Eval General Type:	Compliance Evaluation Inspection
Eval Date:	08-18-2016
Violations Found:	No
Eval Type:	Industrial Storm Water Compliance Evaluation
Eval Notes:	Staff visited and inspected the site in response to a NOT. The company filed NOT because it changed the name from Teledyne Controls Inc. to Teledyne Controls LLC. The former NEC ID number was 4 19NEC001291. Staff met at the site with Mr. Vu Nguyen, Environmental Health and Safety/ Manufacturing Engineer, (310)765-9436. He permitted the inspection and to take photos during the inspection. Also, he accompanied staff during the site inspection. The company assembles electronic parts at the building . The parts are manufactured outside and delivered to this building for assembling and shipping to

TELEDYNE CONTROLS LLC (Continued) **S106832778**

customers. All the industrial activities are conducted indoors. Outside the building was located only a large empty nitrogen tank and part of a cardboard compactor. The company was very clean and organized. Staff believe that the NEC is appropriate in this case. Photos from the site are attached.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code:	D001
Waste name:	IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs):	1107
Waste code:	D002
Waste name:	A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs):	141821
Waste code:	D003
Waste name:	A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs):	8132
Waste code:	D006
Waste name:	CADMIUM
Amount (Lbs):	1028
Waste code:	D007
Waste name:	CHROMIUM
Amount (Lbs):	2088
Waste code:	D008
Waste name:	LEAD
Amount (Lbs):	49159
Waste code:	D011
Waste name:	SILVER
Amount (Lbs):	10402
Waste code:	F001
Waste name:	THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135

THE BOEING COMPANY (Continued) **1000240982**

. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 211
. Waste name: Halogenated solvents (chloroform, methyl chloride, perchloroethylene, etc.)

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB's

. Waste code: 291
. Waste name: Latex waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 611
. Waste name: Contaminated soil from site clean-ups

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: 726
. Waste name: Liquids with nickel > 134 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D018
. Waste name: BENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D040
. Waste name: TRICHLORETHYLENE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF

THE BOEING COMPANY (Continued) **1000240982**

ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F009
. Waste name: SPENT STRIPPING AND CLEANING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: LABP
. Waste name: LAB PACK

. Waste code: P012
. Waste name: ARSENIC OXIDE AS2O3 (OR) ARSENIC TRIOXIDE

THE BOEING COMPANY (Continued) **1000240982**

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P029
. Waste name: COPPER CYANIDE (OR) COPPER CYANIDE CU(CN)

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

. Waste code: P098
. Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

. Waste code: P106
. Waste name: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U012
. Waste name: ANILINE (I,T) (OR) BENZENAMINE (I,T)

. Waste code: U041
. Waste name: EPICHLOROHYDRIN (OR) OXIRANE, (CHLOROMETHYL)-

. Waste code: U079
. Waste name: 1,2-DICHLOROETHYLENE (OR) ETHENE, 1,2-DICHLORO-,(E)-

. Waste code: U112
. Waste name: ACETIC ACID, ETHYL ESTER (I) (OR) ETHYL ACETATE (I)

. Waste code: U133
. Waste name: HYDRAZINE (R,T)

. Waste code: U154
. Waste name: METHANOL (I) (OR) METHYL ALCOHOL (I)

. Waste code: U165
. Waste name: NAPHTHALENE

. Waste code: U213
. Waste name: FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)

. Waste code: U219
. Waste name: THIOUREA

. Waste code: U220
. Waste name: BENZENE, METHYL- (OR) TOLUENE

. Waste code: U223
. Waste name: BENZENE, 1,3-DIISOCYANATOMETHYL- (R,T) (OR) TOLUENE DIISOCYANATE (R,T)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF

THE BOEING COMPANY (Continued) **1000240982**

LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 1107

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 141821

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 8132

Waste code: D006
Waste name: CADMIUM
Amount (Lbs): 1028

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 2088

Waste code: D008
Waste name: LEAD
Amount (Lbs): 49159

Waste code: D011
Waste name: SILVER
Amount (Lbs): 10402

Waste code: F001
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE, AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 118

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT

THE BOEING COMPANY (Continued) **1000240982**

MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 20778

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

CERS ID: 10206970
CERS Description: Chemical Storage Facilities

Violations:
Site ID: 160608
Site Name: The Boeing Company - S15
Violation Date: 02-23-2017
Citation: 22 CCR 15 66265.31 - California Code of Regulations, Title 22, Chapter 15, Section(s) 66265.31
Violation Description: Failure to maintain and operate the facility to minimize the possibility of a fire, explosion, or any unplanned sudden or non-sudden release of hazardous waste or hazardous waste constituents to air, soil, or surface water which could threaten human health or the environment.
Violation Notes: Returned to compliance on 03/23/2017. Failure to store hazardous waste in a manner that protects from a release. The plating process line had drag-out liquid collecting on the containment floor. The facility is not meeting the DTSC's guideline for wet floor management at plating facilities. Any spills in the plating area shall be removed by the end of each shift. The facility shall follow the wet floor guidance document. The document can be found at www.dtsc.ca.gov.

Environmental Interest/Information System:
AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

Facility URL: http://ofmpub.epa.gov/enviro/fii_query_detail.disp_program_facility?p_registry_id=110002333975

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Completed Info:
Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Preliminary Assessment Report
Completed Date: 09/24/1996
Comments: Preliminary Assessment completed under U.S. EPA grant. Site is no further assessment for U.S. EPA. However, DTSC requires a Preliminary Endangerment Assessment.

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Site Screening
Completed Date: 05/25/1995
Comments: The Department received a hazardous substace release report. The site had a waste leak from a plating line and acidic aqueous waste left metal contamination in the soil. Due to evidence of contamination, the Department recommends a PEA. The Department notified the RP that a PEA be conducted.

Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Completed Date: 10/06/2016
Comments: Not reported

Completed Area Name: PROJECT WIDE
Completed Sub Area Name: Not reported
Completed Document Type: Correspondence
Completed Date: 01/18/2017
Comments: Document found acceptable for purposes for moving forward. Anderson made corrections to the reports that constituted the PEAE and agreed to further investigation. They maintain that the SVE should continue to operate although site characterization is incomplete and a remedy selection document has not been prepared. DTSC intends to address outstanding data gaps and discrepencies in a forthcoming SSI scoping meeting.

Completed Document Type: Correspondence
Completed Date: 01/18/2017
Comments: Document found acceptable for purposes for moving forward. Anderson made corrections to the reports that constituted the PEAE and agreed to further investigation. They maintain that the SVE should continue to operate although site characterization is incomplete and a remedy selection document has not been prepared. DTSC intends to address outstanding data gaps and discrepencies in a forthcoming SSI scoping meeting.

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 241
. Waste name: Tank bottom waste

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste code: 291
. Waste name: Latex waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 461
. Waste name: Degreasing sludge

. Waste code: 512
. Waste name: Other empty containers 30 gallons or more

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 731
. Waste name: Liquids with polychlorinated biphenyls > 50 mg/l

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D004
. Waste name: ARSENIC

. Waste code: D005
. Waste name: BARIUM

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D010
. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D015
. Waste name: TOXAPHENE (C10 H10 CL8, TECHNICAL CHLORINATED CAMPHENE, 67-69 PERCENT CHLORINE)

. Waste code: D018
. Waste name: BENZENE

. Waste code: D022
. Waste name: CHLOROFORM

. Waste code: D027
. Waste name: 1,4-DICHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F027
. Waste name: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

. Waste code: P065
. Waste name: FULMINIC ACID, MERCURY(2+) SALT (R,T) (OR) MERCURY FULMINATE (R,T)

. Waste code: P074
. Waste name: NICKEL CYANIDE (OR) NICKEL CYANIDE NI(CN)2

. Waste code: P098
. Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste code: P106
. Waste name: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

. Waste code: P120
. Waste name: VANADIUM OXIDE V2O5 (OR) VANADIUM PENTOXIDE

. Waste code: P122
. Waste name: ZINC PHOSPHIDE ZN3P2, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 10% (R,T)

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste code: U003
. Waste name: ACETONITRILE (I,T)

. Waste code: U019
. Waste name: BENZENE (I,T)

. Waste code: U031
. Waste name: 1-BUTANOL (I) (OR) N-BUTYL ALCOHOL (I)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 10280

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 4410

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 1996

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 2964

Waste code: D008
Waste name: LEAD
Amount (Lbs): 2110

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 51

Waste code: D011
Waste name: SILVER
Amount (Lbs): 537

Waste code: D018
Waste name: BENZENE
Amount (Lbs): 5

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 1978

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 431

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 12042

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Handler Activities Summary:

U.S. importer of hazardous waste: No

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: Yes
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
User oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No

Universal Waste Summary:
Waste type: E
Accumulated waste on-site: No
Generated waste on-site: Yes

Waste type: Batteries
Accumulated waste on-site: Yes
Generated waste on-site: Not reported

Waste type: Thermostats
Accumulated waste on-site: Yes

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 171
. Waste name: Metal sludge (see 121)

. Waste code: 172
. Waste name: Metal dust (see 121) and machining waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 212
. Waste name: Oxygenated solvents (acetone, butanol, ethyl acetate, etc.)

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 221
. Waste name: Waste oil and mixed oil

. Waste code: 223
. Waste name: Unspecified oil-containing waste

. Waste code: 241
. Waste name: Tank bottom waste

. Waste code: 291
. Waste name: Latex waste

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 343
. Waste name: Unspecified organic liquid mixture

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 461
. Waste name: Degreasing sludge

. Waste code: 512
. Waste name: Other empty containers 30 gallons or more

. Waste code: 513
. Waste name: Empty containers less than 30 gallons

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste name: Laboratory waste chemicals

. Waste code: 711
. Waste name: Liquids with cyanides > 1000 mg/l

. Waste code: 731
. Waste name: Liquids with polychlorinated biphenyls > 50 mg/l

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste name: SELENIUM

. Waste code: D011
. Waste name: SILVER

. Waste code: D015
. Waste name: TOXAPHENE (C10 H10 CL8, TECHNICAL CHLORINATED CAMPHENE, 67-69 PERCENT CHLORINE)

. Waste code: D018
. Waste name: BENZENE

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

. Waste code: D022
. Waste name: CHLOROFORM

. Waste code: D027
. Waste name: 1,4-DICHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: F001
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F006
. Waste name: WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.

. Waste code: F007
. Waste name: SPENT CYANIDE PLATING BATH SOLUTIONS FROM ELECTROPLATING OPERATIONS.

. Waste code: F008
. Waste name: PLATING BATH RESIDUES FROM THE BOTTOM OF PLATING BATHS FROM ELECTROPLATING OPERATIONS IN WHICH CYANIDES ARE USED IN THE PROCESS.

. Waste code: F027
. Waste name: DISCARDED UNUSED FORMULATIONS CONTAINING TRI-, TETRA-, OR PENTACHLOROPHENOL OR DISCARDED UNUSED FORMULATIONS CONTAINING COMPOUNDS DERIVED FROM THESE CHLOROPHENOLS. (THIS LISTING DOES NOT INCLUDE FORMULATIONS CONTAINING HEXACHLOROPHENE SYNTHESIZED FROM PREPURIFIED 2,4,5-TRICHLOROPHENOL AS THE SOLE COMPONENT.)

. Waste code: P015
. Waste name: BERYLLIUM

. Waste code: P030
. Waste name: CYANIDES (SOLUBLE CYANIDE SALTS), NOT OTHERWISE SPECIFIED

. Waste code: P065
. Waste name: FULMINIC ACID, MERCURY(2+) SALT (R,T) (OR) MERCURY FULMINATE (R,T)

. Waste code: P074
. Waste name: NICKEL CYANIDE (OR) NICKEL CYANIDE NI(CN)2

. Waste code: P098
. Waste name: POTASSIUM CYANIDE (OR) POTASSIUM CYANIDE K(CN)

. Waste code: P106
. Waste name: SODIUM CYANIDE (OR) SODIUM CYANIDE NA(CN)

. Waste code: P120
. Waste name: VANADIUM OXIDE V2O5 (OR) VANADIUM PENTOXIDE

. Waste code: P122
. Waste name: ZINC PHOSPHIDE ZN3P2, WHEN PRESENT AT CONCENTRATIONS GREATER THAN 10% (R,T)

. Waste code: U002
. Waste name: 2-PROPANONE (I) (OR) ACETONE (I)

. Waste name: CARBAMIC ACID, ETHYL ESTER (OR) ETHYL CARBAMATE (URETHANE)

. Waste code: U239
. Waste name: BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 10280

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

Amount (Lbs): 4410

Waste code: D003
Waste name: A MATERIAL IS CONSIDERED TO BE A REACTIVE HAZARDOUS WASTE IF IT IS NORMALLY UNSTABLE, REACTS VIOLENTLY WITH WATER, GENERATES TOXIC GASES WHEN EXPOSED TO WATER OR CORROSIVE MATERIALS, OR IF IT IS CAPABLE OF DETONATION OR EXPLOSION WHEN EXPOSED TO HEAT OR A FLAME. ONE EXAMPLE OF SUCH WASTE WOULD BY WASTE GUNPOWDER.
Amount (Lbs): 1996

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 2964

Waste code: D008
Waste name: LEAD
Amount (Lbs): 2110

Waste code: D009
Waste name: MERCURY
Amount (Lbs): 51

Waste code: D011
Waste name: SILVER
Amount (Lbs): 537

Waste code: D018
Waste name: BENZENE
Amount (Lbs): 5

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 1978

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 431

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

RAYTHEON SPACE AND AIRBORNE SYSTEMS (Continued) **1015732613**

Amount (Lbs): 12042

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 12042

CA BOND EXP. PLAN:

Reponsible Party:	FEDERAL FACILITY SITE CLEANUP WORKPLAN
Project Revenue Source Company:	Not reported
Project Revenue Source Addr:	Not reported
Project Revenue Source City,St,Zip:	Not reported
Project Revenue Source Desc:	The Department will either enter into an interagency agreement with the Department of Defense or will issue an order. The Department has budgeted $15,000 for oversight/monitoring costs. DHS will seek 100 percent cost recovery for its direct costs plus staff costs and overhead related to the project. The Department of Defense is expected to fund all remedial investigation and cleanup activities.
Site Description:	The Fort McArthur site is a former nike missile base located in the White's Point area of San Pedro. The Army transferred the site to the Air Force for housing and the Air Force transferred part of the site to the City of Los Angeles for a park. Thesite is located at 25th Street and Western Avenue in San Pedro.
Hazardous Waste Desc:	Ninety-six acres of the original 561-acre complex remain under Air Force control. The remaining properties were disposed of as surplus. An initial assessment study was performed on the active ninety-six acres of Fort McArthur. Nine acres of potential contamination were identified. Only two areas are recommended by the Air Force for further site characterization. Released wastes include pesticides and battery acids.
Threat To Public Health & Env:	Residues of hazardous wastes in the soil are the only identified environmental threat. Ground water is intruded by seawater and is unsuitable at this time for use as a drinking water supply. There is no known exposure at this time.
Site Activity Status:	The installation restoration program (IRP) has been initiated at this base. Currently, the program is in the operations/remedial action phase of the mitigation process.

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 133
. Waste name: Aqueous solution with 10% or more total organic residues

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB's

. Waste code: 271
. Waste name: Organic monomer waste (includes unreacted resins)

. Waste code: 331
. Waste name: Off-specification, aged, or surplus organics

. Waste code: 342
. Waste name: Organic liquids with metals (see 121)

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 725
. Waste name: Liquids with mercury > 20 mg/l

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D011
. Waste name: SILVER

. Waste code: D021
. Waste name: CHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.
Amount (Lbs): 58750

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 6660

Waste code: D005
Waste name: BARIUM
Amount (Lbs): 231640

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 297248

Waste code: D011
Waste name: SILVER
Amount (Lbs): 40685

Waste code: D035
Waste name: METHYL ETHYL KETONE
Amount (Lbs): 286725

Waste code: F002
Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE,

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2-TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE LISTED IN F001, F004, OR F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 35260

Waste code: F003
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NON-HALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS, AND, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005, AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Amount (Lbs): 264240

Waste code: F005
Waste name: THE FOLLOWING SPENT NON-HALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NON-HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Summary:

. Waste code: 121
. Waste name: Alkaline solution (pH >12.5) with metals (antimony, arsenic, barium, beryllium, cadmium, chromium, cobalt, copper, lead, mercury, molybdenum, nickel, selenium, silver, thallium, vanadium, and zinc)

. Waste code: 122
. Waste name: Alkaline solution without metals (pH > 12.5)

. Waste code: 123
. Waste name: Unspecified alkaline solution

. Waste code: 131
. Waste name: Aqueous solution (2 < pH < 12.5) containing reactive anions (azide, bromate, chlorate, cyanide, fluoride, hypochlorite, nitrite, perchlorate, and sulfide anions)

. Waste code: 132
. Waste name: Aqueous solution w/metals (< restricted levels and see waste code 121 for a list of metals)

. Waste code: 133
. Waste name: Aqueous solution with 10% or more total organic residues

. Waste code: 134
. Waste name: Aqueous solution with <10% total organic residues

. Waste code: 135
. Waste name: Unspecified aqueous solution

. Waste code: 141
. Waste name: Off-specification, aged, or surplus inorganics

. Waste code: 151
. Waste name: Asbestos-containing waste

. Waste code: 181
. Waste name: Other inorganic solid waste

. Waste code: 213
. Waste name: Hydrocarbon solvents (benzene, hexane, Stoddard, etc.)

. Waste code: 214
. Waste name: Unspecified solvent mixture

. Waste code: 261
. Waste name: Polychlorinated biphenyls and material containing PCB’s

. Waste code: 271
. Waste name: Organic monomer waste (includes unreacted resins)

. Waste code: 331

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste name: Off-specification, aged, or surplus organics

. Waste code: 342
. Waste name: Organic liquids with metals (see 121)

. Waste code: 352
. Waste name: Other organic solids

. Waste code: 541
. Waste name: Photochemicals / photo processing waste

. Waste code: 551
. Waste name: Laboratory waste chemicals

. Waste code: 723
. Waste name: Liquids with chromium (VI) > 500 mg/l

. Waste code: 725
. Waste name: Liquids with mercury > 20 mg/l

. Waste code: 741
. Waste name: Liquids with halogenated organic compounds > 1000 mg/l

. Waste code: 791
. Waste name: Liquids with pH < 2

. Waste code: 792
. Waste name: Liquids with pH < 2 with metals

. Waste code: D001
. Waste name: IGNITABLE WASTE

. Waste code: D002
. Waste name: CORROSIVE WASTE

. Waste code: D003
. Waste name: REACTIVE WASTE

. Waste code: D005
. Waste name: BARIUM

. Waste code: D006
. Waste name: CADMIUM

. Waste code: D007
. Waste name: CHROMIUM

. Waste code: D008
. Waste name: LEAD

. Waste code: D009
. Waste name: MERCURY

. Waste code: D011
. Waste name: SILVER

. Waste code: D021

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

. Waste name: CHLOROBENZENE

. Waste code: D035
. Waste name: METHYL ETHYL KETONE

. Waste code: D039
. Waste name: TETRACHLOROETHYLENE

. Waste code: F002
. Waste name: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F003
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F005
. Waste name: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

. Waste code: F019
. Waste name: WASTEWATER TREATMENT SLUDGES FROM THE CHEMICAL CONVERSION COATING OF ALUMINUM, EXCEPT FROM ZIRCONIUM PHOSPHATING IN ALUMINUM CAN WASHING WHEN SUCH PHOSPHATING IS AN EXCLUSIVE CONVERSION COATING PROCESS.

Biennial Reports:

Last Biennial Reporting Year: 2017

Annual Waste Handled:
Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

NORTHROP GRUMMAN EL SEGUNDO (Continued) **1000840757**

Amount (Lbs): 58750

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.
Amount (Lbs): 6660

Waste code: D005
Waste name: BARIUM
Amount (Lbs): 231640

Waste code: D007
Waste name: CHROMIUM
Amount (Lbs): 297248

Waste code: D011
Waste name: SILVER
Amount (Lbs): 40685

Waste code: D035
Waste name: METHYL ETHYL KETONE

Environmental Interest/Information System:
RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Agency Telephone:	3103315418
Agency Type:	Private
SIC Code:	3721
SIC Code 2:	Not reported
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Primary Waste:	STORMS
Waste Type2:	Not reported
Waste2:	Stormwater Runoff
Primary Waste Type:	Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Secondary Waste:	Not reported
Secondary Waste Type:	Not reported
Design Flow:	0
Baseline Flow:	0
Reclamation:	No reclamation requirements associated with this facility.
POTW:	The facility is not a POTW.
Treat To Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that. based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

CERS: CalEPA Regulated Site Portal Data

The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in California into a single database. It combines data from a variety of state and federal databases, and provides an overview of regulated activities across the spectrum of environmental programs for any given location in California. These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface waters, and toxic materials

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

EDR Hist Cleaner: EDR Exclusive Historical Cleaners

EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data
Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991

GEOCHECK ®- PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

422548
650 AND 700 PACIFIC COAST HIGHWAY
EL SEGUNDO, CA 90245

TARGET PROPERTY COORDINATES

Latitude (North):	33.92505 - 33° 55' 30.18''
Longitude (West):	118.395374 - 118° 23' 43.35''
Universal Tranverse Mercator:	Zone 11
UTM X (Meters):	371019.4
UTM Y (Meters):	3754528.2
Elevation:	118 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	5640438 VENICE, CA
Version Date:	2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

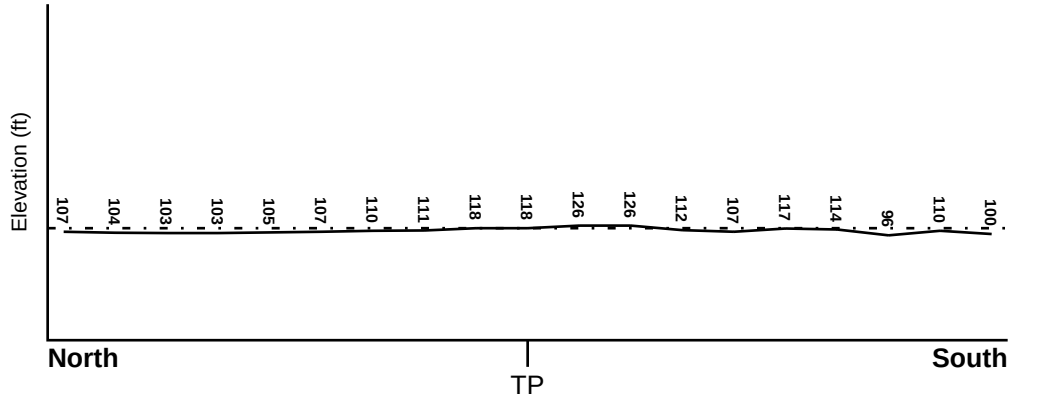
TOPOGRAPHIC INFORMATION

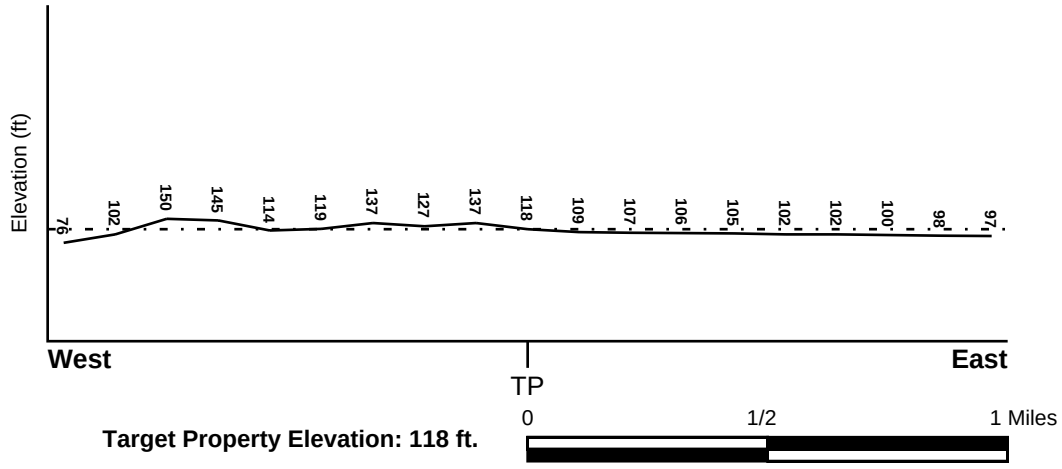
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES





0 1/2 1 Miles

Target Property Elevation: 118 ft.

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

Flood Plain Panel at Target Property	FEMA Source Type
06037C1770F	FEMA FIRM Flood data

Additional Panels in search area:	FEMA Source Type
06037C1760F	FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property	NWI Electronic Data Coverage
VENICE	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSW
Site Name:	International Rectifier
Site EPA ID Number:	CAD076208313
Groundwater Flow Direction:	West
Inferred Depth to Water:	80 feet.
Hydraulic Connection:	Aquifers underlying the site are interconnected.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information is inferred in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

MAP ID	LOCATION FROM TP	GENERAL DIRECTION GROUNDWATER FLOW
Not Reported		

* ©1996 Site--specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Quaternary
Code:	Q *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Stratifed Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name:	DELHI
Soil Surface Texture:	sand
Hydrologic Group:	Class A - High infiltration rates. Soils are deep, well drained to excessively drained sands and gravels.
Soil Drainage Class:	Somewhat excessive. Soils have high hydraulic conductivity and low water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel:	MODERATE
Depth to Bedrock Min:	> 60 inches
Depth to Bedrock Max:	> 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
	Boundary			Classification			
Layer	Upper	Lower	Soil Texture Class	AASHTO Group	Unified Soil	Permeability Rate (in/hr)	Soil Reaction (pH)
1	0 inches	10 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
2	10 inches	30 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
3	30 inches	50 inches	loamy sand	Granular materials (35 pct. or less passing No. 200), Silty, or Clayey Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10
4	50 inches	70 inches	sand	Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand.	COARSE-GRAINED SOILS, Sands, Clean Sands, Poorly graded sand. COARSE-GRAINED SOILS, Sands, Sands with fines, Silty Sand.	Max: 20.00 Min: 6.00	Max: 7.80 Min: 6.10

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand
clay

Surficial Soil Types: coarse sand
silt loam
sandy loam
gravelly - sand
loamy sand

clay

Shallow Soil Types: fine sandy loam
gravelly - loam
sandy clay loam
sandy clay

Deeper Soil Types: coarse sand
silty clay loam
gravelly - fine sandy loam
stratified
gravelly - sandy loam
weathered bedrock
clay loam

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
Source: United States Geologic Survey
EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
Source: FEMA
Telephone: 877-336-2627
Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
Source: Department of Fish and Wildlife
Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^{R} Information System
Source: EDR proprietary database of groundwater flow information
EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit
Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
Telephone: 800-672-5559
SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Dept of Conservation, Geologic Energy Management Division

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by AEI Consultants were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2015. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

Calif. Manifest Counts and Total Tonnage

No Records Found

Non California Manifest Total Tonnage

No Records Found

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

Waste Code Matrix as a spreadsheet

The Department of Toxics Substances Control (DTSC) takes every precaution to ensure the accuracy of data in the Hazardous Waste Tracking System (HWTS). However, because of the large number of manifests handled, inaccuracies in

the submitted data, limitations of the manifest system and the technical limitations of the database, DTSC cannot guarantee that the data accurately reflect what was actually transported or produced.

