above road grade. These elevations were determined through a noise-weighted average of the elevation of the exhaust pipe, tires and mechanical parts in the engine, which are the primary noise emitters from a vehicle.

6.3 Vibration

Construction activity can result in varying degrees of ground vibration, depending on the equipment used on the site. Operation of construction equipment causes ground vibrations that spread through the ground and diminish in strength with distance. Buildings in the vicinity of the project site respond to these vibrations with varying results ranging from no perceptible effects at the low levels to slight damage to the structures at the highest levels. Table G gives approximate vibration levels for particular construction equipment that is provided by the FTA, however it should be noted that not all of these equipment types would be used during construction of the proposed project. The data in Table G provides a reasonable estimate for a wide range of soil conditions.

Table G – Vibration Source Levels for Construction Equipment

Equipment		Peak Particle Velocity (inches/second)	Approximate Vibration Level (L_v)at 25 feet
Pile driver (impact)	Upper range	1.518	112
	typical	0.644	104
Pile driver (sonic)	Upper range	0.734	105
	typical	0.170	93
Clam shovel drop (slurry wall)		0.202	94
Vibratory Roller		0.210	94
Hoe Ram		0.089	87
Large bulldozer		0.089	87
Caisson drill		0.089	87
Loaded trucks		0.076	86
Jackhammer		0.035	79
Small bulldozer		0.003	58

Source: Federal Transit Administration, 2018.

The construction-related vibration impacts have been calculated through the vibration levels shown above in Table G and through typical vibration propagation rates. The equipment assumptions were based on the equipment lists provided above in Table C.

7.0 IMPACT ANALYSIS

7.1 CEQA Thresholds of Significance

Consistent with the California Environmental Quality Act (CEQA) and the State CEQA Guidelines, a significant impact related to noise would occur if a proposed project is determined to result in:

- Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies;
- Generation of excessive groundborne vibration or groundborne noise levels; or
- For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels.

7.2 Generation of Noise Levels in Excess of Standards

The proposed project would not generate a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. The following section calculates the potential noise emissions associated with the temporary construction activities and long-term operations of the proposed project and compares the noise levels to the City standards.

Construction-Related Noise

The construction activities for the proposed project are anticipated to include demolition and rough grading of the existing surface parking lot, grading and foundation construction, building renovation and construction, application of architectural coatings, and paving and site improvements. Noise impacts from construction activities associated with the proposed project would be a function of the noise generated by construction equipment, equipment location, sensitivity of nearby land uses, and the timing and duration of the construction activities. The nearest sensitive receptors to the project site are residents at the multi-family homes located as near as 270 feet west of the project site.

Section 7-2-10(D) of the City's Municipal Code exempts construction noise from the City noise standards provided that construction activities occur between 7:00 a.m. and 6:00 p.m., except Sundays and Federal holidays and such activities do not exceed 65 dBA at the nearby residential properties.

Construction noise impacts to the nearby sensitive receptors have been calculated through use of the RCNM and the parameters and assumptions detailed in Section 6.1 of this report including Table C – Construction Equipment Noise Emissions and Usage Factors. The results are shown below in Table H and the RCNM printouts are provided in Appendix C.

Table H – Construction Noise Levels at the Nearby Sensitive Receptors

Construction Phase	Construction Noise Level (dBA Leq) at:	
	Homes to Northwest	Homes to West
Demolition/Rough Grading	63	63
Grading/Foundation	63	63
Building Construction	62	63
Architectural Coating	54	54
Paving/Site Improvements	64	64
City Construction Noise Threshold[1]	**65**	**65**
Exceed Thresholds?	**No**	**No**

Source: RCNM, Federal Highway Administration, 2006

Table H shows that greatest construction noise impacts would be as high as 64 dBA Leq during the paving and site improvements phase at the nearest homes to the northwest and west of the project site. All calculated construction noise levels shown in Table H are within the City's construction noise standard of 65 dBA. Therefore, through adherence to the limitation of allowable construction times provided in Section 7-2-10(D) of the Municipal Code, construction-related noise levels would not exceed any standards established in the General Plan or Noise Ordinance nor would construction activities create a substantial temporary increase in ambient noise levels from construction of the proposed project. Impacts would be less than significant.

Operational-Related Noise

The proposed project would consist of the renovation and minor alteration of two existing office buildings at 650 North Pacific Coast Highway ("Building A") and 700 North Pacific Coast Highway ("Building B"). In addition, the project includes development of a new 7-story office building with an integrated parking structure with 1,185 parking spaces ("Building C"). Potential noise impacts associated with the operations of the proposed project would be from project-generated vehicular traffic on the nearby roadways and from onsite activities, which have been analyzed separately below.

Roadway Vehicular Noise

Vehicle noise is a combination of the noise produced by the engine, exhaust and tires. The level of traffic noise depends on three primary factors (1) the volume of traffic, (2) the speed of traffic, and (3) the number of trucks in the flow of traffic. The proposed project does not propose any uses that would require a substantial number of truck trips and the proposed project would not alter the speed limit on any existing roadway so the proposed project's potential offsite noise impacts have been focused on the noise impacts associated with the change of volume of traffic that would occur with development of the proposed project.

Since neither the General Plan nor the CEQA Guidelines define what constitutes a "substantial permanent increase to ambient noise levels", this impact analysis has utilized guidance from the Federal Transit Administration for a moderate impact that has been detailed above in Table A that shows that the project contribution to the noise environment can range between 0 and 7 dB, which is dependent on the existing noise levels.

The potential offsite traffic noise impacts created by the on-going operations of the proposed project have been analyzed through utilization of the FHWA model and parameters described above in Section 6.2 and the FHWA model traffic noise calculation spreadsheets are provided in Appendix D. The proposed project's potential offsite traffic noise impacts have been analyzed for the existing year and opening year 2023 conditions, which are discussed below.

Existing Year Conditions

The proposed project's potential offsite roadway noise impacts have been calculated through a comparison of the existing scenario to the existing with project scenario. The results of this comparison are shown in Table I.

Table I – Project Traffic Noise Contributions for Existing Year Conditions

		dBA CNEL at Nearest Receptor[1]				
Roadway	Segment	Existing	Existing Plus Project	Project Contribution	Increase Threshold[2]	Significant Impact?
Pacific Coast Highway	North of Grand Avenue	60.3	60.3	0.0	+2 dBA	No
Pacific Coast Highway	North of Mariposa Avenue	60.6	60.6	0.0	+2 dBA	No
Pacific Coast Highway	North of Palm Avenue	64.2	64.3	0.1	+2 dBA	No
Pacific Coast Highway	North of Maple Avenue	62.8	62.8	0.0	+2 dBA	No
Grand Avenue	West of Pacific Coast Highway	67.1	67.1	0.0	+1 dBA	No

Notes:
[1] Distance to nearest residential use shown in Table D, does not take into account existing noise barriers.
[2] Increase Threshold obtained from the FTA's allowable noise impact exposures detailed above in Table A..
Source: FHWA Traffic Noise Prediction Model FHWA-RD-77-108.

Table I shows that for the existing conditions, the proposed project's permanent noise increases to the nearby homes from the generation of additional vehicular traffic would not exceed the traffic noise increase thresholds detailed above. Therefore, the proposed project would not result in a substantial permanent increase in ambient noise levels for the existing year conditions. Impacts would be less than significant.

Opening Year 2023 Conditions

The proposed project's potential offsite roadway noise impacts have been calculated through a comparison of the opening year 2021 scenario to the opening year 2021 with project scenario. The results of this comparison are shown in Table J.

Table J – Project Traffic Noise Contributions for Opening Year 2023 Conditions

Roadway	Segment	dBA CNEL at Nearest Receptor[1] Year 2023	Year 2023 Plus Project	Project Contribution	Increase Threshold[2]	Significant Impact?
Pacific Coast Highway	North of Grand Avenue	60.3	60.3	0.0	+2 dBA	No
Pacific Coast Highway	North of Mariposa Avenue	60.6	60.6	0.0	+2 dBA	No
Pacific Coast Highway	North of Palm Avenue	64.2	64.3	0.1	+2 dBA	No
Pacific Coast Highway	North of Maple Avenue	62.8	62.8	0.0	+2 dBA	No
Grand Avenue	West of Pacific Coast Highway	67.1	67.1	0.0	+1 dBA	No

Notes:
[1] Distance to nearest residential use shown in Table D, does not take into account existing noise barriers.
[2] Increase Threshold obtained from the FTA's allowable noise impact exposures detailed above in Table A..
Source: FHWA Traffic Noise Prediction Model FHWA-RD-77-108.

Table J shows that for the opening year 2023 conditions, the proposed project's permanent noise increases to the nearby homes from the generation of additional vehicular traffic would not exceed the traffic noise increase thresholds detailed above. Therefore, the proposed project would not result in a substantial permanent increase in ambient noise levels for the opening year 2023 conditions. Impacts would be less than significant.

Onsite Noise Sources

The operation of the proposed project may create an increase in onsite noise levels from noise impacts from rooftop mechanical equipment, parking lots, and delivery trucks. Section 7-2-4(A) of the City's Municipal Code limits the noise created on the project site at the nearby residential properties to the ambient noise level plus 5 dBA and Section 7-2-4(B) of the City's Municipal Code limits the noise created on the project site at the nearby commercial and industrial properties to the ambient noise level plus 8 dBA. The nearest sensitive receptors to the project site are: (1) Homes to the northwest that are located as near as 270 feet from the project site; (2) Homes to the west that are located as near as 270 feet from the project site; and (3) The adjacent commercial uses that are adjacent to the south.

In order to determine the noise impacts from the operation of rooftop mechanical equipment, parking lots, and delivery trucks, reference noise measurements were taken of each noise source and are shown in Table K and the reference noise measurements are provided in Appendix E. The noise levels from each source were calculated through use of standard geometric spreading of noise from a point source with a drop-off rate of 6 dB for each doubling of the distance between the source and receiver.

Table K – Operational Noise Levels at the Nearby Land Uses

Noise Source	Homes to Northwest		Homes to West		Commercial to South	
	Distance - Source to Homes (feet)	Noise Level[1] (dBA Leq)	Distance - Source to Homes (feet)	Noise Level[1] (dBA Leq)	Distance - Source to Commercial (feet)	Noise Level[1] (dBA Leq)
Rooftop Equipment[2]	310	31	300	31	60	45
Parking Lot[3]	310	27	380	25	60	42
Truck Delivery[4]	480	31	380	33	60	49
Combined Noise Levels		**35**		**35**		**51**
City Noise Standard (day/night)		**69/63**		**69/61**		**68/61**
Exceed City Noise Standard?		**No/No**		**No/No**		**No/No**

Notes:
[1] The noise levels were calculated through use of standard geometric spreading of noise from a point source with a drop-off rate of 6 dB for each doubling of the distance between the source and receiver. Does not account for noise reduction features such as buildings and walls.
[2] Rooftop equipment is based on a reference noise measurement of 66.6 dBA at 10 feet.
[3] Parking lot is based on a reference noise measurement of 63.1 dBA at 5 feet.
[4] Truck delivery is based on a reference noise measurement of 54.8 dBA at 30 feet.
[5] City Noise Standard based on ambient noise level shown in Table B plus 5 dB at the residential uses and plus 8 dB for the commercial uses.

Table K shows that the proposed project's onsite operational noise from the anticipated onsite noise sources would not exceed the applicable noise standards at the nearby residential and commercial uses. Therefore, operational onsite noise impacts would be less than significant

Level of Significance

Less than significant impact.

7.3 Generation of Excessive Groundborne Vibration

The proposed project would not expose persons to or generation of excessive groundborne vibration or groundborne noise levels. The following section analyzes the potential vibration impacts associated with the construction and operations of the proposed project.

Construction-Related Vibration Impacts

The construction activities for the proposed project are anticipated to include demolition and rough grading of the existing surface parking lot, grading and foundation construction, building renovation and construction, application of architectural coatings, and paving and site improvements. Vibration impacts from construction activities associated with the proposed project would typically be created from the operation of heavy off-road equipment. The nearest offsite structure where people may sit, which makes them much more susceptible to vibration, would be the commercial uses, located as near as 30 feet south of the project site.

Section 7-2-9 of the City's Municipal Code restricts the creation of vibration which is perceptible without the use of instruments to any reasonable person on normal sensitivity. However, since neither the Municipal Code nor the General Plan provides a quantifiable vibration threshold level, Caltrans guidance that is detailed above in Section 4.2 has been utilized, which defines the threshold of perception from transient sources at 0.25 inch per second PPV.

The primary source of vibration during construction would be from the operation of a bulldozer. From Table G above a large bulldozer would create a vibration level of 0.089 inch per second PPV at 25 feet. Based on typical propagation rates, the vibration level at the nearest homes (20 feet away) would be 0.11 inch per second PPV. The vibration level at the nearest offsite structure where people likely sit, would be below the 0.25 inch per second PPV threshold detailed above. Impacts would be less than significant.

Operations-Related Vibration Impacts

The proposed project would consist of the renovation and minor alteration of two existing office buildings at 650 North Pacific Coast Highway ("Building A") and 700 North Pacific Coast Highway ("Building B"). In addition, the project includes development of a new 7-story office building with an integrated parking structure with 1,185 parking spaces ("Building C"). The proposed project would result in the operation of delivery trucks on the project site, which are a known source of vibration. The nearest offsite structure where people may sit, which makes them much more susceptible to vibration, would be the commercial uses, located as near as 30 feet south of the project site of the nearest onsite driveway.

Caltrans has done extensive research on vibration level created along freeways and State Routes and their vibration measurements of roads have never exceeded 0.08 inches per second PPV at 15 feet from the center of the nearest lane, with the worst combinations of heavy trucks. Based on typical propagation rates, the vibration level at the nearest commercial buildings (30 feet away) would by 0.037 inch per second PPV. Therefore, vibration created from operation of the proposed project would be within the 0.25 inch per second PPV threshold of detailed above. Impacts would be less than significant.

Level of Significance

Less than significant impact.

7.4 Aircraft Noise

The proposed project would not expose people residing or working in the project area to excessive noise levels from aircraft. The nearest airport is Los Angeles International Airport that is located as near as 0.5 mile north of the project site, however it should be noted that the Airport's runways run in generally in a east-west direction and the project site is located approximately in the middle of the Airport, so take-offs and landings do not occur over the project site. As detailed in *3Q19 Los Angeles International Airport – California State Airport Noise Standards Quarterly Report,* prepared November 13, 2019 (found at: https://www.lawa.org/lawa-environment/noise-management/lawa-noise-management-lax/quarterly-noise-reports-and-contour-maps), the project site is located outside of the 65 dBA CNEL noise contours of Los Angeles International Airport. Therefore aircraft noise impacts would be less than significant.

