Subject: Hilltop

Why is it so hard to make that area for families to take their children to play can't you make a pond with Wildlife birds and stuff like that why does it always have to be something that's so noisy you don't understand we're at the top of the hill and we can hear noise from all over Rec Park you don't live here we do

well I live on the next block and I would not like a soccer field there it's too much noise I get noise from the baseball fields I get noise when they have movies down the hill I get noise from the high school field down by eucalyptus and I don't need noise from a soccer field right across the street from me the decibels should not even allow that to happen and let's not even talk about parking. And let's not forget about the airplanes if the city wants to build another noisy place they better check the decibels around where the neighbors are and compare them down to rec park and then maybe give all the neighbors windows since they are taking away our rights to noise levels