PUBLIC RECORDS REQUEST FORM

ATTENTION REQUESTOR: To fulfill your request for records, please fill out this form completely, and identify specifically the type of records you are requesting. Requests must reasonably describe identifiable records prepared, owned, used, or retained by the Sanitation Districts.

REQUESTOR INFORMATION

Name:	Jeffrey L. McNeil	Date:	
Company:	AEI Consultants		
Mailing Address:	9445 Derby Drive		
City:	Jurupa Valley	State: California	Zip Code: 92509
Phone Number:	949-241-2999	Fax Number (optional):	
Email Address (recommended):	jmcneil@compass-rms.com		

REQUESTED RECORDS

Please clearly describe each requested record or document
*(use additional copies of this form, as necessary)**

All records pertaining to Industrial Wastewater Discharge permits for the property located at: 650, 690 and 700 North Sepulveda Boulevard, El Segundo, California 90245, Also Know as 650, 690 and 700 Pacific Coast Highway, El Segundo, California 90245		
Time Period of Document Requested	From: 1/1/1849	To: Present

Time Period of Document Requested	From:	To:

Time Period of Document Requested	From:	To:

* *Requests that are not specific and focused will be returned for more information. If requested, the Sanitation Districts will assist you in making focused and effective requests for identifiable records. The Sanitation Districts will not create new documents or records in response to a request.*

9445 Derby
Jurupa Valley, Ca 92509

Ref: Request for Records; Control No. **1401677**, Received 5/19/2020
RE: P/O'S, EQ'S, NOV'S & NC'S FOR 650 & 700 N. SEPULVEDA BLVD, EL SEGUNDO, CA

After a thorough search of this agency's records, the following records were found:

P/O'S, EQL'S & NC'S FOR 650 & 700 N. SEPULVEDA BLVD, EL SEGUNDO, CA

The following records were not found:

NOV'S FOR 650 & 700 N. SEPULVEDA BLVD, EL SEGUNDO, CA

Your records were provided --Electronically-- on 5/20/2020.

Should you have any questions or need additional information, please do not hesitate to contact me at (909) 396-3700, Tuesday through Friday, between the hours of **8:00 a.m.** and **4:30 p.m.**
Sincerely,

Lisa Ramos

JAMES F. STAHL
Chief Engineer and General Manager

January 15, 2002
File: 05-02-5815
Account No.: 1800591

Mr. Steve Tsumura
Environmental Safety Coordinator
City of El Segundo
350 Main St.
El Segundo, CA 90245

Dear Mr. Tsumura:

Industrial Wastewater Discharge Permit No. 5815

Computer Science Corp.
650 N. Sepulveda Blvd.
El Segundo, CA 90245

Effective immediately, Industrial Wastewater Discharge Permit No. 5815 is void for the following reason:

Exempt. This company is now *permit exempt.*

Exemption from obtaining a permit does not relieve the company of all responsibility. The company must comply with all other Districts' *Wastewater Ordinance* regulations such as keeping rainwater out of the sewer, preventing large amounts of solids or oil and grease from entering the sewer, making certain that the dissolved sulfide concentration is below 0.1 mg/ℓ and that the pH is above 6.0 at all times. In addition, the company must comply with all of your regulations which may involve obtaining a permit through your agency. Changes in the Sanitation Districts' policies or in the company's business operations may require that the company obtain an industrial wastewater discharge permit in the future.

Very truly yours,

James F. Stahl

CERTIFICATE OF ANALYSIS

Prepared For: IT Corporation
336 W. Anaheim St.
Wilmington, CA 90744

Attn: Jess Tapia

Date: October 24, 1985

Date Received: October 16, 1985

P.O. Number: 4794

Job Number: 34714/rjc

Six (6) samples from H.A.C. Space and Communications, Project #4794.

The samples were composited as directed by the client. The composites were then analyzed for pH, sulfide, oil and grease, flash point, and cyanide, with the results reported in Table I.

Metals analyses were performed using inductively coupled argon plasma spectroscopy. Results of these analyses are reported in Table II.

The samples were analyzed for semi-volatile organic contaminants using combined gas chromatography-mass spectrometry according to EPA Methods 625. Results for compounds on the EPA Hazardous Substances List are given on the enclosed summary sheets.

Other organic contaminants found are listed in Table III.

I certify that this report truly represents the finding of work performed by me or under my direct supervision.

Reference: Chemical Disclosure Inventory for Verizon Wireless
650 S. Sepulveda Boulevard, El Segundo

To Whom It May Concern:

This is to certify that the information contained in the annual inventory form submitted March 1, 2003 to the El Segundo Fire Department is complete, accurate and up to date. Further, there has been no change in the quantity of any hazardous material as reported in the most recently submitted annual inventory form, and all chemicals handled in excess of 55 gallons, 200 cubic feet and 500 pounds have been included.

Please contact me at (949) 286-8713 if you have any questions or require further information.

Sincerely,

Melinda Hsu

Re: Hughes Space and Communications Company, Business Plan Update

Dear Mr. Carver,

Attached is the 2000 update to Hughes Space and Communications Company's El Segundo Business Plan. Included in this submittal are the following items:

1. Completed Business Owner/Operator Identification form and updated responses to questions from the 1999 Business Plan submittal;
2. Completed Business Activity form;
3. Completed Recyclable Materials Report forms, pages 1 & 2;
4. "Floppy Disk" with complete HSC hazardous materials inventory for El Segundo sites.

If you have any questions regarding these materials, please call me at (310) 416-5291.

Sincerely,

Subject: MSDS Submittal

The hazardous material (Sodium Bisulfite) referenced by the enclosed Material Safety Data Sheet has recently been stored in quantities exceeding 10,000 lbs. at the Boeing Co. site located at 2401 E. Wardlow Road, Long Beach, CA 90807. This submittal is made in accordance with requirements set forth in 40 CFR 370.21. This material is used solely as a treatment chemical in our industrial wastewater pretreatment unit. This MSDS has also been sent to the Region 1 Local Emergency Planning Committee.

Please contact the undersigned at 562-593-3836 with any questions/comments.

Re: Wastewater Permit Applications for Boeing Satellite Systems, Inc., El Segundo, California

BOEING

Dear Ms. Wienke:

Per my telephone conversation with Alicia Jauregi, attached are permit applications for Boeing Satellite Systems, Inc., industrial wastewater discharge locations in El Segundo. These applications were previously submitted to the County Sanitation Districts of Los Angeles County (CSDLAC) to provide notification of a name change from Hughes Space and Communications Company to Boeing Satellite Systems, Inc.

Following an evaluation by CSDLAC staff, we were notified that this change was considered an ownership change and that our applications were deficient because they did not include a signature from the City of El Segundo. The attached applications, which are copies of the originals that were retained by CSDLAC staff, have been reviewed and approved by El Segundo representative Steve Tsumura and contain his original signature. I am also enclosing copies of our temporary permits assigned by Inspector Marcos Rams for reference.

Please note, wastewater generating processes at Boeing Satellite Systems, Inc., facilities remain unchanged from the former Hughes Space and Communications Company.

Please call me with any questions you might have at (310) 416-9394.

Sincerely,

Jerrod Newlander

Subject: Company Business Name Change

Dear Mr. Carver,

Effective October 7, 2000, the business formerly known has Hughes Space and Communications Company, has undergone a name change. The Company will now be known as Boeing Satellite Systems, Inc.

Please note the name change will affect the following:

1. El Segundo Hazardous Material Business Plan (an updated Business Plan without appendices is attached)
2. Uniform Fire Permits City of El Segundo
3. The El Segundo Hazardous Waste/Hazardous Material "CUPA" Permits

If you have any questions regarding this subject, or require additional information, please contact me at (310) 416-4426.

Sincerely,

Anu B. Garg

EL SEGUNDO
FIRE DEPT.

James Carver
El Segundo Fire Department
314 Main Street
El Segundo, CA 90245

Dear Mr. Carver:

This letter is being sent as a follow-up to our conversations about the Verizon Wireless facilities within the City of El Segundo. Our chemical inventories and business emergency plans have previously been filed under our former company name, AirTouch Cellular. As a result of the merger between Vodafone AirTouch and Bell Atlantic, our new operating name is Verizon Wireless. In California, our legal name is as follows:

Los Angeles SMSA Limited Partnership
dba Verizon Wireless
by AirTouch Cellular, a California Corporation, its General Partner.

Enclosed please find updated chemical inventory forms and business emergency plans for the following facilities:

Verizon Wireless (Site: El Segundo)
650 S. Sepulveda Boulevard
El Segundo, CA 90245

Verizon Wireless (Site: Terminal)
1302 E. Imperial Avenue
El Segundo, CA 90245

Our corporate offices have moved to a new building complex in the City of Irvine. Please send all invoices and other correspondence to the following address:

Verizon Wireless
15505 Sand Canyon Avenue, Building D
Irvine, CA 92618
Attn: Melinda Hsu, Network

If you have any questions or require additional information, please contact me at (949) 286-8713. Thank you for your assistance.

Sincerely,

Melinda Hsu

Business Emergency Plan

General Information

This site is a cellular telephone communications facility which is unmanned, small in size, contains only one or two hazardous materials that are rarely handled or disturbed, and generates no hazardous waste. Therefore, this business emergency plan has been simplified to include only information that pertains to this site.

This facility contains electrical equipment and batteries for powering the equipment. The batteries contain electrolyte in the form of dilute sulfuric acid, which is a corrosive liquid. However, it is completely absorbed and immobilized within the battery so it will not leak even if the battery case is punctured. There are 12 sealed batteries at this site, each containing 8.75 gallons of electrolyte for a total of 105 gallons.

AIRTOUCH™
Cellular

Business Emergency Plan

Emergency Notification

This facility is unmanned, but is remotely monitored 24 hours per day by the AirTouch Cellular Network Control Center (NCC). The NCC continuously monitors a minimum of 32 different site functions such as security, room air temperature and moisture, smoke, heat, and hydrogen gas detection. Any anomaly is immediately reported to AirTouch Cellular personnel who are then dispatched to the site. Smoke and heat detector alarms are immediately reported to the local fire department via 911.

In the event of a spill, release or threatened release (regardless of size) involving a hazardous material, AirTouch Cellular personnel shall immediately report the event to the NCC. AirTouch Cellular personnel will determine if the spill, release or threatened release is reportable. If it is determined to be reportable, AirTouch Cellular personnel shall report the release or spill to the appropriate agencies. AirTouch Cellular does not utilize a private on-site emergency response team.

Fire, Police, Sheriff	**911**
State Office of Emergency Services	(800) 852-7550
	(916) 427-4341
National Response Center	(800) 424-8802

AirTouch Cellular Network Control Center	(714) 669-3508
	(800) 242-7622

AirTouch Cellular personnel affected by exposure to hazardous materials should be transported to the following medical facility along with a copy of the MSDS for the chemical in question:

Los Angeles Metropolitan Medical Center -
Hawthorne Campus
13300 Hawthorne Boulevard
Hawthorne, CA 90250
(310) 679-3321

AIRTOUCH™
Cellular

Business Emergency Plan

Release Prevention and Mitigation

This facility has been engineered, designed and built to withstand severe earthquakes. All batteries are mounted in steel racks and braced. All equipment bays and cable racks are securely mounted and braced. This site is secured to prevent break-in and is remotely monitored to detect any anomaly. AirTouch Cellular has taken great steps to prevent potential problems before they occur. AirTouch Cellular personnel who visit this site are trained to be aware of hazards and to report any problems.

Because this is an unmanned facility and the batteries are securely mounted, the likelihood of a person being on site when an electrolyte release occurs is extremely remote. The nature of battery electrolyte is such that, even if a release occurs, there is very little danger to anyone inside the facility and no danger to persons outside the facility. AirTouch Cellular personnel have been trained to exit the facility and contact the NCC in the unlikely event of a release. Eyewash solution is provided at this facility for first aid.

AirTouch Cellular personnel are not trained to mitigate a release of electrolyte. No mitigation materials are kept at this facility. It is AirTouch Cellular policy that any release requiring the notification of an emergency response agency be handled by the responding emergency personnel. AirTouch Cellular personnel would be made available for site entry assistance and technical advice.

AIRTOUCH™
Cellular

Business Emergency Plan

Training

There are few personnel who have reason to visit this facility. It is not accessible to the general public and only AirTouch Cellular personnel who have been issued keys have access to it. All AirTouch Cellular personnel who have access to this facility are made aware of the fact that there are batteries inside and that the batteries contain dilute sulfuric acid. AirTouch Cellular personnel are also given a copy of the Material Safety Data Sheet (MSDS) to read. All AirTouch Cellular personnel are familiarized with the Business Emergency Plan, and are made aware of the location of the on-site Hazardous Materials Disclosure/Business Emergency Plan and MSDS and they are instructed to:

- Report any release of hazardous materials to the NCC immediately.
- Report any other problems that they may observe.
- Refer to this Hazardous Materials Disclosure/Business Emergency Plan for assistance.
- Not attempt mitigation of releases other than very small ones.
- Take this Hazardous Materials Disclosure/Business Emergency Plan and exit and secure the facility, if necessary.
- Wait for responding emergency personnel.

Training for AirTouch Cellular personnel is conducted at the time of employment and on an annual basis thereafter. The training records are kept on site with the Hazardous Materials Disclosure/Business Emergency Plan as well as at the AirTouch Cellular regional office.

Supersedes Date: 05/27/97

Non-Emergency Telephone # 908-582-3700
Emergency Telephone # 800-424-9300 (CHEMTREC)

Use CHEMTREC only in the event of chemical emergencies involving a spill, leak, fire, exposure, or accident involving chemicals.

Reason for Re-Issue: Reformat

I. PRODUCT IDENTIFICATION

Product Name: Battery, Round Cell KS-20472
Chemical Name/Synonym: KS-20472, Flooded Lead-acid Battery
Product Code/Comcode: 402785232, 402785240, 402785257, 402785265
HMDB Number: 9928
Label Codes

Health: 3 - Corrosive
Fire: 0 - Non-flammable
Reactivity: 2 - Moderately reactive

II. HAZARDOUS INGREDIENTS

Component	CAS #	%	TLV(ACGIH)	PEL(OSHA)
*Lead and lead sulfate (7446-14-2)	7439-92-1	< 60	50 ug/m^3	50 ug/m^3
**Sulfuric acid	7664-93-9	10-30	1 mg/m^3, [1]	1 mg/m^3 [1]

[1]**STEL (ACGIH):** 3 mg/m^3 [1]**STEL (OSHA):** N/A

Comments: The data presented refer primarily to the acid electrolyte since this compound poses the predominant immediate hazard associated with this product. *These chemicals are subject to Section 313 Title III SARA Reporting Requirements. **This chemical in its existing form is not subject to SARA 313 Title III Reportable Requirement. However, if the use of this product results in aerosol formation of this chemical, then the aerosol of this chemical is subject to SARA 313 Title III Reportable Requirements.

III. PHYSICAL PROPERTIES

Appearance/Odor: Acid electrolyte is clear with a strong acrid odor.
Specific Gravity: 1.30
Boiling Point: > 219 °F
Vapor-Pressure: > 20 mm Hg at 77 °F
Evaporation Rate: < 1
% Volatiles by Volume: N/A
% Volatile Organic Carbon: N/A
Vapor Density (Air=1): 3.4
Melting Point: -17 °F
Solubility in Water: Soluble
pH: < 1

IV. HEALTH HAZARD SUMMARY

Primary Routes of Exposure

Oral: **Skin:** X **Eye:** X **Inhalation:** X

Effects of Overexposure:

The electrolyte is corrosive to skin, eyes, and mucous membranes. Repeated or prolonged inhalation of mists can cause inflammation of the upper respiratory tract and chronic bronchitis; pulmonary edema and death may occur from severe exposures.
Early symptoms of lead intoxication include a persistent metallic taste, vomiting, diarrhea or constipation, and severe abdominal pain. Continued exposures may result in muscle weakness and fatigue, nerve system damage, paralysis, liver and kidney damage, anemia, anorexia, and adverse reproductive and developmental effects.

Listed as a Carcinogen or Potential Carcinogen By the Following Agencies?

NTP: No **IARC:** Yes **OSHA:** No

Toxicity Study Information:

Only select Registry of Toxic Effects of Chemical Substances (RTECS) data are presented here. Consult latest issue for more information.

Sulfuric acid: The International Agency for Research on Cancer (IARC) has classified "strong inorganic acid mist containing sulfuric acid" as a Category I carcinogen, a substance that is carcinogenic to humans. This classification does not apply to liquid forms of sulfuric acid contained within a battery. The inorganic acid mist is not generated under normal use of this product. Misuse of the product such as overcharging, may result in the generation of sulfuric acid mist.

Lead-TC_{LO}: 10 ug/m^3, human, inhalation; TD_{LO}: 450 mg/kg/yr, human, oral. Reported to cause chromosomal aberrations in human and animal cells. Causes reproductive and developmental effects in experimental animals.

According to the International Agency for Research on Cancer (IARC) Monograph Supplement (1987), there is inadequate evidence for the carcinogenicity of lead in humans. Lead and inorganic lead compounds are classified as group 2B carcinogens by IARC. OSHA regulated (29 CFR 1910.1025).

Lead sulfate-LD_{LO}: 2 g/kg, dog, oral; LD_{LO}: 30 g/kg, guinea pig, oral. Positive sister chromatid exchange assays in human and animal cells.

The lead and lead sulfate contained in this product pose a minimal hazard because they are enclosed. A lead hazard may result during recycling or if battery is discarded improperly.

V. FIRST AID PROCEDURES

Eye: In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Get medical attention immediately.

Skin: In case of contact, immediately flush skin with plenty of soap and water for at least 15 minutes while removing contaminated clothing and shoes. Get medical attention immediately. Wash clothing before reuse.

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention.

Ingestion: If swallowed, do NOT induce vomiting. Give victim a glass of water. Call a physician immediately. Never give anything by mouth to an unconscious person.

Notes to physician: None

VI. FIRE AND EXPLOSION HAZARD DATA

Flash Point: N/A **Autoignition Temp:** N/A
Flammable Limits: LEL: N/A **UEL:** N/A

Extinguishing Media: For small fires use carbon dioxide, dry chemical. For large fires, flood area with large quantities of water, while suppressing vapors with waterfog/spray.

Special Firefighting Procedures: Cool battery exterior with water to prevent rupture. Firefighters should wear positive pressure self-contained breathing apparatus and thermal protective clothing to avoid toxic and corrosive mists, vapors, and possibly lead fumes.

Unusual Fire and Explosion Hazards: Sulfuric acid, especially when diluted with water, can react with metals to produce flammable gas. Remove all sources of ignition and ventilate area if battery is ruptured or recharging.

VII. REACTIVITY DATA

Stability: Stable

Conditions to Avoid: Prolonged overcharging; sources of ignition. Do not allow metallic articles to simultaneously contact the negative and positive terminals of the battery.

Incompatibility (Materials to Avoid): Combustibles, organic materials, strong oxidizers and reducing agents. strong acids and bases, active metals, water. Carbides, chlorates, nitrates, picrates, fulminates, halides, halogenates, peroxides, sulfides, potassium, sulfur, nascent hydrogen.

Hazardous Decomposition Products:

Sulfuric acid: Sulfur oxides, sulfuric acid mist, hydrogen.

Lead: Presence of nascent hydrogen may generate toxic arsine gas.

Thermal decomposition of battery casing may produce nitrogen oxides and cyanides.

Hazardous Polymerization: Will not occur

Conditions to Avoid: None

VIII. SPECIAL PROTECTION INFORMATION

Ventilation: General ventilation should be adequate under normal conditions of use.
Respiratory Protection: Respirators are not required under normal conditions of use. Use NIOSH approved respirator for acid mist if PEL or TLV is exceeded when handling electrolyte.
Protective Gloves: Required. Neoprene, rubber, or polyethylene types are suggested.
Eye Protection: Required. Chemical splash goggles or full face shield is suggested.
Other Clothing and/or Equipment: Eyewash and safety shower should be available for immediate use. Rubber boots and rubber apron in accordance with potential for electrolyte exposure. Long legged and long sleeved clothing.

IX. ENVIRONMENTAL INFORMATION

Steps to be Taken in Case Material is Released or Spilled: If an acid spill is external to the battery, cover the spill with clay or other recognized acid absorbing agent. Neutralize the acid with sodium bicarbonate (baking soda) or other recognized neutralizer. In an emergency sand, ashes, or gravel can be used to cover spill, and soda ash or lime used to neutralize acid; such substances should not be used on the battery itself as they can cause damage to it. Do not flush with water, even after acid has been neutralized.
Waste Disposal Method: Contains lead. Dispose of according to all applicable regulations.
TSCA Status: All components appear on the TSCA chemical substance inventory.
Shipping Information: USDOT/IATA: Name: Battery, Wet, Filled with acid
Class: 8 **ID#:** UN2794 **PG:** III

X. SPECIAL PRECAUTIONS

Storage and Handling Requirements:

Store in a cool, dry, well ventilated area. Protect batteries from physical damage. All lead acid cells have enormous circuit capability. Extreme care should be exercised to avoid shorting of cell terminals. When working around cells remove rings, wrist watches, necklaces, metal bracelets, belt buckles, etc. Explosive hydrogen gas may be generated during charging. Avoid creating sparks, keep away from sources of ignition and ventilate area during charging.

N.D. = Not Determined **N/A** = Not Applicable.

While information in this fact sheet has been compiled from reference materials and other sources believed to be reliable, its accuracy and completeness is not guaranteed, nor is any responsibility assumed or implied for any loss or damage resulting from inaccuracies or omissions. Any specific evaluation will involve professional judgement by the user's industrial hygiene personnel.

Dear Steve:

As per our telephone conversation this date, I am sending this letter to confirm that AirTouch Cellular's two cell sites within your jurisdiction remain unchanged from what has been previously disclosed. The addresses of these two site are:

ATC Site #208	608 S. Sepulveda Boulevard
ATC Site #436	1302 East Imperial Avenue

There is a Business Emergency Plan at each site, even though they are unmanned and the only hazardous material present is battery electrolyte. Thanks for allowing us to update you via letter.

Sincerely,

Bruce L Spencer

Release Prevention and Mitigation

This facility has been engineered, designed and built to withstand severe earthquakes. All batteries are mounted in steel racks and braced. All equipment bays and cable racks are securely mounted and braced. The site is secured to prevent break-in and is remotely monitored to detect any anomaly. AirTouch Cellular has taken great steps to prevent potential problems before they occur. Personnel who visit this site are trained to be aware of hazards and to report any problems.

Because this is an unmanned facility and the batteries are securely mounted, the likelihood of a person being on site when an electrolyte release occurs is extremely remote. The nature of battery electrolyte is such that, even in the event that a release occurs, there is very little danger to anyone inside the facility and no danger to persons outside the facility. Protective clothing is provided for all personnel who actually work on the batteries, and all site-visit personnel have been trained to exit the facility and contact the ROCC in the unlikely event of a release. Eyewash solution is provided at this facility for personnel first aid.

AirTouch Cellular personnel are not trained to mitigate a release of electrolyte. No mitigation materials are kept at this facility. It is AirTouch policy that any release requiring the notification of an emergency response agency be handled by the responding emergency personnel. An AirTouch facility technician would be made available for site entry assistance and technical advice.

Training

There are few personnel who have reason to visit this facility. It is not accessible to the general public and only people who have been issued keys have access to it. All personnel who have access to this facility are made aware of the fact that there are batteries inside, that the batteries contain dilute sulfuric acid, and they are given a copy of the Material Safety Data Sheet (MSDS) to read. All personnel are made aware of the location of the on-site Emergency Plan and MSDS and they are instructed to:

- Report any release of battery acid to the ROCC immediately.
- Report any other problems that they may observe.
- Refer to this Emergency Plan for assistance.
- Not attempt mitigation of releases other than very small ones.
- Take the Emergency Plan, exit and secure the facility.
- Wait for responding personnel.

Training for personnel who visit cell sites is performed on an as-needed basis by AirTouch Cellular's Human Resources department. The training records are kept in the Human Resources department at AirTouch Cellular's Irvine office.

ROCC personnel remotely monitor this site and they are trained in the procedures to follow when a release is reported by someone on-site or when trouble is indicated by monitoring equipment. These procedures are kept on file at the ROCC, as are the training records for ROCC personnel.

Release Prevention and Mitigation

This facility has been engineered, designed and built to withstand severe earthquakes. All batteries are mounted in steel racks and braced. All equipment bays and cable racks are securely mounted and braced. The site is secured to prevent break-in and is remotely monitored to detect any anomaly. PacTel has taken great steps to prevent potential problems before they occur. Personnel who visit this site are trained to be aware of hazards and to report any problems.

Because this is an unmanned facility and the batteries are securely mounted, the likelihood of a person being on site when an electrolyte release occurs is extremely remote. The nature of battery electrolyte is such that, even in the event that a release occurs, there is very little danger to anyone inside the facility and no danger to persons outside the facility. Protective clothing is provided for all personnel who actually work on the batteries, and all site-visit personnel have been trained to exit the facility and contact the ROCC in the unlikely event of a release. Eyewash solution is provided at this facility for personnel first aid.

PacTel personnel are not trained to mitigate a release of electrolyte. No mitigation materials are kept at this facility. It is PacTel policy that any release requiring the notification of an emergency response agency be handled by the responding emergency personnel. A PacTel facility technician would be made available for site entry assistance and technical advice.