Level of Significance

Less than significant impact.

VEHICLE MILE TRAVELED ANALYSIS
FOR THE PROPOSED 650 PCH PROJECT
IN THE CITY OF EL SEGUNDO

INTRODUCTION

Senate Bill (SB) 743 was approved by the California legislature in September 2013. SB 743 requires changes to California Environmental Quality Act (CEQA), specifically directing the Governor's Office of Planning and Research (OPR) to develop alternative metrics to the use of vehicular "level of service" (LOS) for evaluating transportation projects. OPR has updated guidelines for CEQA, written a technical advisory for evaluating transportation impacts in CEQA and has set a deadline of July 1, 2020 for local agencies to update their CEQA transportation procedures. OPR has recommended that Vehicle Miles Travelled (VMT) replace LOS as the primary measure of transportation impacts. The City of El Segundo is in the process of adopting new Transportation Impact Guidelines and now relies on VMT as the measure for determining a project significant transportation impact under the CEQA process.

This technical memorandum was prepared to document the VMT analysis for the 650 PCH project following the OPR Technical Advisory on Evaluating Transportation Impacts (Governor's Office of Planning and Research, 2018) and the draft City of El Segundo SB 743 Implementation Guidelines.

PROJECT OVERVIEW

The project is located in the north-central portion of the City of El Segundo, in the County of Los Angeles. The Project Site is located at 650 and 700 North Pacific Coast Highway (Buildings A and B, respectively) and 737 Carl Jacobson Way (Building D). In total, the project site consists of seven contiguous parcels. The applicant proposes to renovate and perform minor alterations to buildings A and B and demolish the existing surface parking lot to construct a 122,156 square-foot office building (Building C) with a 1,185-space parking structure. In addition, the Project will consolidate the seven parcels of land into a single 7.258-acre ground parcel through the proposed Vesting Tentative Parcel Map No. 83129. The gross square footages for each building in the Project are as follows:

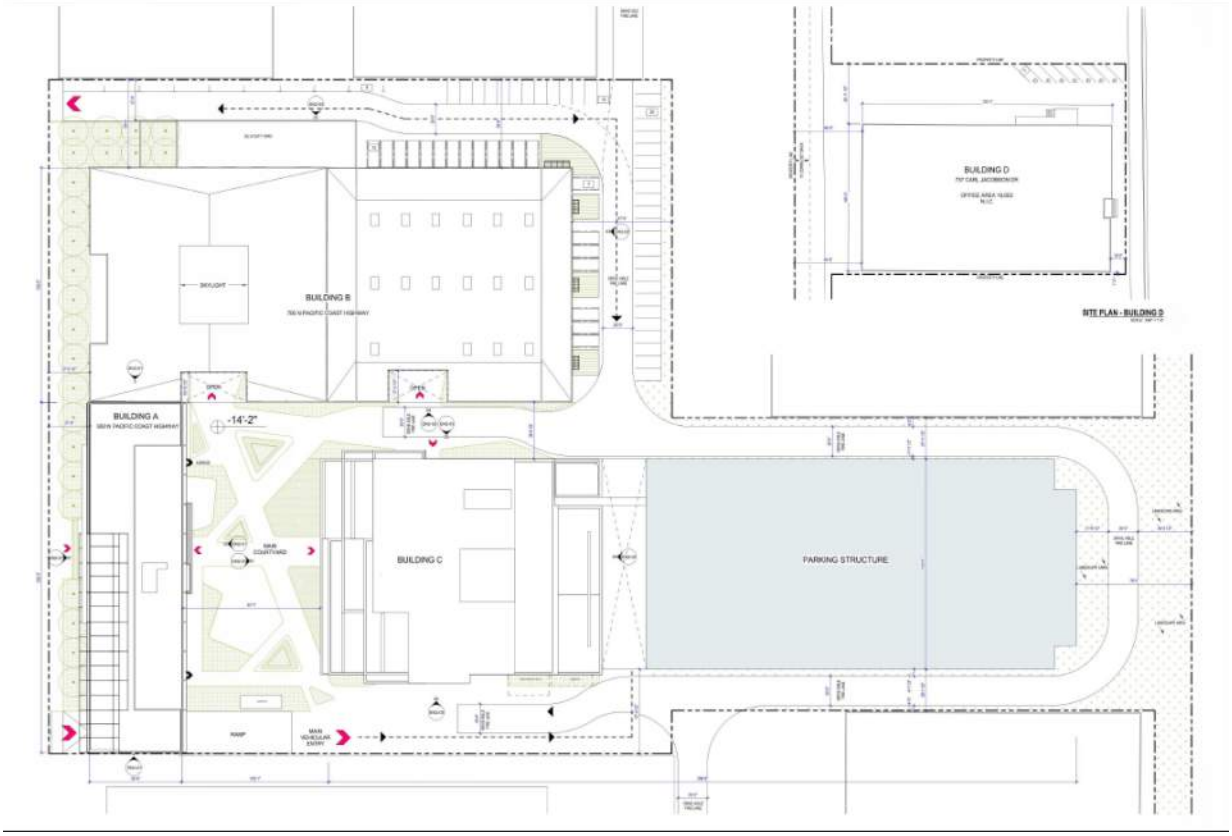
- Building A: 99,916 square-feet of floor area (net addition of 1,031 square feet from existing 98,885 square-feet)
- Building B: 65,120 square-feet of floor area (net reduction of 4,572 square feet from existing 69,692 square-feet)
- Building C: 122,156 gross square feet, with an integrated 1,185-space parking structure
- Building D: 16,652 square-feet of floor area (no proposed changes)

Figure 1 shows the project location and Figure 2 shows a Conceptual Site Layout.

Figure 1 – Project Location

Source: Michael Baker International

Figure 2 – Conceptual Site Layout



Vehicular access provisions for the project site would be provided via two existing driveways on Pacific Coast Highway. One driveway is located on the north side of Building B and the other is on the south side of Building A. Both driveways are unsignalized and provide right-in-right-out only access due to a median on Pacific Coast Highway. An additional driveway is located on Mariposa Avenue which is reserved for emergency vehicle access only that will wrap around the exterior of the proposed parking structure and exit through a gate continuing onto the property at 1910 East Maple Avenue north of the project site.

The proposed parking structure would provide a total of 1,185 parking spaces to serve the office uses at the Project Site and potentially other nearby parcels that do not have adequate parking. In total, the Project Site would provide 1,256 spaces when including the 71 existing and proposed surface parking spaces on the north and east side of Building B. The Project would also include 128 short-term and long-term bicycle parking spaces. Loading space would be provided via three loading docks, located on the south side of Building C.

PROJECT AREA

The area surrounding the project is mostly corporate offices with some general commercial uses. The project site is bounded by Sepulveda Boulevard, a major arterial and truck route, Mariposa Avenue and Lairport Street, which are secondary arterials, and Maple Avenue, a collector street. Mariposa Avenue is also a designated El Segundo bike route.

The project site is well served by public transit provided by Los Angeles County Metropolitan Transportation Authority (Metro). Bus stops located at PCH and Mariposa Avenue serve the project with Metro Line 232. Metro Line 232 operates along PCH and Mariposa Avenue within the project vicinity. On weekdays Line 232 operates from 4:30 AM to 11:47 PM, with approximate 30-minute headways throughout the day. On Saturdays, Sundays and holidays, Line 232 operates from approximately 4:38 AM to 1:01 AM, with 30-minute headways throughout the day. The Mariposa Metro Station, served by the Metro C Line, at the intersection of E Mariposa Avenue and N Noah Street is also located within half mile distance of the Project site.

VEHICLE MILES TRAVELED THRESHOLDS FOR EL SEGUNDO

The OPR Technical Advisory (Governor's Office of Planning and Research, 2018) recommends Vehicle Miles Traveled (VMT) thresholds set to 15% below the regional average. The City of El Segundo is part of Los Angeles County and is a member city of the Southern California Association of Governments (SCAG), which maintains the regional travel demand model as part of the Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS). Therefore, the SCAG area is considered the region to which the regional average is derived from.

The draft City of El Segundo SB 743 Implementation Guidelines was created to apply both SB 743 and the OPR Technical Advisory (Governor's Office of Planning and Research, 2018) to the City specifically and define the City's guidelines to identify transportation impacts under CEQA.

The VMT threshold criteria for Office uses, per the draft City of El Segundo SB 743 Implementation Guidelines , is summarized in Table 1.

Table 1 - VMT Threshold Criteria for Office

Land Use	Threshold of Significance
Office	15% below existing SCAG Home-based Work (HBW) VMT per employee

Based on this criteria shown in Table 1, the VMT threshold of significance for office land use in the City of El Segundo has been established and summarized in Table 2. The numerical threshold value shown in Table 2 is based on the draft City of El Segundo SB 743 Implementation Guidelines.

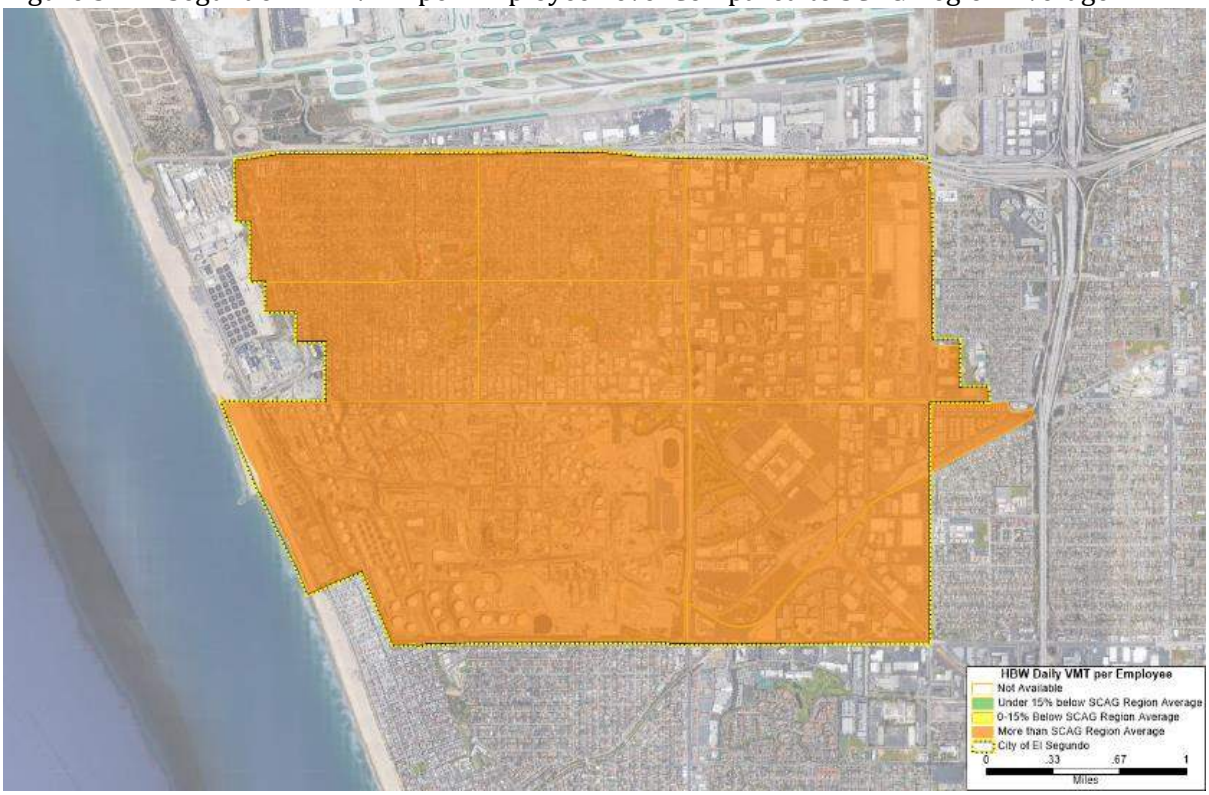
Table 2 - VMT Thresholds of Significance

Land Use	VMT Threshold	Basis
Office	17.0 Work VMT/Employee[1]	15% below existing SCAG HBW VMT per employee

Improvements to methods and data as well as other modeling modifications may result in periodic updates to the numerical threshold that is seen both here and in the draft City of El Segundo SB 743 Implementation Guidelines. However, the criteria of 15% below existing SCAG HBW VMT per Employee levels remains the same. More information on the methodology of how this numerical threshold was calculated can be found in the draft City of El Segundo SB 743 Implementation Guidelines.

Figure 3 shows that the HBW VMT per employee levels in the City are higher compared to the SCAG Region Average.

Figure 3 – El Segundo HBW VMT per Employee Level Compared to SCAG Region Average



VEHICLE MILES TRAVELED SCREENING

This section documents VMT/ SB 743 considerations for the project. The OPR Guidelines provide details on appropriate screening thresholds that can be used to identify when a proposed land

[1] Work VMT specifically applies to commute trips as represented in the Travel Demand Model.

use project is anticipated to result in a less than significant impact without conducting a more detailed level analysis. Screening thresholds are broken into the following three steps:

1. Transit Priority Area (TPA) Screening
2. Low VMT Area Screening
3. Small Project Screening

A land use project needs only meet one of the above screening thresholds to be presumed to result in not significant impact under CEQA pursuant to SB 743.

Transit Priority Area (TPA) Screening

As described in the OPR Guidelines, projects located within half mile from an existing major transit stop or within half of a mile from an existing stop along a high-quality transit corridor can be screened out. A major transit stop is described as a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods. A high-quality transit corridor is described as a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.

The OPR Guidelines state that this presumption may NOT be appropriate if the project:

- Has a Floor Area Ratio (FAR) of less than 0.75;
- Includes more parking for use by residents, customers, or employees of the project than required by the jurisdiction (if the jurisdiction requires the project to supply parking);
- Is inconsistent with the applicable Sustainable Communities Strategy (as determined by the City), with input from the Metropolitan Planning Organization);
- Replaces affordable residential units with a smaller number of moderate-or high-income residential units.

The project site is well served by public transit provided by Los Angeles County Metropolitan Transportation Authority (Metro). It is located within a half mile distance to Mariposa Metro Station, served by the Metro C Line, located at the intersection of E Mariposa Avenue and N Noah Street. The C Line has seven to eight minutes headways during peak hours on the weekdays, 15-minute headways during the midday and all day on the weekends, and 20-minute headways at night. Metro Line 232 operates along PCH and Mariposa Avenue within the project vicinity. On weekdays Line 232 operates from 4:30 AM to 11:47 PM, with approximate 30-minute headways throughout the day. On Saturdays, Sundays and holidays, Line 232 operates from approximately 4:38 AM to 1:01 AM, with 30-minute headways throughout the day.