Training

There are few personnel who have reason to visit this facility. It is not accessible to the general public and only people who have been issued keys have access to it. All personnel who have access to this facility are made aware of the fact that there are batteries inside, that the batteries contain dilute sulfuric acid, and they are given a copy of the Material Safety Data Sheet (MSDS) to read. All personnel are made aware of the location of the on-site Emergency Plan and MSDS and they are instructed to:

- Report any release of battery acid to the ROCC immediately.
- Report any other problems that they may observe.
- Refer to this Emergency Plan for assistance.
- Not attempt mitigation of releases other than very small ones.
- Take the Emergency Plan, exit and secure the facility.
- Wait for responding personnel.

Training for personnel who visit cell sites is performed on an as-needed basis by PacTel's Human Resources department. The training records are kept in the Human Resources department at PacTel Cellular's Irvine office.

ROCC personnel remotely monitor this site and they are trained in the procedures to follow when a release is reported by someone on-site or when trouble is indicated by monitoring equipment. These procedures are kept on file at the ROCC, as are the training records for ROCC personnel.

Material Safety Data Sheet

Sulfuric Acid (Dilute), Electrolyte

I. General Information/Summary

Product Identity:

Chemical Name: Sulfuric Acid (Dilute)
Common Name: Battery Electrolyte, Battery Acid

Summary Information:

Dilute sulfuric acid is a corrosive liquid that is clear in color and has a slightly acrid odor. It can cause burns when it comes in contact with skin or eyes. Body contact and breathing of vapors should be avoided. It is non-flammable but may evolve heat when water is added to it. Hydrogen gas may be evolved when it comes in contact with metals. Extinguishing media appropriate to surrounding fire should be used. Runoff from fire control methods should not be allowed to enter sewers or waterways. Small acid spills may be neutralized with bicarbonate of soda. Larger spills may be neutralized with a mixture of soda ash/slaked lime (50/50). Follow applicable regulations for disposal of neutralized waste with a pH between 5.5 and 8.5.

II. Hazardous Ingredients/Material Identification

Hazardous Component: Sulfuric Acid	**% By Weight:** 28 - 40%	**Chemical Family:** Acid
CAS Registry #: 7664-93-99	**OSHA PEL:** 1.0 mg/m^3	**ACGIH TLV:** 1.0 mg/m^3
Non-Hazardous Component: Water	**% By Weight:** 60 - 72%	

HMIS Rating:	Health: **2**	Flammability: **0**	Reactivity: **2**	Other: **0**
NFPA Rating:	Health: **2**	Flammability: **0**	Reactivity: **2**	Other: **Corrosive**

III. Physical/Chemical Characteristics

Boiling Point:	N/A	**Specific Gravity (Water = 1):**	1.202 - 1.303
Vapor Pressure:	Ambient	**Melting Point:**	N/A
Vapor Density:	N/A	**Evaporation Rate:**	N/A
Solubility in Water:	100%	**Appearance/Odor:**	Clear liquid, acrid odor

IV. Fire/Explosion Hazard

Flash Point:	Non-combustible	**Autoignition Temperature:**	N/A
LEL:	N/A	**UEL:**	N/A

Extinguishing Media: Use extinguishing media appropriate to surrounding fire. Dry chemical, Halon, carbon dioxide, water or foam may be used.

Special Firefighting Procedures: Self contained breathing apparatus and full protective clothing should be worn. Structural firefighter's protective clothing may be damaged if it comes in contact with acid. Rubber gloves should be worn. Runoff from firefighting activities should be prevented from entering sewers or waterways prior to neutralization.

Unusual Fire & Explosion Hazards: Water added to dilute sulfuric acid will evolve heat unless in large quantities. Hydrogen gas may be generated.

V. Reactivity Data

Stability/Polymerization: Sulfuric acid is stable at room temperature in closed containers. Hazardous polymerization will not occur.

Incompatibility (Materials to Avoid): Metals, combustibles.

Conditions to Avoid: Contact with metal, storage near combustibles.

Hazardous Decomposition or Byproducts: Hydrogen gas. Sulfur trioxide may be generated at high temperatures.

VI. Health Hazard Data

Summary of Risks: Dilute sulfuric acid is a respiratory tract, skin, and eye irritant. Exposure can result in burns, tissue damage, scarring, and blindness if splashed in the eye.

Carcinogenity: None known at this time.

Routes of Entry: Inhalation, skin, eyes, ingestion.

Health Hazards - Acute: Tissue destruction on contact. May cause 2nd and 3rd degree burns or blindness. Ingestion will cause corrosive burns on contact. May be fatal if swallowed.

Health Hazards - Chronic: Inhalation of mists may cause upper respiratory irritation and possible pulmonary edema.

Signs and Symptoms of Exposure: Irritating or burning of exposed tissue.

Medical Conditions Aggravated by Exposure: Respiratory disorders may be aggravated by prolonged inhalation of mists.

Emergency First Aid: Skin/Eyes - Flush with water for at least 15 minutes. Remove contaminated clothing.

Emergency First Aid: Inhalation - Remove exposed person to fresh air and support breathing as needed.

Emergency First Aid: Ingestion - Do not induce vomiting. Drink large amounts of water or milk. Seek medical attention immediately.

VII. Precautions for Safe Handling and Use

Steps To Be Taken if Material Is Released or Spilled: Neutralize spill with soda ash or lime. Use adequate ventilation with soda ash due to CO_2 evolution. Keep unprotected individuals away from large spills. Contain large spills with earth or clay dikes.

Waste Disposal Method: If local ordinances permit, neutralized acid may be rinsed to sewer.
RCRA Waste Disposal No.: D002 - Corrosive.

Precautions To Be Taken in Handling and Storing: Add water to acid to avoid excessive heat generation. Store away from reactives and combustibles in cool, dry area.

VIII. Control Measures/Protective Equipment

Respiratory Protection: If needed, NIOSH-approved acid mist respirator.

Ventilation: Local exhaust to avoid vapor/ mist buildup.

Eye Wear: Chemical splash goggles.

Gloves: Rubber or neoprene.

Other Protective Clothing: Acid resistant apron or clothes.

Work Practices: Maintain eyewash and drench shower in area.

Hazardous Materials Coordinator:

PacTel Cellular (PTC) has authorized Radix Consulting to handle HazMat disclosure and Business Emergency Plans for each of their cell sites in Southern California. PTC has over two hundred cell sites in Los Angeles county and must deal with twenty-five different administering agencies in an effort to comply with applicable codes and ordinances. We contacted numerous AA's in different counties in Southern California in order to determine the various disclosure and BEP requirements. What we found was that each AA had a different way of doing virtually the same thing, with each agency having its own set of forms to fill out and return. Because PTC has so many different cell sites, we have established a computer database in which site information is stored. In an effort to keep things manageable and easily updatable in the future, we have designed a computerized disclosure/BEP form which we feel meets the requirements of each administering agency. They are uncomplicated and easily read due to their simplified nature. Since each PTC cell site is unmanned and usually consists only of a small building or room that houses electrical equipment and batteries, much of the information requested in the disclosure and BEP forms does not apply. Typical sites have a rack of twelve or twenty four batteries that are sealed lead acid or calcium lead gel cells. The only hazardous material in the batteries is dilute sulfuric acid with a specific gravity of approximately 1.3. Occasionally, diesel fuel or propane for emergency generator use will be stored in a tank outside of a site.

PTC presently has 2 sites in El Segundo, each of which contains more than 55 gallons of dilute sulfuric acid electrolyte in batteries, and may also contain a fuel tank with more than 55 gallons of diesel fuel or propane. Based on these amounts, we are enclosing a combined Disclosure/Business Emergency Plan for each site. A copy of the applicable BEP is kept at each site in the location shown on the Facility Plan. Two additional copies are kept on file at PTC.

There is presently no NFPA placarding at any of PTC's cell sites in Los Angeles County. PacTel Cellular recognizes their responsibility to provide placarding for emergency responders, but also realizes that one type of placard (NFPA 704) does not necessarily provide the best information. Since PacTel's sites range from rooms in or on top of high rise office buildings, to stand alone buildings in vacant lots, PTC would prefer not to install NFPA placarding at many of their sites. A case in point would be a site inside of a room within a high rise or other office building. Placing an NFPA 704 placard at the front door would possibly be upsetting to the property owner, tenants and customers, would serve very little purpose in the event of an emergency, and could even serve as a detriment to proper response. Based upon our meetings with responding and administering agencies, PacTel Cellular is willing to provide placarding at each site which will best meet the needs of each administering agency. Therefore, we ask that you review the choices offered on the enclosed form and select the choice, or choices, that best meet your requirements. We will provide the requested placarding as soon as we receive a response from your agency on the enclosed form. Please return the form to Radix Consulting, 23591 Avenida Topanga, Mission Viejo, CA 92691.

PTC wishes to comply with the requirements of each administering agency and we have made every effort to do so by developing a system that will facilitate reporting and data tracking. We hope that the enclosed disclosure/ BEP's will meet your requirements. Once we hear from you regarding placarding, we will see that it is done as soon as possible. Should you have any questions, please feel free to contact us at (714) 586-0216.

Sincerely,

Bruce L Spencer

Bruce L. Spencer
Radix Consulting

The following Placards are available:

NFPA 704:

Small (4"x4") shown

Large (14"x14")

Battery Acid:

Actual size, black on yellow

BATTERY ACID

POISON! DANGER!

STRONG OXIDIZER - CONTACT WITH OTHER MATERIALS MAY CAUSE FIRE. CAUSES SEVERE BURNS. MAY BE FATAL IF SWALLOWED.

Do not get in eyes, on skin, on clothing. Avoid breathing vapor. Keep in tightly closed container. Use with adequate ventilation. Wash thoroughly after handling.

EFFECTS OF OVEREXPOSURE: Liquid may cause severe burns to skin and eyes. Inhalation of vapors may cause coughing, chest pains, difficulty breathing, or unconsciousness. Ingestion may be fatal.

FIRST AID PROCEDURES: If swallowed, do NOT induce vomiting. If conscious, give water, milk, or milk of magnesia. In case of contact with skin or eyes, immediately flush with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Thoroughly clean contaminated clothing before reuse. Discard contaminated shoes. In all cases, contact a physician.

Consult MSDS for further health and safety information. **CAS NO. [7664-93-9]**

To PacTel Cellular:

Please placard your sites within our jurisdiction in the following manner:

- ☐ We do not require placarding of any kind.

Outside, stand alone sites:

- ☒ Large NFPA 704 placard.
- ☐ Small NFPA 704 placard.
- ☒ Battery Acid placard at entrance door of site.

Sites within other buildings:

- ☐ Large NFPA 704 placard at entrance to building.
- ☐ Small NFPA 704 placard at entrance to building.
- ☒ Small NFPA 704 placard at entrance door of site.
- ☒ Battery Acid placard at entrance door of site.

Re: 1998 Business Plan

Dear Mr. Carver,

Per our discussion on Feburaury 19, 1998, regarding the 1998 business plan update, Hughes Space and Communications Company (HSC) will not be submitting a business plan update in the beginning of 1998. HSC is planning on submitting the next HSC business plan to the El Segundo Fire Department (ESFD), when the ESFD is ready for electronic reporting, which is planned for April 1998. It is agreed between HSC and ESFD, that the recent September 1997 HSC business plan update meets the March 1, 1998, regulatory update deadline.

If you have any questions regarding this letter please call me at (310) 416-4426.

Sincerely,

Hughes Space and Communications Company

Re: Hughes Space and Communications Hazardous Materials Inventory Update

Dear Mr. Carver,

Attached is a copy of the Fall 1997 update of the Hughes Space and Communications (HSC) Company Business Plan. As discussed with Steve Tsumura on October 15, the Business Plan has been updated to include the HSC operations located off El Segundo Blvd. in the Hughes El Segundo South facility. Previously, the inventory had been reported under the Hughes Aircraft Company (HAC), Sensors and Communications Systems (SCS) business plan. The following attachments have been updated:

- Cover Page
- Building Locations Summary
- Emergency Equipment Inventory
- Site maps
- Emergency Hazmat Spill Notification

As an update, the split of Hughes Electronics and the merger of HAC with Raytheon is predicted for sometime at the end of the '97 calendar year. Following this predicted spilt, there will be service agreements between the two companies for a minimum of one year. Included in the service agreements is the Hughes Fire Dept. support, so emergency response will not change for at least one year.

If you have any questions regarding this document please call me at (310) 416-4426.

Sincerely,

Hughes Space and Communications Company

Re: Updated Business Plan

Dear Mr. Tsumura,

Attached is one copy of the 1997 update of the Business Plan and Hazardous Materials Inventory for Hughes Space and Communications Company.

Please notice, buildings S66, S67 and S52 have been removed from this years report. We moved out of S66 and S67 in June/July period, and S52 has been vacant for a few years.

If you have any questions regarding this document please give at (310) 416-4426.

Sincerely,

Hughes Space and Communications Company

Re: Hughes Space and Communications Company, Business Plan Update

Dear Mr. Carver,

Attached is the 2000 update to Hughes Space and Communications Company's El Segundo Business Plan. Included in this submittal are the following items:

1. Completed Business Owner/Operator Identification form and updated responses to questions from the 1999 Business Plan submittal;
2. Completed Business Activity form;
3. Completed Recyclable Materials Report forms, pages 1 & 2;
4. "Floppy Disk" with complete HSC hazardous materials inventory for El Segundo sites.

If you have any questions regarding these materials, please call me at (310) 416-5291.

Sincerely,

Hughes Space and Communications Company

OFFICIAL INSPECTION REPORT

Date: 11/8/00

DBA: Boeing Satellite Systems, 700 N. Sepulveda	**Facility ID #** 30-0159
LIST ORDER OF INSPECTION AS FOLLOWS: I. Opening Conference II. Walk Through III. Documents IV. Closing Conference V. Violations	

I. Met with Mr. Abel Ramirez, Fire Prevention Specialist for Boeing Satellite Systems to inspect facility for Disclosure & VFC programs. Mr. Ramirez gave consent to inspect.

II. Walked facility with Mr. Ramirez. Identified chemicals required for disclosure & VFC violations.

III. No documents reviewed.

IV. Reviewed inspection results with Mr. Ramirez.

V. Violations.

VFC violations identified on Fire/Life Safety Inspection Notice

1. Provide chemical inventory for compressed nitrogen in Sprinkler Control Room.

Subject: 2005/ 2006 CUPA Consolidated Permit Fee: Correction Required

Hello Diane,

Based on my review of the invoice for the 2005/ 2006 CUPA Consolidated Permit Fee (invoice # 9719), some corrections may be required.

* Two or three building locations may have been included in error. Two of the building locations, 2000 E. El Segundo Blvd. (Bldg E01) and 700 N. Sepulveda Blvd. (Bldg S38) no longer contain hazardous materials greater than 55 gallons, 200 cubic feet, or 500 pounds as identified in the Business Plan submittal. The third location, 2240 E. Imperial Hwy. (Bldg S-4) is no longer occupied by Boeing Satellite Systems and was returned to the building owner on April 30, 2006. This building may or may not require a fee payment based on the lease termination date.

* In addition, two building locations may have been excluded in error. Two building locations, 2040 E. Mariposa St (Bldg S11) and 900 N. Sepulveda Blvd. (Bldg S31), that contain hazardous materials greater than 55 gallons, 200 cubic feet, or 500 as identified in the Business Plan submittal are not included on the 2005/ 2006 CUPA Consolidated Permit Fee invoice.

At your earliest convenience please confirm the correctness of the invoice, or provide me with guidance for correction so that I may pay the correct fee due.

Thank you,

David Seitz

Subject: Company Business Name Change

Dear Mr. Carver,

Effective October 7, 2000, the business formerly known has Hughes Space and Communications Company, has undergone a name change. The Company will now be known as Boeing Satellite Systems, Inc.

Please note the name change will affect the following:

1. El Segundo Hazardous Material Business Plan (an updated Business Plan without appendices is attached)
2. Uniform Fire Permits City of El Segundo
3. The El Segundo Hazardous Waste/Hazardous Material "CUPA" Permits

If you have any questions regarding this subject, or require additional information, please contact me at (310) 416-4426.

Sincerely,

Anu B. Garg

Reference: Electronic Submittal of Chemical Inventory

Dear Ms. Garg:

Thank you for participating in the City of El Segundo Fire Department's electronic data transfer program for the submittal of your chemical inventory. Based on regulations adopted on January 8, 1999 concerning the new Unified Program Consolidated Forms, we are looking forward to receiving your chemical inventory within the next 30 days. Enclosed with this letter is instruction on how to submit the chemical inventory electronically, and 3 1/2-inch floppy discs to store the data. To transfer the data, you will need the computer program Microsoft Access 97.

Included also are the forms "Business Activities" (form ESD-32) and "Business Owner/Operator Identification" (form ESD-38). After the inventory is updated, please submit the updated inventory (on the provided floppy discs) and completed forms to the Department. You may either mail or drop off the floppy discs to the El Segundo Fire Department at 314 Main Street, El Segundo, CA 90245.

Please be advised that the due dates identified on the Notice to Comply's, issued November 20, 2000 for 2006, 2012, 2030 and 2040 East Imperial Highway, 901 North Nash Street and 700 North Sepulveda Boulevard, and on December 23, 2000 for 950 North Sepulveda Boulevard are extended to march 1, 2001. This addition is provided to allow Boeing Satellite Systems, Inc. time to provide the chemical inventory in an electronic format that is compatible with the Department's Environmental Safety Division's computer system.

314 Main Street
El Segundo, CA 90245-3887
Phone (310) 524-2300 Fax (310) 414-0929

If you have any questions, comments, or ideas for improving the electronic data transfer program, please contact me by e-mail at jcarver@elsegundo.org, or by telephone at (310) 524-2239.

Sincerely,

James J. Carver

Subject: Electronic Submittal of Chemical Inventory and Updated Business Plan for 2001

BOEING

Dear Mr. Carver,

In response to the Notice to Comply issued on November 20, 2000 for Buildings S10, S47, S48, and S49 and the Notice to Comply issued on December 23, 2000 for Building S30, we have updated and transferred our chemical inventory to the electronic format you requested. In addition, I am submitting a complete up to date copy of the El Segundo Hazardous Material Business Plan for your records.

This includes twenty 3 1/2 – inch floppy discs with the appropriate chemical inventory data.

If you have any questions regarding this subject, or require additional information, please contact me at (310) 416-4426.

NOTICE TO COMPLY

Conditions to Remedy:

HMMP Inspection

Violation	Inspector	Inspect Date	Due Date
1 CA H&SC Section 25509(a) requires specific information to be reported to the administering agency as noted on the state reporting form. Submitted chemical inventory does not include all data elements. Provide revised chemical inventory with all required data elements.	James Carver	10/18/2001	11/18/2001

Failure to remedy the violations by the due date indicated will result in this agency taking further regulatory action or recovery action. Regulatory action may include, but is not limited to, suspension, modification, or revocation of a permit, or institution of abatement or other proceedings by this agency to correct the condition.

Any questions regarding this notice should be addressed to the lead CUPA, as indicated on this notice.

Sincerely,

James Carver
Principal Fire Prevention Spec.

This document serves as confirmation that the El Segundo Fire Department received the Boeing Satellite Systems Company 2002 Business Plan update in the form of the following materials:

1. Completed Business Owner/Operator Identification form and updated responses to questions from the 2002 Business Plan submittal;
2. Completed Business Activity form;
3. Completed Recyclable Materials Report forms, pages 1 & 2;
4. " 19 - Floppy Disks" with complete BSS hazardous materials inventory for El Segundo sites.

Subject: Electronic Submittal of Chemical Inventory and Updated Business Plan for 2003

BOEING

Dear Mr. Carver,

I am submitting a complete up to date copy of the El Segundo Hazardous Material Business Plan for your records, and twenty-one 3 1/2 – inch floppy discs with the appropriate chemical inventory data.

If you have any questions regarding this subject, or require additional information, please contact me at (310) 416-0809.

Sincerely,

Underground Storage Tank Program – Case Closure
Equinix Communications
1920 E. Maple Avenue, El Segundo
Case No. R-10916A; Global ID. T10000010173; Priority D-1

Dear Mr. Lopez:

This letter confirms the completion of a site investigation and corrective action for the recent underground piping replacement and upgrades associated with the existing underground storage tank(s) located at the above-described location. Thank you for your cooperation throughout this investigation. Your willingness and promptness in responding to our inquiries concerning the underground piping replacement and upgrades are greatly appreciated.

Based on information in the above-referenced file and with the provision that the information provided to this agency was accurate and representative of site conditions, this agency finds that the site investigation and corrective action carried out at your underground tank(s) site is in compliance with the requirements of subdivision (a) and (b) of section 25296.10 of the Health and Safety Code and with corrective action regulations adopted pursuant to section 25299.3 of the Health and Safety Code and that no further action related to the petroleum release(s) at the site is required.

This notice is issued pursuant to subdivision (g) of section 25296.10 of the Health and Safety Code.

Claims for reimbursement of corrective action costs submitted to the Underground Storage Tank Cleanup Fund more than 365 days after the date of this letter or issuance or activation of the Fund's Letter of Commitment, whichever occurs later, will not be reimbursed unless one of the following exceptions applies:

- Claims are submitted pursuant to Section 25299.57, subdivision (k) (reopened UST case); or

- Submission within the timeframe was beyond the claimant's reasonable control, ongoing work is required for closure that will result in the submission of claims beyond that time period, or that under the circumstances of the case, it would be unreasonable or inequitable to impose the 365-day time period.

If you have any questions concerning this matter, please contact Mr. Joshua Cwikla at (213) 576-6713 or joshua.cwikla@waterboards.ca.gov

Sincerely,

Deborah J. Smith

UNDERGROUND STORAGE TANK PROGRAM: TRANSMITTAL OF CLOSURE LETTER

Equinix Communications
1920 E. Maple Avenue, El Segundo
Case No. R-10916A; Global ID. T10000010173; Priority D-1

Dear Mr. Lopez:

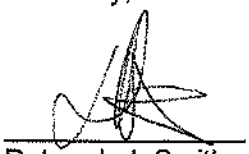
Attached please find the closure letter for the subject site. The current record fee title owners were notified of the proposed closure in accordance with Section 25296.20 of Chapter 6.7 of the Health and Safety Code. The California Regional Water Quality Control Board, Los Angeles Region (Los Angeles Regional Board) sent a public notification of the proposed case closure to all interested parties, which included a 60-day public comment period. No comments were received.

Based on the site specific information and data available in GeoTracker and the Los Angeles Regional Board's case file, we conclude that this case meets all the criteria of the State Water Resources Control Board's Low-Threat Underground Storage Tank Case Closure Policy and that a case closure determination is appropriate.

Site data indicate that there may be residual petroleum hydrocarbons in soil, groundwater, and/or vapor at this site that could pose an unacceptable risk as a result of future construction/redevelopment activities, such as on- or off-site excavations, the installation of water wells at or near the site, or change to a more sensitive land use from commercial use. Responsible parties, land owners, and contractors performing subsurface activities at the site should be prepared to encounter soil, groundwater, and/or vapor contaminated with petroleum hydrocarbons. Appropriate health and safety equipment and protocols should be used, and any encountered pollution should be managed properly to avoid threats to human health or the environment.

Please contact Mr. Daniel P. Pirotton at (213) 576-6714 or at daniel.pirotton@waterboards.ca.gov if you have any questions.

Sincerely,



Deborah J. Smith
Executive Officer

	Mass removal: **N/A**

VIII. COMMENTS AND JUSTIFICATION FOR RECOMMENDED ACTION

Site History

The Site has been operated as an active data storage center facility (Facility) since 2005, and is located at 1920 E Maple Avenue, El Segundo, California (Figure 1). The Site includes 11 generators, two 30,000-gallon diesel USTs, and associated underground piping. The USTs and associated piping are beneath a concrete pad, while the generators are installed on top of the pad. The concrete pad has a 6-inch raised curb around it serving as secondary containment for the above ground equipment. Each generator contains a 3,000-gallon belly tank for local storage of diesel fuel. (Figure 2). During recent underground piping replacement and upgrades, possible contamination from a previous diesel fuel spill was identified. On February 23, 2017, the City of El Segundo Fire Department (ESFD) transmitted this case to this Regional Board due to concerns of soil and groundwater impacts from the Site.

Data Summary

On March 26, 2008, approximately 2,000-2,500 gallons of diesel fuel was released from a generator and was contained within the concrete containment area. The fuel was removed using a vacuum truck and disposed of using an environmental cleanup service.

In 2009, secondary containment testing results revealed failures in the piping system. As part of the associated piping repairs in May of 2010, soil samples were then collected around the piping adjacent to select generators to a maximum depth of four feet below ground surface (bgs) under the observation of the ESFD (Figure 3). The maximum concentrations of total petroleum hydrocarbons as diesel (TPH_D), toluene, ethylbenzene, xylenes, and naphthalene were 5,600 milligrams per kilogram (mg/kg) (TPH_D), 0.00089 mg/kg (toluene), 0.71 mg/kg (ethylbenzene), 1.51 mg/kg (xylenes), and 1.6 mg/kg (naphthalene) respectively. Benzene and methyl tertiary butyl ether (MTBE) were not detected above laboratory reporting limits (Table 1).

In October of 2014, Equinix performed additional piping repairs associated with minor reported leakage.

In September of 2016, as part of upgrades and replacement to piping and connections associated with the USTs and generators, Equinix performed soil sampling in the areas excavated for the purposes of repairs or replacement of system components. Under the observation of ESFD, Equinix collected 22 soil samples at a depth of two feet bgs (Figure 4). No samples were collected in the UST area. The maximum concentrations of TPH_D, ethylbenzene, and xylenes detected were 9,200 mg/kg (TPH_D), 0.12 mg/kg (ethylbenzene), and 0.177 mg/kg (xylenes), respectively. Benzene, toluene, and MTBE were not detected above laboratory reporting limits. Soil samples were not analyzed for naphthalene (Table 2).

Under the direction of ESFD, in November 2016 and January 2017 Equinix removed approximately 63 US Tons of diesel contaminated soil from the excavated areas associated with the piping system repairs. No confirmation soil samples were collected.

The depth to groundwater is anticipated to be approximately 90 feet bgs, with flow to the west based on measurements of groundwater at a Site Cleanup case (LAX – Korean Airlines, at 6101 West Imperial Highway, Los Angeles, case no. 1061B) located approximately 2,140 feet north of the Site in 2011.

Under the direction of the Regional Board, eight soil borings (B-1, B-2, B-3, B-5, B-6, B-8, B-9, and B-10) were advanced at the Site from October 17–19, 2017 to maximum depths of 32 feet bgs (Figure 5). The anticipated depth of 50 feet bgs could not be achieved due to ground refusal. Borings were drilled in a line from east to west just south of the backup generators, within the piping corridor where the product lines were replaced, and diesel-impacted soils were excavated (B-1–B-3). Borings were also drilled in a line from east to west, approximately 10 to 15 feet south of the first row of borings, to assess the lateral extent of remaining impacts (B-4 – B-6). No borings were drilled to the north of the product pipeline excavation due to inaccessibility. TPH_D was detected in all borings at concentrations ranging from 3.9 mg/kg at the 30-foot depths of borings B-3 and B-10 to 10,000 mg/kg at the 4-foot depth of boring B-3 in the piping corridor area. Figure 5 displays all TPH_D and volatile organic compound (VOC) concentrations as well as the associated boring locations. TPH_D concentrations greater than 25 mg/kg were limited to within 10 feet bgs, with only borings B-2, B-3, and B-6 (all within the piping corridor area) having maximum detections greater than 1,000 mg/kg. Residual diesel impacts near the surface may not extend to groundwater which is estimated to be approximately 60 feet deeper than the maximum depth sampled at the Site. Total petroleum hydrocarbons as gasoline (TPH_G) was not analyzed since gasoline was never used at the Site. VOCs including benzene, MTBE, and other fuel oxygenates were non-detect (ND) in soil samples from all borings with the exception of one detection of naphthalene in boring B-3 at the 5-foot depth (0.08 mg/kg). Table 3 displays all soil analytical results for the 2017 Site Assessment.

As part of the October 2017 site assessment, four of the borings advanced were also located around the two existing diesel USTs (B-7 – B-10). The maximum concentration of TPH_D detected in the UST area was 23 mg/kg at a depth of 20 feet bgs in boring B-8. Soil analysis within the UST area was non-detect for VOCs indicating minimal shallow soil impacts and no impacts to groundwater from the USTs.

Soil beneath the site consists of interbedded layers of sand, silty sand, sandy clay, and clayey sand to at least 32 feet bgs. A representative boring log is included as Appendix A.

The nearest sensitive receptor is Lambs and Ivy Daycare Center, located approximately 1,200 feet to the east.

The nearest drinking water well is approximately 2 miles to the east.

Low Threat UST Closure Policy Criteria Evaluation

General Criteria

The site meets all General Criteria components of the Low Threat Policy.

a) The water purveyor within the area of the Site is the City of El Segundo Water Department.
b) The release was from a piping system that conveys diesel fuel from the USTs to the backup generators.
c) In 2009, secondary containment testing results revealed failures in the piping system. These minor leaks were stopped and the UST system was upgraded. No new leaks or piping failures have been detected since the upgrades.
d) Free product was not detected at the site.
e) A site conceptual model has been developed.
f) Equinix removed approximately 63 US Tons of diesel contaminated soil from the excavated areas associated with the piping system repairs.
g) Soil samples were tested for MTBE.
h) The site does not create a nuisance.

Groundwater

The Low Threat Closure Policy groundwater criteria are not applicable. This is a soil only case. No detections of TPH_D, or fuel related VOCs were detected above Regional Screening Levels (RSLs) below 10 feet bgs. The inferred high groundwater elevation at the Site is approximately 90 feet bgs. Groundwater was not encountered to a depth of 32 feet bgs at the Site.

Vapor Intrusion to Indoor Air

The site meets Scenario 3.3 of the Low Threat Closure Policy, with the exception that TPH concentrations exceed 100 mg/kg throughout the entire bioattenuation zone. The maximum concentration of TPH_D detected in soil is 10,000 mg/kg at the 4-foot depth of boring B-3 and decrease significantly with depth. The Site has 11 active generators, utilizing the two 30,000-gallon diesel USTs. Exposures to petroleum vapors related to residual concentrations of the historical diesel impacted soil are comparatively insignificant relative to exposures from small surface spills and fugitive vapor releases that typically occur at active facilities. Additionally, the residual soil impacts are covered by a concrete pad in an open air area of the facility minimizing unacceptable human health risks.

Direct Contact and Outdoor Air Exposure

The parking lot surface is currently covered with a concrete pad. The Site satisfies the media-specific criteria 3.a for Direct Contact and Outdoor Air exposure under the commercial/industrial land use scenario as follows:

a) Residual benzene in soil does not exceed 8.2 mg/kg (maximum residual ≤ 10 ft bgs = **ND mg/kg**).
b) Residual ethylbenzene in soil does not exceed 89 mg/kg (maximum residual ≤ 10 ft bgs = **ND mg/kg**).
c) Residual naphthalene in soil does not exceed 45 mg/kg (maximum residual ≤ 10 ft bgs = **0.08 mg/kg**)

Therefore, no results exceeded the Low Threat Closure Policy criteria identified below:

Maximum Soil Sample Concentration Results (mg/kg) Max residual at site within 10 feet bgs:		Commercial/Industrial		Utility Worker
		(0 to 5 ft bgs)	Volatilization to outdoor air (5 to 10 ft bgs)	(0 to 10 ft bgs)
Benzene	**ND**	8.2	12	14
Ethylbenzene	**ND**	89	134	314
Naphthalene	**0.08**	45	45	219
PAH	**NA**	0.68	NA	4.5

Factors Supporting Low Risk Closure

The extent of soil contamination has been adequately defined.

MTBE and benzene have never been detected in all soil sampling conducted at the Site.

The UST area revealed only minor detections of TPH_D and non-detect for VOCs indicating minimal shallow soil impacts and no impacts to groundwater from the USTs.

Approximately 63 US Tons of diesel contaminated soil from the excavated areas associated with the piping system repairs was removed from the Site.

Groundwater has not been impacted. No detections of TPH_D, or fuel related VOCs were detected above Regional Screening Levels (RSLs) below 10 feet bgs.

Free product was not reported at the Site.

Case closure is consistent with the Low Threat Closure Policy.

IX. MTBE FATE & TRANSPORT PLUME LENGTH MODELING ANALYSIS

This is a soil only case, groundwater is anticipated to be encountered at 90 feet bgs. MTBE has never been detected in all soil sampling conducted at the Site.

X. ELECTRONIC DELIVERABLE FORMAT (EDF) SUBMISSION

Has electronic data reporting requirement been met? Yes

XI. AB 681 REQUIREMENT (Land Owner Notification)

Verify property ownership http://assessor.lacounty.gov/extranet/DataMaps/Pais.aspx (date) : May 26, 2017
Have landowner or impacted site notification requirements been met? Yes
Owners: GPT Maple Avenue Owner LP c/o Gramercy Property Trust Inc.
Responsible party: Equinix Communications
Pre-closure letter sent date 1/31/18

Table 4-1: Maximum Soil Screening Levels (mg/kg) for TPH, BTEX and MTBE above Drinking Water Aquifers

	Distance Above Groundwater	Carbon Range		
TPH		C4-C12	C13-C22	C23-C32
	>150 feet	1,000	10,000	50,000

- TPH = Total petroleum hydrocarbons.
- BTEX = benzene, toluene, ethylbenzene, and xylenes, respectively. MTBE = methyl tertiary butyl ether.
- Respective MCLs (ppm): B=0.001, T=0.15, E=0.3, X=1.75, MTBE=0.013.
- BTEX screening concentrations determined per the attenuation factor method as described in RWQCB Guidance for VOC Impacted Sites (March 1996), with a natural degradation factor of 11 for BTEX and of 3 for MTBE. Table values can be linearly interpolated between distance above groundwater and are proportional to fraction of each lithological thickness.
- Values in Table 4-1 are for soils above drinking water aquifers. All groundwaters are considered as drinking water resources unless exempted by one of the criteria as defined under SWRCB Resolution 88-63 (TDS>3000 mg/L, or deliverability <200 gal/day, or existing contamination that cannot be reasonably treated). Regional Board staff will make a determination of potential water use at a particular site considering water quality objectives and beneficial uses. For non-drinking water aquifers, regardless of depth, TPH for ">150 feet" category in the table should be used;
- Distance above groundwater must be measured from the highest anticipated water level. Lithology is based on the USCS scale.
- In areas of naturally-occurring hydrocarbons, Regional Board staff will make determinations on TPH levels.

B-10-30	10/19/2017	30	13	ND	ND	ND	ND	ND	ND	ND	ND	ND	ND	ND

Abbreviations and Notes:

bgs = below ground surface

mg/kg = milligrams per kilogram

ND = not detected; see laboratory report for practical quantitation limit and method detection limit

Dections in **BOLD** are above industrial screening level of 1,100 mg/kg for TPHd

-- No value for direct exposure human health risk levels

TPH-d analyzed by CA LUFT

Benzene, Toluene, Ethyl-benzene, Total Xylenes, MTBE, ETBE, DIPE, TAME, TBA, Ethanol, and Napthalene analyzed by EPA Method 5035/8260B.

TPH-d = Total petroleum hydrocarbons as diesel

MTBE = Methyl tertiary butyl ether

ETBE = Ethyl tertiary butyl ether

DIPE = Diisopropyl ether

TAME = Tertiary amyl methyl ether

TBA = Tertiary butyl alcohol

VOCs = Volatile Organic Compounds

Attention: Donald F. Holquin

Subject: Industrial Wastewater Discharge Permit No. 5815
Computer Science Corporation
650 North Sepulveda Blvd.
El Segundo, CA 90245

Dear Mr. Holquin:

Enclosed are two (2) approved sets of plans, and copies of the approved Industrial Wastewater Discharge Permit for the subject company. Please review these for compliance with your requirements, and retain the copies you require for your files. A copy of this letter is forwarded to the applicant to notify him of the Sanitation Districts' permit requirements, which are in force from the current date. If any additional permit requirements are issued to the applicant by your agency, copies should be forwarded to the Sanitation Districts for our records. The approved plans consist of:

Plot Plan Including Existing and Proposed Sewer Lines

Approval of the plans and permit is contingent upon continuing compliance with applicable Sanitation Districts' Ordinance requirements, upon any corrections shown in red on the drawings, and upon the items indicated on the attached requirement list.

If you have any questions concerning these requirements, please call the Sanitation Districts' Industrial Waste Section at extension 260.

Very truly yours,

John D. Parkhurst
Chief Engineer and
General Manager

INDUSTRIAL WASTEWATER DISCHARGE PERMIT

REQUIREMENT LIST

COMPANY NAME Computer Science Corporation

INDUSTRIAL WASTEWATER DISCHARGE PERMIT NO. 5815

DATE OF PERMIT ISSUANCE October 21, 1977

The above named company is required to comply with all indicated items on this list as a condition of the permit approval. Satisfactory evidence of compliance with these conditions should be supplied to the Sanitation Districts where requested. Satisfactory evidence will consist of a minimum of written notification signed by a responsible company official, and in some cases may involve the submission of additional drawings and data.

1. The permittee is advised that the chromium content in the cooling tower bleed-off must not cause the concentration of chromium in the total discharge to exceed the allowable limit. Numerical limits have been established by the Sanitation Districts for the maximum concentrations of heavy metals, and other toxic materials, permissible in an industrial discharge to the public sewers. The limits are those shown in the enclosed table of "INDUSTRIAL WASTEWATER EFFLUENT LIMITATIONS." The subject company is advised that any discharge in excess of these limits requires corrective action by the discharger. Penalties applicable to violations of these limits will be strictly enforced by the Sanitation Districts.---------- /X/

2. Industrial Wastewater Discharge permit 5815 is issued only for the discharge of cooling tower bleed-off to the public sewer. Before any other industrial waste is discharged to the sewer system subject company is required to file a revised permit application.---------- /X/

3. The applicant's Surcharge statement for fiscal years 1974-75, 1975-76, and 1976-77 were delinquent September 15, 1975, September 15, 1976 and September 15, 1977 respectively, and should be filed as soon as possible. Necessary forms and instructions for filing surcharge statements are enclosed in the applicant's copy.---------- /X/

4. Any proposed revisions which result in a significant change in wastewater quantity or quality (approximately 25% or more or 25,000 gallons per day) from the values reported in the permit application will required a new permit application to be submitted for the Districts' approval.---------- /X/

Account No.: 1800591

Mr. Steve Tsumura
Environmental Safety Coordinator
City of El Segundo
350 Main St.
El Segundo, CA 90245

Dear Mr. Tsumura:

Industrial Wastewater Discharge Permit No. 5815

Computer Science Corp.
650 N. Sepulveda Blvd.
El Segundo, CA 90245

Effective immediately, Industrial Wastewater Discharge Permit No. 5815 is void for the following reason:

Exempt. This company is now *permit exempt.*

Exemption from obtaining a permit does not relieve the company of all responsibility. The company must comply with all other Districts' *Wastewater Ordinance* regulations such as keeping rainwater out of the sewer, preventing large amounts of solids or oil and grease from entering the sewer, making certain that the dissolved sulfide concentration is below 0.1 mg/l and that the pH is above 6.0 at all times. In addition, the company must comply with all of your regulations which may involve obtaining a permit through your agency. Changes in the Sanitation Districts' policies or in the company's business operations may require that the company obtain an industrial wastewater discharge permit in the future.

Very truly yours,

James F. Stahl

Sanitation Districts' Industrial Waste Discharge Permit Number [1/] 5813

Industrial Waste Contact Person: T. Sandoval

Title: Corporate Property Management Western Region Mgr.

Person in Charge of Local Operations: R. Kelly

Title: Corporate Property Management Manager

Owner of Company: Corporation

II. CATEGORY DETERMINATION

A. Unit Operations

Please check any of the following unit operations which are performed at your facility:

1. [ ] Electroplating
2. [ ] Electroless Plating
3. [ ] Anodizing

Note: 1/ One Baseline Monitoring Report (BMR) must be completed for every industrial waste discharge point to the sewer from your facility. To obtain additional copies of this BMR form you may copy it or call Eddie Esfandi at (213) 699-7411, extension 278.

4. [ ] Coating (phosphatizing, chromating and coloring)

5. [ ] Chemical etching and milling

6. [ ] Printed circuit board manufacturing

7. [X] None of the above

B. Companies Exempt from EPA Electroplating and Metal Finishing Regulations

If you checked item number 7 in II A above, your facility is not covered by the EPA regulations for either the electroplating or metal finishing category. Your claim to such an exemption will be verified through on-site Sanitation Districts' inspections of your facility.

If you believe that your facility is not covered by the above regulations, please indicate which EPA industrial regulatory cateogry should be applied to your facility, if any:

A/C Cooling Tower discharge

Please state the Federal Standard Industrial Classification Number(s) (SIC) used for your facility: 7372 _____ _____

As your checking of item number 7 in II A above denotes you are exempt, you do not need to fully complete this Baseline Monitoring Report (BMR). Please go on to Section VIII of this form; check the exempt box and sign the accompanying statement. Please then proceed to Section X of this form, complete the certification statement and return this form to the Sanitation Districts.

C. Companies Not Exempt

If you did not check item number 7 in II A above, please continue. Please check the appropriate item(s) below:

Type of facility in the electroplating and metal finishing industry. This facility is a(n):

1. [ ] Independent Printed Circuit Board Manufacturer [Manufacturers printed circuit boards primarily for sale to other companies]

2. [ ] Job Shop [Owns less than 50% (area basis) of the materials undergoing metal finishing]

3. [ ] Captive Shop [Owns over 50% (area basis) of the materials undergoing metal finishing]

4. [ ] Integrated Facility [Combines regulated electroplating and metal finishing waste streams with significant amounts (over 10%) of process waste streams not covered by the electroplating or metal finishing regulations]

5. ☐ Nonintegrated Facility (Significant wastewater discharges only from operations covered by the electroplating or metal finishing regulations)

D. Companies Subject Only to the Electroplating Regulations

If you checked only items 1 and/or 2 in II C above (Independent Printed Circuit Board Manufacturer or Job Shop), your facility is not subject to the EPA's Metal Finishing Category regulations (40 CFR 433). However, your facility is subject to the EPA categorical regulations for the Electroplating Category (40 CFR 413). Please indicate whether or not you have previously submitted a BMR to the Sanitation Districts as required by the EPA Electroplating Category Regulations.

Yes	No	If Yes, please give date of submittal
☐	☐	_____

If your facility is covered by the Electroplating Category regulations and your company has not as yet submitted a BMR, you must fully complete this BMR and return it to the Sanitation Districts as soon as possible.

III. TOTAL TOXIC ORGANIC INFORMATION

If you checked item(s) 1 and/or 2 in II C above (Printed Circuit Board Manufacturer and/or Job Shop), your facility is subject to the revised Electroplating regulations for control of Total Toxic Organics (TTO). If you checked item(s) 3, 4 or 5 in II C above (Captive Shop, Intergrated Facility or Nonintegrated Facility), your facility is subject to the Metal Finishing Regulations for control of TTO. Please see Appendix A for a list of toxic organic chemical compounds included in TTO. Please check the appropriate box(es) below:

☐ No toxic organic compounds as listed in Appendix A are used or stored at this facility.

☐ A solvent management plan, as required by the EPA regulations, will be submitted for Districts' approval.

☐ Monitoring for TTO will be performed and information on TTO compounds in the company wastewater will be submitted to the Sanitation Districts.

Please list all organic chemical compounds regularly used or stored at your facility: _____

_____

_____

_____

If your company is subject to only the Electroplating (and not the Metal Finishing) regulations and has previously submitted a BMR to the Sanitation Districts with the information hereafter requested in this form, and no significant changes in this information are necessary, the following portion of this BMR need not be completed. Please go to Section VIII of this BMR, check the appropriate box and sign the accompanying statement. Then go to Section X, complete the certification statement and return this form to the Sanitation Districts.

IV. ENVIRONMENTAL CONTROL PERMITS

Please complete the following portions of this report if you checked item(s) 3, 4 or 5 in II C above (facilities covered by the Metal Finishing Category regulations), or if your company has not as yet filed your required BMR under the Electroplating Category regulations.

Please indicate other environmental control permits held by or for your facility (DO NOT include permits regulating air quality control)

_____

_____

_____

_____

Does your facility have an air pollution control device which produces a discharge to the sewer? Yes ☐ No ☒

V. PRODUCTION INFORMATION

Nature of Operation: _____

_____

_____

Product(s): _____

SIC Code No(s): _____ _____ _____

Rates of Production (Please tabulate below or use a separate listing)

VI. FLOW MEASUREMENT INFORMATION

A. Industrial Wastewater Discharge Permit Flow: [1]

Districts' Permit No. _____, Permit Flow _____ gal/day

B. Wastewater Flow Information

EPA Regulated Wastewater Flows[2]	Average Daily Flow (gal/day)	Maximum Daily Flow (gal/day)	Flow Description[3]	Regulated EPA Category[4]
(1)				
(2)				
(3)				
(4)				

Nonregulated Wastewater Flows[5]	Average Daily Flow (gal/day)	Maximum Daily Flow (gal/day)	Flow Description[3]
(1)			
(2)			
(3)			
Cooling water or other wastewater dilution flows:			
Total Industrial Wastewater Flows: (total of regulated and nonregulated wastewater flows)			

NOTES: 1/ A BMR must be completed for every industrial waste discharge point to the sewer.

2/ Wastewater flows from operations covered by EPA industrial categorical regulations.

3/ Please indicate by letter in this column whether wastewater flow value is: Estimated (E), Measured (M), Intermittent (I) or Continuous (C).

4/ Please identify the EPA regulatory category under which such wastewater is controlled.

5/ Wastewater flows from operations not covered by EPA industrial categorical regulations.

Annual water intake: in millions of gallons _____ per year.

Source of water: Purchase from water purveyor /___/

Company well /___/

VII. CONCENTRATION OF POLLUTANTS IN WASTEWATER

A. Sampling and Analysis Information

The daily maximum and average concentrations must be furnished for all regulated pollutants in all wastewater streams described in Section VI above. The wastewater must be sampled and analyzed and other information furnished as described in Appendix B. Copies of the wastewater analysis results must be attached to this BMR when it is submitted to the Sanitation Districts.

The method of wastewater sample collection used was:

/___/ Flow-proportioned composite sample

/___/ Time-proportioned composite sample

/___/ Grab sample--for which pollutants? _____ _____ _____

B. Other Wastewater Sampling and Analysis Information

Sampling dates and times: _____

_____

Wastewater sampling location(s): _____

_____

Name and address of company obtaining wastewater samples:

_____

Name and address of laboratory performing the analyses:

_____

VIII. STATEMENT OF COMPLIANCE

This statement is to be made by a qualified environmental professional or (for the exempt category) by a responsible company official.

I hereby certify that the EPA categorical pretreatment standards which apply to this company are being met on a consistent basis.

Yes /___/ No /___/ Exempt /___/

Additional pretreatment or operational and maintenance measures which are recommended to bring the company into compliance with the EPA categorical regulations are as follows:

(1)_____

(2)_____

(3)_____

(4)_____

(5)_____

Date: _____ Print Name: _____

Sign Name: _____

Qualification as an Environmental Professional: _____

_____

Company Name: _____

Company Address: _____

IX. COMPLIANCE SCHEDULE

If your company is presently in compliance with the EPA categorical pretreatment standards, or your company is exempt, disregard this item and continue on to itme number X.

If presently not in compliance with the EPA categorical pretreatment standards, please complete the following compliance schedule:

Increment of Progress	Commencement Date	Completion Date
A. Engineering investigation	_____	_____
Consultant selection, if needed	_____	_____
Review of present condition	_____	_____
Treatment process selection	_____	_____
Conceptual design	_____	_____
Final design	_____	_____
B. Permitting process	_____	_____
City/County Engineer	_____	_____

Increment of Progress	Commencement Date	Completion Date
C. Construction	_____	_____
Equipment selection	_____	_____
Installation	_____	_____
D. Start up and trouble shooting	_____	_____
E. Date of final completion and compliance	_____	_____

No progress increment shall exceed nine months and no completion date shall be later than the compliance date for the EPA pretreatment standards. Subdivide any increment if it exceeds nine months. The Districts may be able to review your conceptual design before the preparation of detail plans if the pretreatment is reasonably complex. However, the engineering investigations leading to the conceptual design need to be as complete as possible, and the Districts cannot provide design assistance. The inability of the Districts to review the designs in a timely manner does not excuse noncompliance with the EPA regulations.

X. CERTIFICATION

I certify, under the penalty of perjury, that I have personally examined, and am familiar with, all of the information in this Baseline Monitoring Report, including all attachments. Based upon my inquiry of those persons immediately responsible for obtaining the information contained in this Report, I believe that the information is true, accurate and complete.

Account No.: 1800591

Mr. Steve Tsumura
Environmental Safety Coordinator
City of El Segundo
350 Main St.
El Segundo, CA 90245

Dear Mr. Tsumura:

Industrial Wastewater Discharge Permit No. 5815

Computer Science Corp.
650 N. Sepulveda Blvd.
El Segundo, CA 90245

Effective immediately, Industrial Wastewater Discharge Permit No. 5815 is void for the following reason:

Exempt. This company is now *permit exempt.*

Exemption from obtaining a permit does not relieve the company of all responsibility. The company must comply with all other Districts' *Wastewater Ordinance* regulations such as keeping rainwater out of the sewer, preventing large amounts of solids or oil and grease from entering the sewer, making certain that the dissolved sulfide concentration is below 0.1 mg/ℓ and that the pH is above 6.0 at all times. In addition, the company must comply with all of your regulations which may involve obtaining a permit through your agency. Changes in the Sanitation Districts' policies or in the company's business operations may require that the company obtain an industrial wastewater discharge permit in the future.

Very truly yours,

James F. Stahl

Health Services, Sacramento

INTRODUCTION

Under Technical Directive Document number F9-8709-019, Ecology and Environment, Inc.'s Field Investigation Team (FIT) has been tasked to reassess all Preliminary Assessments (PAs) in the Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) with "active" or "pending" status according to guidelines established to implement the Superfund Amendments and Reauthorization Act (SARA). The strategy for determination of further action under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) is based solely on each site's potential to achieve a score high enough on the Hazard Ranking System (HRS) for inclusion on the National Priorities List (NPL). This strategy is intended to identify those sites posing the highest relative risk to human health or the environment. All other sites needing remedial or enforcement follow-up will be referred to the State or an appropriate Federal agency.

This site was evaluated primarily using the original HRS model. Additionally, this site was also evaluated for its potential to score using the draft revised HRS model. The following is a summary of FIT's findings with regard to this site.

recycled paper

SUMMARY

Devlin Pharmaceuticals (Devlin) was located at 700 N. Sepulveda Blvd., El Segundo, California (Los Angeles County) from 1974 to 1981. The site is owned by Mr. Bruce Rabin and is currently occupied by Hughes Aircraft Company (HAC). HAC has no manufacturing capabilities and uses the site for storage of furniture.

Operation began at the site in 1958. Mr. Rabin operated a pharmaceutical and lighter fluid manufacturing facility on the property. The property was leased to Bergan Brunswick in 1966. Bergan Brunswick manufactured pharmaceuticals. In 1974 the property was leased to Devlin Pharmaceuticals Inc. Devlin manufactured pharmaceuticals and vitamins. Devlin vacated the site in 1981, and in 1982 the present lease holder, HAC, rented the property.

When the operation was started by Rabin in 1958, eight underground storage tanks were installed. The tanks contained gasoline, mineral oils, alcohols and solvents for lighter fluid production. The tanks were made of concrete and from available CERCLIS file information, there is no evidence to indicate that the tanks leaked. The tanks and the lines to the tanks were removed in 1982 by Rabin (prior to the HAC lease).

Bergen Brunswick had a clarifier installed but did not use the underground tanks. The exact nature of the waste is not known but is assumed to be non-hazardous based on the PA done by John Casey of the California Department of Health Services (DOHS).

Devlin also operated the clarifier and did not use the underground tanks. All waste generated were non-hazardous and sewerable.

There is no surface water use within three miles of the site.

In 1985 HAC submitted clarifier sludge samples to the IT Corporation for analysis. Based on this analysis, there no evidence to indicate the potential for air contamination.