OPR also has a beta tool named Site Check that allows users to see the potential accelerated pathways to CEQA compliance that may apply based on the location of the parcels. One of the

screening criteria that it checks for is whether the project is in a TPA. As seen in Appendix A, OPR's Site Check does state that the project meets the TPA criteria.

Based on the OPR Guidelines, the Project may be presumed to have a less than significant impact absent substantial evidence to the contrary. The Project does not meet any of the criteria that would disqualify it from TPA screening with the exception of parking supply. As previously described the proposed Project would provide a total of 1,256 parking spaces to serve the office uses at the Project Site and potentially other nearby parcels that do not have adequate parking. Although the Project provides in excess of 663 parking spaces required per El Segundo Municipal code, Ord. 1444, 8-3-2010, not all the parking spaces are intended to be used by the employees and visitors of the Project. The additional parking spaces are intended to accommodate nearby parcels that are potential underserved. As such, the parking provided may not necessarily disqualify the project from screening out from TPA screening. However, in abundance of caution and to provide a conservative analysis, a full VMT analysis has been conducted.

Low VMT Area Screening

Per the OPR Technical Advisory, "residential and office projects that locate in areas with low VMT, and that incorporate similar features (i.e., density, mix of uses, transit accessibility), will tend to exhibit similarly low VMT. Maps created with VMT data, for example from a travel survey or a travel demand model, can illustrate areas that are currently below threshold VMT. Because new development in such locations would likely result in a similar level of VMT, such maps can be used to screen out residential and office projects from needing to prepare a detailed VMT analysis."

As seen in Figure 3 earlier, the HBW VMT/Employee level TAZ in which the project is located is higher than the SCAG Region average.

Small Project Screening

Per the OPR Technical Advisory, "absent substantial evidence indicating a project would generate a potentially significant level of VMT, or inconsistency with a Sustainable Communities Strategy (SCS) or general plan, projects that generate or attract fewer than 110 trips per day generally may be assumed to cause a less-than-significant transportation impact."

Trip Generation estimates for the existing use and the proposed project are based on the Institute of Transportation Engineers (ITE) Trip Generation Manual (10th Edition) trip rates for General Office Building (ITE Land Use 710). In addition to the existing use, the project is expected to generate 1,155 daily trips, well above the 110 daily trips screening criteria.

VMT ANALYSIS

Methodology

The calculation of vehicle miles traveled has two components – the total number of trips generated and the average trip length of each vehicle. A Travel Demand Model is a useful tool to

estimate VMT as it considers interaction between different land uses based on socio-economic data such as population, households and employment. Travel Demand Models (TDMs) are broadly considered to be amongst the most accurate of available tools to assess regional and sub-area VMT. Southern California Association of Governments (SCAG) maintains the regional travel demand model as part of the Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS), which consists of six counties (Los Angeles, Ventura, Orange, San Bernardino, Riverside, Imperial) in the southern California region. The latest available SCAG travel demand model developed as part of the 2016 RTP/SCS was determined to be the best fit for developing the VMT thresholds considering the geographic location of the City and the detailed roadway and transit networks in the model.

The 2016 Base Year model scenario was used for the baseline conditions and 2040 Plan model scenario was used for the cumulative conditions in the City. Out of the six counties included in the model Los Angeles county is the major contributor of the trips to and from the City during a typical weekday. Trips outside of the SCAG region were estimated from the external stations surrounding the model region and were determined to be excluded from the VMT analysis as those were less than 1% of the Citywide trip generation.

Before beginning the Citywide VMT analysis the zonal structure and various components of the SCAG model were thoroughly reviewed to make the best use of model results to determine the VMT thresholds.

Model Zone Structure

VMTs were computed at Traffic Analysis Zone (TAZ) level to determine the thresholds as well as compare City's performance against the County and entire SCAG region. SCAG model uses two-tiered zone structure the allows for micro and macro-scale analysis and reporting. The first tier contains 4,109 internal zones, while the second tier contains 11,267 internal zones. All Tier 2 zones nest within Tier 1 zones. The model generates outputs for different components that vary by the two tiers. The results that are used to compute VMT are mainly focused at Tier 1 level, therefore the VMT analysis was conducted at the Tier 1 TAZ level.

Socio-Economic Data

Socioeconomic data (SED) and other model inputs are contained in each TAZ. Out of several different variables in the model SED, the VMT analysis mainly focused on population, number of households and types of employment that are used in the trip generation component. VMT computation was focused on the fact that the model uses employment variables by 3 income levels to determine commute trips and employment variables by 13 industries to determine rest of the trips. Employment variables used in the model are listed below.

Employment by Income Level:

1. Low Income Employment (less than $34,999)
2. Medium Income Employment ($35,000 to $74,999)
3. High Income Employment ($75,000 or more)

Employment by Industry type:

1. Agriculture and mining
2. Construction
3. Manufacturing
4. Wholesale trade
5. Retail trade
6. Transportation, warehousing, and utility
7. Information
8. Financial activities
9. Professional and business services
10. Education and health services
11. Leisure and hospitality services
12. Other services
13. Public administration

It should be noted that not all of the employment variables by industry type in the model are used for trip generation, therefore commute VMT was calculated for few land use types were applicable using the trip generation rates that were used in the model.

Trip Generation

The model runs a series of complex steps to estimate daily trip productions and attractions by various trip purposes and market sectors for each TAZ. The trip purposes are listed below.

Model Trip Purpose:

1. Home-Based Work Direct (HBWD)
2. Home-Base Work Strategic (HBWS)
3. Home-Based School (HBSC)
4. Home-Based College and University (HBCU)
5. Home-Based Shopping (HBSH)
6. Home-Based Social-Recreational (HBSR)
7. Home-Based Serving-Passenger (HBSP)
8. Home-Based Other (HBO)
9. Work-Based Other (WBO)
10. Other-Based Other (OBO)

The production model uses several variables such as number of workers, household income, age, household size and car availability depending on the trip purpose. Trip productions for every TAZ in the model were compiled separately by each trip purpose. The attraction model uses income categories of employment for the HBW trip purpose, whereas it uses 13 categories of employment for all non-HBW trip purposes. The attraction model estimates trip attractions to each TAZ by regression coefficients that varies by employment type. Trip attractions for every TAZ were compiled by each purpose and by each employment type based on these regression coefficients.

Person Trips, Vehicle Occupancy, Trip Distance

Trip productions and attractions were compiled after the mode choice step, and only auto trips were used for the analysis. Since these auto trips are person trips, vehicle occupancy factors were applied for carpool 2 and carpool 3+ auto person trips. Model uses separate factors for carpool 3+ for each trip purpose. After the vehicle trip productions and attractions were computed for each trip purpose, trip lengths were applied for each zone pair from the skim matrices in the model to compute the production and attraction VMT by purpose.

VMT by Land Use Type

The residential VMT was computed by combining the production VMT for all the Home-Based trip purposes. VMT for non-residential land uses was computed from the attraction VMT for only the Home-Based-Work trip purpose.

VMT Calculations

The residential VMT was computed by combining the production VMT for all the Home-Based trip purposes. Commute VMT was computed from the attraction VMT by Home-Based Work trip purposes. Residential and commute VMT by each TAZ were computed and average VMT were determined by City County, and Region levels to determine the thresholds.

PROJECT VMT

The major trip purposes of the site in terms of their trip length and frequency should be considered to evaluate this type of facility. Given the description, two types of trips were broadly considered for this development given its context: (1) employee commute trips; (2) other trips related to functioning of the business and/or its employee. The following discussion is provided regarding these two broad trip types.

Employee commute trips. These are the primary automobile trips associated with employment generating uses such as the proposed project. This facility is expected to provide additional jobs and some related trips to the area. The efficiency of VMT associated with employee commute trips has been assessed based on the City's draft guidelines consistent with the SCAG Travel Demand Model.

Other trips. These are often the smallest number and shortest distance of trips for a facility like this and include a broad range of trip types, such as, employee lunches off-site, maintenance teams for on-site infrastructure, office supply deliveries, etc. As such their impact to the overall VMT of the site is likely minimal. As such it is not likely that they are impactful to the local transportation system and are secondary to the commute trips.

The same model used for developing the thresholds was used to calculate the Project VMT consistent with the OPR guidelines. Adjustments in socio-economic data (employment) were

made to the appropriate traffic analysis zone (TAZ) within the SCAG model to reflect the project's proposed land use. The step-by-step guide to these adjustments can be seen in Appendix B.

Project Home-Based Work (HBW) VMT per Employee

The home-based work (HBW) VMT per employee is the HBW attraction VMT divided by the number of employees derived from the SCAG model and is based on those employee commute trips discussed earlier. The HBW VMT per Employee is used to measure efficiency of VMT generated by employment-based uses.

The project is located in TAZ #21138000. Based on the SCAG 2016 RTP/SCS travel demand model, TAZ #21138000 has 12,137 employees that produce 262,958 HBW VMT. Therefore, the Existing HBW VMT per Employee calculated is 21.7. As seen in Table 3, the project adds an additional 473 employees that produce an additional 12,375 HBW VMT.

Table 3 – Project HBW VMT/Emp

TAZ #21138000	Total Employees	HBW VMT	HBW VMT / Emp
Existing	12,137	262,958	21.7
Project	473	12,375	-
Existing Plus Project	12,610	275,333	21.8

Therefore, the Project HBW VMT per Employee calculated based on the SCAG model is 21.8.

Potential Project Impacts

As shown in Table 4, the project's HBW VMT per Employee would not meet the 15% below regional average threshold. As such, the project's transportation impact is potentially significant based on the OPR recommended thresholds.

Table 4 – VMT Impact Evaluation

Threshold Option	Threshold	Project	Change in VMT	Potentially Significant?
HBW VMT Employee	17.0	21.8	+4.8	Yes

Mitigation

If a significant transportation impact is identified, feasible mitigation measures to avoid or reduce the impact must be identified. CEQA requires that the mitigation measures are included in the project's environmental analysis. OPR provides a list of potential measures to reduce VMT but gives the lead agency full discretion in the selection of mitigation measures.

For an individual development project, VMT mitigations will typically require the preparation of a transportation demand management (TDM) program. A TDM program is a combination of strategies to reduce VMT. The program is created by an applicant for their land use project based

on a list of strategies agreed to with the City of El Segundo. The City of El Segundo is developing a list of potential TDM strategies appropriate for their jurisdiction guided by the California Air Pollution Control Officers Association (CAPCOA) recommendations found in the 2010 publication Quantifying Greenhouse Gas Mitigation Measures (California Air Pollution Control Officers Association (CAPCOA), 2010).

In terms of commute trip reduction, the 4.8 miles per employee is equivalent to 254 daily trips (22% of 1,155 daily trips estimated for the project). The applicant shall prepare and implement a Project-specific TDM program that will reduce the Project's VMT per employee by a minimum of 4.8 miles or 254 daily trips based on a preliminary list of applicable strategies described previously that provide feasible means to adequately reduce the Project VMT. These elements may change or be adjusted to adapt to changing commute trends and to maximize the efficiency and performance of the program.

Transportation demand management (TDM) strategies have been evaluated for reducing VMT impacts determined to be potentially significant and a list of potential strategies with the City's max VMT reduction and equivalent daily trip reduction that could be implemented by the Project are listed below:

1. **Safe and Well-Lit Access to Transit**: Enhance the route for people walking or bicycling to nearby transit stops located on PCH and Mariposa Avenue. **(2%) or up to 23 trips.**
2. **Transit Subsidies**: Provide subsidization of transit fare for employees of the project site. This strategy helps reduce single-occupancy vehicle trips by utilizing transit service already present in the project area. **(10%) or up to 116 trips.**
3. **Travel Behavior Change Program**: Provide a web site that allows employees to research other modes of transportation for commuting. **(4%) or up to 46 trips.**
4. **Promotions & Marketing**: Provide marketing and promotional tools to educate and inform travelers about site-specific transportation options and the effects of their travel choices with passive educational and promotional materials. **(4%) or up to 46 trips.**
5. **Commute Assistance Center**: Provide a computer kiosk that allows employees to research other modes of transportation for commuting. **(4%) or up to 46 trips.**
6. **Preferential Carpool / Vanpool Parking Spaces**: Provide reserved carpool/vanpool spaces closer to the building entrance. **(10%) or up to 116 trips.**
7. **Passenger Loading Zones**: Provide passenger loading zones for easy access to carpools or vanpools. **(5%) or up to 58 trips.**
8. **Bike Share**: Implement bike share to allow people to have on-demand access to a bicycle, as-needed. **(0.25%) or up to 3 trips.**
9. **Bike Parking and Facilities**: Include secure bike parking and showers to provide additional end-of-trip bicycle facilities to support safe and comfortable bicycle travel. Provide on-site bicycle repair tools and space to use them supports on-going use of bicycles for transportation. **(3%) or up to 35 trips.**

10. **Traffic Calming Improvements:** Implement traffic calming measures throughout and around the perimeter of the project site that encourage people to walk, bike, or take transit within the development and to the development from other locations. **(1%) or up to 12 trips.**
11. **Pedestrian Network Improvements**: Implement pedestrian network improvements throughout and around the project site that encourages people to walk. **(2%) or up to 23 trips.**
12. **Parking Cash Out**: Provide employees a choice of forgoing current parking for a cash payment to be determined by the employer. **(5%) or up to 58 trips.**
13. **Alternative Work Schedule**: Implement Flextime, Compressed Work Week (CWW), and staggered shifts for employees. **(15%) or up to 173 trips.**
14. **Telecommuting**: Provide telework option to employees by use of telecommunications as a substitute for physical travel. **(22%) or up to 254 trips.**

Additional City of El Segundo TDM measures are provided in Appendix C.

It is recommended that the TDM program be implemented for the entire campus (i.e., Buildings A, B and C) to reduce the overall VMT in the region and thus reducing the Project's potential VMT impact below the threshold. The total trip generation estimate for the campus is 2,797 daily trips. A reduction of 254 daily trips or 9.1% should be achieved for the entire project using a combination of the TDM strategies discussed above to bring the project's potential VMT impact to less than significant levels.

TDM Plan

It is recommended that the Project applicant prepare a TDM Plan in consultation with the City to develop a TDM program to include a combination of the strategies listed above or other strategies as appropriate. The TDM program will be comprised of three major components:

1. Education: The Education component focuses on awareness and communication to reduce vehicle trips to the building by employees.
2. Program Elements: The TDM program shall implement elements that will promote carpool, bicycling, walking, and transit in place of individual vehicle trips to and from the Project. These elements may change or be adjusted to adapt to changing commute trends and to maximize the efficiency and performance of the program.
3. Monitoring: To ensure that the TDM program is working effectively and achieving its goals, regular monitoring of commute patterns and reviewing the TDM program will be necessary.

CONCLUSION

The project's transportation impact based on VMT is potentially significant based on the OPR's recommended thresholds. With the implementation of a TDM program, the Project transportation impact is anticipated to be less-than-significant.

APPENDIX A – SITE CHECK REPORT

Site Check Report

created **January 25, 2021**

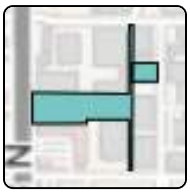
Legal Disclaimer: The following report is provided as a public service, for informational purposes only. This report should not be construed as legal advice. Users of this report should independently verify its determinations prior to taking any action under the California Environmental Quality Act (CEQA).

Legend

A check mark means the tool determined the parcel met the spatial requirements for a CEQA provision.

A question mark indicates (1) the spatial requirements may have been met but must be further verified by the user or (2) that there are no spatial requirements for that provision.

An means the tool determined that the site did not meet the CEQA spatial requirements.



Project 3

Categorical Exemptions

Categorical exemptions are made up of classes of projects that generally are considered not to have potential impacts on the environment. Categorical exemptions are identified by the Natural Resources Agency and are defined in the CEQA Guidelines (§§ 15300-15333). All categorical exemptions are subject to the limitations contained in CEQA Guidelines § 15300.2. Only the two categorical exemptions regularly used for housing are mapped and reported; other categorical exemptions could potentially be utilized and should be reviewed and considered.

CEQA Guidelines § 15332 (Class 32, Infill Development Projects)

This categorical exemption covers all infill projects, including projects that contain residential uses.

Site Check considered the following requirements:

City Limits

Within city limits

User must determine the remaining requirements:

◯ Type of Housing

Any

◯ Plan Consistency

The project is consistent with the applicable general plan designation and all applicable general plan policies as well as with applicable zoning designation and regulations.

◯ Acreage

The project site is no more than five acres.

◯ Infill

The project site is substantially surrounded by urban uses.

◯ Habitat

The project site has no value as habitat for endangered, rare or threatened species.

◯ Significant Impacts

Approval of the project would not result in any significant effects relating to traffic, noise, air quality, or water quality.

◯ Utilities

The site can be adequately served by all required utilities and public services.

◯ Exceptions

None of the exceptions contained in CEQA Guidelines § 15300.2 apply:

◯ Cumulative Impact

All exemptions for these classes are inapplicable when the cumulative impact of successive projects of the same type in the same place, over time is significant.

◯ Significant Effect

A categorical exemption shall not be used for an activity where there is a reasonable possibility that the activity will have a significant effect on the environment due to unusual circumstances.

◯ Scenic Highways

A categorical exemption shall not be used for a project which may result in damage to scenic resources, including but not limited to, trees, historic buildings, rock outcroppings, or similar resources, within a highway officially designated as a State Scenic Highway. This

does not apply to improvements which are required as mitigation by an adopted negative declaration or certified EIR.

◯ Hazardous Waste Sites

A categorical exemption shall not be used for a project located on a site which is included on any list compiled pursuant to GOV § 65962.5.

◯ Historical Resources

A categorical exemption shall not be used for a project which may cause a substantial adverse change in the significance of a historical resource.

Streamlining

Streamlining provisions under CEQA range from a complete exemption to an obligation to prepare a narrowed environmental document with fewer topics.

✓ PRC § 21094.5 (SB 226, Infill Streamlining)

This provision provides a streamlined review process for infill projects that satisfy specified performance standards by limiting the topics subject to review at the project level where the effects of infill development have been addressed in a planning level decision or by uniformly applicable development policies. Streamlining under this section will range from a complete exemption to an obligation to prepare a narrowed, project-specific environmental document (see CEQA Guidelines § 15183.3(c), (d)). A notice of determination must be filed if this code section is used to obtain a full exemption from CEQA (see CEQA Guidelines § 15183.3(d)(2)(A)). For more information on this provision, see CEQA Guidelines Appendix M (performance standards prepared pursuant to PRC § 21094.5.5) and Appendix N (infill environmental checklist form).

Site Check considered the following requirements:

✓ Urban Area

Within an Urban Area

"Urban area" includes either an incorporated city or an unincorporated area that is completely surrounded by one or more incorporated cities that meets both of the following criteria:

A. The population of the unincorporated area and the population of the surrounding incorporated cities equal a population of 100,000 or more.
B. The population density of the unincorporated area is equal to, or greater than, the population density of the surrounding cities.

✓ Transit Proximity

Any of the following:

Note, even if a project does not meet any of the transit proximity requirements listed below, it may still qualify for this streamlining provision if it is a residential or mixed-use project

consisting of 300 or fewer residential units, all of which are affordable to low income households. (See CEQA Guidelines, Appendix M, Section IV.A.)

Existing Major Transit Stop

Within ½ mile of an existing Major Transit Stop.

"Major Transit Stop" means a site containing an existing rail transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with frequencies of service intervals of 15 minutes or less during the morning and afternoon peak commute periods.

Planned Major Transit Stop

Within ½ mile of a planned Major Transit Stop.

A planned and funded stop that is included in an adopted regional transportation improvement program.

Existing High-Quality Transit Corridor

Within ½ mile of a stop along an existing High-Quality Transit Corridor.

"High-quality transit corridor" means an existing corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.

Planned High-Quality Transit Corridor

Within ½ mile of a stop along a planned High-Quality Transit Corridor.

A planned and funded stop that is included in an adopted regional transportation improvement program.

Low Vehicle Travel Area

Within a Low Vehicle Travel Area.

"Low vehicle travel area" means a traffic analysis zone that exhibits a below average existing level of travel as determined using a regional travel demand model. For residential projects, travel refers to either home-based or household vehicle miles traveled per capita. For commercial and retail projects, travel refers to non-work attraction trip length; however, where such data are not available, commercial projects reference either home-based or household vehicle miles traveled per capita.

User must determine the remaining requirements:

Type of Housing

Residential or Mixed-Use (undefined)

Infill

Site either has been previously developed or a vacant site that adjoins existing qualified urban uses on at least seventy-five percent of the site's perimeter.

"Adjoins" includes uses that are separated only by an improved public right-of-way.

SCS Consistency

Since this is within the boundaries of an MPO, the project must be consistent with the general use designation, density, building intensity, and applicable policies specified for the project area in the applicable Sustainable Communities Strategy.

Soil and Water Remediation

If the project site is included on any list compiled pursuant to GOV § 65962.5, the project shall document how it has remediated the site, if remediation is completed. Alternatively, the project shall implement the recommendations provided in a preliminary endangerment assessment or comparable document that identifies remediation appropriate for the site.

Residential Units Near High-Volume Roadways and Stationary Sources

If a project includes residential units located within 500 feet, or other distance determined to be appropriate by the local agency or air district based on local conditions, of a high volume roadway or other significant sources of air pollution, the project shall comply with any policies and standards identified in the local general plan, specific plan, zoning code or community risk reduction plan for the protection of public health from such sources of air pollution. If the local government has not adopted such plans or policies, the project shall include measures, such as enhanced air filtration and project design, that the lead agency finds, based on substantial evidence, will promote the protection of public health from sources of air pollution. Those measure may include, among others, the recommendations of the California Air Resources Board, air districts, and the California Air Pollution Control Officers Association.

PRC § 21099 (SB 743, Aesthetics & Parking)

This provision removes the requirement to analyze aesthetic and parking impacts. It does not affect, change, or modify the authority of a lead agency to consider aesthetic impacts pursuant to local design review ordinances or other discretionary powers provided by other laws or policies. For the purposes of this streamlining provision, aesthetic impacts do not include impacts on historical or cultural resources.

Site Check considered the following requirements:

Transit Proximity

The project is proposed within a transit priority area, as defined in subdivision (a) of PRC § 21099:

"Transit priority area" means an area within one-half mile of a major transit stop that is existing or planned, if the planned stop is scheduled to be completed within the planning

horizon included in a Transportation Improvement Program or applicable regional transportation plan.

User must determine the remaining requirements:

◯ Type of Housing

Residential or mixed-use residential (not defined)

◯ Infill

Must be located on an infill site as defined in PRC § 21099:

"Infill site" means a lot located within an urban area that has been previously developed, or on a vacant site where at least 75 percent of the perimeter of the site adjoins, or is separated only by an improved public right-of-way from, parcels that are developed with qualified urban uses.

✓ PRC § 21155.2 (SB 375, SCEA)

This provision applies to transit priority projects, which are defined in PRC § 21155. If this criterion is met, then the project might qualify for a Sustainable Communities Environmental Assessment (SCEA), which is essentially a negative declaration that is subject to a substantial evidence standard of review (see PRC § 21155.2(b)). If the project does not qualify for an SCEA, it may qualify for a streamlined environmental impact report (see PRC § 21155.2(c)).

Site Check considered the following requirements:

✓ Transit Proximity

Any of the following:

Note, a project is considered to be within one-half mile of a major transit stop or high-quality transit corridor if all parcels within the project have no more than 25 percent of their area farther than one-half mile from the stop or corridor and if not more than 10 percent of the residential units or 100 units, whichever is less, in the project are farther than one-half mile from the stop or corridor. (See PRC § 21155.)

✓ Existing Major Transit Stop

Within ½ mile of an existing Major Transit Stop as defined in PRC § 21064.3:

"Major transit stop" means a site containing any of the following:

a. An existing rail or bus rapid transit station.
b. A ferry terminal served by either a bus or rail transit service.
c. The intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods.

d. "Bus rapid transit" is defined in PRC § 21060.2.

Planned Major Transit Stop

Within ½ mile of a planned Major Transit Stop as defined in PRC § 21064.3 that is included in the applicable Regional Transportation Plan.

Existing High-Quality Transit Corridor

Within ½ mile of an existing High-Quality Transit Corridor:

A high-quality transit corridor means a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours.

Planned High-Quality Transit Corridor

Within ½ mile of a planned High-Quality Transit Corridor that is included in the applicable Regional Transportation Plan.

Within an MPO

Must be located within the boundaries of a Metropolitan Planning Organization.

User must determine the remaining requirements:

Type of Housing

Residential and mixed use (at least 50 percent residential use based on total building square footage)

Density

Provide a minimum net density of at least 20 dwelling units per acre; if the project contains between 26 percent and 50 percent nonresidential uses, a floor area ratio of not less than 0.75.

SCS consistency

Consistent with the general use designation, density, building intensity, and applicable policies specified for the project area in the applicable Sustainable Communities Strategy.

Prior EIR

Must have incorporated all feasible mitigation measures, performance standards, or criteria set forth in the prior applicable environmental impact reports and adopted in findings made pursuant to PRC § 21081.

PRC § 21159.28 (SB 375, Growth Inducing & Cumulative Impacts)

Under this provision, an environmental document does not need to reference, describe, or discuss (1) growth inducing impacts; or (2) any project specific or cumulative impacts from cars and light-duty truck trips generated by the project on global warming or the regional transportation network (see PRC § 21159.28(a)). Any environmental impact report is not required to reference, describe, or

discuss a reduced residential density alternative to address the effects of car and light-duty truck trips generated by the project (see PRC § 21159.28(b)).

Site Check considered the following requirements:

- [x] Within an MPO

  Must be located within the boundaries of a Metropolitan Planning Organization.

User must determine the remaining requirements:

- [ ] Type of Housing

  Residential or Mixed-Use

  A residential or mixed-use residential project is a project where at least 75 percent of the total building square footage of the project consists of residential use.

  Or a transit priority project (see if PRC § 21155.2 applies).

- [ ] SCS Consistency

  Consistent with the use designation, density, building intensity, and applicable policies specified for the project area in the applicable sustainable communities strategy.

- [ ] Prior EIR

  Project incorporates the mitigation measures required by an applicable prior environmental document.

Other Resources

For practitioner's tips from Ascent Environmental:

- Statutory Exemptions for Housing Projects
- Categorical Exemptions for Housing Projects

For more information on how to use a CEQA exemption or streamlining provision, please see AEP's CEQA Portal Topic Paper.

Not all CEQA provisions that may apply to a housing project have been included in this tool. Site Check is focused on the CEQA provisions that cover a variety of housing types. Based on the specifics of the project, users should also consider the following provisions:

- **Affordable Housing** - PRC § 21159.23 - CEQA statutory exemption for construction, conversion, or use of residential housing consisting of 100 or fewer units that is affordable to low-income households.
- **Agricultural Employee Housing** - PRC § 21159.22 - CEQA statutory exemption for the construction, conversion, or use of residential housing for agricultural employees.
- **Motel to Supportive Housing Conversions** - PRC § 21080.50 - CEQA statutory exemption for the conversion of a hotel, motel, apartment hotel, transient occupancy residential structure, or hostel for transitional and supportive housing. This exemption expires on January 1, 2025.
- **Existing Facility Reuse - Class 1**, CEQA Guidelines § 15301 - CEQA categorical exemption for the operation, repair, maintenance, permitting, leasing, licensing, or minor alteration of existing public or private structures, facilities, mechanical equipment, or topographical features, involving negligible or no expansion of existing or former use. As a categorical exemption, this provision is subject to the limitations contained in CEQA Guidelines § 15300.2.

Ministerial/By Right Considerations

CEQA applies when a governmental agency can exercise judgment in deciding whether and how to carry out or approve a project. This makes the project "discretionary." (CEQA Guidelines, § 15357.) Where the law requires a governmental agency to act on a project using fixed standards and the agency does not have authority to use its own judgment, the project is called "ministerial," and CEQA does not apply. (CEQA Guidelines, §§ 15268(a), 15369.)

State and local laws and guidelines should be consulted when determining whether a project may be ministerial or "by right."

State Legislation:

- **SB 35** - GOV § 65913.4 - Creates a streamlined approval process for developments in localities that have not yet met their housing targets, provided that the development is on an infill site and complies with existing residential and mixed-use zoning. Participating developments must provide at least 10 percent of units for lower-income families. All projects over 10 units must be prevailing

wage and larger projects must use skilled and trained labor. See the SB 35 section of https://www.hcd.ca.gov/policy-research/lhp.shtml .

- **AB 2162** – GOV § 65650-65656 - Allows for by-right development for supportive housing anywhere zoned for multifamily and mixed-use housing.
- **AB 430** - GOV § 65913.15 - Establishes a ministerial approval process for housing development in the cities of Biggs, Corning, Gridley, Live Oak, Orland, Oroville, Willows and Yuba City. These provisions expire on January 1, 2026.

Local Legislation:

Housing projects may also be by right under local the zoning code on certain parcels. Check with the appropriate local jurisdiction for more information. Note, where local discretion is limited to design review, the project may not be subject to CEQA. (See McCorkle Eastside Neighborhood Group v. City of St. Helena (2019) 31 Cal.App.5th 80.)