The wastes on-site have a maximum toxicity value due to the presence of metals, including zinc, lead and chromium. From available CERCLIS file information there is no evidence indicating releases from the tanks or potential contamination. The waste quantity is low, and the containers showed no evidence of destabilization. Although the underlying strata is highly permeable, there is no evidence indicating contamination of the Silverado aquifer, which serves a population of over 10,000persons from well within 3 miles of the site. The aquifer lies at a depth of 200 to 250 feet .

A PA was done in November of 1985 by the DOHS recommending active status, low priority. The recommendation was based on the unregulated removal of the tanks by Rabin (threat of potential contamination of soil during removal).

FIT does not concur with the previous conclusion, and recommends no further action. A preliminary HRS screening estimate does not support the site's eligibility to be considered for inclusion on the National Priorities List (NPL) due to: (1) low waste quantity disposed on site; (2) good containment of material; (3) no surface water targets; (4) no indication of airborne contamination; and (5) depth of the aquifer.

RECOMMENDATION

1. EPA

FIT, under CERCLA, recommends no further action for the Devlin Pharmaceutical Inc. site. The recommendation is based on the following:

- o no evidence of on-site contamination;
- o low potential for air release;
- o low waste quantity;
- o no surface water targets; and
- o there is a low potential for observed release to groundwater due to the stability of the containment vessels.

2. State or other Agency

Copies of this reassessment will be sent to DOHS for its consideration.

To Whom It May Concern,

Ramboll Environ US Corporation (Ramboll Environ) is pleased to submit this report to Aerospace Center LLC, a California limited liability company; Rabin Family LLC, a California limited liability company; Ronnie Dalesandro and Susan Hymers, not individually but as Trustees of The Rabin Trust; John D. Winters and Sherry Winters, not individually but as Trustees of the Elaine Winters Survivors Trust; and, John D. Winters and Sherry Winters, not individually but as Executors of the Estate of Elaine Winters to present the findings of a Phase II subsurface investigation conducted recently at the property located at 700 N. Sepulveda Boulevard, El Segundo, California (the "site:" see Figure 1). The Phase II subsurface investigation was performed in accordance with the proposal provided to Liner LLP on February 4, 2016.

BACKGROUND

Based solely on information provided in a Phase I environmental site assessment (ESA) performed by Partner Engineering and Science, Inc. (Partner) in September 2015 (Phase I Environmental Site Assessment Report, Boeing Building II, 700 N. Sepulveda Boulevard, El Segundo, California, dated September 18, 2015 [the "2015 Phase I Report"]), the approximately 1.99 acre site was undeveloped until approximately 1927. Between approximately 1927 and 1938, the site was used as agricultural land. In approximately 1957, the current building was constructed on the site. According to the 2015 Phase I Report, tenants at the site have included Pharmaceutical Co. (1958), The Rabin Company/Pharmapak Drug Company (1960), Rabin Winters Corporation (1962-1967), Rabin Winters Division of Brunswig Drug/Bergan Brunswick (1966-1974), BBC Laboratories (1971), Norton Products/Tannehill Pharmaceuticals (1971), Devlin Pharmaceuticals (1974-1981), Hughes Aircraft Company (1982-1999), and The Boeing Company (2008 - present).

Between 1958 and 1985, eight 1,000 gallon USTs of concrete construction were present on the site and used for the storage of gasoline, sulfides, organic acids, copper, zinc, mineral oils, alcohols, and solvents. In 1985, the tanks were filled in place but were subsequently removed from the site in 1990, reportedly without regulatory closure. In addition, between 1966 and 1985 a concrete clarifier was in use at the site. In 1985, the clarifier was abandoned under the regulatory oversight of the Los Angeles County Department of Public Works (DPW). The site received no further action (NFA) status for the clarifier in 1994. However, no

documentation regarding the closure of the clarifier, including whether any sampling was performed as part of closure activities, was provided for Partner's review. As a result, Partner characterized this issue as a recognized environmental condition (REC) in the 2015 Phase I Report.

In addition, no subsurface characterization activities are known to have been conducted in the vicinity of the former USTs or the concrete clarifier. As a result, and with the specific objective of evaluating the potential for the REC identified by Partner in its 2015 Phase I Report to have impacted the subsurface of the site, Ramboll Environ proposed to complete the scope of work presented in our proposal dated May 12, 2016 and as described below; based on the anticipated depth to groundwater in the site vicinity (on the order of approximately 100 feet), no groundwater sampling was performed as part of the Phase II subsurface investigation.

SCOPE OF WORK

The scope of work included (Task 1) pre-field activities and mobilization; (Task 2) soil and soil vapor sampling; (Task 3) laboratory testing; and (Task 4) data evaluation and reporting. Drilling and sampling activities were supervised by Ramboll Environ field personnel working under the supervision of a California Registered Professional Geologist.

PRE-FIELD ACTIVITIES AND MOBILIZATION

Prior to implementation of the subsurface investigation, a geophysical survey was performed at the site on March 5, 2016, by Spectrum Geophysics of Chatsworth, California in an effort to locate the former UST area and the clarifier. The geophysical survey was performed using a variety of equipment, including EM-61 high sensitivity metal detection, shallow focus terrain conductivity, ground penetrating radar, and electromagnetic utility-locating methods. According to the 2015 Phase I ESA Report, the exact locations of the former UST area and clarifier are not known; the tanks were described as being located "north of the building near receiving." The location of the clarifier is not known but may be located in proximity to the former UST area (information contained in an appendix to the 2015 Phase I Report contains a hand drawn map with a feature labelled as a "large stationary cylindrical tank;" this feature is located to the immediate west of the former UST area and could possibly be the clarifier). As a result, the focus of the geophysical survey was an approximately 11,500 square foot area to the north of the building marked "USTs" on Figure 2 in the 2015 Phase I Report (and shown on Figure 1 in this report). The results of the geophysical survey indicated an anomaly within the survey area that was interpreted by Spectrum Geophysics to be the "most likely" location of the former USTs; the anomaly was observed in the general area marked "USTs" on Figure 2 in the 2015 Phase I Report. Furthermore, this anomaly approximately coincided with a patched area observed on the asphalt surface. No feature indicative of the former concrete clarifier was identified in the surveyed area. The geophysical survey report provided by Spectrum Geophysics is included in Attachment A.

In addition to the area that was cleared for the presence of underground pipes/utilities by Spectrum Geophysics' geophysical survey, Ramboll Environ contacted Underground Services Alert (DigAlert) to mark the locations of all major utilities at the site boundaries.

Prior to initiating drilling activities, Ramboll Environ prepared a site-specific Health and Safety Plan (HASP). The HASP was designed to minimize exposure of Ramboll Environ's field personnel to potentially hazardous materials. All field personnel were required to implement the procedures presented in the HASP while performing field work. As part of this task, Ramboll Environ also contracted with the appropriate subcontractors for the planned fieldwork.

SOIL VAPOR SURVEY AND SOIL SAMPLING

On March 19, 2016, under Ramboll Environ's oversight, BC2 Environmental of Orange, California, advanced 6 soil borings (SB-1 through SB-6) in the area identified as an anomaly during the geophysical survey (see Figure 1). Because the location of the concrete clarifier could not be identified, the soil borings planned for that area (SB-7 and SB-8) were not drilled. At each soil boring location, the asphalt surface was penetrated using a direct push drilling rig, then the soil boring was hand augered to approximately 5 feet below ground surface (bgs) to confirm that no subsurface utilities or lines were present at that location. Once the top 5 feet was hand augered, each soil boring was then advanced to its total depth of approximately 15 feet bgs using a direct push drilling rig. The soil borings were logged in accordance with

the Unified Soil Classification System (USCS) and monitored using an organic vapor meter photoionization device (PID) equipped with a 10.6 electron volt lamp calibrated against an isobutylene standard.

In each soil boring, soil samples were collected at three depth intervals ("shallow," "middle," and "deep"). Soil samples were collected in an attempt to sample native soil and sample depths were adjusted based on soil composition changes from backfill material to native soil in the former USTs area. The depth interval for the shallow and middle sample in each soil boring varied from 7 to 11 feet and 10 to 13 feet bgs, respectively. The depth interval for the deep soil sample at each location was 15 feet bgs.

Soil samples for volatile organic compound (VOC) analyses were collected using Encore soil samplers and sample containers, while soil samples collected for all other analysis were collected in acetate sleeves with Teflon-lined plastic end caps or glass sampling jars with plastic lids. Soil samples were labelled, placed in plastic Ziploc bags for additional containment purposes, and then placed in an insulated cooler with ice for shipment to the laboratory under chain-of-custody protocols. Samples were delivered to TestAmerica Laboratories, Inc., of Irvine, California, for analytical testing. The two shallowest samples from each soil boring were laboratory analyzed, while the deeper samples were placed on hold at the laboratory, pending analytical results of the shallower samples. Soil samples were analyzed for total petroleum hydrocarbons (TPH) as gasoline-, diesel fuel-, and oil-range hydrocarbons (TPH-g, TPH-d, and TPH-o, respectively) in accordance with United States Environmental Protection Agency (USEPA) Method 8015 Modified; VOCs, in accordance with USEPA Method 8260B; and California Manual 17 Metals by (USEPA) Methods 6010B/7471A.

Soil borings were converted to temporary soil vapor probes at depths of approximately 10.5 ft bgs in SB-1 through SB-3, SB-5, and SB-6, and 12 ft bgs in SB-4 (the vapor probe was installed at 12 ft bgs in SB-4 to place it in native soil). The soil vapor probes were installed and sampled in general accordance with the guidelines established by the California Environmental Protection Agency (Cal/EPA), the Department of Toxic Substances Control, the Los Angeles Regional Water Quality Control Board, and the San Francisco Bay Regional Water Quality Control Board in "*Advisory Active Soil Gas Investigations*", dated July 2015 (the advisory). The soil vapor probes were constructed with a temporary airstone filter and 1/4 inch tubing equipped with a valve at its termination. The probe tip was set with a minimum of 6 inches of sand on each side, or one foot total depth, and a minimum of 6 inches of dry bentonite was placed below and above this sand pack.

Following an equilibration period of at least 120 minutes (in accordance with the advisory), each soil vapor probe was sampled. Soil vapor samples were collected in vapor-tight glass syringes and analyzed in an onsite mobile laboratory operated by H&P Mobile Geochemistry of Carlsbad, California. In addition to the 6 primary soil vapor samples, a duplicate sample was collected from probe SV-1-10.5 and a material blank sample was collected from a soil vapor probe and associated tubing assembled and installed by BC2 Environmental. Each soil vapor sample was analyzed for the full suite of VOCs in accordance with USEPA Method 8260B.

In accordance with the advisory, each soil vapor probe was purged three purge volumes before sampling. Additionally before sampling, a shut-in test and a leak test (utilizing the compound 1,1-difluoroethane) were performed in accordance with advisory guidelines to confirm that no leaks existed in the above ground sampling equipment and that ambient air had not been allowed into the soil vapor sample. The analysis of soil vapor samples and the material blank did not indicate the presence of 1,1-difluroethane at concentrations above laboratory reporting limits, indicating that these samples are considered to be representative of the soil vapor at each respective location and depth.

Prior to collection of samples and between successive sampling attempts, sampling equipment was decontaminated to minimize the potential for cross-contamination. After the collection of soil vapor samples, the tubing was removed from each sampling location, the boreholes sealed with hydrated bentonite, and patched to match the surrounding asphalt surface.

Soil cuttings and decontamination water generated during subsurface investigation activities were placed in a 55-gallon Department of Transportation (DOT)-rated drum and stored on site pending offsite disposal.

Results of Sampling

The lithology at the site consisted of dark reddish brown sand extending from the surface to approximately 8 to 12 ft bgs, and transitioned to red sand to the total depth drilled (approximately 15 ft bgs). The transition from dark reddish brown to red sand was considered the contact between backfill material and native soil. In SB-4 and SB-5, pieces of concrete or asphalt-like materials were encountered within the upper approximately 12 feet while drilling, possibly indicating that those materials made up some of the backfill material used when the USTs were removed and the area backfilled.

Analytical results for soil vapor samples are summarized in Table 1 and analytical results for soil samples are summarized in Tables 2a and 2b; laboratory analytical reports are included in Attachment B (soil vapor samples) and Attachment C (soil samples).

Soil Vapor

The following analytes were detected at concentrations above the respective laboratory reporting limits: benzene; carbon tetrachloride; chloroform; 1,1-dichloroethene, dichlorodi-fluoromethane (F12); ethylbenzene; m,p-xylene; o-xylene; naphthalene, tetrachloroethene, toluene; trichloroethene; 1,1,2-trichloro-trifluoroethane (F113), and trichlorofluoromethane (F11).

Soil

The following analytes were detected at concentrations above the laboratory reporting limits: TPH-d and TPH-o, arsenic, barium, beryllium, chromium, cobalt, copper, lead, mercury, nickel, vanadium, and zinc.

SOIL VAPOR AND SOIL SCREENING LEVELS

In evaluating the soil vapor data, Ramboll Environ considered risk-based soil vapor screening levels for residential land use, based on the USEPA Regional Screening Levels (RSLs)(USEPA 2015) and/or Department of Toxic Substances Control (DTSC)-modified screening levels (SLs). The development of the screening levels is described below.

The DTSC-modified RSLs or USEPA RSLs are concentrations of chemicals in residential air that the Cal/EPA and/or USEPA consider to be below thresholds of concern for risks to human health over a lifetime. The thresholds of concern used to develop the RSLs are an excess lifetime cancer risk of one-in-a-million (10^{-6}) and a hazard quotient (HQ) of 1.0 for noncancer health effects. The NCP (40 Code of Federal Regulations [CFR] § 300) is commonly cited as the basis for target risk and hazard levels. According to the NCP, lifetime incremental cancer risks posed by a site should not exceed one in a million (1×10^{-6}) to one hundred in a million (1×10^{-4}), and noncarcinogenic chemicals should not be present at levels expected to cause adverse health effects (i.e., HI greater than one). As a conservative measure, the RSLs are calculated to correspond to an estimated cancer risk of 1×10^{-6} (the low or conservative end of the target risk range) or a noncancer HQ of 1.0. The USEPA RSLs were used unless the DTSC-modified RSLs were more stringent. Under this approach, the DTSC-modified RSLs were used for benzene and PCE.

Soil screening levels were obtained from the USEPA RSL Summary Table (USEPA 2015), and the soil vapor screening levels were derived from the DTSC, Human and Ecological Risk Office Note 3 (Cal/EPA 2016), and/or the Regional Screening Level Summary Table (USEPA 2015). Both the soil vapor and soil screening levels are provided in Tables 1 (soil vapor) and 2a and 2b (soil), respectively.

DATA EVALUATION

Soil vapor results were compared to screening levels derived from Cal/EPA and/or USEPA in a future residential building land use scenario, as described above. None of the VOC compounds that were detected above laboratory reporting limits in the soil vapor samples exceeded their respective screening levels.

Soil sample results were compared to USEPA RSLs for soils in a residential land use scenario. As indicated above, the only compound detected in any of the soil samples that exceeded its respective USEPA RSL was arsenic. Arsenic was detected in four soil samples (SB-2-10, SB-3-10, SB-4-11, and SB-5-10) at concentrations ranging from 3.6 to 4.3 milligrams per kilogram (mg/kg). These concentrations exceed both the residential and commercial/industrial land use USEPA RSLs for arsenic of 0.68 and 3.0 mg/kg, respectively. Arsenic is a naturally occurring metal in soil and tends to be present in native California soils

at concentrations that exceed applicable regulatory thresholds. According to one source,[1] the average concentration of arsenic detected in California soils is 3.5 mg/kg (with a minimum detection of 0.6 mg/kg and a maximum detection of 11.0 mg/kg in the samples collected for this study); in a second source,[2] naturally-occurring arsenic was detected in California soils at concentrations ranging from 0.3 mg/kg to 69 mg/kg. A third study specific to Southern California soils,[3] and based on statistical analysis of a large data set from school sites in Los Angeles County, gave an upper-bound background arsenic concentration of 12 mg/kg. In addition, detected concentrations of arsenic are relatively consistent throughout the samples collected at the site. Therefore, it is Ramboll Environ's opinion that the arsenic detected in the soil at the site is naturally occurring.

CONCLUSIONS AND RECOMMENDATIONS

Based on the results of the sampling described above, it is Ramboll Environ's professional opinion that (a) the investigation that was conducted by Ramboll Environ was a reasonable and prudent investigation designed to assess the potential impacts from historic USTs and a clarifier at the site and should be deemed to be 'all appropriate inquiry' with respect to such potential impact; (b) the low concentrations of constituents detected in the soil vapor and soil sampling results in the area of the site investigated (i) were well below the residential screening levels, the most restrictive applicable screening levels; (ii) are consistent with a no further action status for the site; (iii) are not indicative of any release or condition which has adversely impacted the environmental integrity of the site, which would require additional investigation, monitoring, or remediation or reporting to any governmental agency; (c) are not indicative of conditions which would require special handling in connection with the redevelopment of the site; and (d) no further investigation, monitoring, or remediation is recommended or warranted.

Please call any of the undersigned if you should have questions.

1.0 INTRODUCTION

On March 5, 2016, Spectrum Geophysics conducted a geophysical investigation at a commercial property located at 700 North Sepulveda Boulevard in El Segundo, California. The purpose of the investigation was to delineate the surface trace of detectable steel underground storage tanks (USTs), backfilled excavations or concrete clarifiers within the 190-foot by 95-foot survey area. The area of investigation, as designated by Patrick Holland-Stergar of Ramboll, was primarily asphalt covered though some areas of concrete were visible adjacent to the building.

The expected surficial geology in the upper 8 feet (maximum depth of geophysical investigation) of the survey area was Quaternary Eolian and Dune deposits consisting of wind-blown sands. There may also be artificial fill from previous construction. The water table is expected to be below the maximum depth of investigation, but moisture in the upper five feet of soil can contribute to signal attenuation in ground penetrating radar data. Based on information provided by the Client, the site was occupied by a Boeing facility in the past and had up to 8 USTs present.

Site interferences included a building, several stairwells, a loading dock, several metallic vault lids, bollards, trash bins, and a drain invert.

2.0 EQUIPMENT

The equipment used during this investigation consisted of a Geonics EM-61 high-sensitivity metal detector, a Sensors & Software “Noggin Smart Cart” ground penetrating radar, a shallow-focus metal detector (M-scope), and electromagnetic (EM) utility-locating equipment. An Allegro digital field computer was used to enter acquisition paramenters and store data during the EM-61 survey.

3.0 METHODS AND FIELD PROCEDURES

Prior to data collection, a 5-foot by 5-foot grid was created parallel and perpendicular to the building located at the northern boundary of the survey area. A survey chain with 5-foot markers was used to establish the survey lines and stations, and survey paint was used to mark the locations of each survey station on the ground. The survey was completed with no interference from vehicle traffic. It should be noted that no EM-61 or GPR data were collected outside of the blue dashed boundary labeled "Area of Subsurface Investigation" in Figure 1.

EM-61 data acquisition (archive photo)

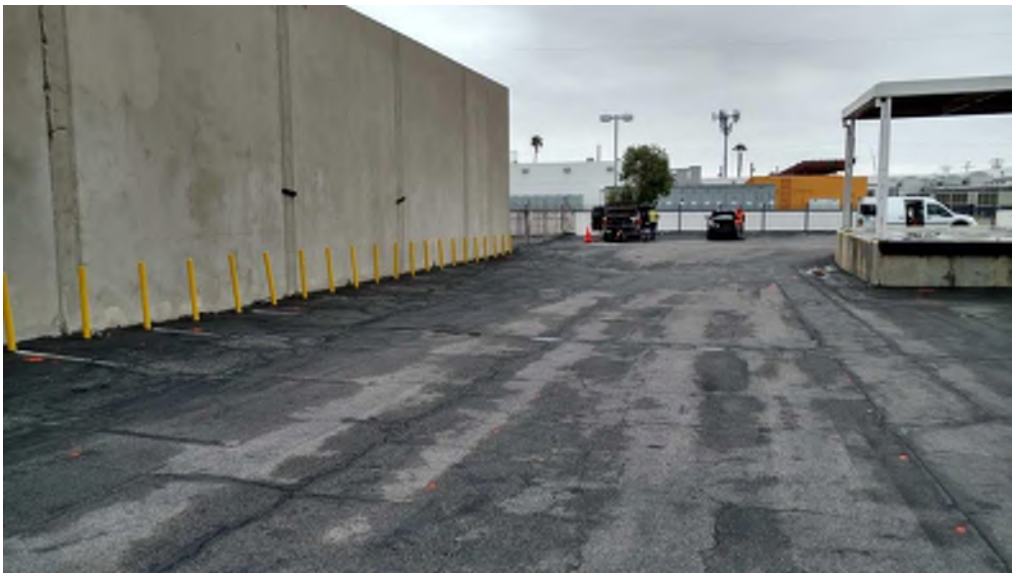
3.1 EM-61 High Sensitivity Metal Detector

The EM-61 high-sensitivity metal detector was used in an effort to delineate areas where metallic objects (such as underground storage tanks and metal piping) may be buried. The EM-61 transmitter generates short pulses of a primary magnetic field that induces electromagnetic currents in nearby metallic objects. Between pulses, the two receiver coils measure the decay of these electromagnetic currents in millivolts (mV). The measured values are proportional to the metal content (ferrous and non-ferrous) of the nearby objects

Prior to data acquisition the EM-61 battery level was checked and found to be within an acceptible range for data collection. After the EM-61 had a few minutes to warm up, the unit was nulled in a location with more than four meters of separation between the coils and any known metallic objects. A cable-shake test was performed to assure the cables were in good working condition and the connectors were fastened properly. Finally a static test was run in which a series of EM-61 readings were taken with no metal followed by a series of readings with a ½-inch bolt on the ground in the center of the EM-61 coils. The EM-61 was found to be working as expected.

During this investigation EM-61 readings were collected at 2.5-foot intervals along parallel west-east lines spaced 5 feet apart within the area of investigation. These data were processed in the field and used to generate contour maps to assist in identifying anomalous areas that may be caused by buried utilities or features of interest.

Top and bottom coil data can be useful for identifying near-surface metallic objects; although, the top coil generally has a greater response than the bottom coil to deeply buried objects. The differential data (top coil data minus the bottom coil data) was used during this survey to distinguish deeper targets such as metallic USTs from shallow ones such as a vault lid or scrap metal. Utilization of the differential data allows for the suppression of near surface targets that might mask the response from deeper targets of interest.



3.2 Electromagnetic (EM) Utility Location

Passive and active EM utility-locating methods were used in an effort to identify possible sources of EM-61 anomalies and to identify buried objects having no surface expression.

Electromagnetic (EM) utility location (archive photo)

Passive locating is possible when electrically conductive conduits are energized by ambient radio frequencies (RF) that are often produced by 50/60 cycle electrical, radio, audio, television, and communication transmissions. A receiver tuned to these frequencies can be used to locate the re-radiated signal emitted by the conductor (i.e., conduit).

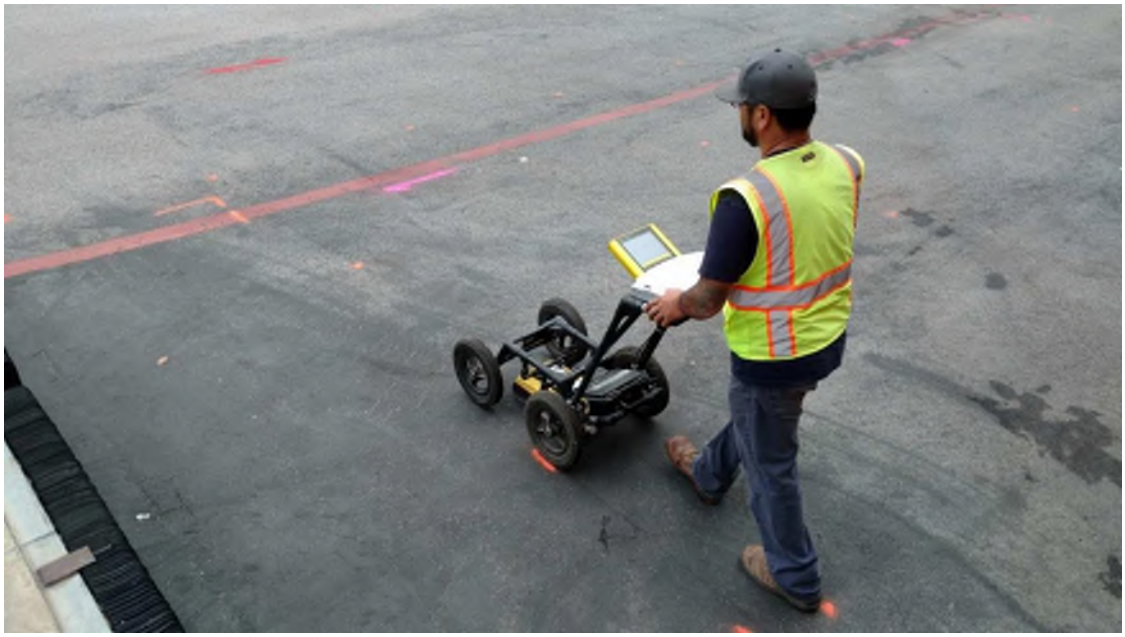
Active locating is initiated by conducting an EM signal at a known frequency (8 and 33 kHz for this site) on a conduit exposed at the surface. A receiver, tuned to these frequencies, is then used to locate the signal maxima (or surface trace) of the applied signal.

3.3 Ground Penetrating Radar

Ground penetrating radar (GPR) data were collected on east – west lines spaced 2.5 feet apart within the survey grid established by the geophysics crew. The purpose of the GPR survey was to locate anomalies from non-metallic sources like backfilled excavations or concrete clarifiers and better characterize EM-61 anomalies. During GPR data acquisition, an antenna containing both a transmitter and a receiver is pushed along the ground surface. The transmitter radiates short pulses of high-frequency (center frequency of 500-MHz)

electromagnetic energy into the ground. These electromagnetic waves propagate into the subsurface at a velocity that is dependent on the electrical properties of the material through which the waves travel. When the GPR waves encounter an interface of two materials having different electrical properties, a portion of the energy is reflected back to the surface and received at the antenna at a time (in nanoseconds) that is related to the depth of the reflecting interface, where later times generally represent greater depths of investigation. The contrast in velocity between the media either side of the interface can be quantified by a reflection coefficient at the media boundary, where a larger reflection coefficient (larger electrical contrast in materials) corresponds to a higher amplitude reflection.

The reflected signal is received at the antenna, transmitted to a control unit (the Smart Cart) and displayed on the computer screen as the data are being acquired. The data may be stored electronically, and subsequently processed with various software packages.



4.0 RESULTS

A map of the area of geophysical investigation is presented in Figure 1. A contour map of the EM-61 Differential Data is presented in Figure 2 and sample GPR profiles are displayed in Figure 3.

4.1 EM-61

The high-amplitude EM-61 anomalies on the north and south perimeter of the survey area are the result of surface metal like the building walls and bollards. There are two linear anomalies identified in the EM-61 data produced from metallic piping running east to west along 55N and a south to north trending railroad track centered from 162E to 1723E. These features were relocated with the utility locators or GPR and plotted on the site map. There are a few isolated EM-61 anomalies from surface metal like sewer clean-outs, a man-hole cover and electric vault cover.

4.2 GPR

Most of the shallow metallic objects such as underground piping and rail road tracks were relocated during the GPR survey. One GPR anomaly with no corresponding EM-61 anomaly was identified. Anomaly A is broad GPR anomaly located from 50E to 150E, between 77N and 88N. This GPR anomaly is characterized by relatively high-amplitude reflectors in the soil compared to the GPR signal in the surrounding soil. There is no corresponding EM-61 anomaly within the bounds of Anomaly A which indicates that the source of the high-amplitude GPR reflectors is not associated with buried metal, but rather a slight change in the electrical conductivity of the soil. A possible source of this GPR anomaly is backfill material which slightly amplifies the GPR signal relative to the adjacent soils.

5.0 LIMITATIONS

Reliable EM-61 data cannot be collected within 8 feet of surface metallic objects such as reinforced concrete pads, vault lids and/or manholes, buildings and parked vehicles. As a result, Spectrum cannot guarantee that a UST is not present beneath these features.

The penetration depth of the GPR signal was approximately 3 feet in the area investigated. As a consequence, some subsurface utilities may not have been detected, and USTs present at depths greater than 3 feet in the areas adjacent to surface metal may not have been detected due to the shallow penetration of the GPR. Because of this limitation, Spectrum cannot guarantee that all non-metallic conduits, such as sewers and PVC water lines, have been identified within the area of investigation. A discussion of the limitations of each method follows.

5.1 EM-61

The EM-61 is capable of detecting a 55-gallon drum up to a depth of 3 meters under favorable conditions. We recommended a minimum 10-foot buffer between the survey area and any metallic or metal bearing surface cultural features such as buildings, fences, parked vehicles

or aboveground piping which could severely compromise the quality of the data. Reliable EM-61 data cannot be collected over areas covered with reinforced concrete.

5.2 GPR

The performance capability of GPR is dependent on the electrical conductivity of the soil at the site. If the soil conductivity is high, attenuation of the radar signal in the soil can severely restrict the maximum penetration depth of the radar signal. Under favorable conditions depth of penetration can be greater than 10 feet; however, average depths of GPR penetration in the West and Southwest tend to range between 2-5 feet.

5.3 General

It should be understood that the detection of subsurface objects and utilities is dependent upon acquiring reliable measured values of magnetic fields or electro-magnetic waves with geophysical instruments above ground. These data may be interpreted as representative of subsurface objects due to the measured signal strength. These waves or fields, however, may be attenuated and/or distorted by a number of factors including soil moisture, corrosion, and proximity to other surface and subsurface facilities.

SOIL VAPOR SAMPLE ANALYTICAL REPORT

Mobile Geochemistry Inc.

23 March 2016

Ms. Rebekah Wale
Ramboll Environ
18100 Von Karman Ave, Suite 600
Irvine, CA 92612

H&P Project: RAM031916-L6
Client Project: 04-16856Q /700 N. Sepulveda Blvd

Dear Ms. Rebekah Wale:

Enclosed is the analytical report for the above referenced project. The data herein applies to samples as received by H&P Mobile Geochemistry, Inc. on 19-Mar-16 which were analyzed in accordance with the attached Chain of Custody record(s).

The results for all sample analyses and required QA/QC analyses are presented in the following sections and summarized in the documents:

- Sample Summary
- Case Narrative (if applicable)
- Sample Results
- Quality Control Summary
- Notes and Definitions / Appendix
- Chain of Custody
- Sampling Logs (if applicable)

Unless otherwise noted, I certify that all analyses were performed and reviewed in compliance with our Quality Systems Manual and Standard Operating Procedures. This report shall not be reproduced, except in full, without the written approval of H&P Mobile Geochemistry, Inc.

We at H&P Mobile Geochemistry, Inc. sincerely appreciate the opportunity to provide analytical services to you on this project. If you have any questions or concerns regarding this analytical report, please contact me at your convenience at 760-804-9678.

Sincerely,

Janis Villarreal

SB-3-10.5	E603081-07	Vapor	19-Mar-16	19-Mar-16
SB-4-12	E603081-08	Vapor	19-Mar-16	19-Mar-16

The percent recoveries for Dichlorodifluoromethane and Chloromethane fell below the method criteria in the continuing calibration verification. Any results for these analytes may be biased low.

Appendix

H&P Mobile Geochemistry, Inc. is approved as an Environmental Testing Laboratory and Mobile Laboratory in accordance with the DoD-ELAP and the ISO 17025 programs, certification number L11-175.

H&P is approved by the State of Arizona as an Environmental Testing Laboratory and Mobile Laboratory, certification numbers AZM758 and AZ0779.

H&P is approved by the State of California as an Environmental Laboratory and Mobile Laboratory in conformance with the Environmental Laboratory Accreditation Program (ELAP) for the category of Volatile and Semi-Volatile Organic Chemistry of Hazardous Waste, certification numbers 2740, 2741, 2743, 2744, 2745, 2754 & 2930.

H&P is approved by the State of Florida Department of Health under the National Environmental Laboratory Accreditation Conference (NELAC) certification number E871100.

The complete list of stationary and mobile laboratory certifications along with the fields of testing (FOTs) and analyte lists are available at www.handpmg.com/about/certifications.

Narrative

Job Narrative
440-142056-1

Comments
No additional comments.

Receipt
The samples were received on 3/19/2016 1:50 PM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 1.7º C.

Receipt Exceptions
Method(s) 8260B: All the EPA 5035A Terracore water-preserved vials for the following sample froze and cracked during storage: SB-2-10 (440-142056-5). The EPA prep 5030B test method had to be used for this sample.

GC/MS VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC VOA
Method(s) 8015B: Surrogate recovery for the following sample was outside control limits: (440-142363-A-3). Re-extraction and/or re-analysis was performed with concurring results. The original analysis has been reported.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Organic Prep
Method(s) 3546 / 8015B: The following sample had smaller initial amount used due to the nature of the sample matrix: SB-6-11 (440-142056-14). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Job ID: 440-142062-1

Laboratory: TestAmerica Irvine

Narrative

Job Narrative
440-142062-1

Comments
No additional comments.

Receipt
The samples were received on 3/21/2016 9:05 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 4.6º C.

GC/MS VOA
Method(s) 8260B: The continuing calibration verification (CCV) associated with batch 440-319492 recovered above the upper control limit

Job ID: 440-142062-1 (Continued)

Laboratory: TestAmerica Irvine (Continued)

for Ethyl-t-butyl ether (ETBE). The samples associated with this CCV were non-detects for the affected analytes; therefore, the data have been reported. The following sample is impacted: SB-4-13 (440-142062-2).

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

GC VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

GC Semi VOA
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Metals
Method(s) 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries and/or precision of Antimony and Silver for preparation batch 440-319531 were outside control limits. Sample matrix interference and/or non-homogeneity are suspected because the associated laboratory control sample (LCS) was within acceptance limits.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Organic Prep
Method(s) 3546 / 8015B: The following samples had smaller initial amounts used due to the nature of the sample matrix: SB-4-11 (440-142062-1) and SB-4-13 (440-142062-2). Elevated reporting limits (RLs) are provided.

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

VOA Prep
No analytical or quality issues were noted, other than those described in the Definitions/Glossary page.

Client: Ramboll Environ US Corporation

Qualifiers

Metals

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.
F1	MS and/or MSD Recovery is outside acceptance limits.
F2	MS/MSD RPD exceeds control limits

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
¤	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

To: Mata, Patty
Subject: Samples taken off hold for 700 N. Sepulveda Blvd. Project, El Segundo

Hi Patty,

For the 700 N. Sepulveda, El Segundo, project, please take the second shallowest sample from each boring location off of hold and run for all analyses listed. Thus, please take SB-1-10; SB-2-10; SB-3-10; SB-4-13; SB-5-10; and SB-6-11 off of hold and run for all analyses listed.

Also, please do not charge us for the disposable plastic terracore samplers I received with the rest of the sampling supplies, I did not order these items and understand that they were included in my supplies deliver by mistake.

Thanks,

Patrick Holland-Stergar

QUALIFICATIONS

Education:

BS Physics, University of California, Irvine
BA Business Administration, University of California, Irvine

Training/Licenses/Registrations:

Radon Measurement Specialist, National Radon Safety Board # NRSB 12SS030
Asbestos Building Inspector (AHERA)

Summary of Professional Experience:

Mr. McNeil has performed due diligence services on all commercial property types including but not limited to, multi-family, multi-tenant, single-tenant, retail shopping centers, industrial facilities, gasoline servicing stations, nursing/assisted living facilities and mobile home parks. He has performed thousands of Phase I Environmental Site Assessments (ESAs), Property Condition Assessments (PCAs), and Physical Needs Assessments (PNAs) in accordance with Fannie Mae, Freddie Mac, and HUD guidelines on multi-family housing, and in accordance with client specific scopes of work for all other commercial property types.

Select project experience for Mr. McNeil includes:

- Freddie Mac scope combination ESA/PCA, 140-unit multi-family, San Bernardino County, California
- Freddie Mac Small Balance Loan report, 66 Unit multi-family, Kern County, California
- Combination ESA/PCA, 585,147 square foot office complex, Orange County, California
- ESA, industrial facility, steel fabrication and machine shop, Los Angeles County, California
- ESA, 171,330 square foot research and development laboratory, Orange County, California
- ESA, 420-unit multifamily property, San Bernardino County, California
- PCA, 125,333 square foot retail shopping center, Los Angeles County, California
- PCA, 78,388 square foot medical office building, Los Angeles County, California
- PCA, 7,320 square foot office building, Honolulu, Hawaii

Mr. McNeil has over 35 years' experience in hazardous materials handling, storage, and transportation; over 30 years' experience in construction, remodeling, and renovation of residential and non-residential use properties; and over 20 years' experience in direct report preparation of commercial due diligence reports.

Victor T. DeTroy – National Client Manager, Due Diligence Services

B.A. - Earth and Environmental Science, Columbia University, Cum Laude

Registered Environmental Property Assessor (REPA) #2061012266170822
OSHA 40-Hour Hazardous Waste Operations
Emergency Response (HAZWOPER) Training
EPA AHERA 24-hour Asbestos Building Inspector

Mr. DeTroy has worked the environmental service industry since 2007 and provides project management to ensure compliance and satisfaction of client requirements for Phase I Environmental Site Assessments, Transaction Screens, limited due diligence assessments, Phase II and Phase III subsurface investigations, and quarterly groundwater monitoring events. He has successfully completed assessments on a variety of residential, commercial, and complex industrial sites. Mr. DeTroy is accustomed to all aspects of Due Diligence Property Assessments and the needs and requirements of a variety of reporting standards, including ASTM, EPA's All Appropriate Inquiry (AAI), Freddie Mac, Fannie Mae, HUD, and customized client formats.

Project experience for Mr. DeTroy includes:

- Phase I Environmental Site Assessments
- Telecommunication Phase I Environmental Site Assessments
- Environmental Transaction Screens
- Environmental Transaction Analyses
- Limited Environmental Site Assessments
- Regulatory Database Reviews
- Historical Records Reviews
- Project Coordination and Setup
- Due Diligence Portfolio Management
- The design and implementation of Phase II soil and groundwater investigations and Phase III subsurface characterizations for a variety of suspected contaminants for due diligence and liability purposes

Subsurface investigations have included extensive soil and groundwater testing, identification of petroleum hydrocarbons and volatile organic compounds contamination in near surface soils, and contaminant plume delineation in soil vapor, soil, and groundwater. Mr. DeTroy's management and technical experience has allowed AEI's projects to be performed in a cost effective and timely manner to the satisfaction of AEI's clients and regulatory agencies.

Engineering and Science, Inc.

November 26, 2019

Crescit Mortgage Capital LLC
Adam Kies
601 Lexington Avenue, 20th Floor
New York, New York 10022

Subject: Phase I Environmental Site Assessment
Commercial Site
650 and 700 North Sepulveda Boulevard
El Segundo, California 92045
Partner Project No. 19-261985.1

Dear Mr. Kies:

Partner Engineering and Science, Inc. (Partner) is pleased to provide the results of the *Phase I Environmental Site Assessment* (Phase I ESA) report of the abovementioned address (the "subject property"). This assessment was performed in conformance with the scope and limitations as detailed in the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process.

This assessment included a site reconnaissance as well as research and interviews with representatives of the public, property ownership, site manager, and regulatory agencies. An assessment was made, conclusions stated, and recommendations outlined.

We appreciate the opportunity to provide environmental services to you. If you have any questions concerning this report, or if we can assist you in any other matter, please contact me at (310) 615-4500.

Sincerely,

Joseph P. Derhake, PE
Chief Executive Officer

EXECUTIVE SUMMARY

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in accordance with the scope of work and limitations of ASTM Standard Practice E1527-13, the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) and set forth by Crescit Mortgage Capital LLC for the property located at 650 and 700 North Sepulveda Boulevard in El Segundo, Los Angeles County, California (the "subject property"). The Phase I Environmental Site Assessment is designed to provide Crescit Mortgage Capital LLC with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the subject property.

Property Description

The subject property is located on the east side of North Sepulveda Boulevard and the south side of East Maple Street within a mixed commercial, retail, industrial and residential area of Los Angeles County. Please refer to the table below for further description of the subject property:

Subject Property Data	
Address(es):	650 and 700 North Sepulveda Boulevard, El Segundo, California (650 and 700)
Historical Address:	700 North Sepulveda Boulevard – previously 690 North Sepulveda Boulevard
Property Use:	Office
Land Acreage (Ac):	5.81 Ac
Number of Buildings:	2
Number of Floors:	700 North Sepulveda Boulevard: 1 and 2; 650 North Sepulveda Boulevard: 8-story and a penthouse
Gross Building Area (SF):	Building 650: 100,349sf; Building 700: 113,900sf
Net Rentable Area (SF):	Building 650: 100,349sf; Building 700: 113,900sf
Date of Construction:	1962 (Building 650); 1957, 1962 (Building 700)
Assessor's Parcel Number (APN):	4138-006-031 (650 North Sepulveda Boulevard); 4138-006-005 (700 North Sepulveda Boulevard)
Type of Construction:	650 - CMU and Steel-Framed; 700 Brick and Wood-Framed
Current Tenants:	Boeing
Site Assessment Performed By:	Dan Frizzell of Partner
Site Assessment Conducted On:	November 14, 2019

The subject property is currently occupied by Boeing for commercial use. Onsite operations consist of typical office activities and building maintenance. In addition to the current structure, the subject property is also improved with asphalt-paved parking areas, associated landscaping, and drainage features.

According to available historical sources, the subject property was formerly undeveloped as early as 1896 until 1927; developed with agricultural land between 1928 and circa 1938; became unimproved land from 1947 until at least 1953, and subsequently developed with the current structures in 1957 (700 North Sepulveda Boulevard) and 1962 (650 North Sepulveda Boulevard). Notable tenants at 650 North Sepulveda Boulevard have included Aerospace Center (1962-1966); Computer Science Corporation (CSC)

(1969-1976); Howard Hughes/Hughes Corporation/Hughes Aircraft Company (1984-1999), and The Boeing Company (2008-Present). Tenants at 700 North Sepulveda Boulevard have included Pharmaceutical Co. (1958); The Rabin Company/Pharmapak Drug Company (1960); Rabin Winters Corporation (1962-1967); Rabin Winters Division of Brunswig Drug/Bergan Brunswick (1966-1974); BBC Laboratories, Norton Products/Tannehill Pharmaceuticals (1971); Devlin Pharmaceuticals Inc. (1974-1981); Hughes Aircraft Company (1982-1999) and The Boeing Company (2008-Present).

The immediately surrounding properties consist of a Chic-fil-A restaurant under construction, eSalon (hair and nails) to the north; a multi-tenant strip mall and commercial building to the south; commercial buildings to the east; and a vacant commercial property, East Palm Avenue, IHOP and Carl's Jr. restaurant to the west across North Sepulveda Boulevard.

According to the Los Angeles Department of Public Works (LADPW) online website and topographic map review, the depth and direction of groundwater in the vicinity of the subject property is inferred to be approximately 97.9 feet below ground surface (bgs) and flow toward the southwest.

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- According to Partner's 2015 Phase I ESA, eight 1,000-gallon underground storage tanks (USTs) were located on the subject property (700 North Sepulveda portion) from 1958 until 1985. The USTs were of concrete construction, and reportedly contained gasoline, sulfides, organic acids, copper, zinc, mineral oils, alcohols, and solvents. No information pertaining to the exact location or status of the tanks was found during Partner's assessment.

  Partner also reported that the subject property was equipped with a concrete clarifier between 1966 and 1985. The exact location of the clarifier has not been identified but the clarifier was reportedly abandoned with the regulatory oversight of the Los Angeles County Department of Public Works (LACDPW). Documentation pertaining to subsurface conditions surrounding the clarifier at the time of closure was not found during Partner's assessment.

  Based on the findings of Partner's 2015 report, a Phase II subsurface investigation was conducted in May 2016 to address potential hazardous substance impacts from the former USTs and clarifier. Analytical results revealed low concentrations of constituents of concern (petroleum hydrocarbons, volatile organic compounds, metals) in soil and soil vapor. The concentrations detected were well below the residential screening levels, the most restrictive applicable screening levels. Based on the analytical results, the presence of the former USTs and clarifier do not represent a significant environmental concern.

- Due to the age of the subject property buildings, there is a potential that ACM and/or LBP are present. Suspect ACMs were observed in good condition and do not pose a health and safety concern to the occupants of the subject property at this time, with the exception of limited areas of water-damaged ceiling tiles observed during the assessment. Partner observed damaged/peeling paint on all exterior elevations and in areas throughout the interior corridors of the 650 building.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 650 and 700 North Sepulveda Boulevard in El Segundo, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property; however, environmental issues were identified. Based on the conclusions of this assessment, Partner recommends the following:

- An Operations and Maintenance (O&M) Program should be implemented in order to safely manage the suspect ACMs and LBP located at the subject property.

1.0 INTRODUCTION

Partner Engineering and Science, Inc. (Partner) has performed a Phase I Environmental Site Assessment (ESA) in conformance with the scope and limitations of ASTM Standard Practice E1527-13 and the Environmental Protection Agency Standards and Practices for All Appropriate Inquiries (AAI) (40 CFR Part 312) for the property located at 650 and 700 North Sepulveda Boulevard in El Segundo, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this scope of work are described in the report.

1.1 Purpose

The purpose of this ESA is to identify existing or potential Recognized Environmental Conditions (as defined by ASTM Standard E1527-13) affecting the subject property that: 1) constitute or result in a material violation or a potential material violation of any applicable environmental law; 2) impose any material constraints on the operation of the subject property or require a material change in the use thereof; 3) require clean-up, remedial action or other response with respect to Hazardous Substances or Petroleum Products on or affecting the subject property under any applicable environmental law; 4) may affect the value of the subject property; and 5) may require specific actions to be performed with regard to such conditions and circumstances. The information contained in the ESA Report will be used by Client to: 1) evaluate its legal and financial liabilities for transactions related to foreclosure, purchase, sale, loan origination, loan workout or seller financing; 2) evaluate the subject property's overall development potential, the associated market value and the impact of applicable laws that restrict financial and other types of assistance for the future development of the subject property; and/or 3) determine whether specific actions are required to be performed prior to the foreclosure, purchase, sale, loan origination, loan workout or seller financing of the subject property.

This ESA was performed to permit the *User* to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) liability (hereinafter, the "*landowner liability protections*," or "*LLPs*"). ASTM Standard E1527-13 constitutes "*all appropriate inquiry* into the previous ownership and uses of the *property* consistent with good commercial or customary practice" as defined at 42 U.S.C. §9601(35)(B).

1.2 Scope of Work

The scope of work for this ESA is in accordance with the requirements of ASTM Standard E1527-13. This assessment included: 1) a property and adjacent site reconnaissance; 2) interviews with key personnel; 3) a review of historical sources; 4) a review of regulatory agency records; and 5) a review of a regulatory database report provided by a third-party vendor. Partner contacted local agencies, such as environmental health departments, fire departments and building departments in order to determine any current and/or former hazardous substances usage, storage and/or releases of hazardous substances on the subject property. Additionally, Partner researched information on the presence of activity and use limitations (AULs) at these agencies. As defined by ASTM E1527-13, AULs are the legal or physical restrictions or limitations on the use of, or access to, a site or facility: 1) to reduce or eliminate potential exposure to hazardous substances or petroleum products in the soil or groundwater on the subject

property; or 2) to prevent activities that could interfere with the effectiveness of a response action, in order to ensure maintenance of a condition of no significant risk to public health or the environment. These legal or physical restrictions, which may include institutional and/or engineering controls (IC/ECs), are intended to prevent adverse impacts to individuals or populations that may be exposed to hazardous substances and petroleum products in the soil or groundwater on the property.

If requested by Client, this report may also include the identification, discussion of, and/or limited sampling of asbestos-containing materials (ACMs), lead-based paint (LBP), mold, and/or radon.

1.3 Limitations

Partner warrants that the findings and conclusions contained herein were accomplished in accordance with the methodologies set forth in the Scope of Work. These methodologies are described as representing good commercial and customary practice for conducting an ESA of a property for the purpose of identifying recognized environmental conditions. There is a possibility that even with the proper application of these methodologies there may exist on the subject property conditions that could not be identified within the scope of the assessment or which were not reasonably identifiable from the available information. Partner believes that the information obtained from the record review and the interviews concerning the subject property is reliable. However, Partner cannot and does not warrant or guarantee that the information provided by these other sources is accurate or complete. The conclusions and findings set forth in this report are strictly limited in time and scope to the date of the evaluations. The conclusions presented in the report are based solely on the services described therein, and not on scientific tasks or procedures beyond the scope of agreed-upon services or the time and budgeting restraints imposed by the Client. No other warranties are implied or expressed.

Some of the information provided in this report is based upon personal interviews, and research of available documents, records, and maps held by the appropriate government and private agencies. This report is subject to the limitations of historical documentation, availability, and accuracy of pertinent records, and the personal recollections of those persons contacted.

This practice does not address requirements of any state or local laws or of any federal laws other than the all appropriate inquiry provisions of the LLPs. Further, this report does not intend to address all of the safety concerns, if any, associated with the subject property.

Environmental concerns, which are beyond the scope of a Phase I ESA as defined by ASTM include the following: ACMs, LBP, radon, and lead in drinking water. These issues may affect environmental risk at the subject property and may warrant discussion and/or assessment; however, are considered non-scope issues. If specifically requested by the Client, these non-scope issues are discussed in Section 6.3.

1.4 User Reliance

This report is for the use and benefit of, and may be relied upon by the client, Crescit Mortgage Capital LLC its employees, agents, successors and assigns, and is intended only for the use specified below. A copy of the report may be provided to, and may be relied upon by, the Client and other persons designated by the Client and its successors and assigns, which persons shall consist of any prospective or existing participating lender(s) and their successors and assigns in connection with any syndication of a loan transaction (which, for the avoidance of doubt, shall include any confidential information

memorandum, bank book or other syndication or marketing materials provided to a prospective or existing participating lender in connection with the subject transaction provided any reference to the appraisal is not inaccurate or misleading) in which the Client participates or leads, as agent.

1.5 Limiting Conditions

The findings and conclusions contain all of the limitations inherent in these methodologies that are referred to in ASTM E1527-13.

Specific limitations and exceptions to this ESA are more specifically set forth below:

- Interviews with past or current owners, operators and occupants were not reasonably ascertainable and thus constitute a data gap. Based on information obtained from other historical sources (as discussed in Section 3.0), this data gap is not expected to alter the findings of this assessment.
- Partner was unable to determine the property use at 5-year intervals, which constitutes a data gap. Except for property tax files and recorded land title records, which were not considered to be sufficiently useful, Partner reviewed all standard historical sources and conducted appropriate interviews.
- Information relative to deed restrictions and environmental liens, a title search, and completion of a pre-survey questionnaire from the Report User was not provided at the time of the assessment.
- Due to the high level of security enforced by the current tenant of the subject property, Partner was not permitted to take photographs onsite or within the subject property building; however, Partner's observations were not limited during this assessment.
- Partner submitted Freedom of Information Act (FOIA) requests to the El Segundo Building Department (ESBD) for information pertaining to hazardous substances, underground storage tanks, releases, inspection records, etc. for the subject property and/or adjacent properties. As of this writing, this agency has not responded to Partner's request. Based on information obtained from other historical sources, this limitation is not expected to alter the overall findings of this assessment.
- Partner observed approximately 10% of all interior units and all common areas. Based on the size and nature of use of the unobserved units (office), this limited method of survey is not expected to alter the overall findings of this assessment.

Due to time constraints associated with this report, the Client has requested the report despite the above-listed limitations.

2.0 SITE DESCRIPTION

2.1 Site Location and Legal Description

The subject property at 650 North Sepulveda Boulevard in El Segundo, California is located on the east side of North Sepulveda Boulevard, south of 700 North Sepulveda between East Maple Avenue and East Mariposa Avenue. According to the Los Angeles County Assessor and online research, the subject property is legally described as "TR=SUB OF PART OF THE SAUSAL REDONDO RANCHO*LOT COM N 0 00'20" W 398.09 FT AND S 89 58"02" E 25.08 FT FROM SW COR OF NW 1/4 OF SEC 7 T 3S R 14W TH S 89¢," and ownership has been vested in Rabin Charlotte C; Rabin Trusts Partnership since 2014.