APPENDIX B – STEPS FOR SCAG MODEL ADJUSTMENTS

Steps to Recalculate Average VMT:

1. Run the SCAG model with desired network and SED data
2. Compile Population and Total Employment by each TAZ from SED
3. Use peak and off-peak person trip matrices by trip purpose and combine into daily person trips. These matrices are saved in \msplit\Outputs\. The files are "PK_HBWD_HAUPAdTrips.mtx", "HBWS_IS_PK_Trips.mtx, "PK_HBSC_HAUPAdTrips.mtx", "PK_HBSH_HAUPAdTrips.mtx", "PK_HBCU_HAUPAdTrips.mtx", "PK_HBO_HAUPAdTrips.mtx", "PK_HBSP_HAUPAdTrips.mtx", "PK_HBSR_HAUPAdTrips.mtx", "PK_WBO_HAUPAdTrips.mtx", "PK_OBO_HAUPAdTrips.mtx", and similarly for off-peak.
4. Use the occupancy factors used in the model for each trip purpose to convert the daily person trips to vehicle trips.
5. Use lengths from the respective Skim matrices and multiply to the daily vehicle trips for Drive Alone, Carpool 2, and Carpool 3+ trips to compute daily VMT by purpose. These skim matrix files are “SPMATPK_DA_Tier1.mtx”, “SPMATPK_SR2_Tier1”, “SPMATPK_SR3_Tier1”, and similarly for off-peak.
6. Extract the daily VMT sum of productions by each TAZ and by trip purpose.
7. Extract the daily VMT sum of attractions by each TAZ and by trip purpose.
8. Combine the sum of productions by each TAZ for all the Home-Based trip purposes, i.e. “HBWD”, ”HBWS”, ”HBOALL”, ”HBSH”, ”HBSP”, ”HBSC”, ”HBCU”. This will be the Residential VMT for internal auto trips.
9. Combine the sum of attractions by each TAZ for only the Home-Based-Work trip purposes, i.e. “HBWD”, ”HBWS”. This will be the Work VMT for internal auto trips.
10. Since person trips are internal trips, the internal share for the SED data needs to be computed for each TAZ. Use vehicle trips from the Origin-Destination tables, the files are “AM_OD.mtx”, “PM_OD.mtx”, “MD_OD.mtx”, ”, “EVE_OD.mtx”, “NT_OD.mtx”. Combine these vehicle trips to daily trips.
11. Extract daily OD trips sum of productions separately for the internal and external vehicle trips.
12. Extract daily OD trips sum of attractions separately for the internal and external vehicle trips.
13. Multiply the share of internal trips from the OD trips to the population and employment data to get appropriate SED for the efficiency matrix.
14. Use the VMT sum of productions and attraction and internal share of the SED by each TAZ to determine Residential VMT per Capita and HBW VMT per Employee average rates at the City, County, or Regionwide levels.

APPENDIX C – CITY OF EL SEGUNDO TRANSPORTATION DEMAND MANAGEMENT (TDM) MEASURES

City of El Segundo Transportation Demand Management (TDM) Measures					
#	**TDM Measure**	**Description**	**TDM Type**	**Max VMT Reduction**	**VMT Reduction Type**
Transit Strategies					
1	Reduce Transit Headways	Makes transit service more appealing by reducing headways, reducing overall transit trip time, and encouraging riders to switch from auto to transit use.	Incentive / Infrastructure	2.5%	All
2	Transit Rerouting	Coordinate with local transit agency to provide or reroute existing transit services near the site	Infrastructure	3%	All
3	Transit Stops	Coordinate with local transit agency to provide bus stop near the site. Real time transportation information displays support on-the-go decision making to support sustainable trip making. Only get a reduction on a non-HQT line, cannot get both.	Infrastructure	2%	All
4	Safe and Well-Lit Access to Transit	Enhance the route for people walking or bicycling to nearby transit (typically off-site). Provide Emergency 911 phones along these routes to enhance safety.	Infrastructure	2%	All
5	Implement Neighborhood Shuttle	Implement project-operated or project-sponsored neighborhood shuttle serving residents, employees, and visitors of the project site	Incentive	13.4%	All
6	Transit Subsidies	Involves the subsidization of transit fare for residents and employees of the project site. This strategy assumes transit service is already present in the project area.	Incentive	10%	All
Communication & Information Strategies					
7	Required Travel Behavior Change Program	Involves the development of a travel behavior change program that targets individuals' attitudes, goals, and travel behaviors, educating participants on the impacts of their travel choices and the opportunities to alter their habits. Provide a web site that allows employees to research other modes of transportation for commuting. Employee-focused travel behavior change program that targets individuals attitudes, goals, and	Incentive	4%	All

City of El Segundo Transportation Demand Management (TDM) Measures					
#	**TDM Measure**	**Description**	**TDM Type**	**Max VMT Reduction**	**VMT Reduction Type**
		travel behaviors, educating participants on the impacts of their travel choices and the opportunities to alter their habits.			
8	Promotions & Marketing	Involves the use of marketing and promotional tools to educate and inform travelers about site-specific transportation options and the effects of their travel choices with passive educational and promotional materials. Marketing and public information campaign to promote awareness of TDM program with an on-site coordinator to monitor program.	Incentive		All
9	Required Commute Trip Reduction Program	Employee-focused travel behavior change program that targets individuals attitudes, goals, and travel behaviors, educating participants on the impacts of their travel choices and the opportunities to alter their habits.	Incentive		Commute
10	On-site TDM Program Manager and TDM Marketing Materials		Infrastructure		All
11	Commute Assistance Center	Provide a computer kiosk that allows employees to research other modes of transportation for commuting.	Infrastructure		All
Commuting Strategies					
12	Employer Sponsored Vanpool or Shuttle	Implementation of employer-sponsored employee vanpool or shuttle providing new opportunities for access to connect employees to the project site.	Incentive / Infrastructure	13.4%	Commute
13	Preferential Carpool / Vanpool Parking Spaces	Reserved carpool / vanpool spaces closer to the building entrance.	Infrastructure	10%	All
14	Passenger Loading Zones for Carpool / Vanpool	Provide easy access for carpools or vanpools.	Infrastructure	5%	All
15	On-site Carts or Shuttles or bikes	Provide on-site cart or shuttle for employees to travel across campus.	Incentive / Infrastructure	4%	All

City of El Segundo Transportation Demand Management (TDM) Measures					
#	**TDM Measure**	**Description**	**TDM Type**	**Max VMT Reduction**	**VMT Reduction Type**
16	Emergency Ride Home (ERH) Program	Provides an occasional subsidized ride to commuters who use alternative modes. Guaranteed ride home for people if they need to go home in the middle of the day due to an emergency or stay late and need a ride at a time when transit service is not available. This supplemental to the other trip reduction strategies.	Incentive	9%	Commute
17	Alternative Work Schedule	Flextime, Compressed Work Week (CWW), and staggered shifts	Incentive	15%	Commute
18	Telework (Telecommuting, Distance-Learning, etc.)	Use of telecommunications as a substitute for physical travel.	Incentive	22%	Commute
19	On-site Childcare	Provides on-site childcare to remove the need to drive a child to daycare at a separate location.	Infrastructure	2%	All
Shared Mobility Strategies					
20	Ride-Share Program	Increases vehicle occupancy by providing ride-share matching services, designating preferred parking for ride-share participants, designing adequate passenger loading/unloading and waiting areas for ride-share vehicles, and providing a website or message board to connect riders and coordinate rides. Need a point person form the business on-site	Incentive	5%	Commute
21	Car Share	Implement car sharing to allow people to have on-demand access to a vehicle, as-needed. This may include providing membership to an existing program located within 1/4 mile, contracting with a third-party vendor to extend membership-based service to an area, or implementing a project-specific fleet that supports the residents and employees on -site.	Incentive		All
		Provide an on-site car vehicle for employees who use alternative transportation to commute to work, to use for short trips during the	Incentive		Commute

City of El Segundo Transportation Demand Management (TDM) Measures					
#	TDM Measure	Description	TDM Type	Max VMT Reduction	VMT Reduction Type
		workday. For example, this allows for employees to run errands or travel for lunch.			
22	Designated Parking Spaces for Car Share Vehicles	Reserved car share spaces closer to the building entrance.	Infrastructure		All
23	School Carpool Program	Implements a school carpool program to encourage ride-sharing for students.	Incentive	15.8%	School
Bicycle Infrastructure Strategies					
24	Bike Share	Implement bike share to allow people to have on-demand access to a bicycle, as-needed.	Incentive Infrastructure	0.25%	All
25	Implement/Improve On-street Bicycle Facility	Implements or provides funding for improvements to corridors and crossings for bike networks identified within a one-half mile buffer area of the project boundary, to support safe and comfortable bicycle travel.	Infrastructure	0.625%	All
26	Include Bike Parking per City Code	Implements long-term bicycle parking to support safe and comfortable bicycle travel by providing parking facilities at destinations	Infrastructure	3%	All
27	Include Secure Bike Parking and Showers in excess of City Code	Implements additional end-of-trip bicycle facilities to support safe and comfortable bicycle travel.	Infrastructure		
28	Bicycle Repair Station / Services	On-site bicycle repair tools and space to use them supports on-going use of bicycles for transportation.	Infrastructure		
Neighborhood Enhancement Strategies					
29	Traffic Calming Improvements	Implements traffic calming measures throughout and around the perimeter of the project site that encourage people to walk, bike, or take transit within the development and to the development from other locations.	Infrastructure	1%	All

City of El Segundo Transportation Demand Management (TDM) Measures					
#	**TDM Measure**	**Description**	**TDM Type**	**Max VMT Reduction**	**VMT Reduction Type**
30	Pedestrian Network Improvements	Implements pedestrian network improvements throughout and around the project site that encourages people to walk.	Infrastructure	2%	All
Parking Strategies					
31	Reduce Parking Supply	Changes on-site parking supply to provide less than the amount required by municipal code. Permitted reductions could utilize mechanisms such as TOC, Density Bonus, Bike Parking ordinance, or locating in a Specific Plan Area.	Infrastructure	10%	All
32	Parking Cash-Out	Provide employees a choice of forgoing current parking for a cash payment to be determined by the employer. The higher the cash payment, the higher the reduction.	Incentive	5%	Commute
33	Price Workplace Parking	Implements workplace parking pricing for employees at employment locations for all land-use contexts and all types of development that include employment where trips originate at home and terminate at work.	Incentive	10%	Commute
34	Residential Area Parking Permits	Implementation of residential permit parking zones for long-term use of on-street parking in residential areas.	Incentive	0.25%	All
35	Parking Management Strategies	Strategies to encourage efficiency in parking facilities and improve the quality of service to parking users.	Incentive	5%	Valet
Mi**scellaneous Strategies**					
36	Virtual Care Strategies for Hospitals	Resources to allow patients to access healthcare services or communicate with healthcare staff through online or off-site programs.	Infrastructure	6%	Hospital / MOB Visitors
37	On-site Affordable Housing	Provides on-site affordable housing close to TOD or work place/business	Land Use	4%	All
38	Delivery Services	Provide delivery services by bicycle, on foot, or in a delivery vehicle that makes multiple stops.	Incentive	1%	All

TRAFFIC STUDY
FOR THE PROPOSED
650 N PACIFIC COAST HIGHWAY PROJECT
IN THE CITY OF EL SEGUNDO

INTRODUCTION

Purpose and Study Objectives

This traffic study has been prepared to address the traffic-related effects of the proposed 650 North Pacific Coast Highway project in the City of El Segundo. This traffic study has been conducted in accordance with the City of El Segundo traffic study requirements, which follow the Los Angeles County Congestion Management Program (CMP).

This report includes a description of existing traffic conditions in the surrounding area, estimated project trip generation and distribution, future traffic growth, and an assessment of the project-related effects on the roadway system. Where necessary, circulation system improvements have been identified to mitigate project effects at the study locations.

Project Overview

The project site is located in the north-central portion of the City of El Segundo, in the County of Los Angeles. The project site is located at 650 and 700 N Pacific Coast Highway (Buildings A and B, respectively) and 737 Lairport Street/Carl Jacobson Way (Building D). The site is shown in its regional setting on Figure 1. The site is currently bounded by Pacific Coast Highway to the west, Maple Avenue to the north, Lairport Street to the east, and Mariposa Avenue to the south. A copy of the project site plan is provided on Figure 2.

The project applicant proposes to renovate and perform minor alternations to buildings A and B and demolish the existing surface parking lot to construct a 122,156 square-foot office building (Building C) with a 1,185-space parking structure, and 71 surface parking spaces for a total of 1,256 parking spaces. In addition, the Project will consolidate the seven parcels of land into a single 7.258-acre ground parcel through the proposed Vesting Tentative Parcel Map No. 83129. The gross square footages for each building in the Project are as follows:

- Building A: 99,916 square-feet of floor area (net addition of 1,031 square feet from existing 98,885 square-feet)
- Building B: 65,120 square-feet of floor area (net reduction of 4,572 square feet from existing 69,692 square-feet)
- Building C: 122,156 gross square feet, with an integrated 1,185-space parking structure
- Building D: 16,652 square-feet of floor area (no proposed changes)

Vehicular access provisions for the project would consist of two existing driveways: two right-in-right-out (RIRO) only driveways on N Pacific Coast Highway. All project driveways would remain unsignalized. The driveway on Mariposa Avenue is intended for Emergency Vehicle access only.

SITE PLAN

ANALYSIS SCENARIOS AND METHODOLOGY

Analysis Scenarios

In accordance with the Los Angeles County CMP guidelines, the project will be evaluated in the morning and afternoon peak hours for the following conditions:

- Existing Conditions
- Existing Conditions Plus Project
- Opening Year 2023 Cumulative Base
- Opening Year 2023 Cumulative Base Plus Project

Study Locations

The study locations were established in consultation with County staff through the Scoping Agreement process. A copy of the Scoping Letter is provided in *Appendix A*.

Study Intersections:

1. N Pacific Coast Highway at El Segundo Boulevard
2. N Pacific Coast Highway at Grand Avenue
3. N Pacific Coast Highway at Mariposa Avenue
4. N Pacific Coast Highway at Palm Avenue
5. N Pacific Coast Highway at Maple Avenue
6. N Pacific Coast Highway at Walnut Avenue
7. N Pacific Coast Highway at Imperial Highway
8. N Nash Street at Imperial Highway
9. N Nash Street at Atwood Way
10. N Nash Street at Maple Avenue
11. N Nash Street at Mariposa Avenue
12. N Nash Street at Grand Avenue
13. N Nash Street at El Segundo Boulevard

D1. N Pacific Coast Highway at Northern Driveway
D2. N Pacific Coast Highway at Southern Driveway

Existing lane configurations and traffic control at the study intersections are shown on Figure 3.