The subject property at 700 North Sepulveda Boulevard in El Segundo, California is located on the east side of North Sepulveda Boulevard, south of East Maple Street. According to the Los Angeles County Assessor and online research, the subject property is legally described as "SUB OF PART OF THE SAUSAL REDONDO RANCHO*LOT COM N 0 00'20" W 636.17 FT AND N 89 59"20" E 25.07 FT FROM SW COR OF NW 1/4 OF SEC 7 T 3S," and ownership has been vested in Rabin Charlotte C; Rabin Trusts Partnership since 2014.

Please refer to Figure 1: Site Location Map, Figure 2: Site Plan, Figure 3: Topographic Map, and Appendix A: Site Photographs for the location and site characteristics of the subject property.

2.2 Current Property Use

The subject property is currently occupied by Boeing for commercial use. Onsite operations consist of typical office activities and building maintenance. The subject property is developed with an eight-story office building (650 North Sepulveda Boulevard) on the southwestern portion and a single structure with areas of one and two stories (700 North Sepulveda Boulevard) located on the northern portion of the property. In addition to the current structure, the subject property is also improved with asphalt-paved parking areas, associated landscaping, and drainage features.

The subject property is designated for corporate office development by the City of El Segundo.

The subject property is identified as a SEMS-ARCHIVE, ICIS, Resource Conservation and Recovery Act (RCRA) Large Quantity Generator (LQG), Envirostor, AST, Facility Index System/Facility Registry System (FINDS), ECHO, CERS Haz Waste, CERS Tanks, and Facility and Manifest Data (HAZNET) site in the regulatory database report, as further discussed in Section 4.2.

2.3 Current Use of Adjacent Properties

The subject property is located within a mixed commercial, retail, industrial and residential area of Los Angeles County. During the vicinity reconnaissance, Partner observed the following land use on properties in the immediate vicinity of the subject property.

Immediately Surrounding Properties

North: Chick-fil-A under construction (740 North Sepulveda Boulevard); eSalon (1910 East Maple Avenue)

South: Multi-tenant strip mall (600-630 North Sepulveda Boulevard) and commercial building (1921 Mariposa Avenue)

East: Vanderlande (607 Lairport Street); Equinox (1920 East Maple Avenue)

Immediately Surrounding Properties

West: Sepulveda Boulevard beyond which is Carl's Jr (639 North Sepulveda Boulevard); Vacant commercial building (707 North Sepulveda Boulevard); IHOP (755 North Sepulveda Boulevard)

Several adjacent properties were identified in the regulatory database report of Section 4.2.

2.4 Physical Setting Sources

2.4.1 Topography

The United States Geological Survey (USGS) Venice, California Quadrangle 7.5-minute series topographic map was reviewed for this ESA. According to the contour lines on the topographic map, the subject property is located at approximately 117 feet above mean sea level (MSL). The contour lines in the area of the subject property indicate the area is sloping gently toward the east. The subject property is depicted on the 2012 map as undeveloped.

A copy of the most recent topographic map is included as Figure 3 of this report.

2.4.2 Hydrology

According to topographic map interpretation, the direction of groundwater in the vicinity of the subject property is inferred to flow toward the southwest. The nearest surface water in the vicinity of the subject property is the Pacific Ocean located approximately two miles west of the subject property. No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the subject property during this assessment. According to available information, a public water system operated by the El Segundo Water Division serves the subject property vicinity. The sources of public water for the City of El Segundo are surface water from the Colorado River and northern California (State Water Project). According to a nearby Los Angeles Department of Public Works (LADPW) well (#1308G), the depth of groundwater in the vicinity of the subject property is inferred to be approximately 97.9 feet below ground surface (bgs).

2.4.3 Geology/Soils

The subject property is situated within the Transverse Ranges Physiographic Province of the State of California. The Transverse Ranges are an east-west trending series of steep mountain ranges and valleys. The east-west structure of the Transverse Ranges is oblique to the normal northwest trend of coastal California, hence the name "Transverse." The province extends offshore to include San Miguel, Santa Rosa, and Santa Cruz islands. Its eastern extension, the San Bernardino Mountains, has been displaced to the south along the San Andreas Fault. Intense north-south compression is squeezing the Transverse Ranges. As a result, this is one of the most rapidly rising regions on earth. Great thicknesses of Cenozoic petroleum-rich sedimentary rocks have been folded and faulted, making this one of the important oil producing areas in the United States. Based on information obtained from the USDA Natural Resources Conservation Service Web Soil Survey online database, the subject property is not mapped. Therefore soils information is unavailable for the subject property.

2.4.4 Flood Zone Information

Partner performed a review of the Flood Insurance Rate Map, published by the Federal Emergency Management Agency. According to Community Panel Number 06037C1770F, dated September 26, 2008

the subject property appears to be located in Zone X, an area located outside of the 100-year and 500year flood plains.

A copy of the reviewed flood map is not included in Appendix B of this report.

3.0 HISTORICAL INFORMATION

Partner obtained historical use information about the subject property from a variety of sources. A chronological listing of the historical data found is summarized in the table below:

Historical Use Information		
Period/Date	**Source**	**Description/Use**
1896-1927	Topographic Maps	Undeveloped/Native land
1928-1938	Aerial Photographs, Topographic Maps	Agricultural
1947-1953	Aerial Photographs	Unimproved land
1957-1981	Aerial Photographs, City Directories, Topographic Maps, Assessor Records, Regulatory Agency Records	700 North Sepulveda - Light-Industrial (manufacturer of pharmaceuticals)
1962-Present	Aerial Photographs, City Directories, Topographic Maps, Agency Records, Interviews, Onsite Observations	650 North Sepulveda - Commercial – Offices/Aerospace
1982-Present	Aerial Photographs, City Directories, Topographic Maps, Agency Records, Interviews, Onsite Observations	700 North Sepulveda - Commercial – Offices/Aerospace

Notable tenants at 650 North Sepulveda Boulevard have included Aerospace Center (1962-1966); Computer Science Corporation (CSC) (1969-1976); Howard Hughes/Hughes Corporation/Hughes Aircraft Company (1984-1999), and The Boeing Company (2008-Present). Tenants at 700 North Sepulveda Boulevard have included Pharmaceutical Co. (1958); The Rabin Company/Pharmapak Drug Company (1960); Rabin Winters Corporation (1962-1967); Rabin Winters Division of Brunswig Drug/Bergan Brunswick (1966-1974); BBC Laboratories, Norton Products/Tannehill Pharmaceuticals (1971); Devlin Pharmaceuticals Inc. (1974-1981); Hughes Aircraft Company (1982-1999) and The Boeing Company (2008-Present).

Environmental concerns identified in association with the former use of the subject property are discussed in Section 5.2.6.

3.1 Aerial Photograph Review

Partner obtained available aerial photographs of the subject property and surrounding area from Environmental Data Resources (EDR). The following observations were noted to be visible on the subject property and adjacent properties during the aerial photograph review:

Date:	***1923, 1928***	***Scale:***	***1"=500'***
Subject Property:	Appears to be agricultural land		
North:	Appears to be agricultural land		
South:	Appears to be agricultural land		
East:	Appears to be agricultural land		
West:	Appears to be agricultural land and farm-like structures across North Sepulveda Boulevard		

Date:	***1938***	***Scale:***	***1"=500'***
Subject Property:	Appears to be fallow land and developed with trees on the western perimeter		
North:	Appears to be fallow land		

Date: 1938		***Scale: 1"=500'***
South:	Appears to be fallow land	
East:	Appears to be fallow land	
West:	Appears to be agricultural land and several farm-like structures across North Sepulveda Boulevard	

Date: 1947		***Scale: 1"=500'***
Subject Property:	Appears to be unimproved land with the exception of the western perimeter of the subject property, which appears to be developed with trees	
North:	Appears to be unimproved land	
South:	Appears to be unimproved land	
East:	Appears to be unimproved land	
West:	Appears to be developed with several commercial structures and a road across Sepulveda Boulevard	

Date: 1953		***Scale: 1"=500'***
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	
East:	No significant changes visible	
West:	No significant changes visible	

Date: 1963		***Scale: 1"=500'***
Subject Property:	Appears to be developed with a commercial structure on the north side and a multi-story commercial office building at the south westernmost portion. The remainder of the property appears to be paved for parking	
North:	Appears to be developed with commercial/industrial structures	
South:	Appears to be developed with commercial structures	
East:	Appears to be developed with parking areas and commercial/industrial structures	
West:	North Sepulveda Boulevard beyond which are commercial structures and an associated parking	

Date: 1977, 1979		***Scale: 1"=500'***
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	
East:	No significant changes visible	
West:	North Sepulveda Boulevard beyond which are several commercial structures and an associated parking lot to the north of East Palm Avenue, and what appears to be an unpaved parking area to the south of East Palm Avenue	

Date: 1981, 1989		***Scale: 1"=500'***
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	
East:	No significant changes visible	
West:	No significant changes visible	

Date: 1994, 2002		*Scale: 1"=500'*
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	Developed with a commercial building and L-shaped multi-tenant commercial strip mall and associated parking lot	
East:	No significant changes visible	
West:	No significant changes visible	

Date: 2005, 2009, 2010, 2012, 2016		*Scale: 1"=500'*
Subject Property:	No significant changes visible	
North:	No significant changes visible	
South:	No significant changes visible	
East:	No significant changes visible	
West:	Developed with several commercial structures and associated paved parking to the north and south of East Palm Avenue across North Sepulveda Boulevard	

Copies of select aerial photographs are included in Appendix B of this report.

3.2 Fire Insurance Maps

Partner reviewed the collection of Sanborn Fire insurance maps from Environmental Data Resources (EDR) on November 1, 2019. Sanborn map coverage was not available for the subject property.

3.3 City Directories

Partner reviewed historical city directories obtained from Environmental Data Resources (EDR) on November 1, 2019 for past names and businesses that were listed for the subject property and adjacent properties. The findings are presented in the following table:

City Directory Search for 650 and 700 North Sepulveda Boulevard (Subject Property)	
Year(s)	**Occupant Listed**

1958	Sequoia Cabinet Co./Utility Cabinet Co. (1921 East Maple Avenue); Robb Restaurant (707 North Sepulveda Boulevard); United California Bank (740 North Sepulveda Boulevard)
1960	Robb Restaurant (707 North Sepulveda Boulevard); United California Bank (740 North Sepulveda Boulevard); Sequoia Furniture Products Inc. (1921 East Maple Avenue)
1990	Airport UNOCAL (603 North Sepulveda Boulevard)
1995, 2000	1995, 2000 Sizzler Restaurants (600 North Sepulveda Boulevard) Airport UNOCAL (603 North Sepulveda Boulevard) Multi-tenant commercial (630 North Sepulveda Boulevard) Carl's Jr. (639 North Sepulveda Boulevard)
2001	Carls Jr. (639 North Sepulveda Boulevard)
2008, 2014	2008, 2013 Multi-tenant commercial (630 North Sepulveda Boulevard) including Tri Cleaners Carl's Jr. (639 North Sepulveda Boulevard)

Copies of reviewed city directories are included in Appendix B of this report.

3.4 Historical Topographic Maps

Partner reviewed historical topographic maps obtained from Environmental Data Resources (EDR) on November 1, 2019. The following was observed on the subject property and adjacent properties during

Date: 1896, 1923, 1924, 1930, 1934, 1948	
Subject Property:	Undeveloped land
North:	Undeveloped land
South:	Undeveloped land
East:	Undeveloped land
West:	Undeveloped land across North Sepulveda Boulevard

Date: 1950	
Subject Property:	No significant changes depicted
North:	No significant changes depicted
South:	No significant changes depicted
East:	No significant changes depicted
West:	A couple of structures are depicted to the south of East Palm Avenue across North Sepulveda Boulevard

Date:	***1964, 1972***
Subject Property:	Depicted with two large rectangular structures
North:	Depicted with one small and one a large rectangular structure
South:	Depicted with two large structures
East:	Depicted with commercial structures
West:	Sepulveda Boulevard beyond which is East Palm Avenue and areas shaded pink, which is indicative of dense urban development

Date:	***1981***
Subject Property:	Depicted with two large rectangular structures on the northern and southwest portions
North:	Depicted with one small and one a large rectangular structure; a third rectangular structure (pink) is depicted to the north of the small rectangular structure
South:	No significant changes depicted
East:	No significant changes depicted
West:	Sepulveda Boulevard beyond which is East Palm Avenue and areas shaded pink, which is indicative of dense urban development

Copies of reviewed topographic maps are included in Appendix B of this report.

4.0 REGULATORY RECORDS REVIEW

4.1 Regulatory Agencies

4.1.1 Health Department

Regulatory Agency Data	
Name of Agency:	Office of Environmental Health Hazard Assessment (OEHHA)
Point of Contact:	Monet Valla
Agency Address:	1001 I Street P.O. Box 2815, Sacramento, California 95812
Agency Phone Number:	(916) 324-1786
Date of Contact:	November 11, 2019
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the (OEHHA).

4.1.2 Fire Department

Regulatory Agency Data	
Name of Agency:	El Segundo Fire Department (ESFD)
Point of Contact:	Ms. Liz Lydic
Agency Address:	314 Main Street, El Segundo, California 90245
Agency Phone Number:	(310) 524-2235
Date of Contact:	November 6, 2019
Method of Communication:	In Person/Email
Summary of Communication:	According to records reviewed, the subject property had routine inspections from the ESFD. No violations or releases were identified for the subject property in their latest inspection report.

4.1.3 Air Pollution Control Agency

Regulatory Agency Data	
Name of Agency:	South Coast Air Quality Management District (SCAQMD)
Point of Contact:	http://www3.aqmd.gov/webappl/fim/prog/search.aspx
Agency Address:	21865 Copley Drive, Diamond Bar, California 91765
Agency Phone Number:	(909) 396-2000
Date of Contact:	November 6, 2019
Method of Communication:	Online
Summary of Communication:	Several permits to operate were on file for the 650 building including an active permit for a diesel generator (2013). No Permits to Operate (PTO), Notices of Violation (NOV), or Notices to Comply (NTC) or the presence of AULs, dry cleaning machines, or USTs were on file for the subject property with the AQMD.

4.1.4 Regional Water Quality Agency

Regulatory Agency Data	
Name of Agency:	Regional Water Quality Control Board (RWQCB)
Point of Contact:	http://geotracker.waterboards.ca.gov/
Agency Address:	320 West 4th Street #200, Los Angeles, California 90013

Regulatory Agency Data	
Agency Phone Number:	(213) 576-6600
Date of Contact:	November 6, 2019
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the RWQCB.

4.1.5 Department of Toxic Substances Control

Regulatory Agency Data	
Name of Agency:	California Department of Toxic Substances Control (DTSC)
Point of Contact:	http://www.envirostor.dtsc.ca.gov/public/ and; http://hwts.dtsc.ca.gov/report_list.cfm
Agency Address:	5816 Corporate Drive, Cypress, California 90630
Agency Phone Number:	N/A
Date of Contact:	November 11, 2019
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the 700 building was occupied by several pharmaceutical companies between 1958 and 1981 before it was leased/occupied by Hughes Aircraft Company. In 1958 a Pharmaceutical Co. was established onsite and installed eight 1,000-gallon USTs "used to store gasoline, mineral oils, alcohols, and solvents." Between 1966 and 1974, the 700 building was leased to pharmaceutical company Bergan Brunswick; Brunswick installed a clarifier circa 1966 but did not use the USTs. In 1982, the eight USTs were closed in place before leasing the property to Hughes Aircraft Company (HAC) "without regulatory oversight;" HAC reportedly conducted no manufacturing on-site and only stored furniture on the subject property. In 1985, HAC submitted clarifier sludge samples to the IT Corporation for analysis (tested for Semi-volatile organic compounds (SVOCs). Based on the analytical results, there was no evidence indicating air contamination. As a result, the Los Angeles County Department of Public Works (LACDPW) inspected the USTs and clarifier on 10/29/1985 indicating they complied. No closure letters or site plans were identified indicating the exact locations of the USTs and clarifier but according to a memo dated 11/12/1985, the USTs were located "north of the building, near receiving." Refer to Section 5.2.6 for further discussion of the USTs. Records pertaining to hazardous waste generation onsite are discussed in Section 4.2

4.1.6 Building Department

Regulatory Agency Data	
Name of Agency:	El Segundo Building Department (ESBD)

Regulatory Agency Data	
Point of Contact:	City Clerk
Agency Address:	350 Main Street, El Segundo, California 90245
Agency Phone Number:	(310) 524-2300
Date of Contact:	November 6, 2019
Method of Communication:	Email
Summary of Communication:	As of the date of this report, Partner received a response from the ESBD indicating that records would be provided by the city clerk. Based on building records reviewed during Partner's 2015 assessment, this limitation is not expected to alter to overall findings of the report.

4.1.7 Planning Department

Regulatory Agency Data	
Name of Agency:	El Segundo Planning Department (ESPD)
Point of Contact:	City of El Segundo Website
Agency Address:	350 Main Street, El Segundo, California 90245
Agency Phone Number:	(310) 524-2300
Date of Contact:	November 6, 2019
Method of Communication:	350 Main Street, El Segundo, California 90245
Summary of Communication:	According to records reviewed, the subject property is zoned C3-M1 for corporate office development by the City of El Segundo.

4.1.8 Assessor's Office

Regulatory Agency Data	
Name of Agency:	Los Angeles County Assessor (LACA)
Point of Contact:	http://assessor.lacounty.gov/extranet/Datamaps/Pais.aspx
Agency Address:	500 West Temple St. Room 225, Los Angeles, California 90012
Agency Phone Number:	(888) 807-2111
Date of Contact:	November 6, 2019
Method of Communication:	Online
Summary of Communication:	According to records reviewed, the subject property is identified by Assessor Parcel Numbers (APNs) 4138-006-031 and 4138-006-005. The current buildings were constructed in 1957 (700 North Sepulveda) and 1962 (650 North Sepulveda); and total approximately 78,736 sf and 121,484 sf, respectively, on a 5.81 acre lot. Additional online information indicates the subject property has been owned by Rabin Charlotte C; Rabin Trusts Partnership since 2014.

4.1.9 Public Works

Regulatory Agency Data	
Name of Agency:	Los Angeles County Department of Public Works (LACDPW)
Point of Contact:	http://www.ladpw.org/epd/cleanla/OpenFileReview.aspx
Agency Address:	900 South Fremont Avenue, Alhambra, California
Agency Phone Number:	(626) 458-3617
Date of Contact:	November 6, 2019

Regulatory Agency Data	
Method of Communication:	Online
Summary of Communication:	No records regarding hazardous substance use, storage or releases, or the presence of USTs and AULs on the subject property were on file with the LACDPW.

Copies of pertinent documents from the above agencies are included in Appendix B of this report.

4.2 Mapped Database Records Search

Information from standard federal, state, county, and city environmental record sources were provided by Environmental Data Resources, Inc. (EDR). Data from governmental agency lists are updated and integrated into one database, which is updated as these data are released. The information contained in this report was compiled from publicly available sources and the locations of the sites are plotted utilizing a geographic information system, which geocodes the site addresses. The accuracy of the geocoded locations is approximately +/-300 feet.

Using the ASTM definition of migration, Partner considers the migration of hazardous substances or petroleum products in any form onto the subject property during the evaluation of each site listed on the radius report, which includes solid, liquid, and vapor.

4.2.1 Regulatory Database Summary

Radius Report Data

Database	Search Radius (mile)	Subject Property	Adjacent Properties	Sites of Concern
Federal NPL or Delisted NPL Site	1.00	N	N	N
Federal CERCLIS Site	0.50	N	N	N
Federal CERCLIS-NFRAP Site	0.50	N	N	N
Federal RCRA CORRACTS Facility	1.00	N	N	N
Federal RCRA TSDF Facility	0.50	N	N	N
Federal RCRA Generators Site (LQG, SQG, CESQG)	0.25	**Y**	**Y**	N
Federal IC/EC Registries	0.50	N	N	N
Federal ERNS Site	Subject Property	N	N	N
State/Tribal Equivalent NPL	1.00	N	N	N
State/Tribal Equivalent CERCLIS	1.00	N	N	N
State/Tribal Landfill/Solid Waste Disposal Site	0.50	N	N	N
State/Tribal Leaking Storage Tank Site	0.50	N	**Y**	N
State/Tribal Registered Storage Tank Sites (UST/AST)	0.25	**Y**	**Y**	N
State/Tribal Voluntary Cleanup Sites (VCP)	0.50	N	N	N
State/Tribal Spills	0.50	N	N	N
Federal Brownfield Sites	0.50	N	N	N
State Brownfield Sites	0.50	N	N	N

EDR US Hist Auto Station	Varies	N	N	N
EDR US Hist Cleaners	Varies	N	N	N

Radius Report Data				
Database	**Search Radius (mile)**	**Subject Property**	**Adjacent Properties**	**Sites of Concern**
SEMS-ARCHIVE	Subject Property	**Y**	N	N
ICIS	Subject Property	**Y**	N	N
Envirostor	Subject Property	**Y**	N	N
FINDS	Subject Property	**Y**	**Y**	N
ECHO	Subject Property	**Y**	**Y**	N
HAZNET	Subject Property	**Y**	**Y**	N

4.2.2 Subject Property Listings

The subject property is identified as a SEMS-ARCHIVE, ICIS, Resource Conservation and Recovery Act (RCRA) Large Quantity Generator (LQG), Envirostor, AST, Facility Index System/Facility Registry System (FINDS), ECHO, CERS Haz Waste, CERS Tanks, and Facility and Manifest Data (HAZNET) site in the regulatory database report, as discussed below:

- The subject property, identified as The Boeing Company/ BOEING SATELLITE SYSTEMS - S38 (700 North Sepulveda Boulevard)/The Boeing Co at 650-700 North Sepulveda Boulevard, is listed on the HAZNET, RCRA-LQG, CERS Haz Waste, CERS Tanks and FINDS databases. The site is listed as having generated asbestos-containing waste, hydrocarbon solvents and photochemical/photo processing waste in 2000, 2014, 2016, as well as unspecified hazardous waste in 2012 and 2013, and 2014. The site is also listed as a large quantity generator in 2012. No violations were reported with regard to the RCRA generator or HAZNET listings. The site also has FINDS registry IDs 110054820841, 110065048353 and 110028067080 for tracking hazardous waste and Integrated Compliance Information System (ICIS) information. The facility was also listed for a registered above ground petroleum storage tank. Administrative violations were issued in May 2018; the violations were returned to compliance on June 21, 2018. Based on the regulatory oversight of hazardous waste generation and disposal with lack of documented violations or releases, this listing is not expected to represent a significant environmental concern.
- The subject property, identified as DEVLIN PHARMACEUTICALS, INC at 700 North Sepulveda Boulevard, is listed on the ENVIROSTOR and SEMS-ARCHIVE databases. The site is not a federal facility and it is not listed on the National Priority List (NPL). According to the database, a preliminary assessment was completed and archived on February 22, 1989. No additional information was provided on the LA Co. Site Mitigation database. According to Envirostor, the site is listed with a "No Further Action (NFA)" status on December 8, 1994. A completed activity to confirm NFA status was completed on March 22, 2018. Based on the regulatory status, this listing is not expected to represent a significant environmental concern.

- The subject property, identified as Southern California Edison – Customer Location at 650 North Sepulveda Boulevard, is listed on the HAZNET database. The site is listed as generating approximately 6.7 tons of waste oil and mixed oil in 2009. The disposal method reported is storage, bulking, and/or transfer off site - no treatment/recovery. Although the volume of materials generated is significant, based on the nature of operations at the subject property since the 1980s being limited to office operations and the name associated with the listing being Southern California Edison, it is presumed that the materials generated were associated with electrical transformers or other electrical equipment located within the subject building or on the subject property. Based on the regulatory oversight and a lack of reported releases or violations identified in regulatory agency records, this listing is not expected to represent a significant environmental concern.
- The subject property, identified as HUGHES SPACE & COMMUNICATIONS at 650-700 North Sepulveda Boulevard, is listed on the HAZNET database. The site is listed as having generated asbestos-containing waste, hydrocarbon solvents and photochemical/photo processing waste in 1999 and 2000. The site is listed with an EPA ID CAD060897063. No violations were reported with regard to the HAZNET listing. Based on the regulatory oversight and a lack of reported releases or violations identified in regulatory agency records, this listing is not expected to represent a significant environmental concern.
- The subject property, identified as AERO SPACE CTR at 650 North Sepulveda Boulevard, is listed on the HAZNET database. The site is listed as having generated asbestos-containing waste, hydrocarbon solvents and photochemical/photo processing waste in 1985. The site is listed with an EPA ID CAD099990947. No violations were reported with regard to the HAZNET listing. Based on the regulatory oversight and a lack of reported releases or violations identified in regulatory agency records, this listing is not expected to represent a significant environmental concern.
- The subject property, identified as Boeing Satellite Systems S-38 (BSS) at 700 North Sepulveda Boulevard appears to be incorrectly identified with the BSS facility that operates four hazardous waste storage units at five contiguous address locations in El Segundo, CA (1950 E. Imperial Highway, 1920 E. Imperial Highway, 940 N. Shelby Street, 930 N. Shelby Street). Based on the distance from the subject property, this listing is not expected to represent a significant environmental concern and it is unlikely that further regulatory file review for this site would alter the findings of this assessment.

4.2.3 Adjacent Property Listings

Adjacent properties to the north, northeast and south are identified as a CERC NFRAP, RCRA LQG, RCRA SQG, Envirostor, LUST, UST, AST, HIST UST, SWEEPS UST, FINDS, HIST CORTESE, LA Co. Site Mitigation, LA Co. HMS, HAZNET, EMI, NPDES, Drycleaners, EDR Historical Auto Station and EDR Historical Cleaners sites in the regulatory database report, as discussed below:

- The adjacent property to the northeast at 1920 East Maple Street, identified as EQUINIX LLC and Hughes Aircraft Co - EDSG, is reported as a CA HIST UST, CA HAZNET, RCRA-SQG, CA HIST UST, FINDS, ECHO, CA LUST, CA CERS, CA UST, RCRA-VSQG, RCRA NonGen / NLR, CA SWEEPS UST, CA

LOS ANGELES CO. HMS, CA AST, and CA SWEEPS UST site. The site is reported to have operated three historical 12,000-gallon gasoline USTs, which were installed in 1981. The site is also listed on the UST database for two USTs, containing diesel fuel, which were reportedly inspected in August 2008. Though further information pertaining to the regulatory status of these specific USTs was not identified, the site is listed on the Los Angeles Co. HMS database with a "closed" facility and permit status. This site reported a release of gasoline on November 3, 1986 to the lead agency (City of El Segundo). Documents reported that on November 1, 2016 to January 1, 2017, 63 tons of contaminated soil was excavated from the site. The radius report indicates that the release impacted soil only. Soil or groundwater has been tested for MTBE and results reported in accordance with Health and Safety Code Section 25296.15. On April 24, 2018 the Los Angeles County Regional Quality Control Board issued a "Closure/No Further Action letter for the completion of the site investigation and corrective action at the site. Based on these findings, the listings are not expected to represent a significant environmental concern.