Intersection Analysis – HCM Methodology

In accordance with the Los Angeles County Transportation Authority Congestion Management Program (CMP), signalized intersection operation is evaluated using the Intersection Capacity Utilization (ICU) methodology, which provides a comparison of the theoretical hourly vehicular capacity of an intersection to the number of vehicles actually passing through that intersection during a given hour. The ICU calculations assume a per-lane capacity of 1,600 vehicles per hour (vph) with a clearance interval of 0.1. Intersection analysis for unsignalized intersections is evaluated using the Highway Capacity Manual (HCM) methodology, which returns a delay value, expressed in terms of average seconds of delay per vehicle.

Operating conditions for both ICU and HCM methodologies are expressed in terms of "Level of Service" which is also referred to by its acronym, LOS. The ICU calculation returns a volume-to-capacity (V/C) ratio that translates into a corresponding Level of Service, ranging from LOS A, representing uncongested, free-flowing conditions; to LOS F, representing congested, over-capacity conditions.

A summary description of each Level of Service and the corresponding volume/capacity (v/c) ratio or delay is provided on the chart below.

LEVEL OF SERVICE DESCRIPTIONS			
Level of Service	Signalized: ICU	Unsignalized: HCM [1]	Description
	V/C Ratio	Delay (sec)	
A	0.00 - 0.60	≤10	EXCELLENT – No vehicle waits longer than one red light, and no approach phase is fully used.
B	0.61 - 0.70	> 10 and ≤ 15	VERY GOOD – An occasional approach phase is fully utilized; drivers begin to feel somewhat restricted within groups of vehicles.
C	0.71 - 0.80	> 15 and ≤ 25	GOOD – Occasionally, drivers may have to wait through more than one red light; back-ups may develop behind turning vehicles.
D	0.81 - 0.90	> 25 and ≤ 35	FAIR – Delays may be substantial during portions of the rush hours, but enough lower volume periods occur to permit clearing of developing lines, preventing excessive back-ups.
E	0.91 - 1.00	> 35 and ≤ 50	POOR – Represents the most vehicles that the intersection approaches can accommodate; may be long lines of waiting vehicles through several signal cycles.
F	> 1.00	> 50	FAILURE – Back-ups from nearby locations or on cross streets may restrict or prevent movement of vehicles out of the intersection approaches. Tremendous delays with continuously increasing queue lengths.

LOS = Level of Service; ICU = Intersection Capacity Utilization; HCM = Highway Capacity Manual; V/C = volume-to-capacity
[1]Source: Source: Highway Capacity Manual, 6th Edition

Performance Criteria

The City of El Segundo Level of Service standard for peak hour intersection operation is Level of Service "D". Intersections on an LA County CMP facility establish Level of Service "E" as acceptable during the peak hours.

Significance Thresholds

For non-CMP intersections, if traffic caused by a development project is forecast to result in an intersection Level of Service change from LOS D or better to LOS E or F, the development effect shall be considered significant. If a development project is forecast to result in the increase of intersection volume/capacity ratio (V/C) of 0.02 or greater at any intersection that is forecast to operate at LOS E or F, the effect shall be considered significant.

For CMP intersections, a project-related traffic effect would be considered significant when the addition of project traffic increases traffic demand on a CMP facility by 2% of capacity (V/C ≥ 0.02), causing LOS F (V/C ≥ 1.0). If the facility is already at LOS F, a significant effect occurs when the proposed project increases traffic demand on a CMP facility by 2% of capacity (V/C ≥ 0.02).

EXISTING CONDITIONS

Existing Roadway Network

Pacific Coast Highway is an 8-Lane divided roadway with a raised median. The posted speed limit is 40 miles per hour (mph). Sidewalks are provided on both sides of the roadway. Pacific Coast Highway is classified as a State Route in the LA County CMP.

Imperial Highway is a 6-Lane divided roadway with a raised median. The posted speed limit is 40 mph. Class II Bicycle lanes and sidewalks are provided on both sides of the roadway. Imperial Highway is classified as a Primary Arterial in the LA County CMP.

Grand Avenue is a 4-Lane divided roadway with a raised median. The posted speed limit is 35 mph. Sidewalks are provided on both sides of the roadway. Grand Avenue is classified as a Primary Arterial in the LA County CMP.

El Segundo Boulevard is a 6-Lane divided roadway with a raised median. The posted speed limit is 35 mph. Sidewalks are provided on both sides of the roadway.

Existing Traffic Volumes

Existing morning and evening peak hour turning movement counts for the study intersections were used from both historical counts and a previous traffic analysis report completed in 2018 from an adjacent project and grown to Existing Year 2020. Historical morning and evening peak period traffic counts were utilized due to the closure of businesses and school amid the COVID-19 pandemic. The counts at the following intersections were obtained from a previous traffic analysis report completed in 2018 from an adjacent project:

- N Pacific Coast Highway at El Segundo Boulevard
- N Pacific Coast Highway at Grand Avenue
- N Pacific Coast Highway at Mariposa Avenue
- N Pacific Coast Highway at Palm Avenue
- N Pacific Coast Highway at Maple Avenue
- N Pacific Coast Highway at Walnut Avenue
- N Pacific Coast Highway at Imperial Highway

Recent historical counts were available at the following intersections:

- N Nash Street at Imperial Highway (2019)
- N Nash Street at Maple Avenue (2017)
- N Nash Street at Mariposa Avenue (2019)
- N Nash Street at Grand Avenue (2016)
- N Nash Street at El Segundo Boulevard (2019)

New traffic counts were collected at the following intersections on December 9th, 2020:

- N Nash Street at Atwood Way
- N Nash Street at Maple Avenue
- N Nash Street at Mariposa Avenue
- N Nash Street at Grand Avenue

Based on a comparison of historical counts to new counts, a factor of 1.56 was applied to counts collected in December 2020 to account for Covid-19 for intersections where recent historical counts were not available.

Morning and evening peak hour traffic volumes are shown on Figure 4. Copies of the traffic count data worksheets are provided in Appendix B.

Existing Operating Conditions

Intersection Level of Service analysis was conducted for the morning and evening peak hours using the analysis procedures and assumptions described previously in this report. The results are shown on Table 1. Review of this table indicates that the following study intersection operates at an unacceptable Level of Service:

- #1 – N Pacific Coast Highway at El Segundo Boulevard: PM – LOS F
- #7 – N Pacific Coast Highway at Imperial Highway: PM – LOS F

Copies of the intersection analysis worksheets are provided in *Appendix C*.

LOS shown in Bold and shaded indicates unacceptable Level of Service.
ICU = Intersection Capacity Utilization
HCM = Highway Capacity Manual
LOS = Level of Service
Intersection operation is expressed in volume-to-capacity (v/c) ratio for the ICU methodology.
Intersection operation is expressed in average seconds of delay (sec/veh) for the HCM methodology.

TRIP GENERATION

Proposed Project Trip Generation

Trip Generation estimates for the existing use and the proposed project are based on the Institute of Transportation Engineers (ITE) Trip Generation Manual (10th Edition) trip rates for General Office Building (ITE Land Use 710). In addition to the existing use, the project is expected to generate 139 AM peak hour trips (119 inbound and 20 outbound), 135 PM peak hour trips (22 inbound and 114 outbound), and 1,155 daily trips. Trip generation estimates are shown on Table 2.

Project Trip Distribution and Assignment

Project trip distribution assumptions for the project site were developed based on the likely origins and destinations of patrons of the project. Trip distribution assumptions for the proposed project are shown on Figure 5. Trip distribution percentages at each study intersection were applied to the project trip generation to determine the project trips through each intersection. The resulting project-related peak hour trips are shown on Figure 6.

At the project driveways, additional trips were added to account for trips from existing uses and the trips from vehicles from adjacent parcels that could potentially utilize the parking structure.

EXISTING PLUS PROJECT CONDITIONS

The Existing Plus Project analysis scenario is a hypothetical scenario that assumes completion of the project and full absorption of the project traffic on the surrounding street network at the current time, with no other changes in traffic conditions.

The project-related peak hour trips were added to the existing peak hour volumes to evaluate Existing Plus Project conditions. The resulting traffic volumes are shown on Figure 7. Existing Plus Project intersection results are shown on Table 3. As this table indicates, the following study intersections would operate at an unacceptable Level of Service;

- #1 – N Pacific Coast Highway at El Segundo Boulevard: PM – LOS F
- #7 – N Pacific Coast Highway at Imperial Highway: PM – LOS F
- D1 – N Pacific Coast Highway at Northern Driveway: PM – LOS F

Intersection analysis worksheets are provided in *Appendix C*.

OPENING YEAR 2023 CUMULATIVE CONDITIONS

The project Opening Year is anticipated to be 2023. Opening Year 2023 Cumulative Base traffic forecasts have been developed by adding an ambient growth factor of 1.003 to existing traffic volumes. In addition to ambient growth, traffic from Cumulative Projects in the project vicinity were added to the Opening Year forecasts to develop Opening Year 2023 Cumulative Base conditions. Cumulative Projects consist of any project that has been approved and is not yet occupied, and projects that are in various stages of the application and approval process but have not yet been approved.

Information regarding Cumulative Projects in the area was obtained from the City of El Segundo Planning Department website. A summary of the Cumulative Projects, including the associated trip generation is provided on Table 4. The trip generation estimates for the Cumulative Projects were obtained from approved traffic studies, where available; and were developed by Kimley-Horn if approved traffic studies were not available. The locations of the Cumulative Projects are shown on Figure 8.

Trip distribution and assignment for the Cumulative Projects were obtained from approved traffic studies, where available; and were developed by Kimley-Horn if approved traffic studies were not available. Traffic volumes associated with the Cumulative Projects were compiled for each of the study intersections and are shown on Figure 9. The Cumulative Projects traffic volumes were added to the Opening Year 2023 traffic volumes. The resulting traffic volumes for Opening Year 2023 Cumulative Conditions are shown on Figure 10.

No planned intersection improvements are assumed to be in place for the Opening Year 2023 Cumulative Conditions analysis.

Opening Year 2023 Cumulative Base

The ambient growth was applied to the existing peak hour volumes to develop Year 2023 without Project traffic forecasts. The resulting traffic volumes are shown on Figure 10 (previously mentioned).

The results of the Year 2023 without Project intersection analysis are summarized on Table 5. Review of this table shows that, with the addition of ambient growth and cumulative traffic, the following study intersections would operate at an unacceptable Level of Service:

- #1 – N Pacific Coast Highway at El Segundo Boulevard: PM – LOS F
- #2 – N Pacific Coast Highway at Grand Avenue: PM – LOS F
- #7 – N Pacific Coast Highway at Imperial Highway: PM – LOS F

Intersection analysis worksheets are provided in *Appendix C*.

			Delay	LOS	Delay	LOS
4	N Pacific Coast Hwy at Palm Ave	U	32.1	C	35.9	D
D1	N Pacific Coast Hwy at Northern Driveway	U	20.0	B	66.6	E
D2	N Pacific Coast Hwy at Southern Driveway	U	19.3	B	28.9	C

LOS shown in Bold and shaded indicates unacceptable Level of Service.
ICU = Intersection Capacity Utilization
HCM = Highway Capacity Manual
LOS = Level of Service
Intersection operation is expressed in volume-to-capacity (v/c) ratio for the ICU methodology.
Intersection operation is expressed in average seconds of delay (sec/veh) for the HCM methodology.

Opening Year 2023 Cumulative Plus Project Conditions

Project-related traffic volumes for the project was added to the Year 2023 forecasts to develop Year 2023 Plus Project traffic forecast volumes. The resulting traffic volumes are shown on Figure 11.

The results of the Year 2023 with Project intersection analysis are shown on Table 6. Review of this table indicates that, with the addition of project traffic, the following study intersections would operate at an unacceptable Level of Service:

- #1 – N Pacific Coast Highway at El Segundo Boulevard: PM – LOS F
- #2 – N Pacific Coast Highway at Grand Avenue: PM – LOS F
- #7 – N Pacific Coast Highway at Imperial Highway: PM – LOS F
- D1 – N Pacific Coast Highway at Northern Driveway: PM – LOS F
- D2 – N Pacific Coast Highway at Southern Driveway: PM – LOS F

Intersection analysis worksheets are provided in *Appendix C*.

The project's contribution to the LOS deficiency at the intersections of N Pacific Coast Highway at El Segundo Boulevard (#1), and N Pacific Coast Highway at Grand Avenue (#2) are less than significant as the increase in v/c ratio is less than 0.02.

LOS shown in Bold and shaded indicates unacceptable Level of Service.
ICU = Intersection Capacity Utilization
HCM = Highway Capacity Manual
LOS = Level of Service
Intersection operation is expressed in volume-to-capacity (v/c) ratio for the ICU methodology.
Intersection operation is expressed in average seconds of delay (sec/veh) ratio for the HCM methodology.

RECOMMENDED IMPROVEMENTS

Based on the significance criteria presented earlier in the report (page 7), the project would have a significant effect on the following study intersection:

- #7 – N Pacific Coast Highway at Imperial Highway

The following improvements would to bring the intersection to a better than pre-project v/c ratio:

- Modify the traffic signal to provide overlap phasing for northbound right turns
- Restrict U-turns for the westbound approach

Intersection analysis worksheets, with improvements are provided in *Appendix D*.

SITE ACCESS

The project site plan presented on Figure 2 (previously referenced) indicates that vehicular access provisions for the project site would consist of the following unsignalized driveways:

- Driveway 1 is an existing right-in-right-out (RIRO) driveway on N Pacific Coast Highway, approximately 300 feet north of Palm Avenue.

- Driveway 2 is an existing RIRO driveway on N Pacific Coast Highway, approximately 115 feet south of Palm Avenue.

The LOS deficiency at the driveway intersections (D1 and D2) occur during the PM peak hour for the traffic exiting out of the site. However, the review of 95th percentile queues does not show significant queuing on-site and does not affect the LOS on the public roadway (N Pacific Coast Highway). Since the driveways are already restricted to right-in-right out movements, no additional improvements are feasible.

The driveway on Mariposa Avenue is intended for Emergency Vehicle access only.

FINDINGS AND CONCLUSIONS

- This study has been prepared to evaluate the traffic-related effects of the proposed 650 N Pacific Coast Highway project, which involves some minor changes to the existing office buildings and the construction of a new office building. The project would consist of a net addition of 118,615 square-feet of office space.

- Weekday morning and evening peak hour operating conditions were evaluated at 14 study intersections for the following study scenarios:
  - Existing Conditions
  - Existing Conditions Plus Project
  - Opening Year 2023 Cumulative Base
  - Opening Year 2023 Cumulative Plus Project

- Under Existing Conditions, the following study intersection would operate at an unacceptable Level of Service:
  - #1 – N Pacific Coast Highway at El Segundo Boulevard: PM – LOS F
  - #7 – N Pacific Coast Highway at Imperial Highway: PM – LOS F

- The proposed additions to the existing site are estimated to generate 1,155 daily trips with 139 trips in the morning peak hour and 135 trips in the evening peak hour.

- Under Existing Plus Project Conditions, the following study intersections would operate at an unacceptable Level of Service:
  - #1 – N Pacific Coast Highway at El Segundo Boulevard: PM – LOS F
  - #7 – N Pacific Coast Highway at Imperial Highway: PM – LOS F
  - D1 – N Pacific Coast Highway at Northern Driveway: PM – LOS F

- Ambient traffic growth at a rate of 1.003, and cumulative project traffic were added to Existing Conditions to develop Opening Year 2023 Cumulative Base without Project forecasts.

- Under Opening Year 2023 Cumulative Base conditions, the following study intersections would operate at an unacceptable Level of Service:
  - #1 – N Pacific Coast Highway at El Segundo Boulevard: PM – LOS F
  - #2 – N Pacific Coast Highway at Grand Avenue: PM – LOS F
  - #7 – N Pacific Coast Highway at Imperial Highway: PM – LOS F

- Under Opening Year 2023 Cumulative Plus Project conditions, the following study intersections would operate at an unacceptable Level of Service:
  - #1 – N Pacific Coast Highway at El Segundo Boulevard: PM – LOS F
  - #2 – N Pacific Coast Highway at Grand Avenue: PM – LOS F
  - #7 – N Pacific Coast Highway at Imperial Highway: PM – LOS F
  - D1 – N Pacific Coast Highway at Northern Driveway: PM – LOS F
  - D2 – N Pacific Coast Highway at Southern Driveway: PM – LOS F

- Based on the significance criteria presented in the report, the project would have a significant effect on the following study intersection:
  - #7 – N Pacific Coast Highway at Imperial Highway

- The following improvements would bring the intersection of N Pacific Coast Highway at Imperial Highway (#7) to a better than pre-project v/c ratio:
  - Modify the traffic signal to provide overlap phasing for northbound right turns
  - Restrict U-turns for the westbound approach

- Vehicular access provisions for the project would consist of two existing driveways: two right-in-right-out (RIRO) only driveways on N Pacific Coast Highway. All project driveways would be unsignalized. Since the driveways are already restricted to RIRO movements, no additional improvements are feasible.

APPENDIX A

SCOPING AGREEMENT

Kimley»Horn

December 14, 2020

Mr. Elias Sassoon
Director of Public Works, City of El Segundo
350 Main Street
El Segundo, CA 90245

RE: *Scoping Letter Agreement for Traffic Impact Study for the Proposed 650 North Pacific Coast Highway Project in the City of El Segundo*

Dear Mr. Sassoon:

Kimley-Horn and Associates, Inc. is submitting this Scoping Letter Agreement to the City of El Segundo to provide a Traffic Impact Study for the proposed 650 N Pacific Coast Highway Project in the City of El Segundo. The proposed Traffic Impact Study scope for the project is presented below.

PROJECT DESCRIPTION

The project is located in the north-central portion of the City of El Segundo, in the County of Los Angeles. The Project Site is located at 650 and 700 North Pacific Coast Highway (Buildings A and B, respectively) and 737 Carl Jacobson Way (Building D). In total, the project site consists of seven contiguous parcels. The applicant proposes to renovate and perform minor alternations to buildings A and B and demolish the existing surface parking lot to construct a 122,156 square-foot office building (Building C) with a 1,185-space parking structure. In addition, the Project will consolidate the seven parcels of land into a single 7.258-acre ground parcel through the proposed Vesting Tentative Parcel Map No. 83129. The gross square footages for each building in the Project are as follows:

Building A: 99,916 square-feet of floor area (net addition of 1,031 square feet from existing 98,885 square-feet)

Building B: 65,120 square-feet of floor area (net reduction of 4,572 square feet from existing 69,692 square-feet)

Building C: 122,156 gross square feet, with an integrated 1,185-space parking structure

Building D: 16,652 square-feet of floor area (no proposed changes)

A copy of the project site plan is provided on Attachment 1.

Vehicular access provisions for the project site would be provided via two existing driveways on Pacific Coast Highway. One driveway is located on the north side of Building B and the other is on the south side of Building A. Both driveways are unsignalized and provide right-in-right-out only access due to a median on Pacific Coast Highway. An additional driveway is located on Mariposa Avenue which is reserved for emergency vehicle access only that will wrap around the exterior of the proposed parking structure and exit through a gate continuing onto the property at 1910 East Maple Avenue north of the project site.

The proposed opening year for the project is Year 2023. The project will be developed in a single project phase.

SCOPE OF TRAFFIC IMPACT STUDY

This scope is based on the City of El Segundo traffic study requirements, which follow the Los Angeles County Congestion Management Program (CMP).

Study Scenarios

- Existing Conditions
- Existing Conditions Plus Project
- Opening Year 2023 Cumulative Base
- Opening Year 2023 Cumulative Base Plus Project

Suggested Study Area

The following is a list of study intersections to be included in the study, as shown on Attachment 2:

Intersections:

1. N Pacific Coast Highway at El Segundo Boulevard
2. N Pacific Coast Highway at Grand Avenue
3. N Pacific Coast Highway at Mariposa Avenue
4. N Pacific Coast Highway at Palm Avenue
5. N Pacific Coast Highway at Maple Avenue
6. N Pacific Coast Highway at Walnut Avenue
7. N Pacific Coast Highway at Imperial Highway
8. N Nash Street at Imperial Highway
9. N Nash Street at Atwood Way
10. N Nash Street at Maple Avenue
11. N Nash Street at Mariposa Avenue
12. N Nash Street at Grand Avenue
13. N Nash Street at El Segundo Boulevard

D1. N Pacific Coast Highway at Northern Driveway
D2. N Pacific Coast Highway at Southern Driveway

Signalized intersections will be analyzed using Intersection Capacity Utilization (ICU) methodology while unsignalized intersections will be analyzed using Highway Capacity Manual (HCM) methodology. The intersection analysis for the traffic impact study will be accomplished using the Vistro software program.

Level of Service (LOS) standards for the traffic impact study will be in accordance with the City of El Segundo traffic study requirements and the Los Angeles County Congestion Management Program (CMP).

Historical morning and evening peak period traffic counts will be utilized due to the closure of businesses and school amid the COVID-19 pandemic. These counts will be from a previous traffic analysis report completed in 2018 from an adjacent project:

1. N Pacific Coast Highway at El Segundo Boulevard
2. N Pacific Coast Highway at Grand Avenue
3. N Pacific Coast Highway at Mariposa Avenue
4. N Pacific Coast Highway at Palm Avenue
5. N Pacific Coast Highway at Maple Avenue
6. N Pacific Coast Highway at Walnut Avenue
7. N Pacific Coast Highway at Imperial Highway

Historical counts were available at the following intersections:

8. N Nash Street at Imperial Highway (2019)
10. N Nash Street at Maple Avenue (2017)
11. N Nash Street at Mariposa Avenue (2019)
12. N Nash Street at Grand Avenue (2016)
13. N Nash Street at El Segundo Boulevard (2019)

New traffic counts were collected at the following intersections on December 9th, 2020:

9. N Nash Street at Atwood Way
10. N Nash Street at Maple Avenue
11. N Nash Street at Mariposa Avenue
12. N Nash Street at Grand Avenue

Based on a comparison of historical counts to new counts, a factor of 1.56 will be applied to counts collected in December 2020 to account for Covid-19.

Trip Generation

Trip generation estimates are based on the Institute of Transportation Engineers (ITE) Trip Generation Manual (10th Edition) trip rates for General Office Building (ITE Land Use 710).

Trip generation rates and the resulting trip generation estimates for the proposed project are summarized on Attachment 3.

Trip Distribution

Project distribution assumptions were developed based on existing travel patterns, and the likely origins and destinations of site employees and patrons. Trip distribution assumptions are shown on Attachment 2 (previously mentioned).

Traffic Growth

For Opening Year scenarios, an annual growth rate of 1.003 will be applied to existing traffic volumes. The annual growth rate of 1.003 is consistent with growth trends in the South Bay/LAX area, per the Los Angeles County CMP. In addition, approved and pending project trips will be applied to the Opening Year scenarios. We will obtain information from the City of El Segundo concerning approved and pending project trips. Where approved trip generation and trip distribution information is not available, these assumptions will be developed by Kimley-Horn.

SENATE BILL (SB) 743 VMT ANALYSIS

Provide a vehicle miles traveled (VMT) assessment due to the development of the site to identify potential impacts based on guidance provided by the Governor's Office of Planning and Research (OPR).

Please contact me if you have any questions, comments, or concerns.

Sincerely,

KIMLEY-HORN AND ASSOCIATES, INC.

Pranesh Tarikere, P.E

Intersection Analysis Summary

ID	Intersection Name	Control Type	Method	Worst Mvmt	V/C	Delay (s/veh)	LOS
1	N Pacific Coast Highway at El Segundo Boulevard	Signalized	ICU 1	NB Right	0.872	-	D
2	N Pacific Coast Highway at Grand Avenue	Signalized	ICU 1	NB Thru	0.800	-	C
3	N Pacific Coast Highway at Mariposa Avenue	Signalized	ICU 1	NB Thru	0.731	-	C
5	N Pacific Coast Highway at Maple Avenue	Signalized	ICU 1	NB Right	0.662	-	B
6	N Pacific Coast Highway at Walnut Avenue	Signalized	ICU 1	SB Right	0.616	-	B
7	N Pacific Coast Highway at Imperial Highway	Signalized	ICU 1	NB Thru	0.977	-	E
8	Nash Street at Imperial Highway	Signalized	ICU 1	SB Thru	0.644	-	B
9	Nash Street at Atwood Way	Signalized	ICU 1	SB Thru	0.353	-	A
10	Nash Street at Maple Avenue	Signalized	ICU 1	SB Thru	0.731	-	C
11	Nash Street at Mariposa Avenue	Signalized	ICU 1	SB Thru	0.467	-	A
12	Nash Street at Grand Avenue	Signalized	ICU 1	SB Right	0.534	-	A
13	Nash Street at El Segundo Boulevard	Signalized	ICU 1	WB Thru	0.559	-	A

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value. For all other control types, they are taken for the whole intersection.

Intersection Level Of Service Report
Intersection 1: N Pacific Coast Highway at El Segundo Boulevard

Intersection Analysis Summary

ID	Intersection Name	Control Type	Method	Worst Mvmt	V/C	Delay (s/veh)	LOS
1	N Pacific Coast Highway at El Segundo Boulevard	Signalized	ICU 1	SB Thru	1.101	-	F
2	N Pacific Coast Highway at Grand Avenue	Signalized	ICU 1	SB Thru	0.880	-	D
3	N Pacific Coast Highway at Mariposa Avenue	Signalized	ICU 1	SB Thru	0.827	-	D
5	N Pacific Coast Highway at Maple Avenue	Signalized	ICU 1	SB Right	0.731	-	C
6	N Pacific Coast Highway at Walnut Avenue	Signalized	ICU 1	SB Thru	0.692	-	B
7	N Pacific Coast Highway at Imperial Highway	Signalized	ICU 1	NB Right	1.207	-	F
8	Nash Street at Imperial Highway	Signalized	ICU 1	EB Thru	0.506	-	A
9	Nash Street at Atwood Way	Signalized	ICU 1	NB Thru	0.338	-	A
10	Nash Street at Maple Avenue	Signalized	ICU 1	NB Thru	0.679	-	B
11	Nash Street at Mariposa Avenue	Signalized	ICU 1	NB Thru	0.604	-	B
12	Nash Street at Grand Avenue	Signalized	ICU 1	EB Left	0.589	-	A
13	Nash Street at El Segundo Boulevard	Signalized	ICU 1	EB Thru	0.604	-	B

V/C, Delay, LOS: For two-way stop, these values are taken from the movement with the worst (highest) delay value. For all other control types, they are taken for the whole intersection.

January 6, 2021

Ref. DOC 6018453

Mr. Zach Vella, Owner
L & R ZAV 650 Sepulveda, LLC
8445 Santa Monica Boulevard
Suite 5
West Hollywood, CA 90069

Dear Mr. Vella:

Will Serve Letter for 650 – 700 PCH Project

The Los Angeles County Sanitation Districts (Districts) received your will serve letter request for the subject project on December 15, 2020. The proposed project is located within the jurisdictional boundary of District No. 5. We offer the following comments regarding sewerage service:

1. The wastewater flow originating from the proposed project will discharge to a local sewer line, which is not maintained by the Districts, for conveyance to the Districts' 120th Street Extension No. 2 Trunk Sewer, located in Douglas Street just north of Maple Avenue. The Districts' 15-inch diameter trunk sewer has a capacity of 1.7 million gallons per day (mgd) and conveyed a peak flow of 0.8 mgd when last measured in 2017.

2. The wastewater generated by the proposed project will be treated at the Joint Water Pollution Control Plant located in the City of Carson, which has a capacity of 400 mgd and currently processes an average flow of 261.1 mgd.

3. The expected increase in average wastewater flow from the project site, described in the application as the renovation of 163,095 square feet of existing structure into office space and 77,942 square feet of new commercial office space, is 37,880 gallons per day. For a copy of the Districts' average wastewater generation factors, go to www.lacsd.org, under Services, then Wastewater Program and Permits, select Will Serve Program, and scroll down to click on the Table 1, Loadings for Each Class of Land Use link.

4. The Districts are empowered by the California Health and Safety Code to charge a fee to connect facilities (directly or indirectly) to the Districts' Sewerage System or to increase the strength or quantity of wastewater discharged from connected facilities. This connection fee is a capital facilities fee that is used by the Districts to upgrade or expand the Sewerage System. Payment of a connection fee may be required before this project is permitted to discharge to the Districts' Sewerage System. For more information and a copy of the Connection Fee Information Sheet, go to www.lacsd.org, under Services, then Wastewater (Sewage) and select Rates & Fees. In determining the impact to the Sewerage System and applicable connection fees, the Districts will determine the user category (e.g. Condominium, Single Family home, etc.) that best represents the actual or anticipated use of the parcel(s) or facilities on the parcel(s) in the development. For more specific information regarding the connection fee application procedure and fees, the developer should contact the Districts' Wastewater Fee Public Counter at (562) 908-4288, extension 2727.