Equinix Operating Center., is also listed on the AST database for registering one AST. No other pertinent information was provided. This site is also listed on the RCRA-VSQG, RCRA-SQG and FINDS databases. The site is identified as a RCRA-VSQG in 2017 with an EPA ID CAR000275388. The site is identified as a SQG in 1997 with an EPA ID CAD981398209. No violations were reported for the RCRA generator status. Based on the absence of a release/violation reported and the small quantity of waste generated, these listings are not expected to represent a significant environmental concern

- The property at 603 North Sepulveda Boulevard, is located adjacent to the south of the subject property. The site is listed in the CA HIST UST, CA UST, CA CERS TANKS, CA HAZNET, CA CERS, CA SWEEPS UST, CA HIST UST, EDR US Hist Auto database. The site is identified as "UNION OIL SERVICE ST" in 1988, AIRPORT 5 STAR in 2005 and 2008, SERVICE STATION 5866 in 1966, TOSCO CORPORATION ST in 2000, 2001, and 2002, WITT JIM UNION SERVICE as an EDR UST AUTO from 1970-2014. One waste oil tank was registered to this site and appears to have been removed. As of September 2008, two unleaded tanks are registered to this site. Several violations were issued to this site prior to April 2019. Based on the lack of a reported release and the inferred direction of groundwater flow, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

- The property, identified as Tri Cleaners, at 630 North Sepulveda Boulevard, is located adjacent to the south of the subject property. The site is listed on the RCRA-SQG, FINDS, Drycleaners, EDR US Hist Cleaners and HAZNET databases. The site is identified as a Small Quantity Generator (SQG) in 1992 with an EPA ID CAD983634742 and a FINDS ID 110002875327. No violations were found. The site is listed as a "drycleaning and laundry services (except coin-operated)" type of business in 1992 and was occupied by "Tri Cleaners" between 1998 and 2012. The site is listed as "Inactive". The site is listed as a generator of hazardous waste including less than a total of 0.2 tons of liquids with halogenated organic compounds greater than or equal to 1,000 micrograms per liter (mg/L); a total of 0.245 tons of unreported waste in 2012 and 0.075 tons of unreported waste in 2013. Based on the absence of a violation or release reported and the inferred depth and direction of

groundwater in the area of the subject property, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

- The property, identified as LAX Photo Lab, at 630 North Sepulveda Boulevard Unit 6 B, is located adjacent to the south of the subject property. The site is identified as a SQG in 1992 with an EPA ID CAD983634171 and a FINDS ID 110002874890. No violations were found. Based on the absence of a release/violation reported, and the inferred direction of groundwater flow, this listing is not expected to represent a significant environmental concern. The site is listed on the Los Angeles Co. HMS database with a "removed" facility and permit status. Based on the absence of a violation reported and the inferred depth and direction of groundwater in the area of the subject property, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.
- The property, identified as XPO Logistics Supply Chain/Raytheon Systems Company/Raytheon/Raytheon Company, Hughes/Hughes, RSG Blg R-24, MS 1150, at 1917-1921 East Mariposa Avenue, is located adjacent to the southeast of the subject property. The site is listed on the UST, HAZNET, NPDES, CIWQS and FINDS databases. The site is listed as a hazardous waste generator and reportedly operated two gasoline USTs, which were removed and received a "permanent facility closure. " In addition, the site is listed on the SWEEPS UST and Los Angeles Co. HMS databases, indicating two "active" USTs, though no other pertinent information is provided except that the property has a "closed" facility and permit status. The site is listed as a generator of hazardous waste including 0.02 tons of laboratory waste chemicals in 2011; 0.02 of unreported waste in 2012 and a total of less than 0.106 tons of unreported waste in 2013. Based on the absence of a violation reported and the inferred depth of groundwater in the area of the subject property, this listing is not expected to represent a significant environmental concern and it is unlikely that a regulatory file review for this site would alter the findings of this assessment.

Based on the findings, vapor migration is expected to represent a significant environmental concern at this time.

4.2.4 Sites of Concern Listings

No sites of concern are identified in the regulatory database report.

4.2.5 Orphan Listings

No orphan listings of concern are identified in the regulatory database report.

A copy of the regulatory database report is included in Appendix C of this report.

5.0 USER PROVIDED INFORMATION AND INTERVIEWS

In order to qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the *Brownfields Amendments*), the *User* must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. The *User* should provide the following information to the *environmental professional*. Failure to provide this information could result in a determination that *all appropriate inquiries* is not complete. The *User* is asked to provide information or knowledge of the following:

- Review Title and Judicial Records for Environmental Liens and AULs
- Specialized Knowledge or Experience of the User
- Actual Knowledge of the User
- Reason for Significantly Lower Purchase Price
- Commonly Known or *Reasonably Ascertainable* information
- Degree of Obviousness
- Reason for Preparation of this Phase I ESA

Fulfillment of these user responsibilities is key to qualification for the identified defenses to CERCLA liability. Partner requested our Client to provide information to satisfy User Responsibilities as identified in Section 6 of the ASTM guidance.

Pursuant to ASTM E1527-13, Partner requested the following site information from Crescit Mortgage Capital LLC (User of this report).

User Responsibilities				
Item	**Provided By User**	**Not Provided By User**	**Discussed Below**	**Does Not Apply**
Environmental Pre-Survey Questionnaire		**X**		
Title Records, Environmental Liens, and AULs		**X**		
Specialized Knowledge		**X**		
Actual Knowledge		**X**		
Valuation Reduction for Environmental Issues		**X**		
Identification of Key Site Manager	**Section 5.1.3**			
Reason for Performing Phase I ESA	**Section 1.1**			
Prior Environmental Reports			**X**	
Other		**X**		

5.1 Interviews

5.1.1 Interview with Owner

The owner of the subject property since 2014, identified as Rabin Charlotte C; Rabin Trusts Partnership, was not available to be interviewed at the time of the assessment.

5.1.2 Interview with Report User

Please refer to Section 5.2 below for information requested from the Report User. The information requested was not received prior to the issuance of this report. Because the Report User (Client) is a lender, it is understood that the Report User would not have knowledge of the property that would significantly impact our ability to satisfy the objectives of this assessment. The lack of this information is not considered to represent a significant data gap.

5.1.3 Interview with Key Site Manager

Mr. Paul Summers, key site manager, indicated that he had no information pertaining to any pending, threatened, or past litigation relevant to hazardous substances or petroleum products in, on, or from the subject property; any pending, threatened, or past administrative proceedings relevant to hazardous substances or petroleum products in, on, or from the subject property; or any notices from a governmental entity regarding any possible violation of environmental laws or possible liability relating to hazardous substances or petroleum products.

According to Mr. Paul Summers, he was unaware of the year of construction of the buildings and unaware of the past uses other than the existing office space use. A previous subsurface investigation was conducted, as further discussed in Section 5.2.6.

5.1.4 Interviews with Past Owners, Operators and Occupants

Interviews with past owners, operators and occupants were not conducted since information regarding the potential for contamination at the subject property was obtained from other sources.

5.1.5 Interview with Others

As the subject property is not an abandoned property as defined in ASTM 1527-13, interview with others were not performed.

5.2 User Provided Information

5.2.1 Title Records, Environmental Liens, and AULs

Partner was not provided with title records or environmental lien and AUL information for review as part of this assessment.

5.2.2 Specialized Knowledge

No specialized knowledge of environmental conditions associated with the subject property was provided by the User at the time of the assessment.

5.2.3 Actual Knowledge of the User

The User was not aware of environmental liens and/or AULs encumbering the subject property or in connection with the subject property at the time of the assessment.

5.2.4 Valuation Reduction for Environmental Issues

The User was not aware of any reductions in property value due to environmental issues.

5.2.5 Commonly Known or Reasonably Ascertainable Information

The User did not provide information that is commonly known or *reasonably ascertainable* within the local community about the subject property at the time of the assessment.

5.2.6 Previous Reports and Other Provided Documentation

The following information was provided to Partner for review during the course of this assessment:

Phase I Environmental Site Assessment Report, Boeing Building II, 700 North Sepulveda Boulevard, Partner (September 18, 2015)

- Historical and regulatory information obtained from Partner's 2015 report is consistent with Partner's current assessment. However, Partner identified the following REC:

  "Based on the historical information reviewed, eight 1,000-gallon underground storage tanks (USTs) were located on the subject property (700 North Sepulveda portion) from 1958 until 1985. The USTs were of concrete construction, and reportedly contained gasoline, sulfides, organic acids, copper, zinc, mineral oils, alcohols, and solvents. No information pertaining to the exact location was available during the course of this assessment, although they were described being located "north of the building, near receiving" in a memo dated November 12, 1985. According to a document issued by the Los Angeles County Department of Public Works (LACDPW) to Hughes Aircraft on October 29, 1985, the USTs were filled in place. In a document dated July 12, 1990, the USTs were described as "removed…without regulatory oversight and their integrity was unknown." Further, no records were identified on-file with the El Segundo Fire Department (ESFD) and the LACDPW, and no information regarding this facility was provided by subject property management. In addition, according to the Department of Toxic Substances Control (DTSC) records reviewed, the subject property was equipped with a concrete clarifier between 1966 and 1985. The exact location of the clarifier has not been identified but the clarifier was reportedly abandoned with the regulatory oversight of the LACDPW. At that time, six sludge samples were collected from the clarifier and analyzed for SVOCs. Laboratory results indicated no potential for air contamination. As a result, the LACDPW issued a statement indicating the clarifier was in compliance to Hughes Aircraft on October 29, 1985. A dry inspection was reportedly conducted for the clarifier on November 12, 1985, which did not identify leaks and indicated no problems were observed. Although no obvious evidence of leaks was identified within the clarifier, the potential exists for small quantities of materials within the clarifier to have been released over time which may have impacted soil and/or groundwater surrounding the clarifier. In addition, Partner has not been provided with or identified documentation pertaining to subsurface conditions surrounding the clarifier at the time of closure, and the subject property appears to have been granted no further action (NFA) status in 1994."

Phase I Environmental Site Assessment Report, Boeing Buildings, 650 North Sepulveda Boulevard, Partner (September 18, 2015)

- Historical and regulatory information obtained from Partner's 2015 report is consistent with Partner's current assessment. Partner recommended that an Operations and Maintenance (O&M)

Program be implemented in order to safely manage the suspect ACMs located at the subject property.

Partner prepared the 2015 reports on behalf of CBRE. The assessments were performed in accordance with ASTM Standard E1527-13. The assessments consisted of a site reconnaissance, interviews with knowledgeable personnel, review of historical information, a review of federal, state and local regulatory databases.

REPORT OF PHASE II SUBSURFACE INVESTIGATION, 700 N. SEPULVEDA BOULEVARD, Ramboll Environ (May 13, 2016)

- A summary of the PHII investigation is provided below:

  Based on the REC identified in Partner's 2015 PHI ESA (discussed above), a Phase II subsurface investigation was recommended to identify any potential impact of contamination/releases of hazardous substances. On May 13, 2016, a subsurface investigation was conducted in the area of the former USTs and clarifier. Based on the results of their geophysical survey, Ramblin Environ (RE) advanced 6 soil borings in the parking lot north to the northeast of the 700 building. Analytical results revealed low concentrations of constituents (petroleum hydrocarbons, volatile organic compounds, metals) detected in soil and soil vapor. Concentrations detected in the area of the site investigated were well below the residential screening levels, the most restrictive applicable screening levels; are consistent with a no further action status for the site; are not indicative of any release or condition which has adversely impacted the environmental integrity of the site, which would require additional investigation, monitoring, or remediation or reporting to any governmental agency; are not indicative of conditions which would require special handling in connection with the redevelopment of the site. Therefore, RE concluded that no further investigation, monitoring, or remediation is recommended or warranted.

Copies of pertinent pages reviewed are included in Appendix B of this report.

6.0 SITE RECONNAISSANCE

The weather at the time of the site visit was sunny and clear. Refer to Section 1.5 for limitations encountered during the field reconnaissance and Sections 2.1 and 2.2 for subject property operations. The table below provides the site assessment details:

Site Assessment Data	
Site Assessment Performed By:	Dan Frizzell
Site Assessment Conducted On:	November 14, 2019

The table below provides the subject property personnel interviewed during the field reconnaissance:

Site Visit Personnel for 650 and 700 North Sepulveda Boulevard (Subject Property)			
Name	**Title/Role**	**Contact Number**	**Site Walk* Yes/No**
Mr. Paul Summers	Key Site Manager	(310) 292-8201	Yes

* Accompanied Partner during the field reconnaissance activities and provided information pertaining to the current operations and maintenance of the subject property.

No potential environmental concerns were identified during the onsite reconnaissance.

6.1 General Site Characteristics

6.1.1 Solid Waste Disposal

Solid waste generated at the subject property is disposed of in commercial dumpsters located to the east of the office building on the subject property. An independent solid waste disposal contractor removes solid waste from the subject property. No evidence of illegal dumping of solid waste was observed during the Partner site reconnaissance.

6.1.2 Sewage Discharge and Disposal

Sanitary discharges on the subject property are directed into the municipal sanitary sewer system. The City of El Segundo services the subject property vicinity. No wastewater treatment facilities or septic systems are observed or reported on the subject property.

6.1.3 Surface Water Drainage

Storm water is removed from the subject property primarily by sheet flow action across the paved surfaces towards storm water drains located throughout the subject property and in the public right of way. Site storm water from roofs, landscaped areas, and paved areas is directed to on-site concrete swales, which drain to the public right of way, and to on-site storm water drains. The subject property is connected to a municipal owned and maintained sewer system. The subject property does not appear to be a designated wetland area, based on information obtained from the United States Fish & Wildlife Service; however, a comprehensive wetlands survey would be required in order to formally determine actual wetlands on the subject property. No surface impoundments, wetlands, natural catch basins, settling ponds, or lagoons are located on the subject property. No drywells were identified on the subject property.

6.1.4 Source of Heating and Cooling

Heating and cooling systems as well as domestic hot water equipment are fueled by electricity and natural gas provided by Southern California Edison (SCE) and Southern California Gas Company (SCG), respectively. The mechanical system is comprised of a central system with interior air handlers and heat exchangers, as well as exterior cooling towers. Hot water is provided by central natural water heaters.

6.1.5 Wells and Cisterns

No aboveground evidence of wells or cisterns was observed during the site reconnaissance.

6.1.6 Wastewater

Domestic wastewater generated at the subject property is disposed by means of the sanitary sewer system. No industrial process is currently performed at the subject property.

6.1.7 Septic Systems

No septic systems were observed or reported on the subject property.

6.1.8 Additional Site Observations

No additional general site characteristics were observed during the site reconnaissance.

6.2 Potential Environmental Hazards

6.2.1 Hazardous Substances and Petroleum Products Used or Stored at the Site

No evidence of the use of reportable quantities of hazardous substances was observed on the subject property. Small quantities of general maintenance supplies were found to be properly labeled and stored at the time of the assessment with no signs of leaks, stains, or spills. The storage and use of maintenance supplies does not appear to pose a significant threat to the environmental integrity of the subject property at this time.

6.2.2 Aboveground & Underground Hazardous Substance or Petroleum Product Storage Tanks (ASTs/USTs)

No evidence of current or former ASTs or USTs was observed during the site reconnaissance.

6.2.3 Evidence of Releases

No spills, stains or other indications that a surficial release has occurred at the subject property were observed.

6.2.4 Polychlorinated Biphenyls (PCBs)

Older transformers and other electrical equipment could contain PCBs at a level that subjects them to regulation by the U.S. EPA. PCBs in electrical equipment are controlled by United States Environmental Protection Agency regulations 40 CFR, Part 761. Under the regulations, there are three categories into which electrical equipment can be classified: 1) Less than 50 parts per million (ppm) of PCBs – "*Non-PCB;*" 2) 50 ppm-500 ppm – "*PCB-Contaminated;*" and, 3) Greater than 500 ppm – "*PCB-Containing.*" The manufacture, process, or distribution in commerce or use of any PCB in any manner other than in a totally enclosed manner was prohibited after July 2, 1979.

The on-site reconnaissance addressed indoor and outdoor transformers that may contain PCBs. Two pad-mounted transformers were observed on the subject property. The transformers are not labeled indicating PCB content. No staining or leakage was observed in the vicinity of the transformers. Based on the good condition of the equipment, the transformers are not expected to represent a significant environmental concern.

Additionally, no other potential PCB-containing equipment (interior transformers, oil-filled switches, hoists, lifts, dock levelers, hydraulic elevators, balers, etc.) was observed on the subject property during Partner's reconnaissance.

6.2.5 Strong, Pungent or Noxious Odors

No strong, pungent or noxious odors were evident during the site reconnaissance.

6.2.6 Pools of Liquid

No pools of liquid were observed on the subject property during the site reconnaissance.

6.2.7 Drains, Sumps and Clarifiers

No drains, sumps, or clarifiers, other than those associated with storm water removal, were observed on the subject property during the site reconnaissance.

6.2.8 Pits, Ponds and Lagoons

No pits, ponds or lagoons were observed on the subject property.

6.2.9 Stressed Vegetation

No stressed vegetation was observed on the subject property.

6.2.10 Additional Potential Environmental Hazards

No additional environmental hazards, including landfill activities or radiological hazards, were observed.

6.3 Non-ASTM Services

6.3.1 Asbestos-Containing Materials (ACMs)

Asbestos is the name given to a number of naturally occurring, fibrous silicate minerals mined for their useful properties such as thermal insulation, chemical and thermal stability, and high tensile strength. The Occupational Safety and Health Administration (OSHA) regulation 29 CFR 1926.1101 requires certain construction materials to be *presumed* to contain asbestos, for purposes of this regulation. Construction materials including, but not limited to, thermal system insulation (TSI), surfacing material, and asphalt/vinyl flooring that are present in a building and that have not been appropriately tested may be considered "presumed asbestos-containing material" (PACM).

The subject property buildings were constructed in 1957 (700 North Sepulveda Boulevard), and 1962 (650 North Sepulveda Boulevard) and may have asbestos containing materials (ACMs: materials containing >1% asbestiform components determined by the EPA 600/R-93/116 Method using Polarized Light Microscopy) present. The table below outlines suspect ACM that is generally found in buildings of this age:

Suspect ACM
Drywall Systems
Floor Tiles
Floor Tile Mastic
Spray-Applied Acoustical Material
Stucco

Suspect ACMs were observed in good condition and do not pose a health and safety concern to the occupants of the subject property at this time, with the exception of limited areas of water-damaged ceiling tiles observed during the assessment.

Prior to disturbance, Partner recommends a comprehensive asbestos survey of the property be completed to determine the presence, condition, friability and likely future condition of suspect or confirmed ACM. All suspect materials must be handled as ACM according to local, state and federal regulations until the results of sampling and analysis indicate the material is a non-ACM. According to the US EPA, ACM that is intact and in good condition can, in general, be managed safely in-place under an Operations and Maintenance (O&M) Program until removal is dictated by renovation, demolition, or deteriorating material condition.

6.3.2 Lead-Based Paint (LBP)

Lead is a highly toxic metal that affects virtually every system of the body. LBP is defined as any paint, varnish, stain, or other applied coating that has 1 mg/cm^2 (or 5,000 ug/g or 0.5% by weight) or more of lead. Congress passed the Residential Lead-Based Paint Hazard Reduction Act of 1992, also known as "Title X", to protect families from exposure to lead from paint, dust, and soil. Under Section 1017 of Title X, intact LBP on most walls and ceilings is not considered a "hazard," although the condition of the paint should be monitored and maintained to ensure that it does not become deteriorated. Further, Section 1018 of this law directed the Housing and Urban Development (HUD) and the US EPA to require the disclosure of known information on LBP and LBP hazards before the sale or lease of most housing built before 1978.

Based on the age of the subject property buildings (pre-1978), there is a potential that LBP is present. Partner observed damaged/peeling paint on all exterior elevations and in areas throughout the interior corridors of the 650 building. Partner recommends that an LBP O&M plan be implemented.

Actual material samples would need to be collected in order to determine if LBP is present.

6.3.3 Radon

Radon is a colorless, odorless, naturally occurring, radioactive, inert, gaseous element formed by radioactive decay of radium (Ra) atoms. The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, according to the table below:

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 1	Exceed 4.0 pCi/L	Highest
Zone 2	Between 2.0 and 4.0 pCi/L	Moderate

EPA Radon Zones		
EPA Zones	**Average Predicted Radon Levels**	**Potential**
Zone 3	Less than 2.0 pCi/L	Low

It is important to note that the EPA has found homes with elevated levels of radon in all three zones, and the US EPA recommends site-specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not conducted as part of this assessment. Review of the US EPA Map of Radon Zones places the subject property in Zone 2. Based upon the radon zone classification, radon is not considered to be a significant environmental concern.

6.3.4 Lead in Drinking Water

According to available information, a public water system operated by the El Segundo Water Division serves the subject property vicinity. The sources of public water for the City of El Segundo are surface water from the Colorado River and northern California. According to the City of El Segundo and the 2015 Annual Water Quality Report, water supplied to the subject property is in compliance with all State and Federal regulations pertaining to drinking water standards, including lead and copper. Water sampling was not conducted to verify water quality.

6.3.5 Mold

Molds are microscopic organisms found virtually everywhere, indoors and outdoors. Mold will grow and multiply under the right conditions, needing only sufficient moisture (e.g.in the form of very high humidity, condensation, or water from a leaking pipe, etc.) and organic material (e.g., ceiling tile, drywall, paper, or natural fiber carpet padding).

Partner observed accessible, interior areas for the subject property buildings for significant evidence of mold growth with the exceptions detailed in Section 1.5 of this report; however, this ESA should not be used as a mold survey or inspection. Additionally, this limited assessment was not designed to assess all areas of potential mold growth that may be affected by mold growth on the subject property. Rather, it is intended to give the client an indication as to whether or not conspicuous (based on observed areas) mold growth is present at the subject property. This evaluation did not include a review of pipe chases, mechanical systems, or areas behind enclosed walls and ceilings.

No obvious indications of water damage or mold growth were observed during Partner's visual assessment.

6.4 Adjacent Property Reconnaissance

The adjacent property reconnaissance consisted of observing the adjacent properties from the subject property premises. No items of environmental concern were identified on the adjacent properties during the site assessment, including hazardous substances, petroleum products, ASTs, USTs, evidence of releases, PCBs, strong or noxious odors, pools of liquids, sumps or clarifiers, pits or lagoons, stressed vegetation, or any other potential environmental hazards.

7.0 FINDINGS AND CONCLUSIONS

Findings

A *recognized environmental condition (REC)* refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The following was identified during the course of this assessment:

- Partner did not identify any recognized environmental conditions during the course of this assessment.

A *controlled recognized environmental condition (CREC)* refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls. The following was identified during the course of this assessment:

- Partner did not identify any controlled recognized environmental conditions during the course of this assessment.

A *historical recognized environmental condition (HREC)* refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls. The following was identified during the course of this assessment:

- Partner did not identify any historical recognized environmental conditions during the course of this assessment.

An *environmental issue* refers to environmental concerns identified by Partner, which do not qualify as RECs; however, warrant further discussion. The following was identified during the course of this assessment:

- According to Partner's 2015 Phase I ESA, eight 1,000-gallon underground storage tanks (USTs) were located on the subject property (700 North Sepulveda portion) from 1958 until 1985. The USTs were of concrete construction, and reportedly contained gasoline, sulfides, organic acids, copper, zinc, mineral oils, alcohols, and solvents. No information pertaining to the exact location or status of the tanks was found during Partner's assessment.

  Partner also reported that the subject property was equipped with a concrete clarifier between 1966 and 1985. The exact location of the clarifier has not been identified but the clarifier was reportedly abandoned with the regulatory oversight of the Los Angeles County Department of Public Works (LACDPW). Documentation pertaining to subsurface conditions surrounding the clarifier at the time of closure was not found during Partner's assessment.

  Based on the findings of Partner's 2015 report, a Phase II subsurface investigation was conducted in May 2016 to address potential hazardous substance impacts from the former USTs and clarifier.

Analytical results revealed low concentrations of constituents of concern (petroleum hydrocarbons, volatile organic compounds, metals) in soil and soil vapor. The concentrations detected were well below the residential screening levels, the most restrictive applicable screening levels. Based on the analytical results, the presence of the former USTs and clarifier do not represent a significant environmental concern.

- Due to the age of the subject property buildings, there is a potential that ACM and/or LBP are present. Suspect ACMs were observed in good condition and do not pose a health and safety concern to the occupants of the subject property at this time, with the exception of limited areas of water-damaged ceiling tiles observed during the assessment. Partner observed damaged/peeling paint on all exterior elevations and in areas throughout the interior corridors of the 650 building.

Conclusions, Opinions and Recommendations

Partner has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM Practice E1527-13 of 650 and 700 North Sepulveda Boulevard in El Segundo, Los Angeles County, California (the "subject property"). Any exceptions to, or deletions from, this practice are described in Section 1.5 of this report.

This assessment has revealed no evidence of recognized environmental conditions in connection with the subject property; however, environmental issues were identified. Based on the conclusions of this assessment, Partner recommends the following:

- An Operations and Maintenance (O&M) Program should be implemented in order to safely manage the suspect ACMs and LBP located at the subject property.

8.0 SIGNATURES OF ENVIRONMENTAL PROFESSIONALS

Partner has performed a Phase I Environmental Site Assessment of the property located at 650 and 700 North Sepulveda Boulevard in El Segundo, Los Angeles County, California in conformance with the scope and limitations of the protocol and the limitations stated earlier in this report. Exceptions to or deletions from this protocol are discussed earlier in this report.

By signing below, Partner declares that, to the best of our professional knowledge and belief, we meet the definition of *Environmental Professional* as defined in §312.10 of 40 CFR §312. Partner has the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property*. Partner has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1920 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.