5. In order for the Districts to conform to the requirements of the Federal Clean Air Act (CAA), the capacities of the Districts' wastewater treatment facilities are based on the regional growth forecast adopted by the Southern California Association of Governments (SCAG). Specific policies included in the development of the SCAG regional growth forecast are incorporated into clean air plans, which are prepared by the South Coast and Antelope Valley Air Quality Management Districts in order to improve air quality in the South Coast and Mojave Desert Air Basins as mandated by the CCA. All expansions of Districts' facilities must be sized and service phased in a manner that will be consistent with the SCAG regional growth forecast for the counties of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Imperial. The available capacity of the Districts' treatment facilities will, therefore, be limited to levels associated with the approved growth identified by SCAG. As such, this letter does not constitute a guarantee of wastewater service, but is to advise the developer that the Districts intend to provide this service up to the levels that are legally permitted and to inform the developer of the currently existing capacity and any proposed expansion of the Districts' facilities.

If you have any questions, please contact the undersigned at (562) 908-4288, extension 2717 or at araza@lacsd.org.

Very truly yours,

Adriana Raza

17	1282	1330 E Franklin	19,950 sf	Office/ Industrial	47,250 sf	Office	Entitlements Pending

APPENDIX K
Draft Mitigation Monitoring and Reporting Program

No.	Environmental Factor	Mitigation Measure	Actions Required	When Monitoring Occurs	Responsible Agency or Party	Monitoring Agency or Party
AES-1	Aesthetics	Prior to issuance of a building permit, the Project applicant must submit a lighting plan to the City for review and approval by the Director of Planning and Building Safety. The plan must include the location, height, number of lights, foot-candles by area, and estimates of maximum illumination on-site with no spill at the property lines. The plan must also demonstrate that all lighting fixtures on the buildings and throughout the entire project site are designed and installed so as to contain light on the subject property and will not create spillover effects or be directed toward adjacent properties or public rights-of-way.	Provide lighting plan to the City for review and approval.	Prior to issuance of building permits.	Project Developer	City of El Segundo, Planning and Building Safety Department
AES-2	Aesthetics	Prior to issuance of a building permit, the Project applicant must submit the Final Design Plans to the City for review and approval by the Director of Planning and Building Safety. The plans must identify the material use that meets the Visible Light Reflection (VLR) performance of the following: i) The new west-facing façade of Building A and the south-facing façade of Building C shall employ a high-performance glazing system comprising a commercial glazing equal to Vitro Solarban 70(2) + Clear with exterior visible light reflection (VLR) of 13% or less; ii) Exterior metal cladding on the Building A curtainwall facing Pacific Coast Highway to be finished with aluminum composite panels	Provide Final Design Plans to the City for review and approval.	Prior to issuance of building permits.	Project developer	City of El Segundo, Planning and Building Safety Department

No.	Environmental Factor	Mitigation Measure	Actions Required	When Monitoring Occurs	Responsible Agency or Party	Monitoring Agency or Party
		(ACP), with matte white or matte, clear anodized aluminum finish; and, iii) Concrete on the north and south elevations of Building A will be painted with low sheen paint and clad limitedly in matte finish ACP with matte white or matte, clear anodized aluminum finish.				
CUL-1	Cultural Resources	Archaeological and Native American monitoring shall be conducted for any grading-related ground disturbing activity have the potential to disturb native soils (i.e., non-engineered fill) within the Project site. Monitoring shall be performed under the direction of a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for archaeology (National Park Service 1983). If cultural resources are encountered during ground-disturbing activities, work in the immediate area must halt and the find must be evaluated by the qualified archaeologist. Depending upon the nature of the find, if the discovery proves to be potentially significant under CEQA, as determined by the qualified archaeologist, additional work such as data recovery excavation, avoidance of the area of the find, documentation, testing, data recovery, reburial, archival review and/or transfer to the appropriate museum or educational institution, or other appropriate actions may be warranted at the discretion of the qualified archaeologist. The archaeologist shall complete a report of excavations and findings and submit the report to	Applicant to hire a qualified archaeologist and submit evidence of this contracted archaeologist to the City.	Applicant to submit evidence of a contracted, qualified archaeologist to the City prior to issuance of building permits.	Project developer	City of El Segundo, Planning and Building Safety Department

No.	Environmental Factor	Mitigation Measure	Actions Required	When Monitoring Occurs	Responsible Agency or Party	Monitoring Agency or Party
		the Director of Planning and Building Safety. After the find is appropriately mitigated, work in the area may resume.				
Paleo-1	Geology and Soils	Prior to the issuance of any grading permits, the applicant shall retain a qualified paleontologist who meets the qualifications established by the Society of Vertebrate Paleontology (SVP) to develop a Worker Environmental Awareness Program (WEAP), which shall be in compliance with SVP guidelines. The paleontologist shall present the training to all construction staff to provide them with a basic understanding of the types of fossils that may be encountered and the laws protecting them, and the procedures to follow in the event the finds are encountered. In the event that paleontological resources are encountered during earth disturbance activities, all construction activities in the area of the find shall be temporarily halted and the paleontologist shall be notified to evaluate the find and determine the appropriate treatment in accordance with SVP guidelines for identification, evaluation, disclosure, avoidance, or recovery, and curation, as appropriate.	Applicant to hire a qualified paleontologist and submit evidence of this contracted paleontologist to the City. This paleontologist to provide WEAP training to all construction staff.	Applicant to submit evidence of a contracted qualified paleontologist to the City prior to issuance of building permits. WEAP training shall be administered prior to the start of earthwork activities and shall be administered to any new construction workers involved in excavation efforts associated with the Project.	Project developer	City of El Segundo, Planning and Building Safety Department
HAZ-1	Hazards and Hazardous Materials	The applicant shall conduct additional investigation and potential remediation actions associated with the previous USTs and clarifier uses. As identified in the Phase I ESA (**Appendix E**), the following investigations will be conducted to identify and confirm the location of the eight 1,000-gallon USTs and clarifier at 700 Pacific Coast Highway and the potential UST	Conduct additional investigation and potential remediation associated with previous USTs and clarifier uses.	Applicant to provide evidence of the presence/absence of a UST at 650 N. Pacific Coast Highway, and submit the results	Project developer	City of El Segundo, Planning and Building Safety Department and El Segundo Fire Department

No.	Environmental Factor	Mitigation Measure	Actions Required	When Monitoring Occurs	Responsible Agency or Party	Monitoring Agency or Party
		at 650 Pacific Coast Highway (associated with 690 North Sepulveda Boulevard). • Eight 1,000-gallon USTs at 700 Pacific Coast Highway: A geophysical survey and Phase II subsurface investigation shall be conducted to identify the location of the former USTs and to sample at the depth of the UST to determine the concentrations of constituents of concern (petroleum hydrocarbons, volatile organic compounds, and metals). In the event that the analyte concentrations exceed appropriate use standards, as designated by the El Segundo Fire Department (local Certified Unified Program Agency [CUPA]), the Project shall implement applicable protective measures in accordance with an approved remedial action plan, including: 1) installation of a soil vapor barrier adequate to protect against vapor transmission; 2) implement a soil-vapor extraction system; and/or 3) conduct remedial excavation activities. Based on information provided by the CUPA, if passive or active systems are utilized to prevent vapor migration, a Land Use Covenant would be required, and recorded, and an Operation and Maintenance (O&M) Plan would be developed for the systems. • Clarifier at 700 Pacific Coast Highway: A geophysical survey and Phase II subsurface investigation shall be conducted to identify the location of the former clarifier and to sample adjacent soils to determine the extent, if any, of		of the geophysical surveys and Phase II Investigations and incorporate applicable treatment procedures in the final design plans to the City prior to issuance of grading and/or building permits.		

No.	Environmental Factor	Mitigation Measure	Actions Required	When Monitoring Occurs	Responsible Agency or Party	Monitoring Agency or Party
		prior release of tetrachloroethylene. In the event that the analyte concentrations exceed appropriate use standards, as designated by the El Segundo Fire Department (local CUPA), the Project shall implement applicable protective measures in accordance with an approved remedial action plan, including: 1) installation of a soil vapor barrier adequate to protect against vapor transmission; 2) implement a soil-vapor extraction system; and/or 3) conduct remedial excavation activities. • Potential UST at 650 North Pacific Coast Highway: The applicant shall conduct review of pending agency records for the UST listed at 690 North Sepulveda Boulevard to determine whether a UST is located on the Project site. In the event the documentation indicates that a UST has the potential to be present, the applicant shall conduct a geophysical survey and Phase II subsurface investigation to identify the location of the former UST and to sample at the depth of the UST to determine whether any concentrations of constituents of concern (petroleum hydrocarbons, volatile organic compounds, and metals) are present in surround soils. In the event that the analyte concentrations exceed appropriate use standards, as designated by the El Segundo Fire Department (local CUPA), the Project shall implement applicable protective measures in accordance with an approved remedial action plan, including: 1) installation of a soil vapor

		barrier adequate to protect against vapor transmission; 2) implement a soil-vapor extraction system; and/or 3) conduct remedial excavation activities.				
HAZ-2	Hazards and Hazardous Materials	Prior to commencement of renovation activities on Buildings A and B, a hazardous building materials survey shall be conducted on both buildings to identify asbestos, lead-based paint, and other potentially hazardous building materials (such as mercury thermometers, lighting and electrical appurtenances). Following results of the hazardous materials survey, renovation plans and contract specifications shall incorporate abatement procedures for the removal of materials containing asbestos and lead. All abatement work shall be done in accordance with federal, state, and local regulations, including those of the U.S. EPA, Occupational Safety and Health Administration, California Occupational Safety and Health Administration, and the SCAQMD.	Conduct a hazardous building materials survey on Buildings A and B and incorporate required abatement work.	-	Project developer	City of El Segundo, Planning and Building Safety Department and El Segundo Fire Department
TRANS-1	Transportation	The applicant shall prepare and implement a Project-specific TDM program that will reduce the Project's daily trips by 254. The TDM program shall consist of a list of approved strategies, guided by the California Air Pollution Control Officers Association (CAPCOA) recommendations to promote carpool, bicycling, walking, and transit in place of individual vehicle trips to and from the Project. These elements may change or be adjusted to adapt to changing commute	Develop and implement a Project-specific TDM program.	Applicant to provide a TDM Program to the City for review, with approval completed prior to Building Permit Final or issuance of the first certificate of occupancy. The success of the	Project developer	City of El Segundo, Planning and Building Safety Department

No.	Environmental Factor	Mitigation Measure	Actions Required	When Monitoring Occurs	Responsible Agency or Party	Monitoring Agency or Party
		trends and to maximize the efficiency and performance of the program. The following is a preliminary list of applicable strategies that provide feasible means to adequately reduce the Project VMT: • Safe and Well-Lit Access to Transit: Enhance the route for people walking or bicycling to nearby transit stops, such as those located on Pacific Coast Highway and Mariposa Avenue. (Maximum reduction of 23 trips) • Transit Subsidies: Provide subsidization of transit fare for employees of the project site. This strategy helps reduce single-occupancy vehicle trips by utilizing transit service already present in the project area. (Maximum reduction of 116 trips) • Travel Behavior Change Program: Provide a web site that allows employees to research other modes of transportation for commuting. (Maximum reduction of 46 trips) • Promotions & Marketing: Provide marketing and promotional tools to educate and inform travelers about site-specific transportation options and the effects of their travel choices with passive educational and promotional materials. (Maximum reduction of 46 trips)		program will be monitored and the tenant commute patterns will be reviewed, with updates of adjustments and changes to be provided in an annual monitoring report, or the TDM shall include a mechanism to report to the City on the progress.		

No.	Environmental Factor	Mitigation Measure	Actions Required	When Monitoring Occurs	Responsible Agency or Party	Monitoring Agency or Party
		• Commute Assistance Center: Provide a computer kiosk that allows employees to research other modes of transportation for commuting. (Maximum reduction of 46 trips) • Preferential Carpool / Vanpool Parking Spaces: Provide reserved carpool/vanpool spaces closer to the building entrance. (Maximum reduction of 116 trips) • Passenger Loading Zones: Provide passenger loading zones for easy access to carpools or vanpools. (Maximum reduction of 58 trips) • Bike Share: Implement bike share to allow people to have on-demand access to a bicycle, as-needed. (Maximum reduction of 3 trips) • Bike Parking and Facilities: Include secure bike parking and showers to provide additional end-of-trip bicycle facilities to support safe and comfortable bicycle travel. Provide on-site bicycle repair tools and space to use them supports on-going use of bicycles for transportation. (Maximum reduction of 35 trips) • Traffic Calming Improvements: Implement traffic calming measures throughout and around the perimeter of the Project site that encourage people to walk, bike, or take

		commence a ground-disturbing activity. The Tribal monitor will only be present on-site during the construction phases that involve ground-disturbing activities. Ground disturbing activities are defined by the Tribe as activities that may include, but are not limited to, pavement removal, potholing or auguring, grubbing, tree removals, boring, grading, excavation, drilling, and trenching, within the project area. The Tribal Monitor will complete daily monitoring logs that will provide descriptions of the day's activities, including construction activities, locations, soil, and any cultural materials identified. The on-site monitoring shall end when all ground-disturbing activities on the Project site are completed, or when the Tribal Representatives and Tribal Monitor have indicated that all upcoming ground-disturbing activities at the Project site have little to no potential for impacting Tribal Cultural Resources.~~that is culturally affiliated with the area to be present on-site during ground-disturbing activities in native soils. Monitoring shall be performed under the direction of a qualified archaeologist meeting the Secretary of the Interior's Professional Qualifications Standards for archaeology (National Park Service 1983).~~ Upon discovery of any Tribal Cultural Resources, construction activities shall cease in the immediate vicinity of the find (not less than the surrounding 100 feet) until the find can be

		~~coroner determines whether the remains are human and subsequently Native American. The discovery is to be kept confidential and secure to prevent any further disturbance. If the finds are determined to be Native American, the coroner will notify the NAHC as mandated by state law who will then appoint a Most Likely Descendent (MLD). If resources are discovered that are Native American in origin, the Consulting Tribe will retain it/them in the form and/or manner the Tribe deems appropriate. The on-site monitoring shall end when all ground-disturbing activities on the Project Site are completed, or when the Tribal Representatives and Tribal Monitor have indicated that all upcoming ground-disturbing activities at the Project Site have little to no potential for impacting Tribal Cultural Resources.~~				

Mitigation Compliance

As a means of ensuring compliance of above mitigation measures, the project proponent and subsequent owner(s) are responsible for funding of all mitigation measures and monitoring efforts, for submitting regular compliance reports to the Director of Planning and Building Safety for review, and for replenishing the mitigation monitoring account if necessary, until such time as all mitigation measures have been implemented and completed.
